

# Supercharge Your Umbrella License: Unlock More Features for the Same Price

Upgrade to Secure Access – Secure Internet Access (SIA)

With Umbrella Secure Internet Gateway (SIG), you've built a strong foundation with our industry leading threat defense. Now it's time to evolve. Cisco Secure Access SIA represents the modern evolution of that protection—delivering AI-powered security, enhanced visibility, and faster troubleshooting for the same investment.

## Everything You Love About Umbrella SIG, and More, Awaits –

## Without Paying More.

**Same Price, More Value**  
Experience AI-powered security, faster performance and more.

**Effortless and Fast Migration**  
Transition typically in under an hour using our automated upgrade manager.

**Ultimate Flexibility**  
Stay focused on securing internet access or opt-in, on your timeline, to take advantage of zero trust capabilities for applications.

## Benefits You Can Expect for the Same Investment

**AI-Powered Security for GenAI Tools**  
Secure Access includes AI Access—an integrated capability that secures your workforce's use of generative AI tools with inline DLP, contextual visibility, and AI risk management.

**Blazing Fast Access**  
Experience up to 4x faster Secure Internet Access powered by modern architecture and Vector Packet Processing for high-performance connectivity.

**Faster Troubleshooting**  
Integrated Experience Insights (ThousandEyes) correlates endpoint, network, and application performance to quickly isolate issues, reduce downtime, and minimize business disruption.

**Simplified Security Management**  
Enjoy unified, rule-based policies across DNS, SWG, and Firewall—reducing administrative complexity and providing immediate management efficiency gains. Policies are easier to create, maintain and update over time. AI Policy Assist enables natural language commands for faster configuration.

## Proof Points

**Cisco earns AAA rating from SE Labs in first Universal ZTNA test**

A testament to the effectiveness of zero trust access from Cisco in providing comprehensive identify and access management protection.

**Unified management experience**

Across all Secure Access components for simplified IT operations.

**Enhanced logging visibility**

See what was blocked, when, and why for every rule.

**Long-term free trial**

Up to 100 seats of Cisco Secure Access – Secure Private Access (SPA) included, featuring the industry's first unified client.

## Fast and Simple Migration

Using the automated Secure Access Upgrade Manager, customers can typically migrate in under an hour. Umbrella customers can leverage the Upgrade Manager for no added cost.

Cisco made upgrading to Secure Access incredibly simple. Whether your timeline is now, next month, or a few months out, start the process to secure your Elevate offer.

Elevate gives you access to both Umbrella and Secure Access during migration, for as long as you need—ensuring continuous protection every step of the way.

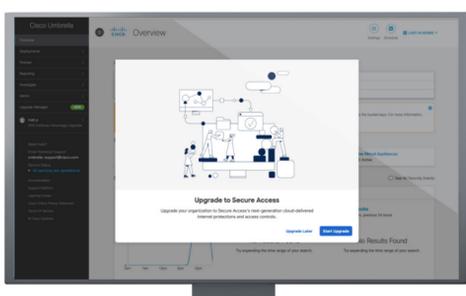

You also get investment credit for your entire unused Umbrella balance that's applied to Secure Access.

**By acting now, you can renew early to Secure Access and lock in your current pricing before any increases at your next renewal.**

*"The Elevate offer was a game changer. It gave us flexibility to migrate on our timeline while avoiding double payment."*

– Derek Shaw, CIO, H.B. Fuller

Migration wizard translates policies to Secure Access rules

Full control of your migration

Provides a dual view so you can access both Umbrella and Secure Access from a single interface

## Ready to Up Your Defense?

With our exclusive Elevate offer, you get one extra year of Umbrella, free. Not only do you benefit from gaining more features for the same price, but if you upgrade now, you also get investment credit for the entire unused balance of your Umbrella subscription that's applied to Secure Access.

## How to Achieve Modern Cloud Security with Cisco

- Tell your Cisco partner or account manager you want to move to Secure Access SIA.
- Entitlement gets activated. If you need more time to migrate, Cisco will extend your Umbrella subscription.
- Migrate in less than an hour using the automated upgrade manager.
- Implement your improved cloud security, and elevate your defense.
- Bonus: use your free trial of Cisco Secure Private Access to test out Cisco's ZTNA capabilities\*

\*Secure Access is flexible by design. Stay DNS-centric or opt-in—on your timeline—to upgrade to additional integrated security capability, up to full SSE.
