</table>

Finding Information about Known and Resolved Issues

Use the Cisco Bug Search Tool to find the most current information about known and resolved defects.

Before You Begin

Register for a Cisco account if you do not have one. Go to https://tools.cisco.com/RPF/register/register.do.

Procedure

**Step 1**  
Go to https://tools.cisco.com/bugsearch/.

**Step 2**  
Log in with your Cisco account credentials.

**Step 3**  
Click Select from list > Security > Email Security > Cisco Email Security Appliance, and click OK.

**Step 4**  
In Releases field, enter the version of the release, for example, 11.0

**Step 5**  
Depending on your requirements, do one of the following:

- To view the list of resolved issues, select Fixed in these Releases from the Show Bugs drop down.
- To view the list of known issues, select Affecting these Releases from the Show Bugs drop down and select Open from the Status drop down.
Additional Information

Alert: Linux Kernel Panic Issue after Upgrading

After upgrading to AsyncOS 11.0.0-267 version on x90 models, you might encounter a Linux kernel panic issue on your appliance. This is a known issue.
Defect ID: CSCvf14316.
For more information, see https://bst.cloudapps.cisco.com/bugsearch/bug/CSCvf14316.

Service and Support

To get support for virtual appliances, have your Virtual License Number (VLN) number ready when you call Cisco TAC.

For non-critical issues, you can also access customer support from the appliance. For instructions, see the User Guide or online help.
