Cisco Collaboration for Education

Cisco Collaboration Benefits for Educators:

- **Improve learning outcomes:** Optimize and personalize learning to equip all students to succeed
- **Extend teaching beyond classroom walls:** Connect students, educators, and researchers around the globe
- **Increase efficiency:** Streamline communication between faculty, students, administrators, and parents
- **Accelerate innovation:** Share knowledge quickly and securely with peers and experts from other institutions

A New Era of Teaching & Learning

Schools, colleges, universities, and research institutions everywhere are facing the myriad demands of enhancing teaching and learning for a new generation of students.

Today's students are hyper-connected digital natives who expect instruction to be tailored to their unique learning styles. They want to learn anytime, anywhere, and on any device. Most of all, they want to be connected. To the Internet. To each other. To experts around the globe. To all the information, instruction, and perspectives they can unearth.

Learn Without Limits, Connect Without Compromise

Cisco® Collaboration liberates the learner from the constraints of the traditional classroom, making learning more accessible and intuitive for students and educators.

Easy-to-use solutions for secure, all-in-one team collaboration enable educational institutions to simplify how school work gets done, enhance student and teacher experiences, and shape the future of learning. And we do it without compromise – in a way that's secure, efficient, and scalable. With Cisco technology, you can equip all of your students to learn how they learn best.

Without walls. Without disparity. Without limits.

Transform Education with Cisco Collaboration Solutions

- **Connected Classroom:** Blend traditional classrooms with digital learning technologies to give students the ability to learn anywhere, anytime, and on any device with Cisco Webex, Cisco video devices, and Learning Management System (LMS) integrations.

- **Virtual Classroom:** Reach more students, increase access to experts and resources around the globe, and help students learn material before, during, and after class by facilitating lessons and discussions using Webex and Cisco video devices, like the Cisco Webex Board Series and the Cisco Webex Room Series.

- **Connected Research:** Empower researchers to securely collaborate and share knowledge with peers and experts anywhere in the world using Webex and Cisco video devices.

Cisco Is an Education Company

Cisco has a long, strong history in education and commitment to driving student outcomes. We design technology to boost student achievement. We partner with universities to drive innovation and train future leaders. We volunteer in schools around the world to give back and to support a culture of creative learning. We make it our mission to help students everywhere learn without limits.
