## Product Overview

Cisco Smart Net Total Care Service™ is designed for IT support operations, including IT managers, network administrators, contract administrators, and others who are responsible for managing the risk to ongoing business continuity. Secure, automated visibility of the Cisco products on your network, combined with Cisco's expertise and deep knowledge base, delivers the up-to-date information you need to make informed decisions about supporting your Cisco products.

A powerful and secure web portal, with customizable dashboard and reports, delivers actionable information and insights about your network. The Smart Net Total Care portal provides access to product lifecycle information, Cisco service coverage status, product and security alerts, and bugs that may be impacting the network. The portal helps you resolve problems more quickly, mitigate risk, and improve the efficiency of your support workflows.

## New and Changed Information

This section provides a brief description of what is new or changed in this release:

- **Reporting Enhancement**

A new column (CCM Name) has been added to the **All Hosts** report to give you a clearer way to identify Call Manager information. The new field will display the Call Manager name that was entered in the Call Manager software (and that was previously displayed in the Hostname field). The Hostname for the Call Manager software will now be the same as the Hostname for the device hardware. You can choose to display the new column; it is not displayed by default.

## Reminders

### Please Take Action:

- Cisco services such as Smart Net Total Care, which require user management, have introduced a new position, Delegated Administrator (DA). If you have not already selected a DA for your company, you need to take action to continue to control portal user access. The DA should be someone who is typically responsible for managing users in your organization. For more information about the Delegated Administrator role and responsibilities see this short How-To video.
- To be able to view data in the portal, your company must have performed a file import or completed at least one recent collection upload. If you are using a collector to gather your device data, ensure that you do an upload. If you continue to have problems take action based on your contract support status. You can find details on contacting support in the "Useful Links" page in the portal.

## Collector Versions supported with Smart Net Total Care

This section covers the versions for the:

- [Cisco Software Collector](#)
- [VMware Virtualization Platform](#)

**Note:** The Smart Net Total Care portal contains material about deploying, registering and configuring the software collector and a link to the download center.

The [PID Checker tool](#) has been updated to reflect the devices supported in the Smart Net Total Care portal. The latest version of the Smart Net Total Care CSPC collector software supports Rules Package 4.6. If you are not using the latest collector version, we encourage you to upgrade your collector software to take advantage of more comprehensive device data collection and reporting.

# CISCO SYSTEMS

## Cisco Software Collector

Following are the supported versions of Collector Software that are certified with Smart Net Total Care 4.x:

- CSPC 2.6 and 2.6.4 + RP 4.4
- CSPC 2.7.X

## VMware Virtualization Platform

These are the minimum system requirements for the collector image that runs on the VMware platform:

- 40 GB of hard drive space
- 2 CPU cores with 64-bit support (virtual CPUs)
- 1 virtual GB NIC (number of NICs required is dependent upon the network topology)
- 2 GB of virtual RAM

## Supported Browsers

- Chrome: version 50.x on Windows 7 and Mac OS X (Preferred Browser)
- Firefox: version 45.0.1 on Windows 7 and Mac OS X
- Microsoft Internet Explorer: version 11 on Windows 7
- Microsoft Edge: version 13 on Windows 10
- Safari: version 9.1.1 on Mac OS 10.11.x

## Resolved Defects

The following defects are fixed, closed, and verified:

Customer and Field Facing Fixed Defects		
Bug ID	Corrected	Description
CSCvg49520	4.3 07/11/18	<b>Problem:</b> In Inventory by Sites report, certain sites needed site verification. <b>Fix:</b> The site information is validated in the backend now.
CSCvg76410	4.3 07/11/18	<b>Problem:</b> After reviewing the latest view at the portal, customers/partners were not able to find the Wireless controller devices that was collected during the latest collection/upload cycle. <b>Fix:</b> This issue is now resolved.
CSCvi97353	4.3 07/11/18	<b>Problem:</b> Certain devices were missing under Covered Report. <b>Fix:</b> This issue is now resolved.
CSCvj06905	4.3 06/27/18	<b>Problem:</b> For certain PID, numeric values were displayed <b>Fix:</b> The PID displays appropriate values now.
CSCvj41720	4.3	<b>Problem:</b> For certain customer, uploads failed. <b>Fix:</b> This issue is now resolved.

## CISCO SYSTEMS

<b>CSCvj42712</b>	4.3 06/27/18	<b>Fix:</b> In SNTC portal, customer admin/customer user were able to view the contracts that do not cover them. <b>Problem:</b> This issue is now resolved.
<b>CSCvj52933</b>	4.3	<b>Problem:</b> IP phone inventory collected under CCME MIBs' did not process in SNTC portal <b>Fix:</b> This issue is now resolved.
<b>CSCvj78507</b>	4.3.3 07/13/18	<b>Problem:</b> Schedule report with space in the report name, was downloaded with generic names instead of actual names. <b>Fix:</b> The Schedule report now appears with actual names.
<b>CSCvj79298</b>	4.3 06/27/18	<b>Problem:</b> Serial number (module) does not display under Custom Inventory report, however reported under Duplicates. <b>Fix:</b> The serial number (module) displays under All Equipment and Custom Inventory report.
<b>CSCvj80926</b>	4.3 06/27/18	<b>Problem:</b> Incorrect entry reported in Alerts LNP for a deleted device. <b>Fix:</b> This issue is now resolved.
<b>CSCvj86874</b>	4.3 06/27/18	<b>Problem:</b> For certain customer, contract details were missing. <b>Fix:</b> This issue is now resolved.
<b>CSCvk03908</b>	4.3.3 07/13/18	<b>Problem:</b> Data type for the CVSS Base Score column was not set to numeric value, which resulted in sorting issues. <b>Fix:</b> This issue is now resolved.
<b>CSCvk07593</b>	4.3.3 07/13/18	<b>Problem:</b> For certain customers, manual file import issues were reported. <b>Fix:</b> This issue is now resolved.
<b>CSCvk14622</b>	4.3.3 07/13/18	<b>Problem:</b> Certain customer was not able to add notes to LDoS devices due to special character in CCO id. <b>Fix:</b> The customer is now able to add notes to LDoS devices.
<b>CSCvk22687</b>	4.3 07/11/18	<b>Problem:</b> The Alert Processing email notification failed to display alerts <b>Fix:</b> The Alert Processing email notification now displays appropriate alerts.
<b>CSCvk23516</b>	4.3 08/10/18	<b>Problem:</b> The PSIRT alerts did not show for devices, which are running on vulnerable PID and Software versions. <b>Fix:</b> This issue is now resolved.

## Known Issues

The following defects are the known issues:

<b>Bug ID</b>	<b>Description</b>
<b>CSCVa16522</b>	<b>Problem:</b> The Custom Inventory online report, takes more time than expected to load. <b>Workaround:</b> None.
<b>CSCVc16629</b>	<b>Problem:</b> Customer administrators may not be able to modify Segments, when also added as Segment user. <b>Workaround:</b> Remove Customer administrator from Segment access list.
<b>CSCVf14637</b>	<b>Problem:</b> All Hosts tab takes more time than expected to load the count and data for customers with more devices. <b>Workaround:</b> None.
<b>CSCVh75091</b>	<b>Problem</b> For certain users, when generating Inventory Collection Delta offline reports, the upload time stamp does not show in snapshots. <b>Workaround:</b> None.
<b>CSCVi64527</b>	<b>Problem:</b> Under cluster configuration the call managers are reported multiple times. <b>Workaround:</b> None.
<b>CSCVk14247</b>	<b>Problem:</b> Inventory details are missing from Inventory Restored with New Collection Action report. <b>Workaround:</b> None.
<b>CSCVk16465</b>	<b>Problem:</b> In Inventory by Product there might be some performance issues. <b>Workaround:</b> None.

## Resources

The following are the resources that are used in the Smart Net Total Care services.

### Smart Net Total Care Support Site

Visit our [Support for Smart Net Total Care](#) pages for documentation, training and more including getting started with Smart Net Total Care, using the portal and support for SNTC-supported collectors.

### Smart Net Total Care Support Community

[Access the community](#) link for relevant Smart Net Total Care, announcements and discussions. This online resource is available 24/7. Need help accessing the community? Please email us at [sntcaccess@cisco.com](mailto:sntcaccess@cisco.com) for help.

### Service and Support

Use the following URL to contact service and support:
