

Cisco DNA Spaces for Workspaces

Cisco DNA Spaces helps enterprise workspace customers solve their physical space blind spot to better understand the behavior and location of people (employees, visitors) and things (assets, sensors). Use Cisco DNA Spaces today to understand space utilization and employee vs. visitor behavior.

Impact across all workspace stakeholders

Operations team

- Meeting room occupancy data helps optimize employee efficiency
- Gain visibility into business performance metrics

Facilities management

- Detect occupancy in buildings
- Improve space utilization and benchmark usage across offices
- Correlate occupancy with consumption of energy, AC and heating, maintenance cycles, housekeeping cycles, F & B etc.

IT

- Gain centralized monitoring and management
- Have a common experience across all offices
- Enable 24x7 global monitoring and end-to-end SLAs

Out of the box use cases

| Value | Key use cases |
|---|---|
| Insights into workspace utilization and occupancy | <ul style="list-style-type: none">Gain insights into utilization and occupancy of workspaces, understand patterns, peaks and troughsCompare employee and visitor behavior data across different campuses, buildings, floors, etc. against benchmarks |
| Seamless guest Wi-Fi onboarding | <ul style="list-style-type: none">Create a uniform Wi-Fi program across all offices supporting local regulations of privacy and opt-insHave a differentiated onboarding experience for visitors, returning visitors, and employees |
| Meeting room and huddle space occupancy | <ul style="list-style-type: none">Visualize meeting room and huddle space availability to easily navigate to nearby rooms |

Business outcomes enabled by partner apps and enterprise software integrations

| Value | Key use cases |
|----------------------|---|
| Enterprise analytics | <ul style="list-style-type: none">Tie location data into enterprise software platforms to correlate visitor behavior with other business KPIs such as operations, energy, food and beverage consumption, AC/heating, etc. |
| Employee sentiment | <ul style="list-style-type: none">Correlate behavior metrics with employee performance rating and employee satisfaction surveys |
