

## Accelerate your Firewall with a Free Cisco-led Software Upgrade

Realize the benefits of improved security, better integration with more products and services, as well as faster, more intuitive workflows by upgrading to the latest suggested Cisco Secure Firewall Threat Defense (FTD) software release.

### Enter the **LevelUp+ Program** to receive a no cost, Cisco-led:

- Upgrade from older Firewall Threat Defense (FTD) software levels above version 6.4.x to the next suggested release. Includes up to two firewalls plus one Firewall Management Center (FMC), including high availability pairs
- Customized Secure Firewall Pre-Upgrade LevelUp+ Report tailored to your environment for peace of mind, as well as maximum preparation
- Virtual Security Engineer support and guidance during the software upgrade
- Learning opportunity in performing future software upgrades

### Gain updated product capabilities, including:

- Virtual platform for flexible deployment options both on-prem and cloud
- Cloud management including logging, analytics, and low-touch provisioning
- VPN enhancements for migrations from ASA software
- Most up-to-date vulnerability protection

### Key reasons to upgrade:

- ✓ Get more value from existing equipment
- ✓ Integrate with more products and services
- ✓ Act faster with more intuitive workflows
- ✓ Attain new features and manageability enhancements
- ✓ Ensure end-of-life software is updated
- ✓ Improve overall security posture

According to Forrester's Total Economic Impact™ of Cisco Secure Firewall, customers reported that the latest software offers:

25% greater efficiency than earlier iterations

Auto-deployment of 90% of policy

3x shorter deployment times
