

Why Automation For Digital Transformation?

Top 2 reasons for automating

Impossible to manage tasks manually due to scale and complexity

20% of processes will not require human intervention by 2020¹

Rapidly changing business demands

70% of companies in top quartile of organizational health are agile²

Automation Propels Digital Transformation

Why Cisco for Automation

Automates more parts of your business than anyone else

Fastest private and hybrid cloud deployment

Cisco CliQr deploys applications in 30+ clouds with a single click

End to end security and IoT lifecycle automation

Cisco Jasper automates the activation, provisioning, security and management of millions of IoT devices across 100+ providers

Zero touch deployment for branches and cloud

Cisco DNA deploys 100s of new branches and manages changes within minutes

“With Cisco infrastructure, we can deliver high-availability solutions with industry-leading uptime.”

Pat O’Day, CTO, Bluelock
