Upgrade Paths

You can upgrade to release 8.0.1-108 from the following versions:

- 8.0.1-023
- 8.0.1-107

Resolved Issues

Click a Defect ID in the table for more information about the defect.

Defect ID	Description
CSCun21348	Rules from RSA Enterprise Management (EM) Server are not getting applied intermittently, and DLP stops scanning outbound messages. Mail logs do not show any DLP verdicts.
CSCuo25329	Machines installed with OpenSSL 1.0.1g patch fail to connect with Cisco Email Security Appliance.

Known Issues

Defect ID	Description
CSCuo97941	Some messages are not encrypted as expected. This can occur if "TLS Required - Verify Hosted Domains" is enabled for the Destination Domain and the destination Mail Transfer Agent (MTA) does not offer STARTTLS. Workaround: Do not enable "TLS Required - Verify Hosted Domains."

Additional Information

For additional information about Cisco AsyncOS for Email Security Appliances, see the Release Notes for your release at http://www.cisco.com/en/US/products/ps10154/prod_release_notes_list.html.

Service and Support

For service and support information for Cisco Content Security appliances, see:

- http://www.cisco.com/en/US/support/tsd_cisco_worldwide_contacts.html
- http://www.cisco.com/en/US/products/ps11169/serv_group_home.html#~Support

If you purchased support through a reseller or another supplier, please contact that supplier directly with your product support issues.

For noncritical questions and issues, you can also submit a customer support request from the appliance. For instructions, see the User Guide or online help.
