

Protecting state and local government from Cyberattacks and Breaches

Attackers seek data and disruption

State and local governments face growing cyber challenges despite staff shortages and budget constraints

Imagine if this were possible.

We help state and local governments make this a reality every day.

Here's where to begin.

Start with our advanced defenses that are simple to deploy and incredibly effective.

- Risky websites
- Malicious code
- Phishing attacks
- Office 365 Security
- Harmful attachments
- USB stick malware
- Ransomware
- Stolen credentials
- Outdated devices
- Brute force attacks
