Introduction

- This document provides information to the systems engineers about the actual functional and performance capabilities of the product delivered to the customer.
- This document is the release notes for SCH TG 4.1.7 which describes system requirements, new features in this release and caveats.
- Cisco® Smart Call Home is an award-winning, embedded support feature available with Cisco Smart Net Total Care® and other qualifying service offers. It is available at no additional cost for a broad range of Cisco network devices.

Operational and Business Benefits

- Problems are often identified and resolved before they affect your business. Smart Call Home provides the following operational and overall business benefits:
- Higher availability as a result of proactive, fast issue resolution
- Increased operational efficiency through less time troubleshooting
- Quick and convenient web-based access to personalized information

Enhancements

The following enhancements are made in the release:

- Performance improvements
- Fixes for security compliance issues
- Default HTTP Messagestore and MailStore sizes are increased from 20 MB to 200 MB. An email will be triggered if the size exceeds the maximum limit.

Important Notes

The following list describes acronyms and definitions for terms used throughout this document:

- **DoS:** Denial of Service
- **TAC:** Technical Assistance Centre
- **TG:** Transport Gateway
- **PSIRT:** Product Security Incidence Response Team
- **SL:** Smart Licensing
- **SR:** Service Request
