

Webex for Government

FedRAMP® Authorized Collaboration Solutions

Providing the most complete solution for reimagining hybrid work.

Webex for Government is a single platform for calling, meetings, messaging and getting work done efficiently. This comprehensive solution provides a consistent experience across all users, providing inclusive yet secure features for users both within your organization and guests from other organizations. With the mobile or desktop app, Webex for Government goes where your people are, office, home, traveling, or in the field. Our broad range of devices equip workers to be productive in any location.

With Webex for Government, your agency gets a robust, industry-leading, cloud-based collaboration solution that adheres to stringent Federal security requirements.

Through our decades of experience partnering with the Federal Government, we have developed:

- Consistency and unparalleled reliability and security with operations and applications, regardless of where they reside
- A reputation as a proven and trusted provider
- A broad suite of solutions for collaboration in the cloud
- FedRAMP moderate authorized solutions for meetings, calling, messaging, and contact center.

Key Features

Meetings

High-definition and rich AI-powered meetings integrated with your calendar, AI-powered noise cancellation, auto adjust quality, gestures, and transcriptions. Valuable resources for events and webinars.

Calling

Built-in high-definition voice and video calling, with integrated devices and headsets. Webex Calling with modern calling features, flexible migration to the cloud, and Control Hub analytics and management capabilities.

Messaging

Message, file share, one-click calling and one button to start a meeting in always-on spaces with people inside and outside of your organization. Enterprise content management allows you to organize files with key third-party apps.

Enterprise-grade security

True end-to-end encryption, Integrated DLP, Cisco CloudLock-ready or 3rd-party CASB integration, automatic anti-malware scanning all built into every component.

Centralized management with Control Hub

Single pane of glass management and workspace optimization, automated user onboarding, diagnostics, proactive alert capabilities, and security and compliance controls for users in the home or office.

Benefits

Reliable

Improve the **resiliency and availability** of Government operations by enabling a **'work from almost anywhere'** cloud environment.

Inclusive

Join from web browsers, desktop, or mobile. Integrate with key business applications to streamline workflows and make work easier and more productive.

Cost Effective

Protect your investment by using existing infrastructure and devices. Utilize a single platform for audio, video, messaging, and meetings.

Flexible

Choose different buying models and deployment models in a single subscription. Eliminate business disruptions with migration to cloud at your pace and requirements.
