</table>
| Handling Unscannable Messages due to decoding errors found during URL Filtering actions | The Cisco Email Security appliance can now handle messages that are not scanned due to decoding errors found during URL Filtering actions. You can configure any of the following actions on such messages through the Security Services > Scan Behavior > Edit Global Settings page in the web interface:  
  - Modify the message subject.  
  - Add a custom header to the message.  
  - Modify the message recipient.  
  - Send the message to alternate destination host.  
  - Quarantine the message.  
For more information, see “Configuring Scan Behavior” chapter in the user guide. |

Upgrade Paths

You can upgrade to release 11-1-2-509 from the following versions:

- 11-1-0-135
- 11-1-1-042
- 11-1-2-023

Known and Fixed Issues

Use the Cisco Bug Search Tool to find information about known and fixed defects in this release.

- Bug Search Tool Requirements, page 2
- Lists of Known and Fixed Issues, page 3
- Finding Information about Known and Resolved Issues, page 3

Bug Search Tool Requirements

Register for a Cisco account if you do not have one. Go to https://identity.cisco.com/ui/tenants/global/v1.0/enrollment-ui.

Finding Information about Known and Resolved Issues

Use the Cisco Bug Search Tool to find the most current information about known and resolved defects.

Before You Begin
Register for a Cisco account if you do not have one. Go to https://identity.cisco.com/ui/tenants/global/v1.0/enrollment-ui.

Procedure

Step 1 Go to https://tools.cisco.com/bugsearch/.
Step 2 Log in with your Cisco account credentials.
Step 3 Click Select from list > Security > Email Security > Cisco Email Security Appliance, and click OK.
Step 4 In Releases field, enter the version of the release, for example, 11.1.0
Step 5 Depending on your requirements, do one of the following:
   - To view the list of resolved issues, select Fixed in these Releases from the Show Bugs drop down.
   - To view the list of known issues, select Affecting these Releases from the Show Bugs drop down and select Open from the Status drop down.

Note
If you have questions or problems, click the Help or Feedback links at the top right side of the tool. There is also an interactive tour; to view it, click the link in the orange bar above the search fields.

Additional Information

Service and Support

Note

To get support for virtual appliances, have your Virtual License Number (VLN) number ready when you call Cisco TAC.

For non-critical issues, you can also access customer support from the appliance. For instructions, see the User Guide or Online Help.
