Documentation Roadmap

This reference helps direct you to the appropriate WAE documentation. The following terms are used in describing directories in which documentation resides.

- `$CARIDEN_HOME`—Directory in which the WAE Design, WAE Live, and WAE Collector executables and binaries are installed. The Linux default is `/opt/cariden/software/mate/current`.
- `$WAE_HOME`—Directory in which the packages are installed. The default is `/opt/cariden/software`.

Where to Find Documentation

- Documentation for each `$WAE_HOME` subdirectory is located in its `docs` directory. For example, `$WAE_HOME/wae-core/docs` contains its relevant documentation.
- All documentation is in the `$CARIDEN_HOME/docs` directory and in `$WAE_HOME/docs/<package>` directory.
- The WAE Design GUI and the WAE web UI each have Help menus that provide access to relevant documentation.
