

Release Notes for the Cisco ISA500 Series Integrated Security Appliances Firmware Version 1.1.13

November 2012

These Release Notes describe important information and known issues for firmware version 1.1.13 .

IMPORTANT:

As with any firmware release, please read these release notes before upgrading the firmware.

- You should install the latest available firmware when setting up a newly purchased device.
- Upgrade your firmware when a new version is available.
- As a standard practice, you should back up your configuration before any firmware upgrade.

Contents

This document includes the following topics:

- [Important Notes](#)
- [Known Issues](#)
- [Related Information](#)

Important Notes

- The ISA500 Series Configuration Utility supports the following web browsers:
 - Microsoft Internet Explorer 8 and 9
 - Mozilla Firefox 3.6.x, 5, and 6
- Please update the Anti-Virus and IPS signatures to the latest version when using the Anti-Virus and IPS features. For more information, see the *Cisco ISA500 Series Integrated Security Appliance Administration Guide* or the help pages for Security Services > Anti-Virus > General Settings and Security Services > Intrusion Prevention (IPS) > IPS Policy and Protocol Inspection.
- The following Cisco AnyConnect Security Mobility Client Software versions are recommended with the ISA500 and are available on the Cisco ISA500 product documentation and software CD.
 - anyconnect-EnableFIPS-win-3.0.2052.exe
 - anyconnect-linux-3.0.2052-EnableFIPS.tar.gz
 - anyconnect-linux-64-3.0.2052-EnableFIPS.tar.gz
 - anyconnect-macosx-i386-3.0.4235-EnableFIPS.tar.gz
 - anyconnect-macosx-i386-3.0.4235-k9.dmg
 - anyconnect-predeploy-linux-3.0.2052-k9.tar.gz
 - anyconnect-predeploy-linux-64-3.0.2052-k9.tar.gz
 - anyconnect-win-3.0.2052-pre-deploy-k9.iso
- Some Firefox add-ons and plug-ins are incompatible with the firmware. If you are using Firefox, Cisco recommends disabling the following add-ons and plug-ins before installing firmware:
 - Adblock Plus (add-on)
 - bitcomentAgent (plug-in)
 - WinZipBar (browser toolbar)

Known Issues

The following table lists the known issues in version 1.1.13 . As with any upgrade, review these known issues before upgrading the firmware.

Reference Number	Issue
CSCua43844	The Usage Report may display the public IP addresses instead of the private IP addresses on the LAN. Typically this issue occurs after topology changes, especially for WAN Interfaces.
CSCuc40174	Interaction between Spanning Tree Protocol (STP) and Cisco Discovery Protocol (CDP) can cause a traffic outage when STP blocks a port due to a physical loop in the network. Work Around: Remove the physical loop, or disable STP, CDP, or both features.
CSCuc47788	The Bandwidth Usage Report by IP Address displays the server's public IP address instead of the SSLVPN client's IP address.
CSCuc89697	Sometimes a mobile phone using AnyConnect Mobile Client loses connectivity.
CSCud06033	When the VRRP priority is changed, the update is not sent to the PC. For example, after adjusting the priority to make one router act as a backup, both routers may act as the master. Work Around: Disable STP.
CSCud10160	UPNP processes may cause the CPU to run at 100%. Work Around: Open the Device Management > Discovery Protocols > UPnP page, disable UPnP, and then enable it again.
CSCub91801	With AnyConnect 3.1.00496 or above releases, SSL VPN connection may fail during MTU renegotiation. Work Around: Change the MTU size to default value of 1500 on the PC.
