# Introduction

This document provides information to the systems engineers and customers about the actual functional and performance capabilities of the product delivered to the customer.

This document is the release notes for Smart Call Home 4.2.8.2 that describes the caveats in this release.

Cisco® Smart Call Home is an award-winning, embedded support feature available with Cisco SMARTnet® and other qualifying service offers. It is available at no additional cost for a broad range of Cisco network devices.

## Operational and Business Benefits

Problems are often identified and resolved before they affect your business. Smart Call Home provides the following operational and overall business benefits:

- Higher availability as a result of proactive, fast issue resolution
- Increased operational efficiency through less time troubleshooting
- Quick and convenient web-based access to personalized information

## Feature Enhancement

This section provides a brief description of what is new or changed in this release:

- Multiple fixes that address the display of bug and some third-party software vulnerabilities have been resolved.

# Resolved Defects

<i>Table 1 Resolved Defects Corrected Reference</i>	
<b>SCH Software Release 4.2.8.2</b>	
<b>ID</b>	<b>Details</b>
<b>CFD</b>	
CSCvw27935	SCH Portal was consistently slow/non-responsive and navigating through portal was typically logging out the user.

# Acronym Definitions

IMC – Integrated Management Controller

ISE – Identity Service Engine

LAE – Lightweight Application Environment

PSS – Partner Support Service
