What’s New In Cisco Domain Protection

Cisco is always working to improve the Cisco Domain Protection product, from fixing issues to improving existing features to adding new features. The following release versions explains the feature changes in Cisco Domain Protection, as well as documentation updates not necessarily related to product features.

- April 2020 Release Updates, page 1
- March 2020 Release Updates, page 2
- February 2020 Release Updates, page 2

April 2020 Release Updates

- A new Executive Reports page provides at-a-glance reports for several key facets of your domain infrastructure. See "Executive Overview" on page 97.
March 2020 Release Updates

- This update includes just some minor documentation bug fixes.

February 2020 Release Updates

This update includes the following improvements to the Domain Protection documentation:

- Corrections were made to the roles that can be assigned to users. One role was renamed, and a new role was added and documented. See "User Account Settings" on page 132.
- The Domain Protection Threat Feed functionality is now documented. See "Threat Feed" on page 112.
- How you can search the Domain Protection audit trail is now documented. See "Search Organization Activity" on page 128.

Service and Support

Note: To get support for virtual appliances, have your Virtual License Number (VLN) number ready when you call Cisco TAC.

For non-critical issues, you can also access customer support from the appliance. For instructions, see the User Guide or online help.
Any Internet Protocol (IP) addresses and phone numbers used in this document are not intended to be actual addresses and phone numbers. Any examples, command display output, network topology diagrams, and other figures included in the document are shown for illustrative purposes only. Any use of actual IP addresses or phone numbers in illustrative content is unintentional and coincidental.
