

Calling one member of a space

The screenshot shows the Cisco Meeting App interface. On the left is a sidebar with a 'Meet' button, a search bar, and a 'Recent' list. The 'Recent' list includes spaces like 'Planning meeting', 'Testing plans', 'Resource planning', 'Legal and general', 'Release Project Management', 'Test Management' (highlighted), 'Sandra only', 'Conversation with Skype user', and 'Design specs'. The main area shows a chat room for 'Test Management' with a list of members: Aaron Paul, Allie Dawson, George Cavendish, Lewis Hill, Sally Wood, and Sandra Ty. A context menu is open over 'Sally Wood', showing 'Meet' and 'Remove' options. Annotations with red lines and circles point to the search bar, the 'Recent' list, and the 'Meet' button in the context menu.

Search for a space or select a space from the **Recent** list

Click on a person's name and select **Meet** to call them directly
