

# Keeping Europe's Hotels Moving

## Benefits

### Easier to run

IOS operating system moves to background as automation takes over, making it easier to manage security policy in a live environment

### Faster Set-Up

Simple to scale up and add new customers/services

### Lower risk

Ability to deliver 24\*7 multi-tenant cloud while retaining complete network separation between clients

50 staff

Netherlands

Service Provider

## Cisco Solution

- Cisco Nexus 9000 Application-Centric Infrastructure (ACI)
- High-performing cloud platform, initially to support managed UC/Video approach (IaaS, PaaS, Mobile, Wireless etc.) for hotels

“We’re completely sold on the Cisco ACI strategy. The pay off is less need for engineering effort and knowledge and better performing cloud services for our customers.”

-Jasper van 't Wout, Director Services, AVIT.
