## Benefits

### Upgrade to Wi-Fi 6 and be ready for growth

[Cisco Catalyst 9100 Access Points](#) deliver the power to support better mobile experiences, offering faster speeds for bandwidth-intensive applications such as video collaboration. Support smart buildings with higher device and IoT capacity for environments such as smart offices, lecture halls, malls, stadiums, and manufacturing facilities.

### Follow through with multigigabit access

Optimize performance of your wireless network with [Cisco multigigabit switches](#) that automatically match speed with access points. Enhance user experience by getting increased bandwidth on existing cabling, preparing your access network to support Wi-Fi 6 devices.
