

Compatibility Matrix for Cisco Secure Email and Web Manager

Published: March 28, 2013

Revised: May 05, 2021

Contents

- [General Compatibility Information, page 1](#)
- [Compatibility with Email Security Appliances, page 2](#)
- [Compatibility with Web Security Appliances, page 7](#)
- [Additional Information, page 71](#)

General Compatibility Information

Each release of the Cisco Content Security Management Appliance (SMA) is compatible with several releases of the Email Security appliance (ESA) and several releases of the Web Security appliance (WSA).

A feature is supported on the Security Management appliance only when it is supported on the associated Email Security appliance or Web Security appliance. However, see [Support for Cloud Web Security Connector, page 70](#).

If an older Security Management appliance release manages supported newer Email or Web Security appliance releases, it generally does not support the new features that are available on those newer-release managed appliances.

The compatibility tables below assume that you have the latest build for each version. For example, if 7.9.0-201 is the latest build for version 7.9.0, you should have build 201, not build 107. This applies to Security Management appliances and associated Email and Web Security releases.

Compatibility With Virtual Appliances

The management appliance does not distinguish between managed appliances that run on physical (hardware) and those that are virtual appliances.

Compatibility with Email Security Appliances

Release	ESA 10.x	ESA 11.x	ESA 12.x	ESA 13.x	ESA 14.x

Centralized Configuration Management

- [Advanced File Publishing, page 32](#)
- [Configuration Masters, page 32](#)

Advanced File Publishing

For Advanced File Publishing, the file to be published must be saved from a Web Security appliance running the identical version as the target Web Security appliance, including build number. For example, you can use Advanced File Publishing to publish a WSA 7.1.4-999 configuration file to a WSA running 7.1.4-999.

Configuration Masters

You can import configuration files from Web Security appliances into Configuration Masters on the Security Management appliance and publish Configuration Masters to Web Security appliances as follows:

- [Configuration Master Compatibility for SMA 11.0.0-060 and later, page 33](#)
- [Configuration Master Compatibility for SMA 10.1.0-052 and earlier, page 64](#)

1. Advanced publishing of a 10.1 XML file to a WSA running AsyncOS 10.5 is not supported.

Support for Cloud Web Security Connector

Security Management appliances do not support Web Security appliances running in Cloud Web Security Connector mode.

Additional Information

For additional information about your release of AsyncOS for Cisco Content Security Management, see the Release Notes at

<http://www.cisco.com/c/en/us/support/security/content-security-management-appliance/products-release-notes-list.html>.
