

# Cisco Services for Hybrid Cloud Platform for Google Cloud

## Accelerate cloud implementation with new Services

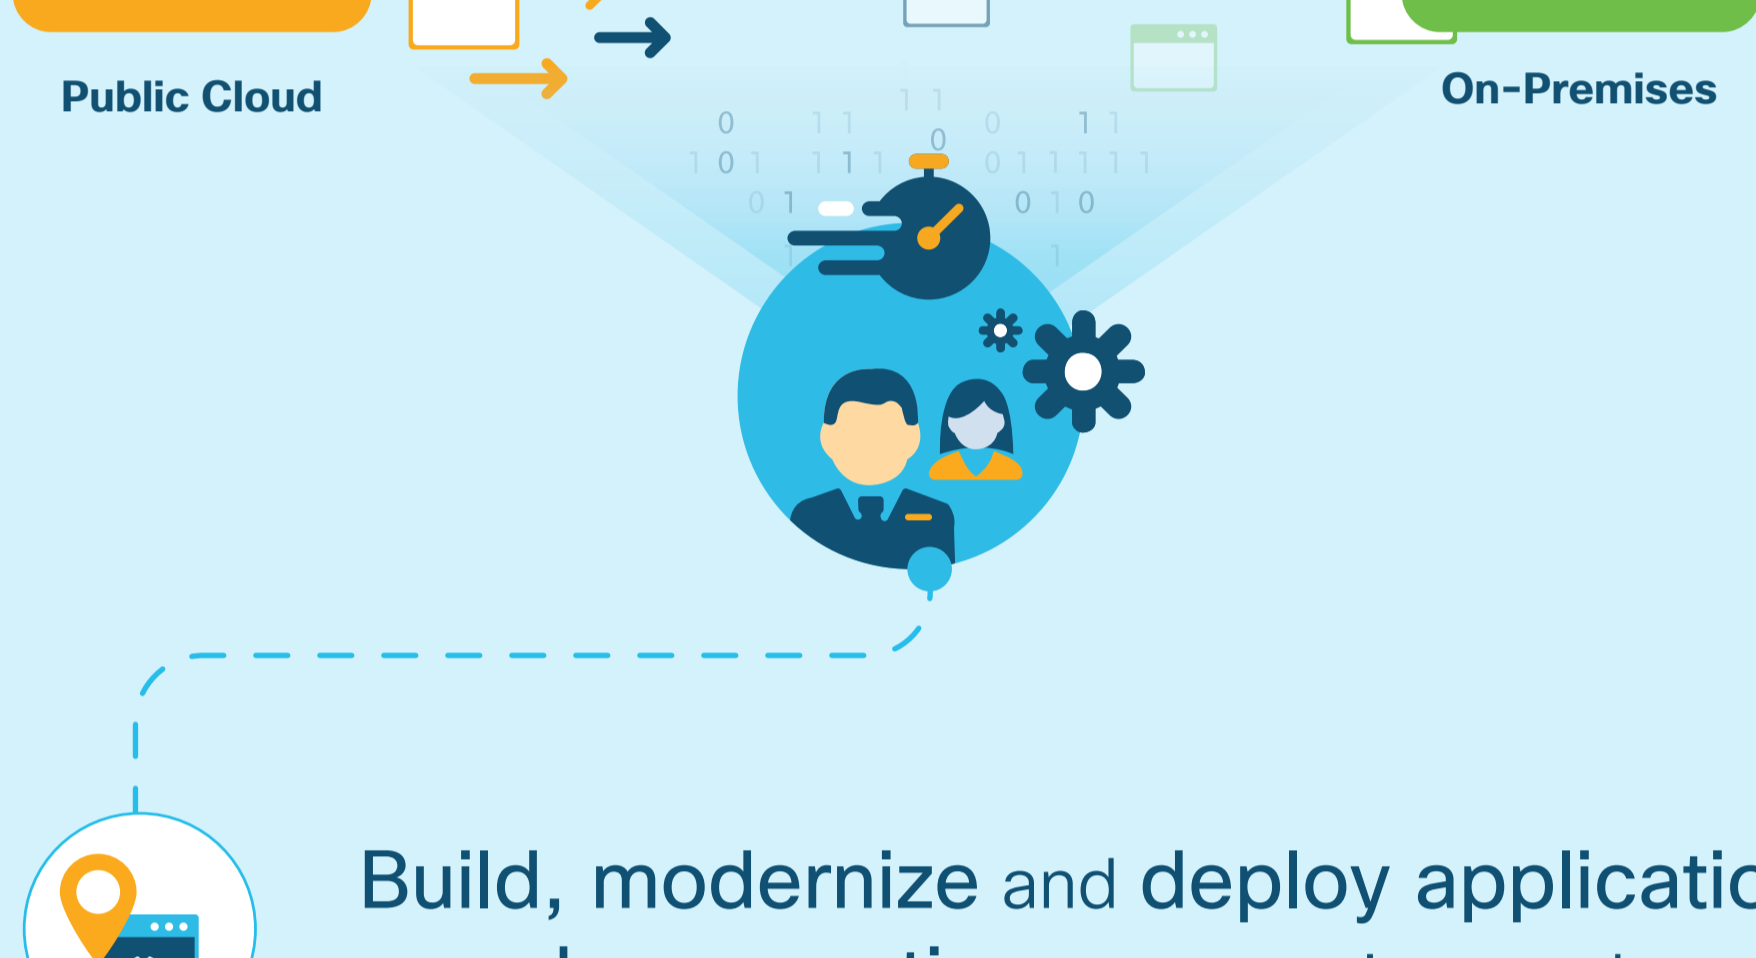

- 85% of cloud adopters use multiple clouds\*
- Fast application innovation and implementation is a key differentiator
- Leveraging the right expertise and best practices speeds app time-to-market

## However, IT challenges impede quick adoption:

- Disparate technologies increase complexity and cost
- Limited consistency and flexibility hinders application development
- Limited expertise and knowledge impacts deployment cycles
- Multiple cloud networks increase security concerns

## Customers need to be empowered to

- Build, modernize and deploy applications anywhere, anytime on-premises and on public clouds
- Access expert guidance and technical knowledge to speed implementation
- Leverage technical support to accelerate cloud adoption and IT investment

## Engage the experts with Cisco Services

**Cisco Quick Start Services** implement the base solution *plus* one customer-selected use case:

### Base Offer set-up and configuration

- Cisco CloudCenter (on-premises or Google Cloud)
- Stealthwatch Cloud
- VPN (Cisco or Google)
- Cisco Hyperflex
- Cisco Container Platform
- Demo of deployment for 2 applications

### Use Cases

- Develop in Public Cloud; Consume On-Premises:** Apigee setup and configuration
- Develop On-Premises; Consume in Public Cloud:** Open Service Broker and Google Catalog Service configuration
- Seamless CI/ CD App:** Gitlab & Artifactory setup & configuration, and Jenkins CC Plugin add & configuration

## Lifecycle of Custom Services are tailored to meet customer needs:

Strategy and Assessment Services + Use Cases

## Leverage the best-of-the-breed

- Expert guidance, IT knowledge and best practices
- 24/7 centralized, expert solution-level support
- Cloud proficiency across networking, security, management and analytics

- Accelerate Hybrid Cloud adoption through strategy and advice
- Enhance Application Agility and Operational Excellence using expert guidance
- Reduce Risk through enterprise-class security expertise
