

Cisco Show and Share Webparts For Microsoft SharePoint

The Cisco Show and Share WebParts for Microsoft SharePoint tightly integrate Cisco's leading webcasting and video sharing application with Microsoft's premiere business productivity platform through surfacing Show and Share's features, functionality and control in SharePoint sites.

Users can view videos, manage content and search all Show and Share delivered media from within SharePoint, allowing businesses who have already invested in Microsoft SharePoint to seamlessly leverage the power of instant access to video content driven by Cisco Show and Share.

The Cisco Show and Share Webparts for Microsoft SharePoint include the following:

Single Video WebPart

Surfaces a single video that can be selected by a user

Video List WebPart

Searchable list of videos by keyword and sortable by Newest, Most Viewed, Highest Rated, Most Ratings, Longest Duration

Channel WebPart

Surface and select multiple Show and Share videos within SharePoint for users via a Channel Control to create a 'TV' channel

Category Selector WebPart

Connects to the Video List WebPart and Displays Show and Share Categories for filtering

Tag Selector WebPart

Connects to the Video List WebPart and Displays Show and Share Tags for filtering

Related Video WebPart

Connects to the Single Video WebPart and displays a list of related videos

Upload Video WebPart

Upload Video to Show and Share from SharePoint with Title, Description, Tags and Category

Search Content from SharePoint

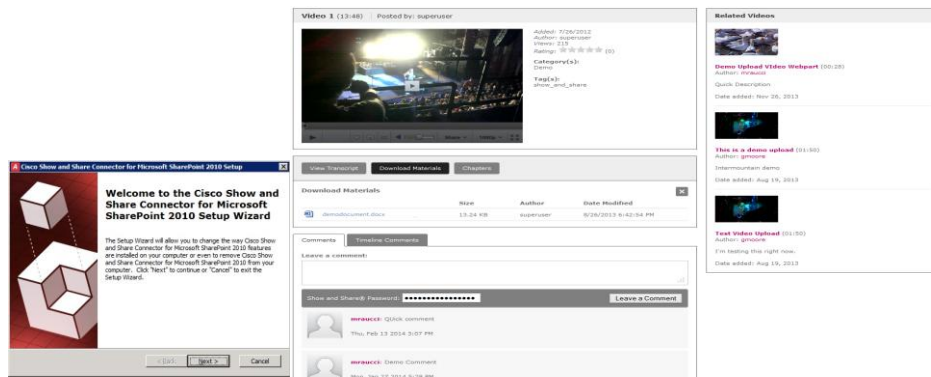

Federated Search Results with SharePoint 2010 enterprise search including Thumbnail image, Title, Description, Author, Date Added and Video Link

Video Account WebPart

Displays user Status Messages, Approval and Action Items, Videos that pertain to the user including Private, Uploaded, Favorite, Live and allows the user to remove favorites and delete videos they have uploaded from SharePoint

Featured Video WebPart

Provides the ability to feature up to 21 videos by Newest, Most Viewed, Most Comments, and Highest Rated via a carousel

Benefits

- Simple automated installation to access video content driven by Cisco Show and Share
- Surface all video from SnS directly in SharePoint
