

Cisco Quick Start Services for Multicloud Deployments

Powering Through Multicloud

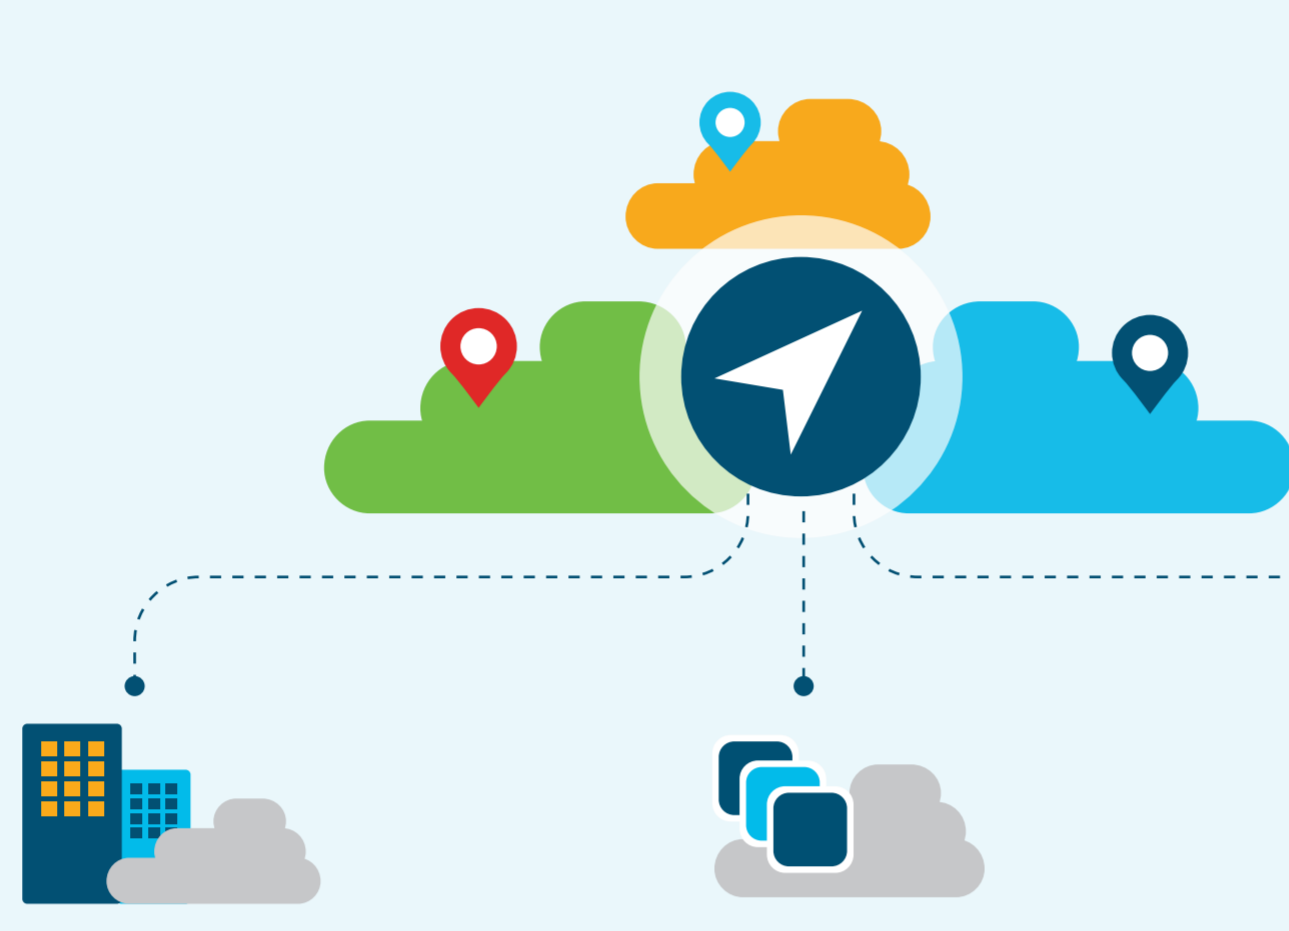

Multicloud is a reality

85% of cloud adopters have multiple deployment options, with 58% using at least four vendors. Every cloud provider has its own configuration, deployment, cost and governance models, thus increasing the complexity quotient.

Source: IDC CloudView, March, 2018, n=5740 worldwide respondents, unweighted

Navigating multiple clouds is not easy

Whether you are looking to migrate on-premise applications to cloud, redesign and implement traditional cloud apps, or simply configure and deploy a new cloud application, there are three key considerations:

Simplicity

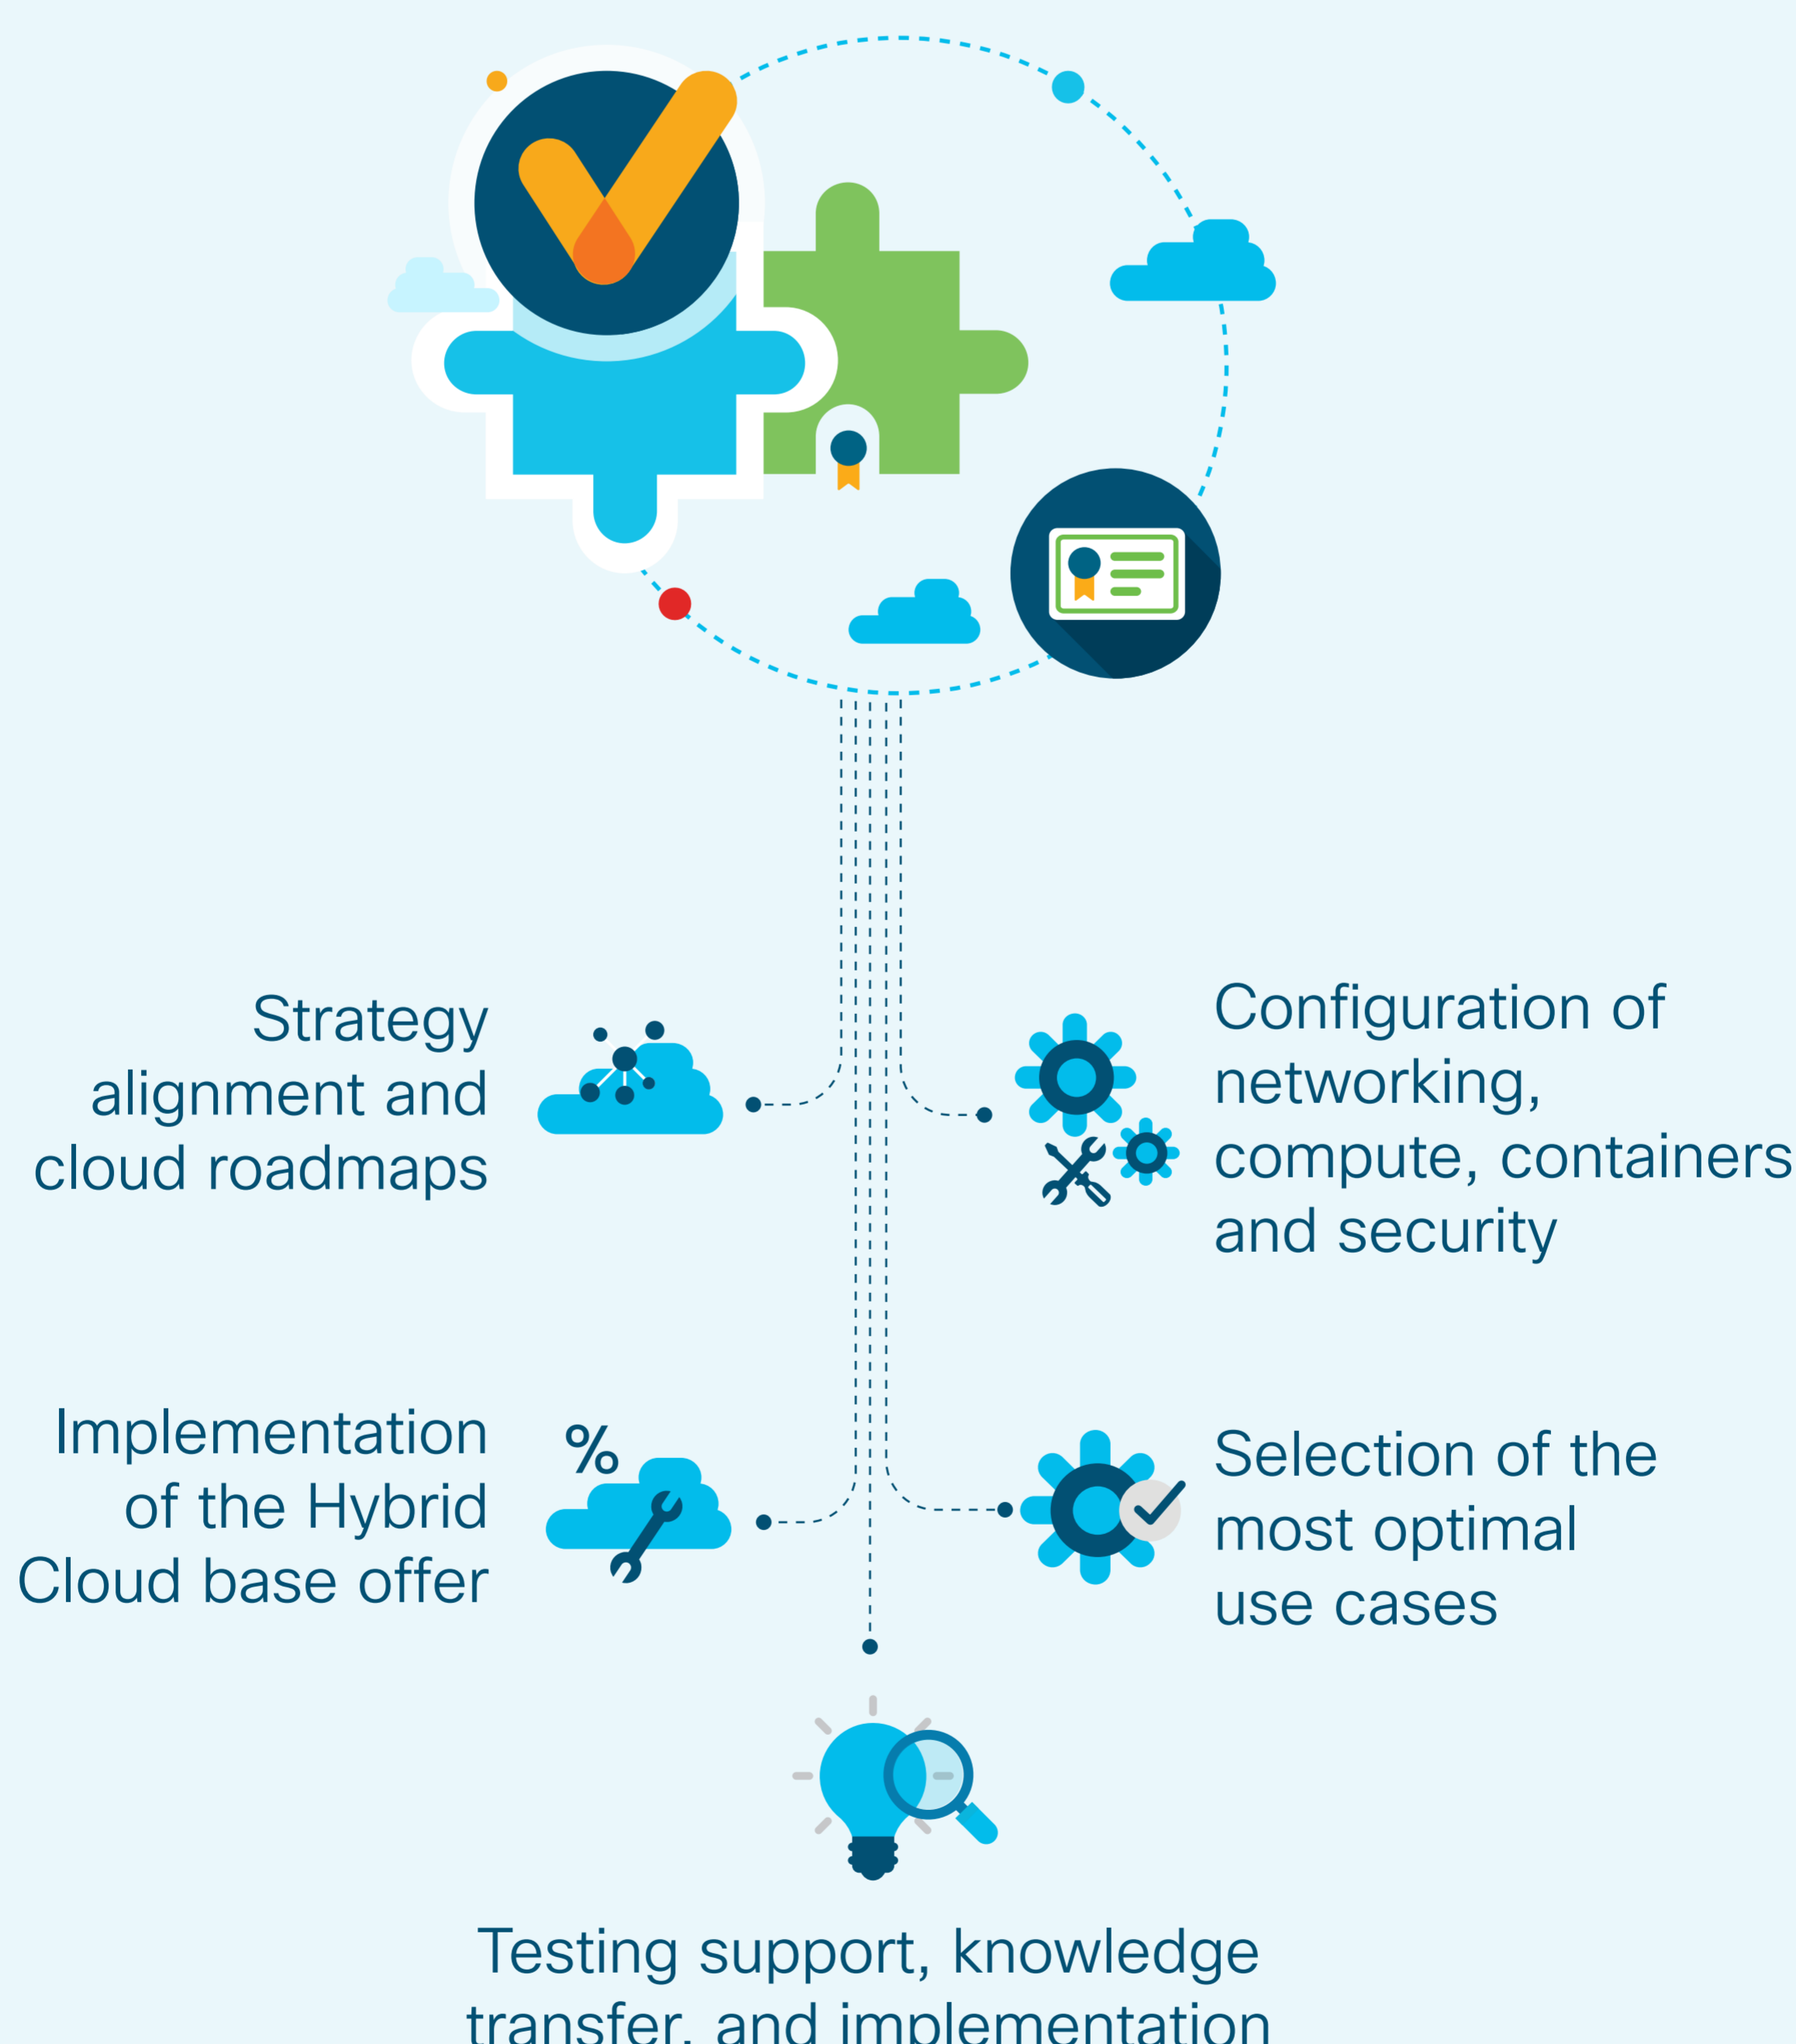

Speed

Security

Get set-up and running quickly with Cisco Quick Start Services. Our portfolio:

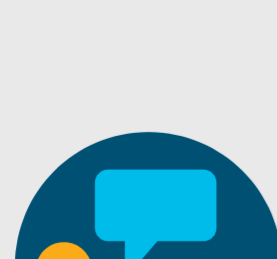

Cisco expertise, best practices, and methodologies drive:

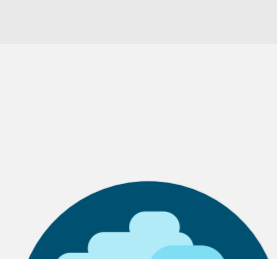

Customer benefits and outcomes

Accelerated cloud adoption through strategy planning and actionable guidance

Improved IT agility and operational excellence with expert advice on design, deployment and management

Reduced risk through expertise and end-to-end security capabilities

Enhanced customer experience leveraging automation, analytics and containerization
