

Help your teams be more productive. While staying safe.

With Cisco Webex Teams™, your employees can concentrate on getting things done while leaving the security to us.

As your employees need to collaborate more frequently with external parties, your security risks can grow.

Were you aware

68% of leaders are extending collaboration to external parties?¹

Data breaches can damage both your brand and your bottom line

More people prefer using personal devices at work. Yet with up to 50% of them invisible to IT, the risk of a data breach is tremendous.²

Nearly 20% of such attacks cause \$2.5M or more in damage.³

55% of organizations have had to manage the public scrutiny of a breach.³

Were you aware

Webex Teams allows you to invite, authenticate, and identify all external guests?

Team Collaboration is increasing

Yet the number 1 reason organizations think twice about collaboration is their concern about security.⁴

Remain calm

You can be confident that your information is always safe.

Unprecedented security

We allow you to host your own encryption keys on your premises.

End-to-end encryption

Your users' content is protected from attacks at rest, in use, and in transit.

Data is always protected

Webex Teams integrates with Cisco Cloudlock® and third-party data loss prevention (DLP) and cloud access security broker (CASB) solutions. So sensitive information won't fall into the wrong hands by mistake or deliberately.

Don't change a thing

Webex Teams works with the security and compliance policies you already have in place.

Were you aware

Webex Teams lets your admins block external communication whenever necessary?

Reduce risks, prevent penalties

Webex Teams is designed with cloud operations best practices in mind.

Were you aware

Webex Teams protects your information even if a device used for collaborating is lost or stolen?

No other solution can offer you such a potent combination of collaboration, simplicity, and comprehensive security.

Cisco Webex Teams keeps your sensitive information safe as your employees work with the people inside your security perimeter and the people beyond it.
