

Cisco TrustSec Platform and Capability Matrix

Cisco TrustSec uniquely builds upon your existing identity-aware infrastructure by enforcing segmentation and access control policies in a scalable manner using the capabilities detailed below:

This table lists latest IOS, IOS-XE, and NX-OS versions that support the TrustSec features. This version is aligned with TrustSec 5.2 Solution validation. Solution-Level validated versions may not always represent the latest available firmware versions on given platforms.

Platform		Capabilities				Note		
Categories	Platform Name	Security Group Tag (SGT) Classification & Mapping	SGT Exchange Protocol (SXP) Support (role / version)	Inline SGT Tagging	SGT Enforcement	Firmware Version to support "all" capabilities listed	Solution Validated Version	License
Cisco Identity Services Engine	Cisco ISE 3415 and 3495 Appliance and VMware	IP-to-SGT mapping & provisioning to switches				Cisco ISE 1.2 Patch 1	Cisco ISE 1.3 Patch1	Base License
Cisco Catalyst® 2000 Series	Cisco Catalyst 2960 Series Switches (includes 2960G, 2960PD)							
	Cisco Catalyst 2960-Plus Series Switches	802.1X MAB Web Auth IP-to-SGT VLAN-to-SGT Subnet-to-SGT	Speaker (version 4)			Cisco IOS 15.2(2)E	-	LAN Base K9
	Cisco Catalyst 2960-C Series	802.1X MAB WEB AUTH IP-to-SGT VLAN-to-SGT Subnet-to-SGT	Speaker (version 4)			Cisco IOS 15.2(2)E	-	LAN Base K9
	Cisco Catalyst 2960-CX Series	802.1X MAB WEB AUTH IP-to-SGT VLAN-to-SGT Subnet-to-SGT	Speaker (version 4)			Cisco IOS 15.2(3)E	-	LAN Base K9
	Cisco Catalyst 2960-S and 2960-SF Series	802.1X MAB WEB AUTH IP-to-SGT VLAN-to-SGT Subnet-to-SGT	Speaker (version 4)			Cisco IOS 15.2(2)E	Cisco IOS 15.0(2)SE 2	LAN Base K9

Platform		Capabilities				Note		
Categories	Platform Name	Security Group Tag (SGT) Classification & Mapping	SGT Exchange Protocol (SXP) Support (role / version)	Inline SGT Tagging	SGT Enforcement	Firmware Version to support "all" capabilities listed	Solution Validated Version	License

Notes

- "Firmware Version to support "all" capabilities listed" represents the version to support all the capabilities listed for that platform. It does not always represent availability of a specific feature set. For example, Cisco Catalyst 3560-E and 3750-E Series supports dynamic classification as well as other static classifications such as IP-SGT and VLAN-SGT mapping features. In order to use all of those features, the switch needs to be running at least Cisco IOS 15.0(2)SE5.
- Product part numbers of supported line cards for inline SGT on the Cisco Catalyst 4500 Supervisor Engine 7-E and Supervise Engine 7L-E include the following: WS-X4712-SFP+E, WS-X4748-UPOE+E, WS-X4748-RJ45V+E, WS-X4748-RJ45-E, WS-X4640-CSP-E.
- IP to SGT, VLAN to SGT, subnet to SGT, port profile to SGT, port to SGT (also known as L2IF to SGT in some platform documentation), and L3IF to SGT use the static classification method.
- For Cisco TrustSec classification, propagation, and enforcement, an IP Base K9 license is required for Cisco Catalyst 3560, 3560-E, 3750, 3750-E, 3560-C, 3560-X, 3750-X, 4500 Sup6(L)-E, 4500 Sup7(L)-E, 6500 Sup720, and 6500 Sup2T.

-
- ** Currently Nexus 7000 supports IP-SGT binding for static classification method when vPC+/FabricPath are configured.
