The Race Against Ransomware
A Proven Road To Better Security

Ransomware
A roadblock that’s here to stay

While some believe attacks like a growing threat, no one is immune. It’s an ongoing challenge that requires constant vigilance. And the payment fees aren’t the only threat.

The hype around big-ransom attacks has overshadowed the smaller, yet more prevalent, ransomware threats that are more insidious in nature. Ransomware is here to stay and is concerning organizations at every level of business.

Security speed bumps: What’s slowing us down?

40% of companies have sensitive files that are unprotected and open to every employee. Some of the world’s largest and most prestigious organizations have been stopped in their tracks due to ransomware in recent years.

Cisco Ransomware Defense

In the race against ransomware, having the best cars and drivers is vital. However, accidents can still happen, so it’s good to also have the best responders in your pit crew.

Discover, contain, and remove advanced malware, zero-day attacks, and persistent threats. Stop phishing, ransomware, and spam from compromising your environment by blocking malicious communications. Obtain a first line of defense against threats on the Internet, whether users are on or off the corporate network.

Cisco paves the way

In the race against ransomware, having the best cars and drivers is vital. However, accidents can still happen, so it’s good to also have the best responders in your pit crew.

Cisco Ransomware Defense

Cisco AMP for Endpoints, Cisco Umbrella, and Cisco Email Security offer customers a thorough, layered security approach to combatting ransomware.
