The Cisco TelePresence® TX9000 Series (TX9000) is the new benchmark for immersive “in-person” collaboration. With modern design and advanced functions, the TX9000 Series enables business transformation through natural and effective communication with enhanced collaboration tools. The TX9000 Series features two products: the one-row TX9000 seats up to six participants and the two-row TX9200 seats up to 18 participants. These new three-screen telepresence systems combine life-size, high-definition video and content sharing, spatial audio, and an advanced touch user interface, all integrated into a specially-designed room environment for the ultimate immersive experience.

Cisco TelePresence® Design Palette Guide

The color temperature, intensity and positioning of lights in a room produce unique reactions from paint colors. Cisco has tested a broad spectrum of hues to identify the paint colors that work best with Cisco TelePresence camera, lighting and plasma technology, while also complementing the skin tones of participants and creating a comfortable atmosphere.

Cisco TelePresence technology performs best when colors are neutral and reflect a certain amount of light. Our first and second generations of color palettes use warm earth tones and neutral tones to ensure participants are portrayed in the most accurate manner possible. Our newest color palettes build on all the previous concepts, adding flexibility through a three-color approach. They also provide greater design detail, with recommendations for fabrics and carpets. The three color categories include:

- Field, or main color
- Complement, or secondary optional color
- Detail color for trims and moldings

These combine to create an immersive Cisco TelePresence experience. You can learn about the three color categories in more detail on page 22.

The physical components in a Cisco TelePresence room, including lighting, furniture, decorations, give the space its identity and provide an opportunity for corporate branding. Organizations are advised to design their immersive Cisco TelePresence rooms to reflect both their corporate and local cultures. Consulting with your organization’s corporate branding team is encouraged.

Note: This color guide is used in conjunction with the Cisco TelePresence Room Design Guide and the Cisco TelePresence Room Readiness Assessment (RRA) process to insure the best Cisco TelePresence experience.

For more design information, please visit: www.cisco.com/go/roomdesign
The Light & Airy palette reflects simplicity and a casual refinement. It is inspired by the open, light-saturated spaces of modern high-rises; the calm and spacious interiors of museums; and the clean, minimalist spaces of high-end boutiques. The finishes are monochromatic ivories and whites, highlighted by glass, metal details and wood tones. Light & Airy is especially recommended for brightening and enlarging small and medium sized spaces.
Modern Warmth evokes a contemporary and understated sophistication. Inspired by modern and intimate lounges, it uses muted organic tones, natural woods, felts and soft textures to create a refined and inviting environment.
Classic elegance is the underlying theme for Rich & Bright. The palette draws on the style of high-end law offices and contemporary restaurants, mixing complementary warm and cool tones with layered textures. Vibrant copper accents offset the rich wood tones and sage green hues, giving the room an expressive, soothing atmosphere.
The Stark Contrast palette provides a crisp, dramatic feel for medium to large rooms. The softly contrasting mouse grays and foamy whites are juxtaposed against off-blacks and deep browns, creating a strikingly chic environment. This understated, yet bold palette takes its cues from contemporary boutique hotels and modern VIP airport lounges.
Luxurious & Calm offers a refreshing combination of soft, sea-inspired blue hues, warm woods and gilded metal accents. Influenced by the invigorating and welcoming atmosphere of contemporary corporate lobbies and visitor centers, this palette subtly energizes rooms of any size with cool, calming neutrals and complementary hues.

**DETAILS**
BM Refined / AF-75

**FABRIC**
Ponte 5510 / 162
Carnegie

**CARPET**
Icon Tile 59423 / Ultra Vixen 21761
Shaw

**Luxurious & Calm**
Modern museum spaces and high-end residential buildings provide the inspiration for the Elegant and Earthy palette. Warm grays and natural textures are enriched by off-black details and golden accents. This understated scheme works particularly well when combined with golden wood tones.
Traditional Warmth draws its refined, timeless feel from a combination of warm French grays, subtle peach tones, and creamy whites mixed with blond woods. This scheme, which draws on the tranquil intimacy of a luxury spa, is ideal for bringing a sense of comfort, calm and sophistication to medium and large rooms.
Details

The Cisco Telepresence® color palettes are designed to work in a broad range of environments. Each has been tested to ensure it creates optimal images on the display, works with participants’ skin tones and provides a pleasing overall atmosphere.

Although each palette may be used in a variety of ways in almost any room, we recommend using color, especially Field colors, on the walls to achieve optimal picture quality.
Recommended Combinations
While all seven color palettes work well with both the Walnut and Maple wood finishes Cisco offers, the best results may be achieved by using the following palette and wood combinations:

Recommended color palettes for walnut:

- **Light & Airy**
- **Modern Warmth**
- **Rich & Bright**
- **Stark Contrast**

Recommended color palettes for maple:

- **Luxurious & Calm**
- **Elegant & Earthy**
- **Traditional Warmth**

Recommended Combinations
Light & Airy

* Recommended with Walnut

Modern Warmth

* Recommended with Walnut
Rich & Bright

Stark Contrast

* Recommended with Walnut
Luxurious & Calm

Elegant & Earthy

* Recommended with Maple
Traditional Warmth

* Recommended with Maple
Color Palette System

Description

Each color palette is comprised of three colors, defined as Field, Complement, and Detail.

The Field Color is the dominant color and should be present on most surfaces in the camera’s field of view.

The Complement Color is an optional secondary color that can be applied to walls, architectural features, upholstery, window coverings or other elements.

The Detail Color is recommended for the trim elements, such as baseboards, door frames, moldings and ceilings. It should appear only marginally in the camera field.

Each palette also includes suggestions for fabrics and carpets. The suggested fabrics can be used in both the Field and Complement Color areas of your Cisco TelePresence® room, without causing any undesired optical effects on camera. The suggested carpets are generally in darker tones to help ground the environment and tie all design elements together.

Please refer to the Application Example for guidance on how and where to apply the palette in your teleconference space.
Application Example:

**Field**
The predominant color: most surfaces visible in camera’s field of view.

**Complement**
The secondary color: architectural features, fabrics, upholstery and window coverings.

**Details**
The detail color: baseboards, door frames, mouldings, ceilings, etc. This color should appear only marginally in the camera field.
Details

In the following pages you will find the specifications for recommended Cisco TelePresence® color palette, including colors, fabrics and carpets.

Questions regarding the availability of certain finishes or requests to use colors outside the recommended palette should be addressed to your design and remediation partner, or to Cisco® Advanced Services as an additional service.

Do not perform a color match using a printed version of this document.

Because of the vast number of color systems and paint manufacturers throughout the world, it is not possible to identify matching colors for each paint manufacturer or provider. To translate colors to your local paint system and for an accurate representation of the paint colors, request a color sheet from Benjamin Moore (see vendors section for contact info).
