# The New 40.9 In-Meeting Experience

for

◎ Webex Meetings

Meeting features are easier to find at a glance.

Optimized Audio and Video Preview

Intuitively preview your audio and video settings before joining your meeting.

Choose your audio options and make sure you look your best in the preview window before you join. When you're ready, click **Join Meeting**

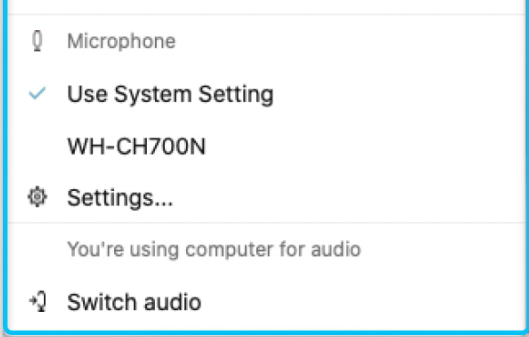

## Easy-to-find Meeting Controls

Essential meeting controls are always available where you need them.

Audio and video options have contextual menus.

Adjust your audio device and settings. See when you're speaking.

Change your video camera and virtual background.

Invite others, lock meeting, and more.

Quickly glance to see when your microphone and video camera are on.

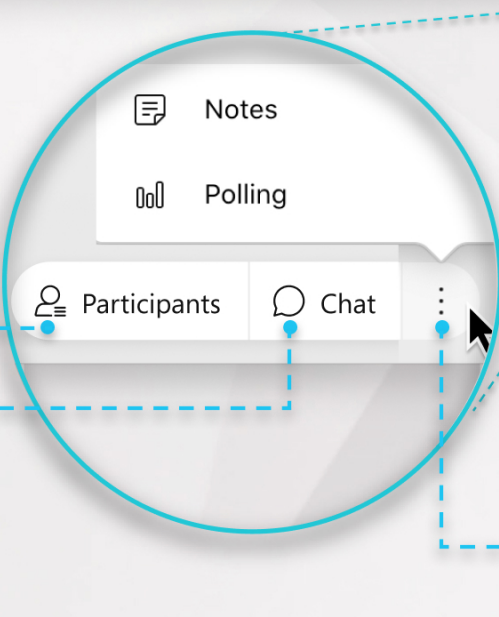

Consolidated Panel Controls

Consolidated panel controls make it easier to access panels like **Participants** and **Chat**.

Quickly open and close the **Participants** and **Chat** panels directly from the meeting controls.

Click **More** ⋯ to see other available panels.

Controls that adjust with your window size

When you resize your application window, your meeting controls will adopt an appropriate size.

Accommodate different desktop apps and tasks with your screen's extra real-estate, all without losing sight of your meeting controls.

Take advantage of the new Meetings experience today.
