

Cisco and Intel® are committed to data center growth along with our partners. Learn about the disruptive data center trends at the 2015 Unified Data Center Challengers Roadshow. During this two-day partner event, Cisco and Intel, along with some of our partners, will share opportunities we have developed to help you increase personal profitability and even win a few prizes. Find about the latest incentives and promotions as well as the latest updates in our data center portfolio including:

- Disruptive fabric innovations such as Cisco Application Centric Infrastructure (Cisco ACI) and new Cisco Nexus Series Switches portfolio positioning.
- Compute innovations based on the Intel® Xeon® E5-2600 v3 Product family, integrated compute management offerings, and new Cisco Unified Computing System (Cisco UCS) products such as Cisco UCS Mini and Cisco UCS 3160 C-Series and M-Series servers.

Select a location nearest to you and [register](#) for this event. Encourage your partners to do the same. See dates and locations of event below.
