

## Have a direct line with every client

My relationships with customers can only be as good as my communication tool allows. My customers need to be able to reach me at any time and I need to keep a pulse on how they're feeling. Cisco Webex Teams lets us chat and meet flexibly, frequently, and informally from wherever we are.

### 1:1 Spaces

Download the Cisco Webex Teams app. External customers can use all Cisco Webex Teams features too. Use one persistent space for just you and your customer as your communication central. You can always reference their past messages and priorities.

[Add external people](#)

### Ditch the formality

Tear down communication barriers. Your customer can reach you however is best for them. Send a quick ping. Easily switch between chatting and meeting. See their facial reactions. Answer questions on any device, at any time.

[Send a message](#) | [Call your customer](#)

### Share documents

Share key deal documents. Store large files securely for later reference. Give your customer all the information they need to move the deal forward.

### Plan your meeting

With one button, easily schedule a 1:1 catchup. The meeting will appear on both of your calendars. Cisco Webex Teams will remind you when you're meeting. Their questions are documented close by when you meet. Never have a conversation without context.
