

Staying ahead of threats

Empower your SecOps team to **detect and defend faster**

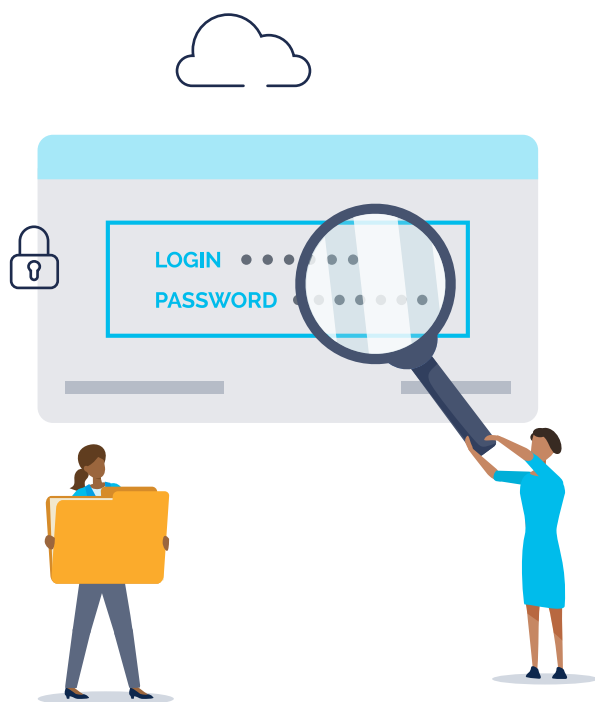

Threats are on the rise

400% increase in cyberattacks on remote workers last year¹

600% increase in cloud cyberattacks.² But...

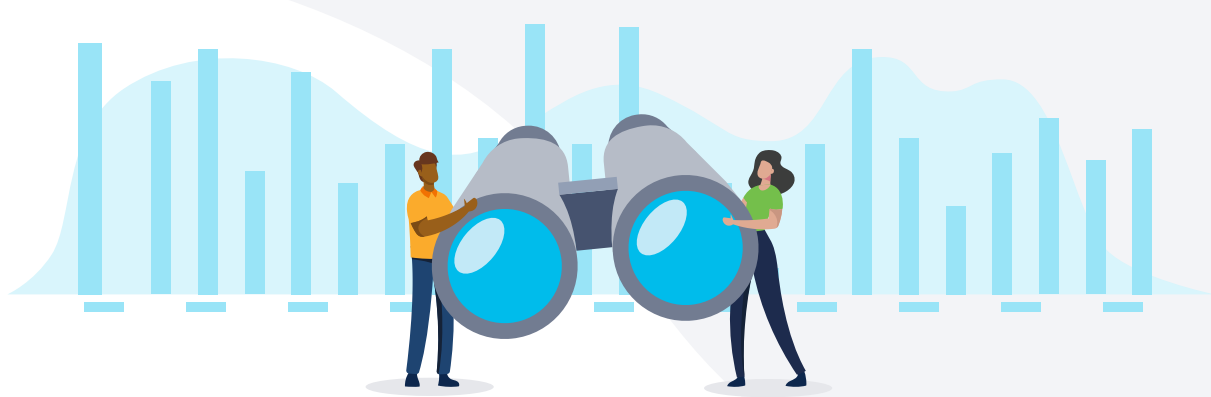

86% of organizations can't find the talent they need to address mounting cybersecurity threats³

Security expertise powered by insights

With Cisco® Business Critical Services, security operations teams can reduce monetary loss from a cyberattack up to 99 percent, with a layered defense that provides 4x faster outage detection against cybercrime.⁴

Packages include, among other services:

Operational Insights Review

Use predictive analytics and insights to identify deficiencies, non-compliance, and potential risks, and to monitor and optimize your Cisco security infrastructure.

Expert Review Workshops

Review your security strategy, architecture, and design to maximize the value of your security investments.

Change Window Support

Receive real-time consultation remotely from Cisco experts to address change planning, configuration, and implementation.

Accelerators

Address specific security operations challenges along the adoption lifecycle, with one-on-one remote technical sessions from a Cisco expert.

Plus, with our **Specialized Expertise** Scrum Services and Expert-as-a-Service offerings, teams can gain guidance for security and threat management, or get the support of a dedicated Cisco expert to create an adaptive workforce ready to protect and defend your business.

A recognized leader in security, Cisco has:

Millions

of telemetry agents

350+

security intelligence researchers

100+

threat intelligence partners

4

global data centers

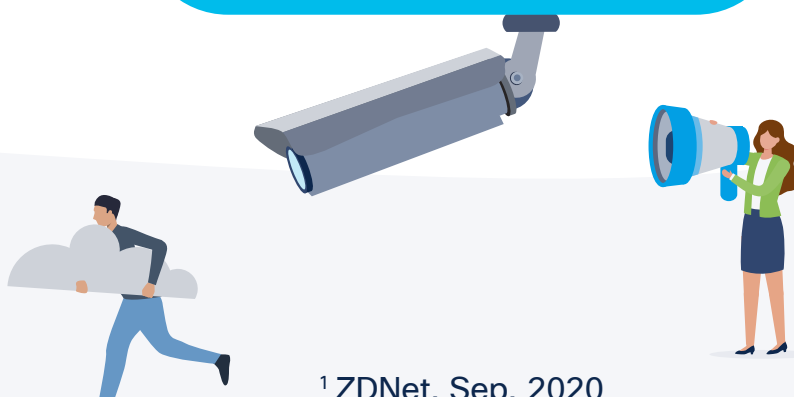

1,100+

threat traps

Leveraging Cisco's 35+ years as an industry leader, **Business Critical Services** can help your SecOps team preempt, protect, and defend against attacks to keep your network secure—all while enabling you to perform and transform faster.

Contact your local Cisco account representative or authorized Cisco partner today to start the conversation.
