What's New

Feature/Enhancement	Description						
Re-branded Product and Related Documentation	We have re-branded the product, and related documentation from “Cisco Email Encryption Plug-In” to “Cisco Secure Email Encryption Plug-In.” The following table shows the old and re-branded terminologies:						
	<table border="1"> <thead> <tr> <th>Old Terminology</th> <th>Re-branded Terminology</th> </tr> </thead> <tbody> <tr> <td>Cisco Registered Envelope Service</td> <td>Cisco Secure Email Encryption Service</td> </tr> <tr> <td>Registered Envelope or Envelope</td> <td>Secure Message</td> </tr> </tbody> </table>	Old Terminology	Re-branded Terminology	Cisco Registered Envelope Service	Cisco Secure Email Encryption Service	Registered Envelope or Envelope	Secure Message
	Old Terminology	Re-branded Terminology					
	Cisco Registered Envelope Service	Cisco Secure Email Encryption Service					
Registered Envelope or Envelope	Secure Message						
 Note The installer name and file paths still use the existing naming convention (Cisco Email Encryption).							

Supported Configurations

The following configurations are supported for the Cisco Secure Email Encryption Plug-in 1.2.1.

Cisco Secure Email Encryption Plug-in 1.2.1	Outlook 2016 (32 bit)	Outlook 2016 (64 bit)	Outlook 2019 (64 bit)	Office 365
Win 10 32 bit	compatible	—	compatible	—
Win 10 64 bit	compatible	certified	certified	certified

Note

When you upgrade to Office 365, Cisco Secure Email Encryption Plug-in may be disabled in your Outlook. In that case, you must enable it manually.

Note

Support for Microsoft Windows 7 and 8.1 versions was available till the Cisco Secure Email Encryption Plug-in version 1.2.1-151. From this release onwards, there is only support for Microsoft Windows 10.

Upgrading to Cisco Secure Email Encryption Plug-in 1.2.1

- [Upgrade Paths, page 3](#)
- [Upgrading the Cisco Secure Email Encryption Plug-in, page 3](#)
- [Upgrading from the Cisco Secure Email Security Plug-in to the Cisco Secure Email Encryption Plug-in, page 3](#)

Upgrade Paths

You can upgrade to Cisco Secure Email Encryption Plug-in 1.2.1-167 from the following component versions:

- Cisco Secure Email Security Plug-in 7.6.2.037
- Cisco Secure Email Encryption Plug-in 1.2.1-158

Note

After you update the Cisco Secure Email Security Plug-in 7.6.2.037, the Cisco Secure Email Security Plug-in will be removed and the Cisco Secure Email Encryption Plug-in will be available instead.

Upgrading the Cisco Secure Email Encryption Plug-in

To upgrade the Cisco Secure Email Encryption Plug-in:

-
- Step 1** Download the Email Encryption Plug-in installer from the Cisco Software Download Center.
 - Step 2** Double-click the *Cisco Email Encryption Plug-in.exe* file.
 - Step 3** In the **Cisco Email Encryption Plug-in Setup** window, select a language, and then click **OK**.
 - Step 4** In the message that appears, click **OK** to start an upgrade. The previous version of the Cisco Secure Email Encryption Plug-in will be removed.
 - Step 5** Click **Next** to continue upgrading the Cisco Secure Email Encryption Plug-in.
 - Step 6** Click **Install** to start installing the latest version.
 - Step 7** Wait until the Setup Wizard installs the Cisco Secure Email Encryption Plug-in, and click **Finish**.
-

Note

If you cannot upgrade the Cisco Secure Email Encryption Plug-in, uninstall all previous versions of the plug-in and then perform a fresh install.

Upgrading from the Cisco Secure Email Security Plug-in to the Cisco Secure Email Encryption Plug-in

To upgrade from the Cisco Secure Email Security Plug-in to the Cisco Secure Email Encryption Plug-in:

-
- Step 1** Download the Email Encryption Plug-in installer from the Cisco Software Download Center.
 - Step 2** Double-click the *Cisco Email Encryption Plug-in.exe* file.
 - Step 3** In the **Cisco Email Encryption Plug-in Setup** window, select a language, and then click **OK**.
 - Step 4** In the message that appears, click **OK** to start an upgrade. The Cisco Secure Email Security Plug-in will be removed and the Cisco Secure Email Encryption Plug-in will be installed.
 - Step 5** Click **Next** to continue upgrading the Cisco Secure Email Encryption Plug-in.
 - Step 6** Click **Install** to start installing the latest version.
 - Step 7** Wait until the Setup Wizard installs the Cisco Secure Email Encryption Plug-in, and click **Finish**.

Note The Cisco Secure Email Security Plug-in will be removed from the Outlook toolbar, and the Cisco Secure Email Encryption Plug-in will be available instead.

Installing Cisco Secure Email Encryption Plug-in 1.2.1

- [Installing the Cisco Secure Email Encryption Plug-in, page 4](#)
- [Performing Mass Installation of Cisco Secure Email Encryption Plug-in, page 4](#)

Installing the Cisco Secure Email Encryption Plug-in

**Note**

Do not use or install the Cisco Secure Email Encryption Plug-in 1.2.1 with the Cisco Secure Email Security Plug-in 7.6.0 or later. If you need the reporting functionality, install both the Cisco Secure Email Encryption Plug-in 1.x and the Cisco Secure Email Reporting Plug-in 1.x.

To install the Cisco Secure Email Encryption Plug-in:

-
- Step 1** Download the Email Encryption Plug-in installer from the Cisco Software Download Center.
 - Step 2** Double-click the *Cisco Email Encryption Plug-in.exe* file.
 - Step 3** In the **Cisco Email Encryption Plug-in Setup** window, select a language, and then click **OK**.
 - Step 4** Click **Next** to start the installation program.
 - Step 5** Click **Install**.
 - Step 6** Wait until the Setup Wizard installs the Cisco Secure Email Encryption Plug-in, and click **Finish**.
-

Performing Mass Installation of Cisco Secure Email Encryption Plug-in

See [Cisco Secure Email Encryption Plug-in 1.2.1 Administrator Guide](#) for instructions on how to perform mass installation of Cisco Secure Email Encryption Plug-in.

Related Documentation

For more information about the Cisco Secure Email Encryption Plug-in, see:

- [Cisco Secure Email Encryption Plug-in 1.2.1 Administrator Guide](#). This guide provides instructions for installing and configuring the Cisco Secure Email Encryption Plug-in, and it may help you to understand how to configure your encryption settings to work with the plug-in settings you configure.
