

Readme for Installing Security Fix Software for the Cisco Prime Infrastructure Appliance

Installing the Appliance PRIME-NCS-APL-K9 Software Upgrade

Note: As explained in the Cisco Security Advisory for Prime Infrastructure, you need to upgrade your Prime Infrastructure software to resolve a security issue:

<http://tools.cisco.com/security/center/content/CiscoSecurityAdvisory/cisco-sa-20140226-pi>.

Downloading the Fix

If you are running Prime Infrastructure versions 1.2, 1.3, 1.4, or 2.0, go to <http://software.cisco.com/download/navigator.html?mdfid=284145020&flowid=38562>, navigate to your Prime Infrastructure version, and download **PI-CSCum71308-0.tar.gz**.

Install the patch by using the command: **application install PI-CSCum71308-0.tar.gz <Repository Name>**

Additional Information About the Repository

You must have a defined repository on the Prime Infrastructure appliance, on which you downloaded the patch file. The repository can be on the local Prime Infrastructure server, for example, defaultRepo, or on a remote server.

If you have a local repository, the repository has the following configuration:

```
Repository defaultRepo
```

```
Url disk:/defaultRepo
```

For more information about creating repositories, see :

http://www.cisco.com/c/en/us/td/docs/wireless/prime_infrastructure/2-0/command/reference/cli20/cli20_appendix_011.html#wp3225104169

Support:

In case assistance is needed with the above, please open a service request with TAC:

Obtaining a Media Kit/DVD:

To order replacement software DVDs for the physical appliance PRIME-NCS-APL-K9 (instead of downloading the software via Cisco.com), you can order PID 'PI12-MEDIA-K9' (for Prime Infrastructure 1.3) or PID 'PI20-MEDIA-K9=' (for Prime Infrastructure 2.0) via your normal fulfilment channel or the Cisco Ordering Tool.

Note: For Prime Infrastructure 1.4 DVD – this is available via Cisco.com as a download only (NCS-APL-1.4.0.45-2-K9.iso) You can then create the DVD for this version. There is no physical DVD for this version.
