

Start your Hybrid Mesh Firewall Journey

This is for you if you operate a Cisco on-premises FMC appliance or Firewall Threat Defense (FTD) devices. Explore your options to supercharge your Secure Firewall experience in Cisco Security Cloud Control—the industry's first AI-powered cloud management platform to unify a broad range of enforcement points, including 3rd party firewall policies.

Migration Options

If you have...

An end-of-life (or approaching) on-premises FMC appliance
A mixed ASA + Firewall Threat Defense (FTD) environment

Fully Cloud

AI-driven management, monitoring, and event logging via Security Cloud Control

Ideal if you're pursuing a cloud-first strategy to boost OpEx efficiency and avoid the CapEx of on-premises upgrades

If you have...

The latest on-premises FMC appliance

Cloud Integration

Keep your on-premises FMC appliance for FTD management, plus get access to a subset of intelligent Security Cloud Control capabilities

Ideal if you're looking to improve security posture with existing investments in Cisco Secure Firewall

Value and Benefits of Cisco Security Cloud Control

Efficiency & Cost

Eliminate hardware maintenance, space, and power costs:
Remove the overhead of on-premises hardware. ●

Boost OpEx efficiency:
Avoid the CapEx associated with on-premises upgrades. ●

99.99% uptime SLA:
Guaranteed high availability without the need to maintain a dedicated HA setup. ●

Latest management firmware:
Get the latest features and security updates with zero overhead, manual effort, or downtime. ●

Auto backups:
Regular backup of configurations that can be easily restored if needed. ●

AI-Powered Intelligence

Cisco AI Assistant:
Simplifies tasks, enhances decision-making, and accelerates workflows. ●●

Policy analyzer & optimizer:
Automatically identifies and suggests improvements for network policies. ●●

Best practice recommendation:
Provides guidance toward optimal configurations for improved security and performance. ●●

Feature adoption:
Reveals how effectively you're leveraging your investment's full potential. ●●

Flexibility & Control

Secure management access:
Securely manage your environment from a web browser without a VPN. ●●

Elastic scale:
Add or remove FTDs without worrying about exceeding on-premises appliance capacity. ●

Combined visibility:
Unified view of security events across FTD and ASAs for mixed deployments. ●

Streamlined security management:
Consolidate multiple security tools—including 3rd party policies—into a single AI-driven interface. ●

● Full Cloud ● Cloud Integration

Why Now

Migrating your on-premises FMC to the cloud is the essential first step to unlocking the Cisco Hybrid Mesh Firewall journey. Whether you are looking to maximize existing investments or transition to a cloud-first, AI-driven model, moving to Intelligent Cloud Management allows you to centralize security coordination and boost operational agility.
