

Get a 4G LTE

Advanced Module at No Cost
with Cisco 4000 Series
Integrated Services Routers

Deploy a 4G LTE-A as a primary or backup WAN network service for seamless branch and retail business continuity and software-defined WAN (SD-WAN) network path diversity. You no longer need to add a second box for 4G LTE-A.

Offer available through July 28, 2018

Contact your Cisco Partner or Account Manager for more information

Product eligibility

- Purchase a Cisco 4200 Series ISR with Cisco ONE™ Software and get a no-cost 4G LTE-A Network Interface Module (NIM).
- The 4200 Series ISR also requires performance licensing to be eligible for the no-cost 4G LTE-A NIM.
- Promotion is valid for all orders placed through July 28, 2018.

Primary benefits

- Modernize your older routers with 21st-century SD-WAN and 4G LTE-A solutions.
- Deploy 4G LTE-A as a primary or backup for true SD-WAN network path diversity.
- Get network routing, security, compute, and storage with 4G LTE-A in a single box.
- Quickly connect branch offices, retail stores, ATMs, and small and medium-sized businesses.
- Take advantage of the cost-effective Cisco ONE Software solution.
