# Changes in Behavior

| DMARC Aggregate Reports Changes | You can now use the `dmarcconfig` command in the CLI to configure the maximum limit of DMARC aggregate reports that can be generated per day. The default value for the number of DMARC aggregate reports generated per day is 1000, and the maximum value is 50K. It is recommended that you schedule the generation of DMARC aggregate reports during non-peak hours to avoid impact on mail flow. If you generate a higher number of DMARC aggregate reports, you might experience a slight delay in email delivery during non-peak hours for a longer duration. |

## Upgrade Paths

You can upgrade to release 11.0.1-505 from the following versions:

- 9.7.2-065
- 10.0.3-004
- 11.0.1-027

## Known and Fixed Issues

Use the Cisco Bug Search Tool to find information about known and fixed defects in this release.

- [Bug Search Tool Requirements](#), page 2
- [Lists of Known and Fixed Issues](#), page 2
- [Finding Information about Known and Resolved Issues](#), page 3

## Lists of Known and Fixed Issues

Finding Information about Known and Resolved Issues

Use the Cisco Bug Search Tool to find the most current information about known and resolved defects.

Before You Begin
Register for a Cisco account if you do not have one. Go to https://tools.cisco.com/RPF/register/register.do.

Procedure

- **Step 1** Go to https://tools.cisco.com/bugsearch/.
- **Step 2** Log in with your Cisco account credentials.
- **Step 3** Click Select from list > Security > Email Security > Cisco Email Security Appliance, and click OK.
- **Step 4** In Releases field, enter the version of the release, for example, 11.0.1
- **Step 5** Depending on your requirements, do one of the following:
  - To view the list of resolved issues, select Fixed in these Releases from the Show Bugs drop down.
  - To view the list of known issues, select Affecting these Releases from the Show Bugs drop down and select Open from the Status drop down.

Note
If you have questions or problems, click the Help or Feedback links at the top right side of the tool. There is also an interactive tour; to view it, click the link in the orange bar above the search fields.

Additional Information

For more information about a generic Hot Patch release, see the Content Security Release Terminology page at https://supportforums.cisco.com/t5/security-blogs/content-security-release-terminology/ba-p/3104704

Service and Support

Note
To get support for virtual appliances, have your Virtual License Number (VLN) number ready when you call Cisco TAC.

For non-critical issues, you can also access customer support from the appliance. For instructions, see the User Guide or Online Help.
