Cisco Webex for Education

Cisco Webex Benefits for Educators:

- **Facilitate project-based learning:** Organize students and educators in team spaces built for ongoing communication and sharing

- **Connect physical and virtual classrooms:** Build hybrid learning environments that integrate online resources with the Cisco Webex Board and other connected devices

- **Increase efficiency:** Integrate Cisco Webex with LMS to streamline administrative workflows within a single platform

- **Learn anytime and anywhere:** Connect to a single, continuous workstream with any device to create, meet, message, call, whiteboard, and share from anywhere

From Static Individuals to Active Teammates

Gone are the days when going to class meant simply sitting, listening, taking notes, and studying for an exam. Today's learning environments need to offer so much more. They need to be personalized and to provide students with the opportunity to collaborate with peers and experts around the world.

Physical and virtual learning spaces need to be connected around tools that facilitate project-based learning and sharing between individuals and teams. Seamlessly, so they are accessible anytime, anywhere, on any device. In class. At home. In the library. Even on the bus. Your students need a space to learn together.

The More Intuitive Way to Learn

Cisco makes learning what it should be - intuitive. Students and teachers connect without effort. Tools adapt, so classes don't have to. Experiences stay consistent on every device so every classmate feels fully included. Content moves freely so instruction flows smoothly. And learning continues, even after class ends.

With **Cisco Webex™**, students and educators can meet, create, and communicate anytime, anywhere, and on any device. All in one continuous workstream: before, during, and after class.

Cisco Webex Use Cases in Education

- **Blended learning:** Connect classrooms with digital learning technologies using Cisco Webex to give students the ability to create, meet, message, call, whiteboard, and share resources inside and outside the classroom and on any connected device, like a mobile phone, tablet, or Webex Board. With Webex, any classroom, common space, library, lab, office space, or project room can be connected.

- **Project-based learning:** Organize students, teachers, and experts in team spaces where they can access and share resources in a single, unified and continuous workstream. Integrate Webex with outside applications, learning tools, and multimedia to facilitate creativity and innovation for all types of projects. Promote peer-to-peer sharing, simplified educator advising, and virtual office hours.

- **Simplified administration:** Integrate Webex with Learning Management Systems (LMS) to streamline administrative processes and tasks. Simplify grading, scheduling, record keeping, lesson planning, and communications with centralized coordination.

Cisco Is an Education Company

Cisco has a long, strong history in education and commitment to driving student outcomes. We design technology to boost student achievement. We partner with universities to drive innovation and train future leaders. We volunteer in schools around the world to give back and to support a culture of creative learning. We make it our mission to help students everywhere learn without limits.
