Create Breakout Sessions

Place participants into smaller group sessions, within which they can collaborate and share ideas.

- Choose the number of sessions and allocate participants automatically or manually.
- Add and remove sessions.

Join Sessions to Assist Others

When your students or attendees need help, you can join individual video breakout rooms to answer questions, provide feedback, and more.

- Join Session to help students or attendees.

Broadcast a Message

Send a broadcast message to breakout session participants to share important updates.

- You can broadcast your message to everyone or a specific set of participants from one session.

Assign Cohorts to Assist You

We've renamed ad hoc cohorts to help you track and share attendees with specific tasks or interests, so you can focus on your attendees.

Now, webinar hosts can filter the training, coaching, or sales teams in the audience and send messages to different team members.
