

Doubling Growth and Keeping Headcount Lean

Benefits

More Profitable Growth

Can add services and customers, while keeping headcount under control.

Faster Set-Up Times

ACI builds on UCS service templates experience, enabling multiple services to be created quickly with greater levels of automation.

Higher Customer Satisfaction

Greater network intelligence to spot and proactively resolve problems before they become visible to end users.

Service Provider

Cisco Solution

- Cisco Nexus 9000 Application-Centric Infrastructure (ACI)
- Supports private and hybrid cloud offerings for software developers, companies, and private sector clients

“Our customer base is up 200 percent, but we’ve only had to hire one extra headcount. ACI cuts out so much unnecessary work.”

- Peter Elbertse, co-founder and owner, P-PRO's
