Follow these steps to install the CSPC ISO image on the hardware unit you created based on the CSPC ISO Application Note.

**IP Configuration**

1. Boot up the server where the CSPC software will be installed.
2. Connect a keyboard and monitor to the server. Alternatively, connect to the box through a console cable.
3. You will see the following screen. Press (**F8**) to start the CIMC configuration process as seen below.
The following window will be shown:
4. Configure an IP address for the device.
   - For a STATIC IP address, fill in CIMC IP, Subnet mask, and Gateway
• For a DHCP IP address, navigate to DHCP Enable, hit the spacebar to enable the option.

5. Press (F10) to save the IP address information.
6. Press ESC to exit the CIMC configuration process.
Software Configuration

1. Open a browser window and enter the CIMC IP address on the address bar as seen below.
   *(The next steps may vary slightly depending on the browser. These steps were done on Google Chrome)*

2. Click **Advanced**

3. Click on **Proceed to <your_ip_address> (unsafe)**.
4. Login to the CIMC console with your admin credentials.

5. Launch the KVM session by selecting the button shown below. Choose whether to launch the HTML or JAVA based KVM. In this example, HTML is used.
6. Click on the link provided.

   KVM server certificate has been accepted. Click this link to continue loading the KVM client application:

7. On the screen displayed, select **Virtual Media > Activate Virtual Devices**.

   ![Cisco Integrated Management Controller](image)

8. Once virtual media is activated, map the ISO image by selecting **Map CD/DVD**... under Virtual Media.

   ![Cisco Integrated Management Controller](image)
9. Click on Browse, navigate to where the ISO image is located and click on Map Drive.

11. Reboot the system by selecting Power > Power Cycle System (cold boot).
12. Once the reboot is underway, the screen below will display. Press (F6) to enter the Boot Menu.

13. Select the Cisco vKVM-Mapped vDVD drive and press ENTER.
14. As soon as the ISO image is loaded. You need to provide root password to proceed the installation and click “Next”

![Image of root password prompt]

**Note:** Same password cannot be used for login after installation, user need to enable root account from adminshell and new password will be generated.

15. Allow the installation to complete, there are two intermediate reboots after installation. After this, the CSPC software will be fully installed.

**Note:** Ensure that the computer runs on the KVM session, do not turn off or lose network connection during the installation and connection should be active until first reboot is completed.

16. After installation is complete login screen appears, you should provide new admin login password.

17. Select 1 to configure IPv4 address or select 2 to configure IPv6 address.
18. Once you configure IP Address, you will be able to access the box with assigned IP-address via ssh CLI or Web-UI (https://<ip-address>:8001)
