Chapter 1

Introduction
About this guide

This guide introduces you to the Application Programming Interface (API) for the Collaboration Endpoint software, and serves as a reference guide for the command line commands.

The guide describes the API for on-premise registered video systems (CUCM, VCS) as well as video systems registered to Cisco’s cloud service (Cisco Webex).

Which commands are available depends on the product, the back-end (on-premise, cloud), and the user role of the local user (admin, audit, integrator, roomcontrol, user). To get an overview of the commands, see the “Supported commands matrix” on page 401.

This guide applies to the following products:

- **DX Series:**
  - DX70
  - DX80
- **MX Series:**
  - MX200 G2
  - MX300 G2
  - MX700
  - MX800
- **SX Series:**
  - SX10 Quick Set
  - SX20 Quick Set
  - SX80 Codec
- **Room Series:**
  - Room Kit
  - Room Kit Mini
  - Codec Plus
  - Codec Pro
  - Room 55
  - Room 55 Dual
  - Room 70
  - Room 70 G2

Downloading the user documentation

You can download the user documentation from the Cisco web site, go to:

→ https://www.cisco.com/go/telepresence/docs

For Cisco Webex registered devices, go to:

→ https://help.webex.com

Guidelines for how to find the documentation on the Cisco web site are included in the → User documentation on the Cisco web site appendix.

1 Included in Room Kit Plus and Room Kit Plus Precision 60
2 Included in Room Kit Pro and Room Kit Pro Precision 60
What’s new in CE9.7

This section provides an overview of the new and changed system settings, and the new features and improvements in the Cisco Collaboration Endpoint software version 9.7 (CE9.7) compared to CE9.6.

For more details, we recommend reading the Software release notes:

New features and improvements in CE9.7

**Connect to xAPI over a WebSocket (All products)**

You can now connect to the xAPI over WebSocket. The communication channel over WebSocket is open both ways until it is explicitly closed. This means that the server can send data to the client as soon as the new data is available, and there is no need for re-authentication for every request. This improves speed significantly compared to HTTP.

Each message contains a complete JSON document and nothing else. Many programming languages have good library support for WebSocket and JSON-RPC.

WebSocket is not enabled by default. Note that WebSocket is tied to HTTP and HTTP or HTTPS must be enabled before you can use WebSocket.

For more information, see xAPI over WebSocket guide.

**Graphical sound mixer available on Audio Console (Codec Pro, MX700, MX800, Room 70 G2, Room 70D G2, SX80)**

The Audio Console now has a graphical sound mixer. It has 8 user-definable parametric equalizer settings. A setting consists of up to 6 sections, each of which has its own filter type, gain, center/crossover frequency and Q value. Each section is shown with its own color and the effect of altering any of the parameters immediately becomes visible in the graph.

For more information, see the Customization guide for CE9.7 at https://www.cisco.com/go/in-room-control-docs

**Ambient noise reporting (Codec Plus, Codec Pro, Room 55, Room 55 Dual, Room 70, Room 70 G2, Room Kit, Room Kit Mini)**

The Room series devices can be configured to report the stationary ambient noise level in the room. The reported value is an A-weighted decibel value (dBA), which reflects the response of the human ear. Based on reported noise, facility management or a building manager can intervene to troubleshoot the issue.

All signal processing related to this feature is local and the only data transmitted is the calculated noise level.

**Support for multiple SRG-120DH/PTZ-12 cameras (Codec Plus)**

You can now connect up to three SRG-120DH/PTZ-12 cameras to a Codec Plus using an HDMI and an Ethernet switch.

**Other updates**

- 1080p support for Room Kit Mini when it is used as a USB camera. (Room Kit Mini)
- You can turn video off and on during calls. (All products)
- A system administrator can prevent the use of HTTP and only allow HTTPS Post and HTTPS Put requests. (All products)
xConfiguration changes in CE9.7

New configurations

CallHistory Mode (All products)

Conference Multipoint Mode (Codec Pro, Codec Plus, MX200 G2, MX300 G2, MX700, MX800, Room Kit, Room Kit Mini, Room 55, Room 55D, Room 70, Room 70 G2, SX20, SX80)

HttpContext AllowHTTP (All products)

Logging External Mode (All products)

Logging External Protocol (All products)

Logging External Server Address (All products)

Logging External Server Port (All products)

Logging Internal Mode (All products)

NetworkServices Websocket (All products)

Phonebook Server [1] Pagination (All products)

RoomAnalytics AmbientNoiseEstimation Mode (Codec Plus, Codec Pro, Room Kit, Room Kit Mini, Room 55, Room 55D, Room 70, Room 70 G2)

SIP ANAT (All products)

UserInterface Features Call VideoMute (Codec Plus, Codec Pro, MX200 G2, MX300 G2, MX700, MX800, Room Kit, Room Kit Mini, Room 55, Room 55D, Room 70, Room 70 G2, SX10, SX20, SX80)

UserInterface Features Whiteboard Start (DX70, DX80)

UserInterface Phonebook Mode (All products)

UserInterface SettingsMenu Visibility (All products)

UserInterface UsbPromotion (Room Kit Mini)

Video Presentation Priority (All products)

Configurations that are modified

Audio Input Line [1..4] VideoAssociation VideoInputSource (MX700, MX800, SX80)

OLD: 1 / 2 / 3 / 4 / 5
NEW: 1 / 2 / 3 / 4

Audio Input Microphone [1..8] VideoAssociation VideoInputSource (Codec Pro, Room 70 G2)

OLD: 1 / 2 / 3 / 4 / 5
NEW: 1 / 2 / 3 / 4 / 5 / 6

Audio Input Microphone [1..8] VideoAssociation VideoInputSource (MX700, MX800, SX80)

OLD: 1 / 2 / 3 / 4 / 5
NEW: 1 / 2 / 3 / 4

Video Input Connector [6] CameraControl Mode (Codec Pro, Room 70 G2)

OLD: Default: On
NEW: Default: Off
OLD: On
NEW: On / Off

Configurations that are removed

RoomAnalytics PeopleCountOutOfCall (MX700, MX800)
xCommand changes in CE9.7

New commands
Audio Diagnostics Advanced Run (All products)
Audio Setup Reset (Codec Pro, MX700, M800, Room 70 G2, SX80)
Conference Call AuthenticationResponse (All products)
Conference Participant Admit (All products)
Conference Participant Disconnect (All products)
Conference Participant Mute (All products)
Conference ParticipantList Search (All products)
UserInterface Extensions Panel Open (All products)
UserInterface Extensions Panel Update (All products)
Video Input MainVideo Mute (All products)
Video Input MainVideo Unmute (All products)
Video Matrix Assign (Room 55D, Room 70)
Video Matrix Reset (Room 55D, Room 70)
Video Matrix Swap (Room 55D, Room 70)
Video Matrix Unassign (Room 55D, Room 70)

Commands that are modified
Audio LocalOutput Add (Codec Pro, MX700, M800, Room 70 G2, SX80)
   NEW: AutoconnectRemote: On/Off, Default: On
   OLD: VolumeControlled, Default: undefined
   NEW: VolumeControlled, Default: Off

Audio LocalOutput Update (Codec Pro, MX700, M800, Room 70 G2, SX80)
   NEW: AutoconnectRemote: On/Off

CallHistory Get (All products)
   OLD: CallHistoryId: Integer (0..65534)
   NEW: CallHistoryId: Integer (1..2147483647)

HttpClient Post (All products)
   NEW: Timeout: Integer (1..30), Default: 30

HttpClient Put (All products)
   NEW: Timeout: Integer (1..30), Default: 30

UserInterface Message TextInput Display (All products)
   NEW: InputText: String (0, 255), Default: **
xStatus changes in CE9.7

New statuses
- Audio Output LocalOutput [n] AutoconnectRemote (Codec Pro, MX700, MX800, Room 70 G2, SX80)
- Call [n] Ice (All products)
- Conference Call [n] AuthenticationRequest (All products)
- NetworkServices UPnP Status (All products)
- Peripherals ConnectedDevice [n] SerialNumber (All products)
- Provisioning CUCM Customization Checksum (All products)
- RoomAnalytics AmbientNoise Level dBA (Codec Plus, Codec Pro, Room Kit, Room Kit Mix, Room 55, Room 55D, Room 70, Room 70 G2)
- UserInterface Features Whiteboard Start (DX70, DX80)
- UserInterface Settings Menu Visibility (All products)
- Video Input Main Video Mute (All products)

Statuses that are modified
- Diagnostics Message [n] Type (All products)
  - Added to valuespace: PIILoggingMode / WebexAudioProximityConnectivity / WebexLyraConnectivity / WebexNotificationConnectivity
- Video Input Connector [n] Type (All products)
  - OLD: 3G-SDI / Camera / Composite / DVI / HD-SDI / HDMI / USB / Unknown / VGA / YC / YPbPr
  - NEW: 3G-SDI / Camera / Composite / DVI / HD-SDI / HDMI / USB / Unknown / VGA / YC / YPbPr / USBC-DP
What’s new in CE9.6

This section provides an overview of the new and changed system settings, and the new features and improvements in the Cisco Collaboration Endpoint software version 9.6 (CE9.6) compared to CE9.5.

For more details, we recommend reading the Software release notes:

**New features and improvements**

**HDCP support** *(Codec Plus, Codec Pro, Room 55 Dual, Room 70, Room 70 G2)*

One of the video system’s HDMI inputs can be configured to support HDCP (High-bandwidth Digital Content Protection) protected content. This allows customers to re-purpose the screen by connecting devices such as a Google Chromecast, an Apple TV, or an HDTV decoder. This type of content cannot be shared while in a call.

When the connector is configured to support HDCP, it is reserved for this type of content. This means that you cannot share any content from this specific connector while in a call, not even non-protected content from a laptop.

**Remove default buttons from the user interface** *(All products)*

If you don’t need all of the default buttons on the user interface, you can remove the ones that you don’t need. This makes it possible to fully customize the user interface. The configuration only removes the buttons, not the functionality as such, and the custom In-Room Control panels can still be exposed.

For more information, see the Customization guide for CE9.6 at [https://www.cisco.com/go/in-room-control-docs](https://www.cisco.com/go/in-room-control-docs)

**Support for 3rd party USB controllers** *(Codec Plus, Codec Pro, DX70, DX80, Room 55, Room 55 Dual, Room 70, Room 70 G2, Room Kit)*

You can use a 3rd party USB input device to control certain functions on a room device. A Bluetooth remote control with a USB dongle and a USB keyboard are examples of such input devices. You can setup the desired features through macros.

This feature is meant to complement the functionality of the Touch 10 or the DX user interfaces. It is not meant to replace the Touch 10 and DX user interfaces.

For more information, see the Customization guide for CE9.6 at [https://www.cisco.com/go/in-room-control-docs](https://www.cisco.com/go/in-room-control-docs)

**HTTP Post and Put requests** *(All products)*

This feature makes it possible to send arbitrary HTTP(S) Post and Put requests from a device to an HTTP(S) server.

By using macros, you can send data to an HTTP(S) server whenever you want. You can choose what data to send, and structure them as you like. This way you can adapt the data to an already established service.

Security measures:

- The HTTP(S) Post/Put feature is disabled by default.
- The system administrator can specify a list of HTTP(S) servers that the device is allowed to send data to.
- The number of concurrent Post and Put requests is limited.

**Content priority** *(All products)*

You can now configure your device to prioritize bandwidth usage for either Main Video Channel or Presentation Channel.

xConfiguration Video Presentation Priority: <Equal, High>

Equal is the default configuration and means 50 / 50 bandwidth division. Selecting "High" divides the bandwidth 25 / 75 in favor of the presentation channel.

**Other updates** *(All products)*

- You can start and control recording meetings from the device’s user interface, provided that recording is supported by your infrastructure.
- Edit favorite contact’s information on Touch 10 controller.
- SIP calls now display the SIP Session ID field in the logs to help identify calls.
- Ability to use ICE over MRA to locate the best path for media.
xConfiguration changes in CE9.6

New configurations

Audio Input Microphone [1..8] Channel (Codec Pro, Room 70 G2)

Audio Input HDMI [n] Level (Codec Plus, Room 55, Room 70 G2, Room Kit)

Audio Input HDMI [n] Mode (Room 70 G2, Room Kit)

Audio Input HDMI [2..5] VideoAssociation MuteOnInactiveVideo (Room 70 G2)

Audio Microphones PhantomPower (Codec Plus, MX200 G2, MX300 G2, Room 55, Room Kit, SX20)

Audio Output ConnectorSetup (Codec Pro, Room 70 G2)

Audio Output HDMI [n] Level (MX700, MX800)

Audio Output HDMI [n] Mode (Codec Plus, MX700, MX800)

Audio Output InternalSpeaker Mode (MX700, MX800, Room 55 Dual, Room 70)

Audio Output Line [1..6] Equalizer ID (Room 70 G2)

Audio Output Line [1..6] Equalizer Mode (Room 70 G2)

Audio Output Line [1..6] Equalizer Volume (Room 70 G2)

Audio Ultrasound MaxVolume (SX20)

NetworkServices NTP Server [1..3] Key (All products)

NetworkServices NTP Server [1..3] KeyId (All products)

NetworkServices NTP Server [1..3] KeyAlgorithm (All products)

Peripherals InputDevice Mode (Codec Plus, Codec Pro, DX70, DX80, Room 55, Room 55 Dual, Room 70, Room 70 G2, Room Kit)

UserInterface Branding AwakeBranding Colors (All products)

UserInterface Features Call End (All products)

UserInterface Features Call MidCallControls (All products)

UserInterface Features Call Start (All products)

UserInterface Features HideAll (All products)

UserInterface Features Share Start (All products)

Video Input Connector [n] HDCP Mode (Codec Plus, Codec Pro, Room 55 Dual, Room 70, Room 70 G2)

Video Output Connector [2] CEC Mode (Room 70 Single)

Configurations that are modified

Audio Output ARC [1] Mode (Codec Pro, Room 70 G2)

OLD: Default: Auto

NEW: Default: On

OLD: Off / On / Auto

NEW: Off / On

Audio Output HDMI [1..3] Mode (Codec Pro, Room 70 G2)

OLD: Default: Auto (Codec Pro)

NEW: Default: On (Codec Pro)

OLD: Default, HDMI [2..3]: Auto (Room 70 G2 Single)

NEW: Default, HDMI [2..3]: Off (Room 70 G2 Single)

OLD: Default, HDMI [3]: Auto (Room 70 G2 Dual)

NEW: Default, HDMI [3]: Off (Room 70 G2 Dual)

OLD: Off / On / Auto

NEW: Off / On

Audio Output InternalSpeaker Mode (Room 55, Room 70 G2, Room Kit)

OLD: Default: Auto (Room 70 G2)

NEW: Default: On (Room 70 G2)

OLD: Off / On / Auto (Room 70 G2)

NEW: Off / On / UltrasoundOnly (Room 70 G2)

OLD: Off / On (Room 55, Room Kit)

NEW: Off / On / UltrasoundOnly (Room 55, Room Kit)

Audio Ultrasound MaxVolume (SX20)

OLD: Default: 70

NEW: Default: 60

Provisioning Mode (All products)

OLD: Auto / CUCM / Edge / Off / TMS / VCS / Spark

NEW: Auto / CUCM / Edge / Off / TMS / VCS / Webex

Provisioning Mode (Room 55 Dual)

OLD: Default: Off

NEW: Default: On
Standby WakeupOnMotionDetection *(Room 55 Dual)*

**OLD:** Default: Off

**NEW:** Default: On

Configurations that are removed

Conference MultiStream Mode *(MX200 G2, MX300 G2, SX20)*
xCommand changes in CE9.6

**New commands**
- Conference Recording Pause *(All products)*
- Conference Recording Resume *(All products)*
- Conference Recording Start *(All products)*
- Conference Recording Stop *(All products)*
- HttpClient Allow Hostname Add *(All products)*
- HttpClient Allow Hostname Clear *(All products)*
- HttpClient Allow Hostname List *(All products)*
- HttpClient Allow Hostname Remove *(All products)*
- HttpClient Post *(All products)*
- HttpClient Put *(All products)*

**Commands that are modified**

**Audio Sound Play** *(All products)*
- OLD: Sound (r): Alert / Binding / Bump / Busy / CallDisconnect / CallInitiate / CallWaiting / Dial / KeyInput / KeyInputDelete / KeyTone / Nav / NavBack / Notification / OK / Pairing / PresentationConnect / Ringing / SignIn / SpecialInfo / StartListening / TelephoneCall / VideoCall / VolumeAdjust / WakeUp
- NEW: Sound (r): Alert / Binding / Bump / Busy / CallDisconnect / CallInitiate / CallWaiting / Dial / KeyInput / KeyInputDelete / KeyTone / Nav / NavBack / Notification / OK / Pairing / PresentationConnect / Ringing / SignIn / SpecialInfo / StartListening / TelephoneCall / VideoCall / VolumeAdjust / WakeUp / Announcement

**Audio VuMeter Start** *(DX70, DX80, Codec Plus, Codec Pro, Room 50, Room 70, Room 70 G2, Room Kit, SX10)*
- OLD: ConnectorType (r): HDMI / Microphone / Line
- NEW: ConnectorType (r): HDMI / Microphone

**Audio VuMeter Stop** *(DX70, DX80, Codec Plus, Codec Pro, Room 50, Room 70, Room 70 G2, Room Kit, SX10)*
- OLD: ConnectorType (r): HDMI / Microphone / Line
- NEW: ConnectorType (r): HDMI / Microphone
Video Input

**SetMainVideoSource** *(All products)*

**OLD:** Layout: Equal / PIP

**NEW:**
- Layout: Equal / PIP / Prominent
- PIPPosition: LowerLeft / LowerRight / UpperLeft / UpperRight
- PIPSize: Auto / Large

**Video Matrix Assign** *(All products)*

**NEW:**
- Layout: Equal / Prominent
- RemoteMain: ntegerArray, Max: 4, Min: 1, Step: 1, Multiple: 4

**Video Matrix Unassign** *(All products)*

**OLD:** SourceId (r): Integer, Max: 2, Min: 1, Step: 1

**NEW:**
- SourceId: Integer, Max: 2, Min: 1, Step: 1
- RemoteMain: ntegerArray, Max: 4, Min: 1, Step: 1, Multiple: 4
xStatus changes in CE9.6

New statuses
- Audio Input Connectors HDMI [n] Mute (All products)
- Audio Input Connectors Line [n] Mute (All products)
- Audio Input Connectors Microphone [n] Mute (All products)
- H320 Gateway Address (All products)
- H320 Gateway Id (All products)
- H320 Gateway Mode (All products)
- H320 Gateway Number (All products)
- H320 Gateway Reason (All products)
- H320 Gateway Status (All products)
- MediaChannels Call [n] Channel [n] Audio ChannelRole (All products)
- UserInterface Features Call End (All products)
- UserInterface Features Call MidCallControls (All products)
- UserInterface Features Call Start (All products)
- UserInterface Features Share Start (All products)
- Video Layout Site [n] Frame [n] Mirrored (All products)

Statuses that are removed
- Audio Output Connectors InternalSpeaker [n] DelayMs (Room 55 Dual, Room 70, Room 70 G2)
- Audio Output Connectors InternalSpeaker [n] Mode (Room 55 Dual, Room 70, Room 70 G2)
- Video Mute (All products)

Statuses that are modified
- Audio Output Connectors HDMI [n] Mode (Codec Plus, Codec Pro, Room 55 Dual, Room 70, Room 70 G2, Room Kit)
  - OLD: Off / On
  - NEW: Off / On / DelayMeasurement
What’s new in CE9.5

This section provides an overview of the new and changed system settings, and the new features and improvements in the Cisco Collaboration Endpoint software version 9.5 (CE9.5) compared to CE9.4.

For more details, we recommend reading the Software release notes:

New features and improvements

Presentation source compositing (Codec Plus, Codec Pro, MX200 G2, MX300 G2, MX700, MX800, Room 55, Room 55 Dual, Room 70, Room 70 G2, Room Kit, SX20, SX80)

With using two or more content sources and sending them as one image, you can create a new experience for sharing in meetings.

This gives users more flexibility with what they present to remote sites. You can configure the presentation composition through In-Room Controls together with Macros or an external controller.

The number of sources is determined by the device in use:

- MX200 G2, MX300 G2, Room Kit and SX20: up to two sources
- Room 55, Room 55 Dual, Room 70, Room Kit Plus: up to three sources
- MX700, MX800, Room 70 G2, Room Kit Pro, and SX80: up to four sources

You can only compose content that has been shared through a VGA or HDMI cable.

Web audio console (Codec Pro, SX80)

The new audio console is natively available on the web interface of the high-end integrator devices. The audio console gives you simplified tools to route audio from an input to an output. The new audio console replaces the old java-based CE Console that is no longer maintained.

When you access the audio console for the first time you will see the default system audio routes. The audio console is controlled by an underlying macro which is saved and started once you select Choose to overwrite the current device configurations.

For more information, see the Customization guide for CE9.5 at

https://www.cisco.com/go/in-room-control-docs

Classroom scenario (Codec Plus, Codec Pro, Room 55 Dual, Room 70, Room 70 G2, SX80)

The Classroom mode uses macros to tailor a room setup that works well for presenting and teaching scenarios. The template provides easy setup, maintenance, and use of the room. Classroom works similarly to the existing Briefing Room mode but it doesn’t require three screens.

Support for Korean keyboard (All products)

Korean keyboard input is now supported on Touch 10 controller when the user interface language is set to Korean.

Remote monitoring of screen status (SX20, SX80)

The remote monitoring of screen status that has been available for the Webex Room series and SX10 is now available for SX20 and SX80.

The codec can wake up the screen if it is in standby mode or put the screen to standby when the codec enters standby. The input source can also be changed automatically when a call is received.

CEC is disabled on the video system by default and must be enabled in the Video Output Connector [1] CEC Mode setting. Your screen must support CEC and it has to be enabled on it for remote monitoring to work.

Welcome banner (All products)

You can set up a welcome banner that the user sees after they sign in to the device’s web interface or the command line interface. The banner can for example contain information that the user needs to get started or things they need to be aware of when changing settings.
xConfiguration changes in CE9.5

New configurations
- Audio Input ARC[n] Mode (Codec Pro, Room 70 G2)
- Audio Output ARC[1] Delay DelayMs (Codec Pro, Room 70 G2)
- Audio Output ARC[1] Delay Mode (Codec Pro, Room 70 G2)
- Audio Output ARC[1] Mode (Codec Pro, Room 70 G2)
- Audio Output InternalSpeaker Mode (Room 70 G2)
- Audio Output Line[1] OutputType (Codec Plus, Room 55)
- NetworkServices SSH HostKeyAlgorithm (All products)
- RoomAnalytics PeopleCountOutOfRange (SX80, MX700ST)

Configurations that are removed
- Audio Output InternalSpeaker Mode (Codec Pro)
- Cameras SpeakerTrack ConnectorDetection CameraLeft (Codec Pro, Room 70 G2)
- Cameras SpeakerTrack ConnectorDetection CameraRight (Codec Pro, Room 70 G2)
- Cameras SpeakerTrack ConnectorDetection Mode (Codec Pro, Room 70 G2)
- Cameras SpeakerTrack TrackingMode (Codec Pro, Room 70 G2)

Configurations that are modified
- Audio Input Microphone[1..8] Equalizer ID (Codec Pro, Room 70 G2)
  - OLD: Integer, Max: 14, Min: 1, Step: 14
  - NEW: Integer, Max: 8, Min: 1, Step: 8
- Audio Output Line[1..6] Level (Codec Pro, Room 70 G2)
  - OLD: Default: 0
  - NEW: Default: [1]: ; [2]: 4; [3]: ; [4]: 4; [5]: ; [6]: 4; [7]: ; [8]: 4; [9]: ; [10]: 4; [11]: ; [12]: 4
- Audio Ultrasound MaxVolume (Codec Pro, MX700ST, Room 70 G2, SX80)
  - OLD SX80, Codec Pro, Room 70 G2: Default: 70
  - NEW SX80, Codec Pro, Room 70 G2: Default: 60
  - OLD MX700ST: Default: 70
  - NEW MX700ST: Default: 66
  - OLD Room 70 G2: Integer: 0 – 90
  - NEW Room 70 G2: Integer: 0 – 80
- Video Input Connector[3,4,5] PreferredResolution (Codec Pro, Room 70 G2)
  - OLD: Default: 3840_2160_30
  - NEW: Default: 1920_1080_60
xCommand changes in CE9.5

New commands
Audio Equalizer List (SX80, Codec Pro, MX700, MX800, Room 70 G2)
Audio Equalizer Update (SX80, Codec Pro, MX700, MX800, Room 70 G2)
Provisioning RoomType Activate (Codec Plus, Room 70)
SystemUnit WelcomeBanner Clear (All products)
SystemUnit WelcomeBanner Set (All products)
UserInterface Extensions Panel Close (All products)
UserInterface Message TextInput Response (SX20, SX80, MX200 G2, MX300 G2, MX700, MX800)
UserManagement User Unblock (All Products)
Video CEC Output KeyClick (SX20, SX80, MX200 G2, MX300 G2, MX700, MX800)
Video CEC Output SendActiveSourceRequest (SX20, SX80, MX200 G2, MX300 G2, MX700, MX800)

Commands that are modified
Audio LocalInput AddConnector (Codec Pro, Room 70 G2)
  OLD: ConnectorType (r): HDMI / Microphone / Line
  NEW: ConnectorType (r): HDMI / Microphone / ARC

What’s new in CE9.4

This section provides an overview of the new and changed system settings, and the new features and improvements in the Cisco Collaboration Endpoint software version 9.4 (CE9.4) compared to CE9.3.

For more details, we recommend reading the Software release notes:

New features and improvements

**New products**

- Cisco Webex Codec Pro
- Cisco Webex Room 70 Single G2
- Cisco Webex Room 70 Dual G2
- Cisco Webex Room 55 Dual

**Rebranding from Cisco Spark to Cisco Webex** *(All products)*

Cisco Spark has changed its name to Cisco Webex, and the user interface elements that displayed Spark are changed to Webex. In the activation flow you now see Cisco Webex as a registration option instead of Cisco Spark.

The following products have gotten new names:

- Cisco Spark Room Kit is now Cisco Webex Room Kit
- Cisco Spark Room Kit Plus is now Cisco Webex Room Kit Plus
- Cisco Spark Codec Plus is now Cisco Webex Codec Plus
- Cisco Spark Quad Camera is now Cisco Quad Camera
- Cisco Spark Room 55 and 70 are now Cisco Webex Room 55 and 70
- Cisco DX70 is now Cisco Webex DX70
- Cisco DX80 is now Cisco Webex DX80

**The maximum number of Proximity clients is increased** *(Codec Plus, Codec Pro, Room 55, Room 55 Dual, Room 70, Room 70 G2, Room Kit)*

A Cisco Webex Room Series device can have up to 30 paired clients simultaneously when the Proximity service `ContentShare ToClients` is disabled. If `ContentShare ToClients` is enabled, the limit of paired clients is 7 which is the same as in earlier software releases.

**CUCM provisioning of the admin settings lockdown configuration** *(All products)*

The admin settings lockdown configuration, that was introduced in CE9.2.1, can now be provisioned from CUCM. You can lock a selection of the settings on the settings menu on all of your devices simultaneously when you configure them through CUCM.

Your CUCM may require a device package in order to expose the new fields for this configuration.

**Support for content sharing using H.263 in a call between Cisco Webex Room Series and legacy MXP devices** *(Codec Plus, Codec Pro, Room 55, Room 55 Dual, Room 70, Room 70 G2, Room Kit)*

Support for H.263 content sharing between MXP and Cisco Webex Room Series is now available. The Room Series previously had a limitation where it could not receive or share content in a separate content channel. Sharing content from a Room Series device to a MXP device would in earlier versions compose the presentation into the main video stream.

This is only supported in certain scenarios:

- Direct H.323 calls (IP dialing) between a Room Series device and a MXP device.
- MXP registered on VCS on H.323 and a Room Series device registered to the same VCS on either SIP or H.323. Note that making a H.323 to SIP call on a VCS requires that an interworking option key is installed on the VCS.

See the CE9 release notes for information on other limitations related to this feature.
Enable backlight compensation from the touch screen (DX70, DX80)

A new setting on the DX70 and DX80 main menu enables and disables backlight compensation. This is a fixed setting that increases (on) or decreases (off) the sensor's brightness levels in order to compensate for sunlight or other bright light sources behind the user. The backlight compensation sets the sensor to a fixed level and it is not auto adjusted to the backlight.

Changed default HTTP mode from HTTP+HTTPS to HTTPS

The default value of NetworkServices HTTP Mode is changed from HTTP+HTTPS to HTTPS. This is to increase the security of the room devices on default configuration. Upgrading from earlier software versions will not automatically change the default value and it will stay on HTTP+HTTPS to avoid breaking current HTTP implementations.

The change is seen on new systems running CE9.4.0 or later, or if the device is factory reset on CE9.4.0. The HTTP requests are redirect to HTTPS and on the first visit to the device's web interface, the device displays an “Insecure connection warning”. To proceed to the web interface, you need to create an exception in your browser. This is a one-time operation unless you access the web interface with a different browser that has never visited the device web interface or if the device is factory reset.

In-Room Control update (All products)

You can add buttons for as many panels as you want on the home screen as well as on the in-call screen of the user interface.
System configuration changes in CE9.4

New configurations
Audio Input Microphone [n] PhantomPower (Codec Pro, Room 70 G2)
Audio Input HDMI [n] Mode (Room 55, Codec Pro)
Audio Input HDMI [n] VideoAssociation MuteOnInactiveVideo (Room 55, Codec Pro)
Audio Output HDMI [n] Delay DelayMs (Codec Pro)
Audio Output Line [1] OutputType (Room 70, Room 55D)
Cameras Camera [1] Backlight DefaultMode (DX70, DX80)

What's new in CE9.3

This section provides an overview of the new and changed system settings, and the new features and improvements in the Cisco Collaboration Endpoint software version 9.3 (CE9.3) compared to CE9.2.

For more details, we recommend reading the Software release notes:

New features and improvements

Backup and restore settings and custom elements *(All products)*

You can include custom elements as well as configurations in a backup file bundle (zip). You can choose which of the following elements to include in the bundle:

- Branding images
- Macros
- Favorites
- Sign-in banner
- In-room control panels
- Configurations (all or a sub-set)

In previous software versions, you could only backup the configurations.

The backup file can either be restored manually from the video system’s web interface, or you can generalize the backup bundle so that it can be provisioned across multiple video systems, for example using Cisco UCM or TMS.

You will find the backup and restore functionality under Maintenance > Backup and Restore on the video system’s web interface.

Provisioning of custom elements *(All products)*

The backup bundle, as described above, can be provisioned to many video systems using Cisco UCM or TMS.

It is important that device specific information is removed when creating a backup bundle intended for multiple video systems. If you include device specific information in such a bundle, you may end up with multiple video systems that cannot be reached.

By provisioning a non-system specific backup bundle, you can for example, copy a video system’s setup with macros, branding elements, and in-room control panels across multiple video systems.

Currently, provisioning via Cisco UCM will not restore any configurations, only the other custom elements; TMS will restore everything that is included in the backup bundle.

See the release note for more details about provisioning.

In-Room Control updates *(All products)*

The following functionality is added to the in-room control feature:

- You can add buttons for up to 20 panels in total. The buttons appear on the home screen or the in-call screen of the user interface depending on the panel type.
- As before, there are three types of in-room control panels: global panels (always available), in-call panels (available only when in call), and out-of-call panels (only available when not in a call). The entry point for the global panel has been removed from the status bar (top right corner of the user interface). Buttons to open global panels are added to both the home screen and the in-call screen instead, together with the buttons for the out-of-call only and in-call only panels, respectively.
- You can make standalone trigger-buttons, which are buttons that trigger an event directly, without opening a panel on the user interface.

Also the following features are added in the in-room control editor:

- Some new icons are available.
- A set of colors to choose from for the in-room-control buttons.
- Double click text elements to edit text directly.
- Drag and drop in-room control XML files into the editor.

For a full description of in-room controls, see the Customization guide for CE9.3 at https://www.cisco.com/go/in-room-control-docs
Support for ISDN Link (All products)

ISDN Link with software version IL1.1.7 is supported for all video systems that supports CE9.3.0.

As before, when using automatic pairing (which allows the ISDN Link to be automatically discovered by the video system) IPv6 must be enabled on the video system.

One Button to Push snooze (All products)

You are able to snooze an One Button to Push (OBTP) meeting reminder for 5 minutes. The snooze time cannot be changed. The reminder typically appears if you are in a call and a scheduled meeting is about to start. You can snooze the reminder for 5 minutes each time it appears until the meeting has ended.

Screen status monitoring and control (SX10)

SX10 now has the same CEC (Consumer Electronics Control) behavior as the video systems in the Room series.

The video system will use CEC to set the screen in standby when the system itself enters standby, and wake up the screen and select the correct video input when the video system itself wakes up from standby. CEC information from the screen is included in the video system's status. Of course, the screen must also support CEC and send the relevant information to the video system.

CEC is disabled on the video system by default, and must be enabled in the Video Output Connector [1] CEC Mode setting.

Adjust the call rate before making a call (All products)

As soon as you start typing in the Search or dial field, you can open a dialog and select a custom call rate. In earlier releases this was available only when selecting an entry from the Directory.

If you don’t select a custom call rate, you get the rate set in the Conference DefaultCall Rate setting.

Select ring-tone and adjust ring-tone volume (All products)

You can select a ring-tone and adjust the ring-tone volume from the settings menu on the user interface. In the previous releases this was done from the web interface.

Resume a postponed upgrade (All products)

When you get a notification about software upgrade, you can choose Upgrade now or Postpone. If you postpone the upgrade, you can resume the upgrade from the Settings > About this device menu on the user interface when you are ready; you don’t have to wait for 6 hours like you had to before.

If you don’t manually resume the upgrade, the upgrade will start automatically after 6 hours.

Prevent system information from being exposed in the user interface (All products)

You can prevent important system information from being exposed in the user interface, for example:

- IP addresses (video system, touch controller, UCM/VCS registrar)
- MAC address
- Serial number
- Software version

To enable this feature the following must be done:

- A passphrase must be set for all users with administrator rights
- UserInterface SettingsMenu Mode must be set to Locked
- UserInterface SecurityMode must be set to Strong

This feature also means that the IP address is not displayed on the screen when you disconnect a Touch controller.

Accessibility: Flashing screen on incoming calls (All products)

You can configure the video system so that the screen and Touch controller flashes red / light grey when the system receives an incoming call. This feature is mainly targeting hearing impaired users, making it easier for them to notice an incoming call.

The feature is disabled by default, and must be enabled by the Accessibility IncomingCallNotification setting.

Mirrored self-view (DX70 and DX80)

You can configure the video system to show the self-view image the way other people see you, or as you would see yourself in a mirror. Use the Video Selfview Mirrored setting.

Mirrored self-view used to be available only for Cisco DX devices running Android software.

Mirroring only applies to the self-view image, and has no effect on the video that is sent to the far end.

One common API guide

We have gathered all API information in one API guide, that covers all products. This is in contrast to earlier releases were we have had one API guide per product.
System configuration changes in CE9.3

**New configurations**
- **Audio KeyClickDetector Attenuate** *(Room Kit, Codec Plus, Room 55, Room 70)*
- **Audio KeyClickDetector Enabled** *(Room Kit, Codec Plus, Room 55, Room 70)*
- **Cameras Camera [1..3] AssignedSerialNumber** *(Codec Plus, Room 70)*
- **Cameras Camera [3] Backlight DefaultMode** *(Codec Plus, Room 70)*

NEW: User role: ADMIN, INTEGRATOR, USER
### Status changes in CE9.3

#### New statuses
- **Audio Input KeyClick Attenuate** *(Codec Plus, Room 55, Room 70, Room Kit)*
- **Audio Input KeyClick Enabled** *(Codec Plus, Room 55, Room 70, Room Kit)*
- **Audio Input KeyClick Detected** *(Codec Plus, Room 55, Room 70, Room Kit)*
- **HttpFeedback [n] Status** *(All products)*
- **Peripherals ConnectedDevice [n] UpgradeFailureReason** *(All products)*
- **Peripherals ConnectedDevice [n] UpgradeURL** *(All products)*
- **Provisioning RoomType** *(MX700, MX800, SX80)*
- **Provisioning Software UpgradeStatus Urgency** *(All products)*
- **Video Output Monitor [n] FirmwareVersion** *(Codec Plus, Room 55, Room 70, Room Kit, SX10)*
- **Video Output Monitor [n] ModelName** *(Codec Plus, Room 55, Room 70, Room Kit, SX10)*
- **Video Output Monitor [n] Position** *(Codec Plus, Room 55, Room Kit)*
- **Video Output Monitor [n] SerialNumber** *(Codec Plus, Room 55, Room 70, Room Kit, SX10)*
- **Video Output Monitor [n] Temperature** *(Codec Plus, Room 55, Room 70, Room Kit, SX10)*

#### Statuses that are removed
- **MediaChannels Call [n] Channel [n] Netstat Drop** *(All products)*
- **USB Device [n] State** *(SX20)*
- **USB Device [n] Type** *(SX20)*

#### Statuses that are modified
- **Cameras Camera [n] Flip** *(Codec Plus, MX700, MX800, Room 70, SX10, SX20, SX80)*
  - **OLD:** String
  - **NEW:** Off/On
- **Diagnostics Message [n] Type** *(All products)*

What's new in CE9.2

This section provides an overview of the new and changed system settings, and the new features and improvements in the Cisco Collaboration Endpoint software version 9.2 (CE9.2) compared to CE9.1.

For more details, we recommend reading the Software release notes:

New features and improvements

**Macro framework (All products except SX10)**

The macro framework allows users and integrators to write JavaScript macros in order to automate scenarios and customize endpoint behavior so that it suites an individual customer's requirements.

The combination of macros and powerful features such as listening for events/status changes, automating execution of commands and configurations, and providing local control functionality for the In-Room control feature, provides many possibilities for custom setups.

Minor behavioral changes, such as having the video system in Do Not Disturb for an infinite amount of time, can be easily realized by macros. Some other examples are: Reset configurations automatically, make a call at a certain time of the day, and issue alert or help messages depending on status changes.

The macro editor, which also provides several example macros, is available from the video system's web interface.

**HDCP support (Room 55)**

The video system's second HDMI input (Connector 3) can be configured to support HDCP (High-bandwidth Digital Content Protection) protected content. This allows customers to re-purpose the video system's screen by connecting devices such as a Google ChromeCast, an AppleTV, or an HDTV decoder. This type of content cannot be shared while in a call.

When the connector is configured to support HDCP, it is reserved for this type of content. This means that you cannot share any content from this specific connector while in a call, not even non-protected content from a laptop.

**Branding and halfwake customization (All products except SX10)**

You can upload your own text and images to customize the appearance of the screen and user interface in both the halfwake state and the awake state.

In the **Halfwake** state you can:
- Add a background brand image to the screen and user interface.
- Add a small logo in the bottom right corner of the screen and user interface.

In the **Awake** state you can:
- Add a small logo in the bottom right corner of the screen and user interface.
- Add a label or message in the bottom left corner of the screen (not the user interface).

**Source composition (All products except DX70, DX80 and SX10)**

You can compose up to four input sources (depending on how many input sources are available on the codec) into one image. This is the image that will be sent in the main video stream to the far end in a call. Source composition can only be enabled via the API, so we recommend creating a user interface extension combined with a macro to control the compositions on demand.

This feature replaces some of the functionality that was provided by the TC Console application for TC software.

**HTTP Proxy support (All products)**

You can set up the video system to go through a HTTP Proxy when registering it to Cisco's cloud service, Cisco Spark.
User interface features (All products)

• The Settings panel is restructured.
• The Settings panel in the user interface (Touch 10 or on-screen) can be protected by the video system’s admin password. If the password is blank, anyone can access the Settings and factory reset the system.
• If you select the Russian language on the user interface, you can choose between a Russian keyboard and a keyboard with a Latin character set.
• Arabic and Hebrew languages are added to the user interface. Also localized keyboards are included.
• Basic IEEE 802.1x settings are added to the Settings panel in the user interface.

Cisco TelePresence Precision 60 Camera support

(Codec Plus)

You can connect Cisco TelePresence Precision 60 cameras to Codec Plus. Note that you need a switch for the camera control cables if you have more than one camera. The People Count feature is not supported if Precision 60 is the only camera type connected to the codec.

Cisco Spark Quad Camera support

(SX80)

You can connect a Cisco Spark Quad Camera to the SX80. Note that the Quad Camera uses only one of the codec’s HDMI inputs, while the SpeakerTrack 60 camera uses two. The People Count feature (in call) is also available when using the Quad Camera.

Support for the Snap to Whiteboard feature

(SX80, MX700/MX800, Room Kit, Room Kit Plus, Room 55, Room 70)

The Snap to Whiteboard feature is now available for all products that have a camera with speaker track functionality: SX80 with Cisco TelePresence Speaker Track 60 camera or Cisco Spark Quad camera, MX700/MX800 with dual camera, Room Kit, Room Kit Plus, Room 55 and Room 70.

When the video system detects a person that is speaking close to the whiteboard, the camera view will switch to the whiteboard area. The wizard in the Settings panel on the Touch 10 user interface helps you to set up the feature and define where the whiteboard area is.

Briefing Room mode

(SX80, MX700/MX800)

The Briefing Room feature, which was introduced already in TC software, has been reworked. The in-room control framework is used for creating the associated user interface elements.

MX700/MX800: As before, Briefing Room is supported only for dual camera systems. Also, you need a Precision 60 camera, and a total of three screens.

SX80: Briefing Room is supported when a speaker track camera, a Precision 60 camera, and three screens are connected. The speaker track camera can be either Cisco TelePresence SpeakerTrack 60 or Cisco Spark Quad Camera.

USB to Serial port support

(Room Kit, Codec Plus, Room 55, Room 70)

You can connect a USB (Type A) to serial (D-sub 9) adapter to access the video systems API. Cisco recommends the UC232R-10 USB to RS232 (FTDI) adapter.

Certificate upload via API

(All products)

ASCII PEM formatted certificates can be installed directly using multiline API commands (xCommand Security Certificates CA Add, or xCommand Security Certificates Services Add). You can also upload certificates to a video system from its web interface, as before.

Mute and unmute remote participants in a CMS hosted conference – Active Control

(All products)

When a video system is enabled for Active Control in a CMS (2.1 or later) conference you can mute and unmute remote participants from the participant list on the user interface (the feature must also be enabled on the CMS).

A video system that is running software version CE9.2 will not be unmuted directly. When you try to unmute such a video system remotely, a message will show up on its screen requesting the user to unmute the audio locally.

API commands for Custom input prompt

(All products)

API commands are introduced to allow for an input prompt in the user interface: xCommand UserInterface Message TextInput *. When issuing the display command a prompt with your custom text, a text input field for the user, and a submit button, shows up on the user interface. For example, you can prompt a user to leave feedback after an ended call. You can specify what type of input you want from the user: single line text, numeric, password, or PIN code.

The prompt can only be enabled via the API, so it is recommended to combine it with macros (not available for SX10) and either a custom user interface panel or an auto-triggered event.

API commands for user management

(All products)

You can create and manage user accounts directly using API commands (xCommand UserManagement User *). As before, you can also do this from the video system’s user interface.
Preview mode for In-Room Controls (All products)

The In-Room Control editor has a new preview mode. A virtual touch user interface shows how the design looks on the user interface. The user interface is interactive so that you can test the functionality. It produces real events on the video system, which can trigger any functionality you have created with a third-party control system or with a macro. A console in the right pane displays both the widget values when interacted with, and control system feedback messages.

Intelligent Proximity changes (All products)

A Proximity indicator is displayed on the screen (middle right) to inform that one or more clients are paired to the system with Cisco Proximity. The old indicator (top left), which was always shown when Proximity was enabled, has been removed.

You can no longer disable the Proximity services from the user interface.

The ultrasound settings have moved from Peripherals Pairing Ultrasound to Audio Ultrasound.

Automatic factory reset when changing the call service - device activation (All products)

The video system will automatically factory reset and restart when using the user interface to change the device activation method, for example from VCS to Cisco UCM. This will prevent conflicting configurations when provisioning the video system to a new service.

Changing the provisioning from the API will not automatically factory reset the video system.

Support for separate RTP port ranges for audio and other media (All products)

You can configure the video system so that audio uses a different RTP port range than other media. The two ranges cannot overlap. As default, all media use the same RTP port range.
Configuration changes in CE9.2

New configurations

Audio Input HDMI[n] Mode (Codec Plus)
Audio Input HDMI[n] VideoAssociation MuteOnInactiveVideo (Room Kit, Codec Plus)
Audio Output InternalSpeaker Mode (Room 55)
Audio Ultrasound MaxVolume (All products)
Cameras Camera[1..2] Focus Mode (MX700/MX800)
    Added for the integrated cameras
Cameras SpeakerTrack Whiteboard Mode (RoomKit, Codec Plus, Room 55)
Macros AutoStart (All products except SX10)
Macros Mode (All products except SX10)
NetworkServices HTTP Proxy Allowed (All products)
NetworkServices HTTP Proxy LoginName (All products)
NetworkServices HTTP Proxy Mode (All products)
NetworkServices HTTP Proxy Password (All products)
NetworkServices HTTP Proxy Url (All products)
Standby WakeupOnMotionDetection (All products)
UserInterface CustomMessage (All products)
UserInterface OSD HalfwakeMessage (All products)
UserInterface SettingsMenu Mode (All products)

    OLD: User role: ADMIN, INTEGRATOR
    NEW: User role: ADMIN, INTEGRATOR, USER

Configurations that are removed

Conference MultiStream Mode (SX10, DX70/DX80)

Configurations that are modified

Audio Input MicrophoneMode (DX70/DX80)
    OLD: User role: ADMIN
    NEW: User role: ADMIN, INTEGRATOR

Audio Input Microphone[n] Level (Room Kit, Room 55)
    OLD: Value space: 0..36
    NEW: Value space: 0..26

Cameras Camera[n] Focus Mode (SX80, MX700/MX800, Codec Plus)
    OLD: Value space: Auto/Manual
    NEW: Value space: Auto/AutoLimited/Manual

Cameras SpeakerTrack Closeup (SX80, MX700/MX800, Room Kit, Codec Plus, Room 55)
    OLD: User role: ADMIN, INTEGRATOR
    NEW: User role: ADMIN, INTEGRATOR, USER

Cameras SpeakerTrack Whiteboard Mode (SX80, MX700/MX800)
    OLD: User role: ADMIN, INTEGRATOR
    NEW: User role: ADMIN, INTEGRATOR, USER

UserInterface Language (All products)
    NEW: Arabic and Hebrew added to valuespace

UserInterface OSD Output (RoomKit)
    OLD: Default value: 1
    NEW: Default value: Auto

Video Input Connector[2] Name (Codec Plus, Room 55)
    OLD: Default value: PC (HDMI1)
    NEW: Default value: PC 1 (HDMI)

Video Input Connector[3] Name (Codec Plus, Room 55)
    OLD: Default value: PC (HDMI2)
    NEW: Default value: PC 2 (HDMI)

Video Output Connector[1] Resolution (MX200G2/MX300G2, DX70/DX80, Room 55)
    OLD: User role: ADMIN, INTEGRATOR
    NEW: User role: ADMIN, INTEGRATOR, USER

Video Selfview OnCall Mode (RoomKit)
    OLD: Default value: Off
    NEW: Default value: On
Command changes in CE9.2

New commands
Cameras SpeakerTrack Whiteboard ActivatePosition (Room Kit, Codec Plus, Room 55)
Cameras SpeakerTrack Whiteboard AlignPosition (Room Kit, Codec Plus, Room 55)
Cameras SpeakerTrack Whiteboard SetDistance (Room Kit, Codec Plus, Room 55)
Cameras SpeakerTrack Whiteboard StorePosition (Room Kit, Codec Plus, Room 55)
Macros Log Clear (All products except SX10)
Macros Log Get (All products except SX10)
Macros Macro Activate (All products except SX10)
Macros Macro Deactivate (All products except SX10)
Macros Macro Get (All products except SX10)
Macros Macro Remove (All products except SX10)
Macros Macro Roles Set (All products except SX10)
Macros Macro Save (All products except SX10)
Macros Runtime Restart (All products except SX10)
Macros Runtime Start (All products except SX10)
Macros Runtime Status (All products except SX10)
Macros Runtime Stop (All products except SX10)
Message Send (All products)
Security Certificates CA Add (All products)
Security Certificates CA Delete (All products)
Security Certificates CA Show (All products)
Security Certificates Services Activate (All products)
Security Certificates Services Add (All products)
Security Certificates Services Deactivate (All products)
Security Certificates Services Delete (All products)
Security Certificates Services Show (All products)

Commands that are removed
UserInterface OSD Key Click (Room Kit, Codec Plus, Room 55)
UserInterface OSD Key Press (Room Kit, Codec Plus, Room 55)
UserInterface OSD Key Release (Room Kit, Codec Plus, Room 55)

Commands that are modified
Audio Microphones Mute (All products)
OLD: User role: INTEGRATOR, USER
NEW: User role: ADMIN, INTEGRATOR, USER
### Audio Microphones ToggleMute (All products)
- **OLD:** User role: INTEGRATOR, USER
- **NEW:** User role: ADMIN, INTEGRATOR, USER

### Audio Microphones Unmute (All products)
- **OLD:** User role: INTEGRATOR, USER
- **NEW:** User role: ADMIN, INTEGRATOR, USER

### Audio Sound Play (All products)
- **OLD:** Sound: Alert / Bump / Busy / CallDisconnect / CallInitiate / CallWaiting / Dial / KeyInput / KeyInputDelete / KeyTone / Nav / NavBack / Notification / OK / PresentationConnect / Ringing / SignIn / SpecialInfo / TelephoneCall / VideoCall / VolumeAdjust / WakeUp
- **NEW:** Sound: Alert / Bump / Busy / CallDisconnect / CallInitiate / CallWaiting / Dial / KeyInput / KeyInputDelete / KeyTone / Nav / NavBack / Notification / OK / Pairing / PresentationConnect / Ringing / SignIn / SpecialInfo / TelephoneCall / VideoCall / VolumeAdjust / WakeUp
- **OLD:** User role: INTEGRATOR, USER
- **NEW:** User role: ADMIN, INTEGRATOR, USER

### Audio Sound Stop (All products)
- **OLD:** User role: INTEGRATOR, USER
- **NEW:** User role: ADMIN, INTEGRATOR, USER

### Audio SoundsAndAlerts Ringtone List (All products)
- **OLD:** User role: INTEGRATOR, USER
- **NEW:** User role: ADMIN, INTEGRATOR, USER

### Audio SoundsAndAlerts Ringtone Play (All products)
- **OLD:** User role: INTEGRATOR, USER
- **NEW:** User role: ADMIN, INTEGRATOR, USER

### Audio SpeakerCheck (MX700/MX800)
- **OLD:** Volume: Integer(1..10)
- **NEW:** Volume: Integer(1..30)

### Call Disconnect (All products)
- **OLD:** User role: ADMIN, USER
- **NEW:** User role: ADMIN, INTEGRATOR, USER

### Camera PositionReset (SX80, SX20, SX10, MX200G2/MX300G2, MX700/MX800, Codec Plus)
- **OLD:** User role: ADMIN, USER
- **NEW:** User role: ADMIN, INTEGRATOR, USER

### Camera PositionSet (All products except DX70/DX80)
- **OLD:** User role: ADMIN, USER
- **NEW:** User role: ADMIN, INTEGRATOR, USER
- **Added:** Lens: Wide / Center / Left / Right

### Camera Ramp (All products except DX70/DX80)
- **OLD:** User role: ADMIN, USER
- **NEW:** User role: ADMIN, INTEGRATOR, USER

### Cameras PresenterTrack ClearPosition (SX80, MX700/MX800)
- **OLD:** User role: INTEGRATOR, USER
- **NEW:** User role: ADMIN, INTEGRATOR, USER

### Cameras PresenterTrack Set (SX80, MX700/MX800)
- **OLD:** User role: INTEGRATOR, USER
- **NEW:** User role: ADMIN, INTEGRATOR, USER

### Cameras PresenterTrack StorePosition (SX80, MX700/MX800)
- **OLD:** User role: INTEGRATOR, USER
- **NEW:** User role: ADMIN, INTEGRATOR, USER

### Cameras SpeakerTrack Diagnostics Start (SX80, MX700/MX800, RoomKit, Codec Plus, Room 55)
- **OLD:** User role: ADMIN, USER
- **NEW:** User role: ADMIN, INTEGRATOR, USER

### Cameras SpeakerTrack Diagnostics Stop (SX80, MX700/MX800, RoomKit, Codec Plus, Room 55)
- **OLD:** User role: ADMIN, USER
- **NEW:** User role: ADMIN, INTEGRATOR, USER

### Cameras SpeakerTrack Whiteboard ActivatePosition (SX80, MX700/MX800)
- **Removed:** Camera
- **Added:** CameraId: Integer (1..7)

### Cameras SpeakerTrack Whiteboard AlignPosition (SX80, MX700/MX800)
- **Removed:** Camera
- **Added:** CameraId: Integer (1..7)

### Cameras SpeakerTrack Whiteboard StorePosition (SX80, MX700/MX800)
- **Removed:** Camera
- **Added:** CameraId: Integer (1..7)

- OLD: Value space: Integer
- NEW: Value space: 1 / 2 / 3 / 4 / Composed
What’s new in CE9.1

This section provides an overview of the new and changed system settings, and the new features and improvements in the Cisco Collaboration Endpoint software version 9.1 (CE9.1) compared to CE9.0.

For more details, we recommend reading the Software release notes:

New features and improvements

**Dual Screen experience and Active Control for CMS based meetings** *(All products except DX70/DX80, SX10, SX20, MX200/MX300)*

Dual screen video systems can utilize both screens for video in a CMS based meeting. The video system receives two transcoded video streams and one content stream from the CMS, and utilizes both screens to render the streams.

With Active Control enabled, you get a participant list that shows all meeting participants and their current activity status, such as mute, sharing and active speaker indication. You can change the layout seamlessly from the touch interface by using the layout selection panels.

**New wake-up experience** *(All products)*

**SX10/DX70**: Only Halfwake

**Other products**: Halfwake, and Standby with motion detection

The new wake-up experience introduces a Halfwake state, which leads to a calmer wake-up of the system, and gives users better guidance on how to get started.

When wake-up on motion detection is enabled the system will automatically wake to the Halfwake state when people enter the room. The system will also wake to this state when a user pairs a Cisco Proximity client to the system (also DX70).

**Bluetooth headset support** *(DX70, DX80)*

A Bluetooth headset can be used with the video system. The headset must support HFP (Hands Free Protocol). The user can enable Bluetooth and set the video system in Bluetooth pairing mode from the user interface.

**Support for the EAP authentication framework for wireless networks** *(DX70, DX80, Room Kit)*

In addition to WPA-PSK and WPA2-PSK, the video system now supports the WPA-EAP authentication framework for Wi-Fi connections. In total the following methods are supported:

- Open
- WPA-PSK (AES)
- WPA2-PSK (AES)
- EAP-TLS
- EAP-TTLS
- EAP-FAST
- PEAP
- EAP-MSCHAPv2
- EAP-GTC

**Additions for Room Analytics** *(All products except SX10, DX70, DX80)*

**Detect people presence in the room**: The video system has the capability to find whether there are people present in the room. The feature is based on ultrasound, and it does not keep record of who was in the room, only whether or not the room is in use.

**People count** *(only Room Kit, Codec Plus, Room 55)*: The video system counts the number of people in the room when in a call, and when displaying the self-view picture. You can configure the video system to also count the number of people outside of call, but the video system cannot count the number of people when it is in standby. It does not keep record of who was in the room, only the number of faces that were detected.
Network port 2 can be disabled (DX70, DX80)

You can connect a computer to the network through the video system's second network port. Then you only need one network wall socket to support both the video system and the computer.

For security reasons, we recommend that you disable this network port if the video system is used in a public environment. This way, you prevent someone from connecting a computer to your network through the video system.
System configuration changes in CE9.1

New configurations

Cameras Camera Framerate (Room Kit)

NetworkPort [2] Mode (DX70, DX80)

RoomAnalytics PeopleCountOutOfCall (Room Kit)

RoomAnalytics PeoplePresenceDetector (MX200 G2, MX300 G2, MX700, MX800, Room Kit, SX20, SX80)

Configurations that are removed

None.

Configurations that are modified

Conference DefaultCall Rate (MX200 G2, MX300 G2, MX700, MX800, Room Kit, SX20, SX80)

OLD: Default value: 3072
NEW: Default value: 6000

Conference MultiStream Mode (MX700, MX800, Room Kit, SX80)

OLD: Valuespace: Off; Default value: Off
NEW: Valuespace: Auto/Off; Default value: Auto

Network [1] IEEE8021X Password (All products)

OLD: Valuespace: String(0, 32)
NEW: Valuespace: String(0, 50)

Peripherals Profile TouchPanels (SX80, Room Kit)

OLD: Default value: NotSet
NEW: Default value: Minimum1

Video Input Connector [n] PresentationSelection (All products)

OLD: Valuespace: AutoShare/Manual/OnConnect (MX200 G2, MX300 G2, MX700, MX800, Room Kit, SX10, SX20, SX80)
OLD: Valuespace: AutoShare/Desktop/Hidden/Manual/OnConnect (DX70, DX80)
NEW: Valuespace: AutoShare/Desktop/Manual/OnConnect (All products)

Video Output Connector [1..2] MonitorRole (Room Kit)

OLD: Default value: Connector [1]: First; Connector [2]: Second
NEW: Default value: Auto
System command changes in CE9.1

New commands
SystemUnit FirstTimeWizard Stop (All products)
UserInterface Extensions Set (All products)

Commands that are removed
Camera Position Reset (Room Kit)
Camera Trigger Autofocus (Room Kit)

Commands that are modified
Audio Select (DX70, DX80)
OLD: Device: Internal/HeadsetUSB/HeadsetAnalog/HandsetUSB
NEW: Device: Internal/HeadsetBluetooth/HeadsetUSB/HeadsetAnalog/HandsetUSB

Presentation Stop (Room Kit)
OLD: PresentationSource: Integer (0..65534)
NEW: PresentationSource: Integer (1..2)
SystemUnit Factory Reset (All products)
OLD: Keep: LocalSetup/Network/Spark/Provisioning
NEW: Keep: LocalSetup/Network/Spark/Provisioning/SerialPort/Certificates (not in use)
System status changes in CE9.1

**New statuses**

- Audio Output Connectors Line ConnectionStatus (Room Kit)
- Audio Output Connectors Line ConnectionStatus (Room Kit)
- Audio Devices Bluetooth ActiveProfile (DX70, DX80)
- Audio Volume/HeadsetBluetooth (DX70, DX80)
- RoomAnalytics PeoplePresence (Room Kit)
- SystemUnit Software OptionKeys Encryption (SX20, SX80, Room Kit, MX200, MX300, MX700, MX800)

**Statuses that are removed**

- Cameras Camera [n] Flip (Room Kit)
- Cameras Camera [n] HardwareID (Room Kit)
- Cameras Camera [n] MacAddress (DX70, DX80, Room Kit)
- Cameras Camera [n] Position Focus (Room Kit)
- Cameras Camera [n] SoftwareID (Room Kit)
- Video Input Source [n] TMDsClockPresent (Room Kit)

**Statuses that are modified**

- Diagnostics Message Type (All products)
Standby State (All products)

OLD: Value space: Standby/EnteringStandby/Off

NEW: Value space: Standby/EnteringStandby/Halfwake/Off
What’s new in CE9.0

This section provides an overview of the new and changed system settings, and the new features and improvements in the Cisco Collaboration Endpoint software version 9.0 (CE9.0) compared to CE8.3.

For more details, we recommend reading the Software release notes:

New features and improvements

**Updated user interface**

The user interfaces on the Touch 10, on screen, and on the integrated touch screen have been updated. The main menu items on the home screen have been replaced with more prominent activities.

Some of the setting have been removed from the Touch 10 advanced settings menu to align with the on-screen display menu.

**Wakeup on motion detection**

Wakeup on motion detection senses when a person walks into the conference room and the system wakes up automatically. You need to enable the following setting for this feature to work:

xConfiguration Standby WakeupOnMotionDetection

You can’t manually place the system in standby when this feature is enabled.

**Updated In-Room Control Editor**

The In-Room Control editor is updated with a new look, improved logic and usability for producing a control interface more efficiently. In addition, a new directional pad widget and an In-Room Control simulator is added.

**Added language support**

We have added support for Potuguese (Portuguese) to the on-screen display and Touch controller menus.

**Other changes**

- Support for HTTPS client certificates has been added.
- Unplugging the presentation cable instantly stops the presentation sharing.
System configuration changes in CE9.0

New configurations
Cameras SpeakerTrack Closeup (MX700, MX800, SX80)
NetworkServices HTTPS Server MinimumTLSVersion (All products)
NetworkServices HTTPS StrictTransportSecurity (All products)
NetworkServices UPnP Mode (MX200 G2, MX300 G2, MX700, MX800, SX10, SX20, SX80)

Configurations that are removed
Audio Microphones PhantomVoltage (MX200 G2, MX300 G2, SX20)

Configurations that are modified
Cameras Camera [n] * (MX200 G2, MX300 G2, MX700, MX800, SX10, SX20, SX80)
OLD: User role: ADMIN, USER
NEW: User role: ADMIN, INTEGRATOR
Cameras SpeakerTrack * (MX700, MX800, SX80)
OLD: User role: ADMIN, USER
NEW: User role: ADMIN, INTEGRATOR
Conference MultiStream Mode (MX200 G2, MX300 G2, MX700, MX800, SX10, SX20, SX80)
OLD: Value space: Auto/Off
NEW: Value space: Off
UserInterface Language (All products)
NEW: Portuguese added to value space

xConfigurations with INTERATOR user role
A new user role - INTERATOR - is introduced in CE9.0. It has been added to the following configurations:

Audio DefaultVolume (All products)
Audio Input HDMI [n] * (MX700, MX800, SX80)
Audio Input Line [n] * (MX700, MX800, SX20, SX80)
Audio Input Microphone [n] * (MX200 G2, MX300 G2, MX700, MX800, SX10, SX20, SX80)
Audio MicrophoneReinforcement * (MX700, MX800, SX80)
Audio Microphones Mute Enabled (All products)
Audio Output HDMI [n] * (SX80)
Audio Output Line [n] * (MX700, MX800, SX10, SX20, SX80)
Audio SoundsAndAlerts * (All products)
Cameras Camera [n] * (MX200 G2, MX300 G2, MX700, MX800, SX10, SX20, SX80)
Cameras SpeakerTrack * (MX700, MX800, SX80)
Conference DefaultCall Rate (All products)
Conference DoNotDisturb DefaultTimeout (All products)
GPIO Pin [n] Mode (MX700, MX800, SX80)
Peripherals Profile * (MX200 G2, MX300 G2, MX700, MX800, SX10, SX20, SX80)
SerialPort BaudRate (MX700, MX800, SX20, SX80)
SerialPort Mode (All products)
Standby * (DX70, DX80, MX200 G2, MX300 G2, MX700, MX800, SX10, SX20, SX80)
Standby BootAction (MX700, MX800)
Standby Control (MX700, MX800)
Standby Delay (MX700, MX800)
Standby StandbyAction (MX700, MX800)
Standby WakeupAction (MX700, MX800)
SystemUnit Name (All products)
Time Zone (All products)
UserInterface OSD Output (All products)
Video Input Connector [n] CameraControl CameraId (All products)
Video Input Connector [n] CameraControl Mode (All products)
Video Input Connector [n] InputSourceType (All products)
Video Input Connector [n] Name (All products)
Video Input Connector [n] PresentationSelection (All products)
Video Input Connector [n] Quality (All products)
Video Input Connector [n] Visibility (All products)
Video Monitors (All products)
Video Output Connector [n] CEC Mode (All products)
Video Output Connector [n] MonitorRole (MX700, MX800, SX20, SX80)
Video Output Connector [n] Resolution (All products)
Video Presentation DefaultPIPPosition (All products)
Video Selfview Default * (All products)
Video Selfview OnCall * (All products)

<path> * means that the change applies to all configurations starting with <path>. 
System command changes in CE9.0

New commands
Audio Microphones ToggleMute (All products)
Audio Volume ToggleMute (All products)
Audio Sound Play (All products)
Audio Sound Stop (All products)
Cameras AutoFocus Diagnostics Start (MX700, MX800, Room Kit, SX80)
Cameras AutoFocus Diagnostics Stop (MX700, MX800, Room Kit, SX80)
SystemUnit SignInBanner Clear (All products)
SystemUnit SignInBanner Get (All products)
SystemUnit SignInBanner Set (All products)
Video Output Monitor Backlight Set (MX700, MX800)
Video Output Monitor Brightness Set (MX700, MX800)
Video Output Monitor Color Blue Set (MX700, MX800)
Video Output Monitor Color Green Set (MX700, MX800)
Video Output Monitor Color Red Set (MX700, MX800)
Video Output Monitor Color Select (MX700, MX800)
Video Output Monitor Contrast Set (MX700, MX800)
Video Output Monitor CSC Select (MX700, MX800)
Video Output Monitor Gamma Set (MX700, MX800)
Video Output Monitor Reset (MX700, MX800)
Video Output Monitor Sharpness Set (MX700, MX800)

Commands that are modified
SystemUnit FactoryReset (All products)

xCommand with INTEGRATOR user role
Audio Microphones Mute (All products)
Audio Microphones ToggleMute (All products)
Audio Microphones Unmute (All products)
Audio Sound Play (All products)
Audio SoundsAndAlerts Ringtone List (All products)
Audio SoundsAndAlerts Ringtone Play (All products)
Audio Sound Stop (All products)
Cameras AutoFocus Diagnostics Start (MX700, MX800, Room Kit, SX80)
Cameras AutoFocus Diagnostics Stop (MX700, MX800, Room Kit, SX80)
Cameras PresenterTrack ClearPosition (SX80, MX700, MX800)
Cameras PresenterTrack Set (SX80, MX700, MX800)
Cameras PresenterTrack StorePosition (SX80, MX700, MX800)
Cameras SpeakerTrack Diagnostics Start (SX80, MX700, MX800)
Peripherals Connect (All products)
Peripherals List (All products)
Standby Activate (All products)
Standby Deactivate (All products)

Chapter 2

About the API
API fundamentals

This chapter contains a top-level view of the mechanisms supported by the codec API.

Here you can read about how to access the API, how to use the command line and what the different parts of the API can be used for. This chapter also describes how to use the feedback functions that are available for the codec.

The API consists of four major groups:
- Commands
- Configurations
- Status
- Events

These four groups are hierarchically organized, which makes it easier to find related functionality. You can find the complete lists of all commands, configurations and statuses in the following chapters.

NOTE: The commands return values that may affect how the codec interacts with 3rd party systems. These may change from release to release and are not documented.

Connecting to the API

There are several ways to access the codec API:
- SSH
- Telnet¹
- HTTP/HTTPS
- WebSocket
- Serial connection²

Regardless of which method you choose, the structure of the API is the same. Choose the connection method that suits your application best. Note that not all methods are not available for all products.

Before you start, please read this section about the different methods, as some of them may require additional configuration changes before being enabled. The configurations, apart from password, can be set from the Configuration menu on the web interface or from the command line interface. The examples are for the command line interface.

SSH

SSH is a secure TCP/IP connection and it is enabled by default on the codec. It can be disabled. You need an SSH client, such as PUTTY, to access the API over SSH.

```bash
xConfiguration NetworkServices SSH Mode: <Off,On>
```

Telnet

Telnet¹ can be viewed as the equivalent of the serial protocol in the TCP/IP world. Telnet is disabled by default. Before connecting to the codec with Telnet you have to enable it.

To enable the Telnet service, configure the following setting on the codec. Changing this setting does not require a reboot of the device, but it may take some time to take effect.

```bash
xConfiguration NetworkServices Telnet Mode: <Off,On>
```

HTTP/HTTPS

As HTTP/HTTPS are connectionless protocols, there is no persistent connection. There are several ways of communicating with the API over HTTP.

In order to enable or disable the HTTP and HTTPS services, configure the following setting on the codec.

```bash
xConfiguration NetworkServices HTTP Mode: <Off, HTTP+HTTPS, HTTPS>
```

Connecting

You can inspect the API by entering the IP address or host name of the codec in your web browser. This opens the web interface, and you can find the API documents under the menu section Integration > Developer API. The HTTP POST and GET methods are used to execute commands and get feedback from the codec. This is described in “Using HTTP” on page 65 in this document.

WebSocket

WebSocket is a protocol that provides a full-duplex communication channel between a client and the API of the video system. The API commands are embedded in JSON-RPC objects before they are sent over WebSocket.

In order to enable or disable the use of WebSocket, configure the following settings. Because WebSocket is tied to HTTP, also HTTP or HTTPS must be enabled before you can use WebSocket.

```bash
xConfiguration NetworkServices WebSocket: <Off, FollowHTTPService>
```

```bash
xConfiguration NetworkServices HTTP Mode: <Off, HTTP+HTTPS, HTTPS>
```

Read the »API over WebSocket guide for details how to convey API commands in JSON-RPC objects over WebSocket.

¹ Telnet is only available for DX, MX, and SX series.
² Serial connection is not available for DX70, DX80, Room 55 Dual, and Room 70.
RS-232 / serial connection

Depending on the product the codec has either an USB or a standard COM-port for serial communication. It can be used without an IP address, DNS or a network. Serial connection is allowed by default.

```
xConfiguration SerialPort Mode: <Off/On>
```

**Baud-rate and other serial port parameters**

The serial port uses 115200 bps, 8 data bits, no parity and 1 stop bit. The default baud rate is set to 115200 bps.

The exception to this is SX20, where the serial port uses 38400 bps, 8 data bits, no parity and 1 stop bit. The default baud rate is set to 38400 bps.

The codec can give very much feedback. We therefore recommend keeping the connection at this speed or higher to avoid sluggishness.

On MX700, MX800, SX20, SX80, and the Room series, you can change the baud rate if required.

```
xConfiguration SerialPort BaudRate
```

During the initial boot sequence, the codec uses a baud rate of 38400 bps regardless of the baud rate you have set.

**Login and password**

You always have to login for serial connections to Codec Pro and Room 70 G2.

For other products, you can choose whether login is required or not for serial connections. For security reasons the password prompting is turned on by default, but it can be turned off if preferred.

```
xConfiguration SerialPort LoginRequired: <Off/On>
```

**Ethernet ports**

The main network port – Network port 1 – is always reserved for the connection to LAN. This applies to all video systems.

Some of our video systems have more than one network port. The additional ports can be used for peripheral devices like cameras, Touch 10, and more.

A device that is connected to such a network port gets a local IP address from the codec, and therefore is not part of the corporate network.

- A Cisco device is assigned a dynamic IP address in the range (DHCP): 169.254.1.41 to 169.254.1.240
- A non-Cisco device is assigned the dynamic IP address (DHCP): 169.254.1.30

**NOTE:** Only one non-Cisco device can get a dynamic IP address at a time.

- A non-Cisco device can be assigned a static IP address in the range: 169.254.1.241 to 169.254.1.254

This method can also be used to connect to the codec with SSH. In this case you can use the IP address 169.254.1.1.

**Power over Ethernet (PoE)**

The following products have one or more Ethernet ports that provide PoE:

- Codec Plus, Room Kit Mini, Room 55, Room 55 Dual, Room 70 (marked with the Touch controller symbol ( ))
- Codec Pro, Room 70 G2 (2 ports: one marked with the Touch controller symbol ( ), the other with the letters “PoE”)

**User roles**

A user account may hold one or a combination of user roles. A user account with full access rights, like the default admin user, should possess the ADMIN, USER and AUDIT roles.

These are the user roles:

- **ADMIN:** A user with this role can create new users, change most settings, make calls, and search the contact lists. The user cannot upload audit certificates and change the security audit settings.
- **USER:** A user with this role can make calls and search the contact lists. The user can modify a few settings, for example adjust the ringtone volume and set the time and date format.
- **AUDIT:** A user with this role can change the security audit settings and upload audit certificates.
- **ROOMCONTROL:** A user with this role can create in-room controls. The user has access to the In-room control editor and associated development tools.
- **INTEGRATOR:** A user with this role has access to settings, commands and status that are required to set up advanced AV scenarios, and to integrate our video systems with 3rd party equipment. Such a user can also create in-room controls.

---

1 Depending on the video system, Network port 1 is marked with the number 1, the network symbol ( ), or both.
Passphrase

The video system is delivered with a default user account with full credentials. The user name is `admin`, and initially, no passphrase is set for the default user.

It is mandatory to set a passphrase for the `admin` user in order to restrict access to system configuration. You should in addition set a passphrase for any other user with similar credentials.

You can set the passphrase on the codec's web interface. Open a web browser and enter the IP address of the video system in the address bar and sign in. Click your user name in the upper right corner and choose `Change passphrase` in the drop down menu.
API output

The `xPreferences` is used to set preferences for the RS-232, Telnet and SSH sessions.

The output modes are:

- **Terminal**: Line based output for use with line based control systems
- **XML**: XML output for use with control systems that understand XML.
- **JSON**: JSON format is convenient when integrating with web based systems.

The default output mode is **terminal**. To change this you have to define your preferences for each session individually. Examples in this guide are in terminal mode.

To set output mode to XML, issue the command:
```
xPreferences outputmode xml
```

To revert to terminal mode, issue the command:
```
xPreferences outputmode terminal
```

---

Example: Command in terminal mode

```plaintext
xCommand Audio Volume Set Level: 50
```

---

Example: Command in XML mode

```xml
<Command>
  <Audio>
    <Volume>
      <Set command="True">
        <Level>50</Level>
      </Set>
    </Volume>
  </Audio>
</Command>
```
Using the command line

Help
To get a list of all supported top level commands you can type `?` or `help` after connecting to the video system using RS-232, Telnet or SSH (Example 1).

Bye
Typing the bye command closes the command line interface.

API commands

xConfiguration
Configurations are system settings, such as system name and network settings. These are persistent across boots. Refer to “Configurations” on page 59.

xCommand
Commands instruct the codec to execute actions, such as to dial a number or to search the phone book. Refer to “Commands” on page 59.

xStatus
A status contains the current state of the codec, such as connected calls, the status of the gatekeeper registration, connected inputs and output sources. Refer to “Status” on page 59.

xFeedback
The Feedback commands are used to specify what parts of the configuration and status hierarchies to monitor. Feedback is only issued on the RS-232, Telnet or SSH session for which it is specified. If you are connecting to the codec with multiple sessions, you have to define feedback individually for each session. Refer to “Feedback mechanism” on page 63.

Example 1:
```
?                           # User Commands
  help                     
xcommand                  
xconfiguration           
xevent                    
xfeedback                 
xgetxml                   
xdocument                 
xpreferences              
xtransaction              
xstatus                   
bye                        
echo                       
log                        
systemtools               
OK                          
```

Other commands

Systemtools
The systemtools commands are a set of command line tools for administrative control and diagnostics. The commands can be used for advanced troubleshooting together with Cisco technical support. Systemtools are not a part of the programming API. Refer to “The SystemTools commands” on page 462.

Log
The log command is used to enable advanced logs. It is only used for debugging the system.

xPreferences
The xPreferences command is used to set preferences for the RS-232, Telnet and SSH sessions. Refer to “API output” on page 56.

Echo <on/off>
If echo is set to On the key inputs are displayed when entering text in a command line interface. If echo is set to Off user input is not displayed when entering text in a command line interface.

xEvent
The xEvent command returns information on which events are available for feedback. Refer to “Events” on page 62.

xGetxml
The xGetxml request returns an XML document based on the location parameter attached to the request. The elements (or a complete document) matching the expression will be returned. Refer to “Feedback mechanism” on page 63.
Command line shortcuts

If your client supports it, there are some timesaving shortcuts you can use:

- Tab-completion to complete the commands and arguments.
- Arrow up and arrow down keys to navigate your command history.
- <CTRL-a>: Jump to the beginning of the line.
- <CTRL-e>: Jump to the end of the line.
- <CTRL-r>: Incremental command history search.
- <CTRL-w>: Erase the current line.

Searching

You can use // to search for elements anywhere in the status or configuration hierarchy (Example 1).

You can also combine multiple //’s (Example 2).

NOTE: The search shortcuts work well for inspecting the API, but should not be used in applications. We recommend that you always use the complete paths to avoid command ambiguity when upgrading to newer firmware releases.

Example 1:
List all configurations that include words that starts with OUT and HDMI:

```
xconfiguration //out//hdmi
  *c xConfiguration Audio Output HDMI 1 Level: 0
  *c xConfiguration Audio Output HDMI 1 Mode: On
  *c xConfiguration Audio Output HDMI 2 Level: 0
  *c xConfiguration Audio Output HDMI 2 Mode: Off
  ** end
```

Example 2:
Get the resolution width of all connected sources for both inputs and outputs:

```
xStatus //vid//res//wid
  *s Video Input Source 1 Resolution Width: 1920
  *s Video Input Source 2 Resolution Width: 0
  *s Video Input Source 3 Resolution Width: 0
  *s Video Input Source 4 Resolution Width: 0
  *s Video Output Connector 1 Resolution Width: 1920
  *s Video Output Connector 2 Resolution Width: 1280
  *s Video Output Connector 3 Resolution Width: 1280
  ** end
```

Value types and formats

The system supports the following value types:

- Integer values: <x..y>
  Defines the valid range for an integer input. x = min value, y = max value.
- Literal values: <X/Y/..Z>
  Defines the possible values for a given configuration.
- String values: <S: x, y>
  Defines that the valid input for this configuration is a string with minimum length of x and maximum length of y characters. Strings can have rules that further specify their format and length.

Input values that contain spaces need to be quoted

Any values for configurations and commands containing spaces must be enclosed in quotes. Quotes are not necessary for values without spaces.

Example:

Correct: xCommand dial number: "my number contains spaces"

Correct: xCommand dial number: 12345

Incorrect: xCommand dial number: my number contains spaces

Case sensitivity

All commands are case-insensitive. All of the following commands will work.

```
XCOMMAND DIAL NUMBER: foo@bar.org
xcommand dial number: foo@bar.org
xCommand Dial Number: foo@bar.org
```

File name: D15407.08 Cisco Collaboration Endpoint Software API Reference Guide CE9.7, APRIL 2019
Commands

Commands instruct the codec to execute actions, such as to dial a number or to search the phone book. All commands start with the prefix xCommand followed by a command path.

Writing `xCommand ?` on the command line will list all the top level commands.

To view the complete list of commands and their parameters, write `xCommand ??` on the command line.

Command arguments are key-value pairs.

When issuing a `xCommand`, the command consists of one argument and one required parameter. In this document the command usage is described for all `xCommands`, with both required and optional parameters. The optional parameters are in brackets.

Example:

```
 xCommand Dial Number: 123
```

`xCommand` is the command prefix. The command to be executed is Dial.

The example contains one argument, Number: 123. Number is the key and 123 is its value. The key/value pair is separated with `:`.

Configurations

Configurations are system settings that are persistent across boots. Like commands, also configurations are structured in a hierarchy.

Writing `xConfiguration ?` on the command line lists all the top level configurations.

Writing `xConfiguration ??` lists all configurations and their value spaces.

Writing `xConfiguration` lists all configurations and their current values. To list out only some of the configurations, write `xConfiguration` followed by one or more parts of the configuration paths.

Example: Set the H323 Alias ID

Type:

```
 xConfiguration H323 Profile 1 H323Alias ID:
 "changed@company.com"
```

Example: Get the H323 Alias ID

Type:

```
 xConfiguration H323 Profile 1 H323Alias ID
 Result:
 *c xConfiguration H323 Profile 1 H323Alias ID:
 "changed@company.com"
**end
```

Status

A status contains the current state of the codec, such as connected calls, the status of the gatekeeper registration, connected inputs and output sources.

Writing `xStatus ?` on the command line lists all top level statuses.

Writing `xStatus` lists all statuses and their current values. To list out only some of the statuses, write `xstatus` followed by the relevant part of the status path (address expression):

```
xStatus <address expression>
```
Multiline commands

Multiline commands are commands that support larger amounts of data as input than the single line commands. Typical use for these commands is to allow for provisioning of in-room control definitions, branding images (base64 encoded), macros, welcome banners, and security certificates.

To issue a multiline command, you start issuing it like any other XAPI command. However, once you enter the command, you have set the API into an input mode where anything you issue on the API after this is treated as input to that command, including line breaks. You now enter the payload for this command in accordance to the input format expected by this command.

When done, finish with a line break ("\n") and a separate line containing just a period ending with a line break (".\n"). The command will now be executed, and you will get a command result with an OK or ERROR depending on the command being executed successfully or not.

The commands that require multiline input format are marked as such in the command descriptions in this guide.

The multiline commands are marked as multiline in xCommand overview section in this guide.

Example: Set up welcome banner text

```
xCmd SytemUni WelcomeBanner Set
Hello!
This is the second line of text.
This is the third.
Thank you!
.
OK
*WelcomeBannerSetResult (status=OK):
** end
```
Synchronous API calls

The API works asynchronously. This means that there is no guarantee that command responses arrive in the same order as the commands were issued. The codec may also respond with feedback between your request and the response, in form of status changes or events, due to changes on the system.

For some applications it might be crucial to match requests with responses. The API therefore supports a response-tagging mechanism.

This mechanism works with all command types: xcommand, xconfiguration, and xstatus. A typical use of this would be to create a command queue in your application and assign unique IDs to every command sent to the codec. A listener then listens to all feedback from the codec and matches the ID on the response with the corresponding ID in the command queue. This enables matching the original request with the specific response.

Example:

```plaintext
xcommand Video Layout Add | resultId="mytag_1"
OK
* r VideoLayoutAddResult (status=OK):
  LayoutId: 1
  ** resultId: "mytag_1"
  ** end

In XML mode the resultId is added as an attribute to the top-level XmlDoc tag:
xgetxml /Configuration/Video/Layout/Scaling | resultId="mytag_2"
<XmlDoc resultId="mytag_2">
  <Configuration item="1">
    <Video item="1">
      <Layout item="1">
        <Scaling item="1" valueSpaceRef="...">Off</Scaling>
      </Layout>
    </Video>
  </Configuration>
</XmlDoc>
```
Events

Event returns information about the events that are available for feedback. This overview presents examples of some of the events that are available on the API.

To get an overview of the supported events:
- **xEvent** - Lists the top level events
- **xEvent <top level category>** - List all of the available events in that category
- **xEvent * - Lists all available events on that codec

The result for events depends on the state of the codec.

Example 1: Outgoing Call Indication

Outgoing Call Indication is an event reported when an outgoing call is about to be dialled. Returns the CallId the call has been assigned.

```plaintext
*e OutgoingCallIndication CallId: x
** end
```

Example 2: Call Disconnect

Call Disconnect is an event reported when a call is disconnected. Returns the CallId of the disconnected call and reason for the call's disconnection.

```plaintext
*e CallDisconnect CallId: x CauseValue: 0
  CauseString: "" CauseType: LocalDisconnect
  OrigCallDirection: "outgoing"
** end
```

Example 3: Call Successful

Call Successful is an event reported when a call is connected successfully, that is when all channels are up and established.

```plaintext
*e CallSuccessful CallId: 132 Protocol: "h223"
  Direction: "outgoing" CallRate: 768 RemoteURI: "h223:integratorHQ@company.com" EncryptionIn: "Off" EncryptionOut: "Off"
** end
```

Example 4: FECC Action request

FECC Action request is an event reported when far end is sending FECC commands.

```plaintext
*e FeccActionInd Id: 132 Req: 1 Pan: 1 PanRight: 1 Tilt: 0 TiltUp: 0 Zoom: 0 ZoomIn: 0 Focus: 0 FocusIn: 0 Timeout: 300 VideoSrc: 0 m: 0
** end
```

Example 5: TString message received

TString message received is an event reported when far end has sent a TString message.

```plaintext
*e TString CallId: 132 Message: "ee"
** end
```

Example 6: SSTring message received

SString message received is an event reported when far end has sent a SString message.

```plaintext
*e SString String: "ee" Id: 132
** end
```
Feedback mechanism

To build solutions that can reliably keep the state between your application and the codec synchronized, you can set up a notification system to report the changes in the state of the codec.

The API supports notifications on the following:
- Configuration changes
- Status changes
- Event notifications

These notifications will not be sent unless you have explicitly told the codec to do so. You can subscribe to the feedback by registering feedback expressions. How you register feedback expressions varies according to the connection method used.

When using HTTP, the method of handling feedback differs slightly from what is presented in this section. See “Feedback from codec over HTTP” on page 67 for more information.

Feedback expressions

The expression used when registering for feedback is a variant of the XPath language. The XPath language describes a way to select nodes from an XML/JSON document. The CE software contains three main feedback documents.

The syntax for feedback registering is:

```
xFeedback register <path>
```

Never register for all status feedback by issuing `xFeedback register /Status`. It is safe to register for all configuration changes using `xFeedback register /Configuration`, as configuration changes will most likely not occur that often.

By going through some examples, we can see how this information can be used to build feedback expressions. A good way to verify the expressions is to point your browser to `http://<ip-address>/getxml?location=path` or to execute `xgetxml <path>` from the terminal, and check that the output matches the nodes you want feedback on.

**WARNING:** A codec may give very much feedback, especially when calls are connected and disconnected. Do only subscribe to the feedback you need.

Never register for all status feedback by issuing `xFeedback register /Status`. This may give the control application too much data to handle, which may lead to sluggish or unpredictable behavior.

---

**Example 1: Microphones Mute status**

Terminal query

```
xStatus Audio Microphones Mute
*s Audio Microphones Mute: Off
** end
```

Equivalent feedback expression

```
xFeedback register /Status/Audio/Microphones/Mute
```

**Example 2: Name of all video input connectors**

Terminal query

```
xConfiguration Video Input Connector Name
*c xConfiguration Video Input Connector 1 Name: "NameA"
*c xConfiguration Video Input Connector 2 Name: "NameB"
*c xConfiguration Video Input Connector 3 Name: "NameC"
*c xConfiguration Video Input Connector 4 Name: "NameD"
*c xConfiguration Video Input Connector 5 Name: "NameE"
** end
```

Equivalent feedback expression

```
xFeedback register /Configuration/Video/Input/Connector/Name
```

**Example 3: Name of video input connector 3**

Terminal query

```
xConfiguration Video Input Connector 3 Name
*c xConfiguration Video Input Connector 3 Name: "NameC"
** end
```

Equivalent feedback expression

```
xFeedback register /Configuration/Video/Input/Connector[@item='3']/Name
```
Terminal connections

Managing feedback subscriptions

To register, list and deregister feedback expressions you use the command xFeedback and its corresponding sub commands.

The registered expressions are only valid for the currently active connection. If you open two Telnet sessions and register to get feedback in one session, you do not receive feedback in the other session. This also means that if you disconnect from a session, you have to re-register all expressions after reconnecting.

You can register up to 38 expressions.

Feedback output

The feedback output is exactly the same as you get when querying the system using the xConfiguration and xStatus commands. E.g., if you issue the command xStatus Standby Active on the command line the result is:

```
*s Standby Active: On
** end
```

If you have registered for feedback on status changes the feedback you get when the system goes to standby-mode will be exactly the same:

```
*s Standby Active: On
** end
```

This means that when you are programming against the device you only need to handle one format.

Example: Managing feedback subscriptions

A: Register feedback expressions.

Write in: 
`xFeedback register /Status/Audio`

Result:
```
** end
OK
```

B: List out currently registered expressions.

Write in: 
`xFeedback list`

Result:
```
/Configuration/Video/MainVideoSource
/Event/CallDisconnect
/Status/Audio
** end
OK
```

C: Deregister feedback expressions.

Write in: 
`xFeedback deregister /Event/CallDisconnect`

Result:
```
** end
OK
```

Write in: 
`xFeedback deregister /Status/Audio`

Result:
```
** end
OK
```

D: List the new feedback expressions.

Write in: 
`xFeedback list`

Result:
```
/Configuration/Video/MainVideoSource
** end
OK
```
### Using HTTP

The codec supports sending commands and configurations over HTTP and HTTPS. It is also possible to retrieve configurations and statuses this way. This interface exposes the same API as the command line, but in XML format.

#### HTTP XMLAPI Authentication

Access to the XMLAPI requires the user to authenticate using HTTP Basic Access Authentication as a user with 'ADMIN' role. Unauthenticated requests prompt a 401 HTTP response containing a Basic Access Authentication challenge. How to use HTTP Basic Access Authentication varies according to the HTTP library or tool that you are using.

If your application will be issuing multiple commands through the API, we highly recommend that you use Session Authentication (see below). The standard basic authentication does a full re-authentication per request, which may affect the performance of your application.

#### HTTP XMLAPI Session Authentication

Authenticating with your username and password combination for each API request might introduce too much latency for some use-cases. To mitigate this, the API supports a session-based authentication mechanism.

To open a session, issue a POST to `http://<ip-address>/xmlapi/session/begin` with Basic Access Authentication. The response sets a SessionId-cookie that can be used with subsequent requests.

Note that when using API Session Authentication, it is important to explicitly close the session when you are done. Failing to do so may cause the device to run out of sessions, as there are a limited number of concurrent sessions available, and they do not time out automatically.

### URL cheat sheet

The following table contains the main URLs used when accessing the API over HTTP.

<table>
<thead>
<tr>
<th>Method</th>
<th>URL</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>GET</td>
<td>http://&lt;ip-address&gt;/status.xml</td>
<td>Complete status document</td>
</tr>
<tr>
<td>GET</td>
<td>http://&lt;ip-address&gt;/configuration.xml</td>
<td>Complete configuration document</td>
</tr>
<tr>
<td>GET</td>
<td>http://&lt;ip-address&gt;/command.xml</td>
<td>Complete command document</td>
</tr>
<tr>
<td>GET</td>
<td>http://&lt;ip-address&gt;/valuespace.xml</td>
<td>Complete valuespace document</td>
</tr>
<tr>
<td>GET</td>
<td>http://&lt;ip-address&gt;/getxml?location=&lt;path&gt;</td>
<td>Retrieve document based on a path</td>
</tr>
<tr>
<td>POST</td>
<td>http://&lt;ip-address&gt;/putxml</td>
<td>Configurations and commands in HTTP body</td>
</tr>
</tbody>
</table>

### Example: Starting a HTTP XMLAPI session

**Request:**
```
POST /xmlapi/session/begin HTTP/1.1
Authorization: Basic <Base64 encoded authentication string>
```

**Response:**
```
HTTP/1.1 204 No Content
Server: nginx/1.8.0
Connection: keep-alive
Set-Cookie: SessionId=f08102c8ce5aaf8fba23a7238cc2ef464b990e18bfbb7fbcf8820c0e28955c54; Path=/; HttpOnly
```

This session counts toward the systems concurrent sessions limit.

With an open session, provide the SessionId cookie to following requests. Your tool/library may do this automatically.

### Example: Using a HTTP XMLAPI session

**Request:**
```
GET /configuration.xml HTTP/1.1
Cookie: SessionId=f08102c8ce5aaf8fba23a7238cc2ef464b990e18bfbb7fbcf8820c0e28955c54
```

**Response:**
```
HTTP/1.1 200 OK
Server: nginx/1.8.0
Content-Type: text/xml; charset=UTF-8
Content-Length: 43549
Connection: keep-alive
<?xml version="1.0" encoding="UTF-8" standalone="yes"?>
<Configuration product="Cisco Codec" version="ce8.2.0" apiVersion="4">
  ...
</Configuration>
```

To close a session after use, issue a POST to `http://<ip-address>/xmlapi/session/end` with the provided cookie.

**Example: Closing a HTTP XMLAPI session**

**Request:**
```
POST /xmlapi/session/end HTTP/1.1
Cookie: SessionId=f08102c8ce5aaf8fba23a7238cc2ef464b990e18bfbb7fbcf8820c0e28955c54
```

**Response:**
```
HTTP/1.1 204 No Content
Server: nginx/1.8.0
Connection: keep-alive
Set-Cookie: SessionId=; Max-Age=0; Path=/;HttpOnly
```
Getting status and configurations

Example 1: Get all status entries on the codec.
http://<ip-address>/getxml?location=/Status

Example 2: Get just the audio statuses of the codec.
http://<ip-address>/getxml?location=/Status/Audio

Example 3: Get all configurations of the codec.
http://<ip-address>/getxml?location=/Configuration

Example 4: Get all video configurations of the codec.
http://<ip-address>/getxml?location=/Configuration/Video

Sending commands and configurations

Using HTTP POST

When sending configurations and commands to the codec, it is important that the HTTP header Content-Type is set to text/xml, i.e. Content-Type: text/xml. The body of the POST should contain the XML content.

Example 1: Changing the system name.

Request

POST /putxml HTTP/1.1
Content-Type: text/xml

<Configuration>
  <SystemUnit>
    <Name>newName</Name>
  </SystemUnit>
</Configuration>

Response

HTTP/1.1 200 OK
Content-Type: text/xml
Content-Length: 91

<?xml version="1.0"?>
<Command>
  <CameraPositionSetResult item="1" status="OK"/>
</Command>

Example 2: Setting the camera position.

Request

POST /putxml HTTP/1.1
Content-Type: text/xml

<Command>
  <Camera>
    <PositionSet command="True">
      <CameraId>1</CameraId>
      <Pan>200</Pan>
      <Tilt>200</Tilt>
    </PositionSet>
  </Camera>
</Command>

Response

HTTP/1.1 200 OK
Content-Type: text/xml
Content-Length: 91

<?xml version="1.0"?>
<Command>
  <CameraPositionSetResult item="1" status="OK"/>
</Command>
Feedback from codec over HTTP

You can get the device to post HTTP feedback messages (also known as webhooks) on changes to the API state, e.g. statuses, events and configuration updates. The HTTP Post feedback messages will be sent to the specified ServerURL. You can choose between events being posted in either XML or JSON format. You can subscribe to changes on multiple parts of the API by register up to 15 different feedback expressions.

Registering for feedback

The command for registering is `xCommand HttpFeedback Register`. The syntax for this command and its arguments are described in this section.

HttpFeedback Register syntax:

```
xCommand HttpFeedback Register
  FeedbackSlot: <1..4>
  ServerUrl(r): <S: 1, 2048>
  Format: <XML/JSON>
  Expression: <S: 1, 255>
  Expression: <S: 1, 255>
  Expression: <S: 1, 255>
  Expression: <S: 1, 255>
  Expressions: <S: 1, 255>
  Expressions: <S: 1, 255>
  Expressions: <S: 1, 255>
  Expressions: <S: 1, 255>
  Expressions: <S: 1, 255>
  Expressions: <S: 1, 255>
  Expressions: <S: 1, 255>
  Expressions: <S: 1, 255>
  Expressions: <S: 1, 255>
  Expressions: <S: 1, 255>
  Expressions: <S: 1, 255>
```

HttpFeedback Register arguments:

- **FeedbackSlot**: The codec can register up to 4 slots of servers requesting HTTP feedback. Set the registering to one of them.
- **ServerUrl**: The URL to the HTTP server where you want the codec to post the HTTP feedback messages to.
- **Format**: Set the format for the feedback from the HTTP server to XML or JSON.
- **Expression**: The XPath expression specifies which parts of the Status, Configuration or Event documents are monitored. You can have from 1 to 15 XPath expressions.
- **Example**: Registering feedback on configuration changes, disconnect events and call status changes.

```
POST /putxml HTTP/1.1
Content-Type: text/xml

<Command>
  <HttpFeedback>
    <Register command="True">
      <FeedbackSlot>I</FeedbackSlot>
      <ServerUrl>http://127.0.0.1/myhttppostscripturl</ServerUrl>
      <Format>XML</Format>
      <Expression>Configuration</Expression>
      <Expression>Event/CallDisconnect</Expression>
      <Expression>Status/Call</Expression>
    </Register>
  </HttpFeedback>
</Command>
```

Feedback output

When the codec notifies the registered HTTP server about changes, the body contains the same XML as when polling. There is however one small difference. The root-node contains an `Identification` node with children that specify the codec from which the notification originated. This means that you can handle multiple codecs with a single HTTP server URI.

**Example**: Audio volume changed.

```
<Configuration xmlns="http://www.company.com/XML/CUIL/2.0">
  <Identification>
    <SystemName>My System Name</SystemName>
    <MACAddress>00:00:de:ad:be:ef</MACAddress>
    <IPAddress>192.168.1.100</IPAddress>
    <ProductType>Cisco Codec</ProductType>
    <ProductID>Cisco Codec SX80</ProductID>
    <SWVersion>CE8.3.0.199465</SWVersion>
    <HWBoard>101401-5 [08]</HWBoard>
    <SerialNumber>PH00000000</SerialNumber>
  </Identification>
  <Audio item="1">
    <Volume item="1">60</Volume>
  </Audio>
</Configuration>
```
Translating from terminal mode to XML

Translating commands
The XML commands maintain the same structure as the terminal commands, but they use a parent-child relationship to describe the hierarchy. You can see this structure in the examples below.

Example 1: Setting up a call.
Terminal
xCommand Dial Number: "12345" Protocol: H323
XML
<Command>
  <Dial command="True">
    <Number>12345</Number>
    <Protocol>H323</Protocol>
  </Dial>
</Command>

Example 2: Assigning volume level
Terminal
xCommand Audio Volume Set Level: 50
XML
<Command>
  <Audio>
    <Volume>
      <Set command="True">
        <Level>50</Level>
      </Set>
    </Volume>
  </Audio>
</Command>

Translating configurations
Translating from xConfiguration to XML is similar to commands, but with the addition of a special attribute item="NN" for specifying the index in arrays.

Example: Configuring the input source type for video input connector 2.
Terminal
xConfiguration Video Input Connector 2
InputSourceType: camera
XML
<Configuration>
  <Video>
    <Input>
      <Connector item="2">
        <InputSourceType>camera</InputSourceType>
      </Connector>
    </Input>
  </Video>
</Configuration>
Dos and don’ts

Here are some best practices when programming the Cisco DX, MX, SX, and Room series API.

AVOID remote control emulation

The use of xCommand UserInterface OSD Key Click and xCommand UserInterface OSD Key Press commands is highly discouraged. The commands are still available in the API, but we recommend the use of direct commands, as this ensures backwards compatibility in your integrations. Program against the codec, not the on-screen-display.

DO use complete commands

You should always use complete commands when programming, i.e. always use xConfiguration Video instead of xconfvid. The shortcuts can be used for searches in the API on the command line, but not for programming. The reason for this is that you might end up with ambiguous code when additional commands are added to the API.

DO NOT subscribe to unnecessary feedback

Subscribing to too much feedback may congest the control application. Although the amount of feedback may seem fine in the current version, the amount of feedback may grow in future releases.
Chapter 3

xConfiguration commands
### Description of the `xConfiguration` commands

In this chapter, you can find a complete list of the `xConfiguration` commands.

We recommend you visit our web site regularly for updated versions of the manual.

Audio configuration

xConfiguration Audio DefaultVolume

Applies to: All products
Requires user role: ADMIN, INTEGRATOR, USER

Define the default volume for the speakers. The volume is set to this value when you switch on or restart the video system. Use the controls on the user interface to change the volume while it is running. You may also use API commands (xCommand Audio Volume) to change the volume while the video system is running, and to reset to default value.

**USAGE:**

```
xConfiguration Audio DefaultVolume: DefaultVolume
```

where

DefaultVolume: 

*Integer (0..100)*

*Range:* Select a value between 1 and 100. This corresponds to the dB range from -34.5 dB to 15 dB, in steps of 0.5 dB. If set to 0 the audio is switched off.

Default value:

50

xConfiguration Audio Input ARC [n] Mode

Applies to: CodecPro Room70G2
Requires user role: ADMIN, INTEGRATOR

Each HDMI output has an associated audio return channel (ARC). You can use the ARC to send audio from a screen or TV, which is connected to the HDMI output, to the video system. You can decide for each HDMI output connector (n) separately, whether or not to allow audio transmission.

**USAGE:**

```
xConfiguration Audio Input ARC [n] Mode: Mode
```

where

n: Unique ID that identifies the ARC input.

*Range:* 1..3 [CodecPro]

*Range:* 3..3 for Room 70 Dual G2; 2..3 for Room 70 Single G2 [Room70G2]

Mode:

*Off/On*

*Off:* Disable the ARC channel of HDMI output n (audio is not sent to the video system).

*On:* Enable the ARC channel of HDMI output n (audio is sent to the video system).

Default value:

*On*
xConfiguration Audio Input HDMI [n] Level

Applies to: SX80 MX700/MX800/MX800D RoomKit RoomKitMini CodecPlus CodecPro Room55 Room70G2
Requires user role: ADMIN, INTEGRATOR

Set the gain on the HDMI input connector. The gain can be tuned in steps of 1 dB.

**USAGE:**
xConfiguration Audio Input HDMI [n] Level: **Level**

where

- **n**: Unique ID that identifies the HDMI input.
  - Range: 1..3 [SX80 ]
  - Range: 2..3 for single camera systems; 3..3 for dual camera systems [MX700/MX800/MX800D ]
  - Range: 2..3 [CodecPlus ]
  - Range: 1..5 [CodecPro ]
  - Range: 1..1 [RoomKit RoomKitMini ]
  - Range: 1..2 [Room55 ]
  - Range: 2..5 [Room70G2 ]

**Level:**

- **Integer** (-24..0)
- **Range**: Select the gain in decibel (dB).
- **Default value**: 0

xConfiguration Audio Input HDMI [n] Mode

Applies to: SX80 MX700/MX800/MX800D RoomKit RoomKitMini CodecPlus CodecPro Room55 Room70G2
Requires user role: ADMIN, INTEGRATOR

Define if the audio on the HDMI input connector shall be enabled.

**USAGE:**
xConfiguration Audio Input HDMI [n] Mode: **Mode**

where

- **n**: Unique ID that identifies the HDMI input.
  - Range: 1..3 [SX80 ]
  - Range: 2..3 for single camera systems; 3..3 for dual camera systems [MX700/MX800/MX800D ]
  - Range: 2..3 [CodecPlus ]
  - Range: 1..5 [CodecPro ]
  - Range: 1..1 [RoomKit RoomKitMini ]
  - Range: 1..2 [Room55 ]
  - Range: 2..5 [Room70G2 ]

**Mode:**

- **Off**/ **On**
- **Off**: Disable audio on the HDMI input.
- **On**: Enable audio on the HDMI input.
- **Default value**: **On** [MX700/MX800/MX800D RoomKit RoomKitMini CodecPlus CodecPro Room55 Room70G2 ]
- **HDMI [1..2]**: **Off** [SX80 ]
xConfiguration Audio Input HDMI [n] VideoAssociation MuteOnInactiveVideo

Applies to: SX80 MX700/MX800/MX800D RoomKit RoomKitMini CodecPlus CodecPro Room55 Room70G2
Requires user role: ADMIN, INTEGRATOR

Use this setting to decide whether to stop the audio playback of a connected presentation source if that presentation source is not currently shown on-screen, or to always playback the audio as long as the presentation source is connected.

USAGE:

xConfiguration Audio Input HDMI [n] VideoAssociation MuteOnInactiveVideo:

MuteOnInactiveVideo

where

n: Unique ID that identifies the HDMI input.
  Range: 1..3 (SX80)
  Range: 2..3 for single camera systems; 3..3 for dual camera systems (MX700/MX800/MX800D)
  Range: 2..3 (CodecPlus)
  Range: 1..5 (CodecPro)
  Range: 1..2 (Room55)
  Range: 2..5 (Room70G2)
  Range: 1..1 (RoomKit RoomKitMini)

MuteOnInactiveVideo:

Off/On

Off: Audio is played, locally and to far end, as long as a presentation source is connected; you do not have to present the HDMI input source.

On: Audio is played, locally and to far end, only when the connected presentation source is shown on-screen.

Default value:

On (SX80 MX700/MX800/MX800D RoomKit RoomKitMini CodecPlus CodecPro Room55)

HDMI [1,2]: Off

HDMI [3,4,5]: On (CodecPro)

HDMI [2]: Off

HDMI [3,4,5]: On (Room70G2)

xConfiguration Audio Input Line [n] Equalizer ID

Applies to: SX80 MX700/MX800/MX800D
Requires user role: ADMIN, INTEGRATOR

Select the equalizer ID of the audio source that is connected to the line input.

USAGE:

xConfiguration Audio Input Line [n] Equalizer ID: ID

where

n: Unique ID that identifies the audio line input.
  Range: 1..4

ID: Integer (1..8)

Set the equalizer ID.

Default value:

1

xConfiguration Audio Input Line [n] Equalizer Mode

Applies to: SX80 MX700/MX800/MX800D
Requires user role: ADMIN, INTEGRATOR

Define the equalizer mode for the audio source that is connected to the line input.

USAGE:

xConfiguration Audio Input Line [n] Equalizer Mode: Mode

where

n: Unique ID that identifies the audio line input.
  Range: 1..4

Mode: Off/On

Off: No equalizer.

On: Enable the equalizer for the audio source that is connected to the line input.

Default value:

Off
xConfiguration Audio Input Line [n] VideoAssociation MuteOnInactiveVideo

Applies to: SX20  SX80  MX700/MX800/MX800D

Requires user role: ADMIN, INTEGRATOR

The audio source can be associated with a video source on the video input connector, and you can determine whether to play or mute audio depending on whether the video source is presented or not.

**USAGE:**
xConfiguration Audio Input Line [n] VideoAssociation MuteOnInactiveVideo:
MuteOnInactiveVideo

where

* n: Unique ID that identifies the audio line input.
  Range: 1..4  [SX80 MX700/MX800/MX800D]
  Range: 1..1  [SX20]

MuteOnInactiveVideo:

Off/On

Off: The audio source is not associated with a video source. The audio will be played locally and to far end regardless of whether the video source is presented.

On: The audio source is associated with a video source. The audio will be played (locally and to far end) when the associated video source is presented. The audio will be muted when the video source is not presented.

Default value:

Line [1, 2]: On  Line [3, 4]: Off  [SX80 MX700/MX800/MX800D]
On  [SX20]

xConfiguration Audio Input Line [n] VideoAssociation VideoInputSource

Applies to: SX20  SX80  MX700/MX800/MX800D

Requires user role: ADMIN, INTEGRATOR

The audio source can be associated with a video source on the video input connector.

**USAGE:**
xConfiguration Audio Input Line [n] VideoAssociation VideoInputSource:

VideoInputSource

where

* n: Unique ID that identifies the audio line input.
  Range: 1..4  [SX80 MX700/MX800/MX800D]
  Range: 1..1  [SX20]

VideoInputSource:

1/2/3/4  [SX80 MX700/MX800/MX800D]
1/2  [SX20]

Select the video input connector to associate the audio source with.

Default value:

Line [1, 2]: 4  Line [3, 4]: 1  [SX80 MX700/MX800/MX800D]
2  [SX20]
xConfiguration Audio Input Line [n] Channel

Applies to: SX80  MX700/MX800/MX800D
Requires user role: ADMIN, INTEGRATOR

Define whether the audio source on the line input is a mono signal or part of a multichannel signal.

**USAGE:**

xConfiguration Audio Input Line [n] Channel: **Channel**

where

n: Unique ID that identifies the audio line input.
Range: 1..4

Channel:
- **Left/Mono/Right**
  - **Left**: The Audio Line input signal is the left channel of a stereo signal.
  - **Mono**: The Audio Line input signal is a mono signal.
  - **Right**: The Audio Line input signal is the right channel of a stereo signal.

Default value: **Left**

---

xConfiguration Audio Input Line [n] Level

Applies to: SX80  MX700/MX800/MX800D
Requires user role: ADMIN, INTEGRATOR

Set the gain on the Line input connector. The gain should be adjusted to suit the output level of the connected audio source. The gain can be tuned in steps of 1 dB. If the gain is set too high, the audio signal will be clipped. If the gain is set too low, the audio signal-to-noise ratio will be degraded; however, this is usually preferable to clipping.

The maximum input level with 0 dB gain is 22 dBu.

Example: If your audio source has a maximum output level of 8 dBu, then you should set the gain to 22 dBu - 8 dBu = 14 dB.

**USAGE:**

xConfiguration Audio Input Line [n] Level: **Level**

where

n: Unique ID that identifies the audio line input.
Range: 1..4

Level:
- **Integer (0..24)**
  - **Range**: Select the gain in decibel (dB).

Default value: **10**
**xConfiguration Audio Input Line [n] Mode**

*Applies to: SX80, MX700/MX800/MX800D*

*Requires user role: ADMIN, INTEGRATOR*

Define the mode for the audio input line.

**USAGE:**

`xConfiguration Audio Input Line [n] Mode: Mode`

where

- `n`: Unique ID that identifies the audio line input.
  - Range: 1..4

`Mode`:

- `Off/On`
  - `Off`: Disable the Audio Line input.
  - `On`: Enable the Audio Line input.

Default value: `On`

---

**xConfiguration Audio Input Microphone [n] Channel**

*Applies to: CodecPro, Room70G2*

*Requires user role: ADMIN, INTEGRATOR*

Define whether the signal on the microphone input is a mono signal or part of a multichannel signal.

**USAGE:**

`xConfiguration Audio Input Microphone [n] Channel: Channel`

where

- `n`: Unique ID that identifies the microphone input.
  - Range: 1..8

`Channel`:

- `Left/Mono/Right`
  - `Left`: The microphone input signal is the left channel of a stereo signal.
  - `Mono`: The microphone input signal is a mono signal.
  - `Right`: The microphone input signal is the right channel of a stereo signal.

Default value: `Mono`
xConfiguration Audio Input Microphone [n] EchoControl Mode

**Applies to:** SX10  SX20  SX80  MX700/MX800/MX800D  RoomKit  CodecPlus  CodecPro  Room55  Room70/Room55D  Room70G2

**Requires user role:** ADMIN, INTEGRATOR

The echo canceller continuously adjusts itself to the audio characteristics of the room, and compensates for any changes it detects in the audio environment. If the changes in the audio conditions are significant, the echo canceller may take a second or two to re-adjust.

**USAGE:**
xConfiguration Audio Input Microphone [n] EchoControl Mode: Mode

where

- **n**: Unique ID that identifies the microphone input.
  - Range: 1..8  [ SX80 MX700/MX800/MX800D CodecPro Room70G2 ]
  - Range: 1..2  [ SX20 ]
  - Range: 2..2  [ SX10 ]
  - Range: 1..3  [ CodecPlus Room70/Room55D ]
  - Range: 2..3  [ RoomKit Room55 ]

**Mode**:

- **Off/On**
  - **Off**: Turn off the echo control. Recommended if external echo cancellation or playback equipment is used.
  - **On**: Turn on the echo control. Recommended, in general, to prevent the far end from hearing their own audio. Once selected, echo cancellation is active at all times.

Default value:

- **Off**

---

xConfiguration Audio Input Microphone [n] EchoControl Dereverberation

**Applies to:** SX10  SX20  SX80  MX700/MX800/MX800D  RoomKit  CodecPlus  CodecPro  Room55  Room70/Room55D  Room70G2

**Requires user role:** ADMIN, INTEGRATOR

The system has built-in signal processing to reduce the effect of room reverberation. Dereverberation requires that Audio Input Microphone [n] EchoControl Mode is enabled.

**USAGE:**
xConfiguration Audio Input Microphone [n] EchoControl Dereverberation: Dereverberation

where

- **n**: Unique ID that identifies the microphone input.
  - Range: 1..8  [ SX80 MX700/MX800/MX800D CodecPro Room70G2 ]
  - Range: 1..2  [ SX20 ]
  - Range: 2..2  [ SX10 ]
  - Range: 1..3  [ CodecPlus Room70/Room55D ]
  - Range: 2..3  [ RoomKit Room55 ]

**Dereverberation**:

- **Off/On**
  - **Off**: Turn off the dereverberation.
  - **On**: Turn on the dereverberation.

Default value:

- **Off**
xConfiguration Audio Input Microphone [n] EchoControl NoiseReduction

Applies to: SX10 SX20 SX80 MX700/MX800/MX800D RoomKit CodecPlus CodecPro Room55 Room70/Room55D Room70G2

Requires user role: ADMIN, INTEGRATOR

The system has built-in noise reduction, which reduces stationary background noise, for example noise from air-conditioning systems, cooling fans etc. In addition, a high pass filter (Humfiltr) reduces very low frequency noise. Noise reduction requires that Audio Input Microphone [n] EchoControl Mode is enabled.

**USAGE:**

```
xConfiguration Audio Input Microphone [n] EchoControl NoiseReduction: NoiseReduction
```

where

- \( n \): Unique ID that identifies the microphone input.
- Range: 1..8 [ SX80 MX700/MX800/MX800D CodecPro Room70G2 ]
- Range: 1..2 [ SX20 ]
- Range: 2..2 [ SX10 ]
- Range: 1..3 [ CodecPlus Room70/Room55D ]
- Range: 2..3 [ RoomKit Room55 ]

**NoiseReduction:**

- **Off/On**
  - **Off**: Turn off the noise reduction.
  - **On**: Turn on the noise reduction. Recommended in the presence of low frequency noise.

Default value:

- **On**

xConfiguration Audio Input Microphone [n] Equalizer ID

Applies to: SX80 MX700/MX800/MX800D CodecPro Room70G2

Requires user role: ADMIN, INTEGRATOR

Select the equalizer ID of the source that is connected to the microphone input.

**USAGE:**

```
xConfiguration Audio Input Microphone [n] Equalizer ID: ID
```

where

- \( n \): Unique ID that identifies the microphone input.
- Range: 1..8

**ID:**

- *Integer (1..8)*
- Set the equalizer ID.
- Default value:
  - **1**

xConfiguration Audio Input Microphone [n] Equalizer Mode

Applies to: SX80 MX700/MX800/MX800D CodecPro Room70G2

Requires user role: ADMIN, INTEGRATOR

Define the equalizer mode for the source that is connected to the microphone input.

**USAGE:**

```
xConfiguration Audio Input Microphone [n] Equalizer Mode: Mode
```

where

- \( n \): Unique ID that identifies the microphone input.
- Range: 1..8

**Mode:**

- **Off/On**
  - **Off**: No equalizer.
  - **On**: Enable the equalizer for the source that is connected to the microphone input.

Default value:

- **Off**
xConfiguration Audio Input Microphone [n] Level

 Applies to: SX10, SX20, SX80, MX200G2/MX300G2, MX700/MX800/MX800D, Room Kit, Codec Plus, Codec Pro, Room 55, Room 70, Room 55D, Room 70G2

 Requires user role: ADMIN, INTEGRATOR

 Set the gain on the Microphone input connector. The gain should be adjusted to suit the output level of the connected audio source. The gain can be tuned in steps of 1 dB.

 If the gain is set too high, the audio signal will be clipped. If the gain is set too low, the audio signal-to-noise ratio will be degraded; however, this is usually preferable to clipping.

 Note that unprocessed speech signals typically contain significant level variations, making it very important to allow for sufficient signal headroom.

 The maximum input level with 0 dB gain differs depending on the product: -18 dBu (SX10, SX20, MX200G2/MX300G2, Room Kit, Codec Plus, Room 55, Room 70, Room 55D), 22 dBu (SX80, MX700/MX800), 24 dBu (Codec Pro, Room 70 G2).

 Example: If your microphone has a maximum output level of -44 dBu, and it is connected to an SX80, then you should set the gain to 22 dBu - (-44 dBu) = 66 dB.

 USAGE:

 xConfiguration Audio Input Microphone [n] Level: Level

 where

 n: Unique ID that identifies the microphone input.
 Range: 1..8 [ SX80 MX700/MX800/MX800D CodecPro Room70G2 ]
 Range: 1..2 [ SX10 SX20 ]
 Range: 2..2 [ SX10 ]
 Range: 1..3 [ CodecPlus Room70/Room55D ]
 Range: 2..3 [ MX200G2/MX300G2 RoomKit Room55 ]

 Level:

 Integer (0..26) [ RoomKit Room55 ]
 Integer (0..24) [ SX10 SX20 MX200G2/MX300G2 CodecPlus Room70/Room55D ]
 Integer (0..70) [ SX80 MX700/MX800/MX800D CodecPro Room70G2 ]

 Range: Select the gain in decibel (dB).

 Default value:
 14 [ SX20 MX200G2/MX300G2 RoomKit CodecPlus Room55 Room70/Room55D ]
 17 [ SX10 ]
 58 [ SX80 MX700/MX800/MX800D CodecPro Room70G2 ]

 xConfiguration Audio Input Microphone [n] Mode

 Applies to: SX10, SX20, SX80, MX200G2/MX300G2, MX700/MX800/MX800D, Room Kit, Codec Plus, Codec Pro, Room 55, Room 70, Room 55D, Room 70G2

 Requires user role: ADMIN, INTEGRATOR

 Disable or enable audio on the microphone connector.

 SX10, MX200 G2, MX300 G2, Room Kit, Room Kit Mini, Room 55: Microphone [1] is the video system's internal microphone.

 USAGE:

 xConfiguration Audio Input Microphone [n] Mode: Mode

 where

 n: Unique ID that identifies the microphone input.
 Range: 1..8 [ SX80 MX700/MX800/MX800D CodecPro Room70G2 ]
 Range: 1..2 [ SX10 SX20 ]
 Range: 2..2 [ SX10 ]
 Range: 1..3 [ CodecPlus Room55 Room70/Room55D ]
 Range: 1..1 [ MX200G2/MX300G2 ]

 Mode:

 Off/On

 Off: Disable the audio input microphone connector.
 On: Enable the audio input microphone connector.

 Default value:
 On
xConfiguration Audio Input Microphone [n] Type

Applies to: SX80, MX700/MX800/MX800D
Requires user role: ADMIN, INTEGRATOR

The microphone connectors are intended for electret type microphones. The microphone connector can be set to Line or Microphone type. The pre-amplification gain is fully determined by the Audio Input Microphone Level setting. There is no limitation of the adjustment range caused by the chosen type.

**USAGE:**

```
xConfiguration Audio Input Microphone [n] Type: Type
```

where

- n: Unique ID that identifies the microphone input.
  - Range: 1..8
- Type:
  - **Line/Microphone**
  - **Microphone**: Select Microphone if your input source requires 48 V phantom power to operate.
  - **Line**: Select Line if 48 V phantom power is not required or desired for correct operation.

Default value:
- Microphone

---

xConfiguration Audio Input Microphone [n] PhantomPower

Applies to: CodecPro, Room70G2
Requires user role: ADMIN, INTEGRATOR

Define whether or not to have phantom power (48 V +/− 1 V) on the microphone input.

**USAGE:**

```
xConfiguration Audio Input Microphone [n] PhantomPower: PhantomPower
```

where

- n: Unique ID that identifies the microphone input.
  - Range: 1..8
- PhantomPower:
  - **Off/On**
    - **Off**: Disable the phantom power on the microphone input. Use this when connecting to equipment that do not need phantom power, such as external mixers.
    - **On**: Enable the phantom power on the microphone input. Use this when connecting directly to microphones that require phantom power, including the Cisco Table Microphone and Cisco Ceiling Microphone.

Default value:
- On
xConfiguration Audio Input Microphone [n] VideoAssociation
MuteOnInactiveVideo

Applies to: SX80 MX700/MX800/MX800D CodecPro
Requires user role: ADMIN, INTEGRATOR

The microphone can be associated with a video source on the video input connector, and
you can determine whether to play or mute audio depending on whether the video source is
presented or not. By default, audio is not muted.

USAGE:
xConfiguration Audio Input Microphone [n] VideoAssociation MuteOnInactiveVideo:
MuteOnInactiveVideo

where

n: Unique ID that identifies the microphone input.
Range: 1..8

MuteOnInactiveVideo:
Off/On

Off: No video source is associated.
On: A video source is associated, and the audio will be muted if the associated video
source is not displayed.
Default value:
On

xConfiguration Audio Input Microphone [n] VideoAssociation
VideoInputSource

Applies to: SX80 MX700/MX800/MX800D CodecPro Room70G2
 Requires user role: ADMIN, INTEGRATOR

Select the video input connector to associate the audio source with.

USAGE:
xConfiguration Audio Input Microphone [n] VideoAssociation VideoInputSource:
VideoInputSource

where

n: Unique ID that identifies the microphone input.
Range: 1..8

VideoInputSource:
1/2/3/4 [ SX80 MX700/MX800/MX800D ]
1/2/3/4/5/6 [ CodecPro Room70G2 ]

Select the video input connector to associate the audio source with.
Default value:
1
xConfiguration Audio Input MicrophoneMode

Applies to: DX70/DX80

Requires user role: ADMIN, INTEGRATOR

This setting applies only to DX80.

The DX80 has microphones in both legs. If you set the microphone mode to Focused, the microphones can be combined to focus sound sensitivity. As a result, the noise in the room is suppressed, and you can be heard better when sitting right in front of the video system. The voice of people not sitting right in front of the system will be suppressed.

If you set the microphone mode to Wide, the system behaves like any other system. The voice of people sitting beside you will be heard, and also more noise from the room.

We recommend that you use Focused mode when you are the only speaker. Use Wide mode when several speakers are in front of the system.

USAGE:

xConfiguration Audio Input MicrophoneMode: MicrophoneMode

where

MicrophoneMode:

- Focused/Wide
- Focused: Focused sound sensitivity, suppressing sound from sources that are not right in front of the video system.
- Wide: Default microphone operation with normal sound sensitivity.

Default value:

Wide

xConfiguration Audio KeyClickDetector Attenuate

Applies to: RoomKit RoomKitMini CodecPlus CodecPro Room55 Room70/Room55D Room70G2

Requires user role: ADMIN, INTEGRATOR, USER

The video system (codec) can detect clicking noise from a keyboard and automatically attenuate the microphone signal. This is useful when a meeting participant starts typing on the keyboard, because the noise can disturb the other participants. If the participant types on the keyboard and speaks at the same time the microphone signal will not be attenuated. Requires that the Audio KeyClickDetector Enabled setting is set to On.

USAGE:

xConfiguration Audio KeyClickDetector Attenuate: Attenuate

where

Attenuate:

- Off/On
- Off: The attenuation of the microphone signal is disabled.
- On: The system will attenuate the microphone signal if clicking noise from keyboards is detected. If voice or voice + keyboard clicks are detected the microphone signal will not be attenuated.

Default value:

On
xConfiguration Audio KeyClickDetector Enabled

 Applies to: RoomKit, RoomKitMini, CodecPlus, CodecPro, Room55, Room70/Room55D, Room70G2
 Requires user role: ADMIN, INTEGRATOR, USER

The video system (codec) can detect clicking noise from a keyboard and automatically attenuate the microphone signal. This is useful when a meeting participant starts typing on the keyboard, because the noise can disturb other participants. To enable attenuation on the microphone signal, set the Audio KeyClickDetector Attenuate to On.

**USAGE:**

```
xConfiguration Audio KeyClickDetector Enabled: Enabled
```

where

- **Enabled**
  - Off/On
  - Off: The key click detection is disabled.
  - On: The system will detect clicking noise from keyboards.

Default value:

- Off

xConfiguration Audio Microphones Mute Enabled

 Applies to: All products
 Requires user role: ADMIN, INTEGRATOR

Define the microphone mute behavior on the video system.

**USAGE:**

```
xConfiguration Audio Microphones Mute Enabled: Enabled
```

where

- **Enabled**
  - True/InCallOnly
  - True: Muting of audio is always available.
  - InCallOnly: Muting of audio is only available when the device is in a call. When Idle it is not possible to mute the microphone. This is useful when an external telephone service/audio system is connected via the codec and is to be available when the codec is not in a call.

When set to InCallOnly this will prevent the audio system from being muted by mistake.

Default value:

- True

xConfiguration Audio Microphones PhantomPower

 Applies to: SX20, MX200G2/MX300G2, RoomKit, CodecPlus, Room55
 Requires user role: ADMIN

Define whether or not to have phantom power (11 V +/- 1 V) on the microphone input.

**USAGE:**

```
xConfiguration Audio Microphones PhantomPower: PhantomPower
```

where

- **PhantomPower**
  - Off/On
  - Off: Disable the phantom power on the microphone input. Use this when connecting to equipment that do not need phantom power, such as external mixers.
  - On: Enable the phantom power on the microphone input. Use this when connecting directly to microphones that require phantom power, including the Cisco Table Microphone and Cisco Ceiling Microphone.

Default value:

- On
xConfiguration Audio MicrophoneReinforcement Input Microphone [n] Mode

Applies to: SX80, MX700/MX800/MX800D
Requires user role: ADMIN, INTEGRATOR

Set the microphone reinforcement mode individually on each microphone. The signals from all microphones with Mode = On will be mixed and fed to the selected MicrophoneReinforcement outputs. Also consult the Audio MicrophoneReinforcement Output Line Mode setting.

USAGE:
```
xConfiguration Audio MicrophoneReinforcement Input Microphone [n] Mode: Mode
```
where
- **n**: Unique ID that identifies the microphone input.
  - Range: 1..8
- **Mode**: Off/On
  - **On**: The microphone signal will be fed to the selected MicrophoneReinforcement outputs, as well as to the far end.
  - **Off**: The microphone signal will be sent only to the far end. It will not be fed to the selected MicrophoneReinforcement outputs.

Default value: Off

xConfiguration Audio MicrophoneReinforcement Output Line [n] Mode

Applies to: SX80, MX700/MX800/MX800D
Requires user role: ADMIN, INTEGRATOR

Set the microphone reinforcement mode individually on each line output. If Mode = On, the line output will add the microphone reinforcement mix to its ordinary output signal. Also consult the Audio MicrophoneReinforcement Input Microphone Mode setting.

USAGE:
```
xConfiguration Audio MicrophoneReinforcement Output Line [n] Mode: Mode
```
where
- **n**: Unique ID that identifies the microphone output.
  - Range: 1..4
- **Mode**: Off/On
  - **On**: This output will deliver far end audio, local presentation audio and the microphone reinforcement mix.
  - **Off**: This output will deliver far end audio and local presentation audio.

Default value: Off

xConfiguration Audio MicrophoneReinforcement Gain

Applies to: SX80, MX700/MX800/MX800D
Requires user role: ADMIN, INTEGRATOR

The gain (in dB) that will be applied to the mixed microphone signal that is fed to the selected MicrophoneReinforcement outputs.

USAGE:
```
xConfiguration Audio MicrophoneReinforcement Gain: Gain
```
where
- **Gain**: Integer (-54..15)
  - Use this gain to adjust the level of microphone signal that should be fed to the local output. The value -54 means "Off", and no signal will be fed from the microphone to the output.

Default value: -54
xConfiguration Audio Output ARC [n] Delay DelayMs

Applies to: CodecPro Room70G2
Requires user role: ADMIN, INTEGRATOR

To obtain lip-synchronization, you can configure each ARC output with an extra delay that compensates for delay in other connected devices, for example TVs and external loudspeakers. The delay that you set here is either fixed or relative to the delay measured on or reported by an external monitor, as defined in the Audio Output ARC [n] Delay Mode setting.

**USAGE:**

```
xConfiguration Audio Output ARC [n] Delay DelayMs: DelayMs
```

where

- `n`: Unique ID that identifies the audio ARC output.
  - Range: 1..1
- `DelayMs`:
  - Integer (0..290)
  - The delay in milliseconds.
- Default value: 0

xConfiguration Audio Output ARC [n] Delay Mode

Applies to: CodecPro Room70G2
Requires user role: ADMIN, INTEGRATOR

You may add extra delay to an audio ARC output with the Audio Output ARC [n] Delay DelayMs setting. The extra delay added is either a fixed number of milliseconds, or a number of milliseconds relative to the detected delay on or reported by an external monitor.

**USAGE:**

```
xConfiguration Audio Output ARC [n] Delay Mode: Mode
```

where

- `n`: Unique ID that identifies the audio ARC output.
  - Range: 1..1
- `Mode`:
  - `Fixed/RelativeToHDMI`
  - `Fixed`: Any extra delay (DelayMs) added to the output, will be a fixed number of milliseconds.
  - `RelativeToHDMI`: Any extra delay (DelayMs) added to the output, will be relative to the detected delay on or reported by an external monitor. The actual delay is detected-delay + DelayMs. The Audio Output Connectors ARC [n] DelayMs status reports the actual delay.
- Default value:
  - `RelativeToHDMI` [CodecPro]
  - `Fixed` [Room70G2]
xConfiguration Audio Output ARC [n] Mode

Applies to: CodecPro Room70G2

Requires user role: ADMIN, INTEGRATOR

Choose whether or not to enable the audio return channel (ARC) on the HDMI [n] input connector. The ARC output must be enabled if you want audio playback through the Quad Camera. On Room 70 G2, the Quad Camera is a part of the integrated loudspeaker system. We recommend to leave the ARC output enabled. If you want to disable the complete integrated loudspeaker system, use the Audio Output InternalSpeaker Mode setting.

**USAGE:**
xConfiguration Audio Output ARC [n] Mode: Mode
where

`n`: Unique ID that identifies the audio ARC output.

- **Range:** 1..1
- **Mode:**
  - Off/On
  - *Off*: Disable the ARC output on the HDMI input.
  - *On*: Enable the ARC output on the HDMI input.

Default value:

- **On**

xConfiguration Audio Output ConnectorSetup

Applies to: CodecPro Room70G2

Requires user role: ADMIN, INTEGRATOR

You can choose whether to set up the audio inputs and outputs manually, or to let the video system (codec) do it automatically based on the type of camera you have and which screens are connected.

In Auto mode, you cannot add, update, delete or connect audio inputs and outputs manually. Therefore the following API commands do not have any effect: xCommand Audio Setup *, xCommand Audio LocalInput *, and xCommand Audio LocalOutput *.

When going from Manual to Auto mode: The existing Audio setup is cleared (xCommand Audio Setup Clear), and the input and output groups are set up according to product defaults. The Audio Output HDMI [n] Mode and Audio Output ARC [1] Mode settings are set to their default value. For Codec Pro automatic delay measurement is enabled.

When going from Auto to Manual mode: The HDMI and ARC output connectors are connected to the default groups. The Audio Output HDMI [n] Mode and Audio Output ARC [1] Mode settings are not changed. For Codec Pro delay measurement is stopped.

**USAGE:**
xConfiguration Audio Output ConnectorSetup: ConnectorSetup
where

**ConnectorSetup:**

- **Auto/Manual**
  - **Auto**: For Code Pro, the system will play audio either through the camera, or through a screen that is connected to one of the HDMI outputs. The system chooses to play the audio on the first available device in the following list:
    1. A Quad Camera that has camera control connected to one of the camera control connectors of the codec (Ethernet 2 or 3), and HDMI connected to the camera input of the codec (HDMI 1 input). Additionally, the Audio Output ARC [1] Mode and Video Input Connector [1] CEC Mode settings must be On. The audio return channel (ARC) on the HDMI 1 input is used to play audio through the camera.
    2. A screen that is connected to the HDMI 1 output, provided that the Audio Output HDMI [1] Mode setting is On.
    3. A screen that is connected to the HDMI 2 output, provided that the Audio Output HDMI [2] Mode setting is On.
    4. A screen that is connected to the HDMI 3 output, provided that the Audio Output HDMI [3] Mode setting is On.
  
  When audio is played out through the Quad Camera, the system will measure the delay between a screen and the camera, so that it can synchronize the audio on the camera with the video on screen (lip-synchronization). In order to measure the delay, the codec
sends a signal to the screen, and the screen sends the signal back to the codec using the audio return channel. The first screen in the list above that supports CEC (Consumer Electronics Control), and has the Video Output Connector [n] CEC Mode set to On, is used for the delay measurements.

When audio is played out through a screen, additional lip-synchronization delay is the responsibility of the screen. The codec will not add any delay.

For Room 70 G2, the system will play audio through its integrated loudspeaker system, provided that Audio Output ARC [1] Mode and Audio Output InternalSpeaker Mode is On, and Audio Output HDMI [n] Mode is On for the integrated screen(s). Automatic delay measurement is not necessary, because the relationship between the integrated loudspeaker system and screen(s) is known.

Manual: You must set up the audio inputs and outputs manually using the Audio Console application or the API (xCommand Audio LocalInput *, and xCommand Audio LocalOutput *).

For Room 70 G2, external screen(s) may be used for audio output if the connectors are explicitly added using the Audio Console application or the API (xCommand Audio LocalOutput *). In that case, the external screens will play a stereo down mix of the audio that is played on the built-in loudspeaker system. Ultrasound signals will not play through external screens or line outputs; only through the integrated loudspeaker system.

Default value: Auto

**xConfiguration Audio Output HDMI [n] Delay DelayMs**

**Applies to:** CodecPro

**Requires user role:** ADMIN, INTEGRATOR

To obtain lip-synchronization, you can configure each HDMI output with an extra delay that compensates for delay in other connected devices, for example TVs and external loudspeakers. The delay that you set here is either fixed or relative to the delay measured on or reported by an external monitor, as defined in the Audio Output HDMI [n] Delay Mode setting.

**USAGE:**

```
xConfiguration Audio Output HDMI [n] Delay DelayMs: DelayMs
```

where

- **n**: Unique ID that identifies the audio line output.
  - Range: 1..3
- **DelayMs**: Integer (0..290)
  - The delay in milliseconds.

Default value: 0
xConfiguration Audio Output HDMI [n] Delay Mode

Applies to: CodecPro

Requires user role: ADMIN, INTEGRATOR

You may add extra delay to an audio hdmi output with the Audio Output HDMI [n] Delay DelayMs setting. The extra delay added is either a fixed number of milliseconds, or a number of milliseconds relative to the detected delay on or reported by an external monitor.

**USAGE:**

xConfiguration Audio Output HDMI [n] Delay Mode: {Mode}

where

- n: Unique ID that identifies the audio line output.
  - Range: 1..3

Mode:

- **Fixed/RelativeToHDMI**
- **Fixed**: Any extra delay (DelayMs) added to the output, will be a fixed number of milliseconds.
- **RelativeToHDMI**: Any extra delay (DelayMs) added to the output, will be relative to the detected delay on or reported by an external monitor. The actual delay is detected-delay + DelayMs. The Audio Output Connectors HDMI [n] DelayMs status reports the actual delay.

Default value:

- **Fixed**

---

xConfiguration Audio Output HDMI [n] Level

Applies to: SX80 MX700/MX800D Room70G2

Requires user role: ADMIN, INTEGRATOR

Set the gain on the HDMI input connector. The gain can be tuned in steps of 1 dB.

**USAGE:**

xConfiguration Audio Output HDMI [n] Level: {Level}

where

- n: Unique ID that identifies the HDMI output.
  - Range: 1..3 [Room70G2]
  - Range: 1..2 [SX80]
  - Range: 1..1 for single screen systems; 1..2 for dual screen systems [MX700/MX800/MX800D]

**Level:**

- **Integer (-24..0)**
- **Range**: Select the gain in decibel (dB).
- **Default value**: 
  - 0
### xConfiguration Audio Output HDMI [n] Mode

**Applies to:** SX80 MX700/MX800/MX800D CodecPlus CodecPro Room70G2

**Requires user role:** ADMIN, INTEGRATOR

Define if the audio channel on this HDMI output connector shall be enabled.

**USAGE:**

xConfiguration Audio Output HDMI [n] Mode: **Mode**

where

- **n:** Unique ID that identifies the HDMI output.
  - Range: 1..1 [CodecPlus ]
  - Range: 1..3 [CodecPro Room70G2 ]
  - Range: 1..2 [SX80 ]
  - Range: 1..1 for single screen systems; 1..2 for dual screen systems [MX700/MX800/MX800D ]

**Mode:**

- **Off/On**
  - **Off:** The connector will not be used for audio out.
  - **On:** The connector can be used for audio out. For Codec Pro and Room 70 G2 it depends on the Audio Output ConnectorSetup setting.

**Default value:**

- **Room 70 Dual G2:** HDMI 1,2: On   HDMI 3: Off
- **Room 70 Single G2:** HDMI 1: On   HDMI 2,3: Off [Room70G2 ]
- **On** [MX700/MX800/MX800D CodecPlus CodecPro ]
- **HDMI 1:** On   **HDMI 2:** Off [SX80 ]

### xConfiguration Audio Output InternalSpeaker Mode

**Applies to:** MX200G2/MX300G2 MX700/MX800/MX800D RoomKit CodecPlus Room55 Room70/Room55D Room70G2

**Requires user role:** ADMIN

Define whether or not to use the camera's integrated speakers. Codec Plus must be connected to a Quad Camera for this setting to apply.

For Room 70 G2, MX700, and MX800, the Audio Output HDMI [n] Mode settings for the integrated monitor(s) must be set to On in order to play any audio on the integrated speakers. For Room 70 G2, also the Audio Output ARC 1 Mode setting must be On.

For all products except Codec Plus, MX300 G2, and MX200 G2, you can limit the use of the integrated speakers to play only ultrasound.

**USAGE:**

xConfiguration Audio Output InternalSpeaker Mode: **Mode**

where

**Mode:**

- **Off/On/UltrasoundOnly** [MX700/MX800/MX800D RoomKit Room55 Room70/Room55D Room70G2 ]
  - **Off/On** [MX200G2/MX300G2 CodecPlus ]
  - **Off:** Disable the video system's integrated speakers.
  - **On:** Enable the video system's integrated speakers.
  - **UltrasoundOnly:** Enable the video system's integrated speakers only for ultrasound.

**Default value:**

- **On**
xConfiguration Audio Output Line [n] Channel

Applies to: SX80 MX700/MX800/MX800D CodecPro Room70G2
Requires user role: ADMIN, INTEGRATOR

Define whether the Audio Line output is a mono signal or part of a multichannel signal.

**USAGE:**
xConfiguration Audio Output Line [n] Channel: Channel

where

- \text{n}: Unique ID that identifies the audio line output.
  - Range: 1..6
- \text{Channel}:
  - \text{Left/Mono/Right}
  - \text{Left}: The Audio Line output signal is the left channel of a stereo signal.
  - \text{Mono}: The Audio Line output signal is a mono signal.
  - \text{Right}: The Audio Line output signal is the right channel of a stereo signal.

Default value:

  Line [1,3,5]: Left  Line [2,4,6]: Right

xConfiguration Audio Output Line [n] Delay DelayMs

Applies to: SX10 SX20 SX80 MX700/MX800/MX800D CodecPro Room70G2
Requires user role: ADMIN, INTEGRATOR

To obtain lip-synchronization, you can configure each audio line output with an extra delay that compensates for delay in other connected devices, for example TVs and external loudspeakers. The delay that you set here is either fixed or relative to the delay on the HDMI output, as defined in the Audio Output Line [n] Delay Mode setting.

**USAGE:**
xConfiguration Audio Output Line [n] Delay DelayMs: DelayMs

where

- \text{n}: Unique ID that identifies the audio line output.
  - Range: 1..6  \[ SX80 MX700/MX800/MX800D CodecPro Room70G2 \]
  - Range: 1..1  \[ SX10 SX20 \]
- \text{DelayMs}:
  - \text{Integer (0..290)}
  - The delay in milliseconds.

Default value:

  0
xConfiguration Audio Output Line [n] Delay Mode

**Applies to:** SX10 SX20 SX80 MX700/MX800/MX800D CodecPro Room70G2

**Requires user role:** ADMIN, INTEGRATOR

You may add extra delay to an audio line output with the Audio Output Line [n] Delay DelayMs setting. The extra delay added is either a fixed number of milliseconds, or a number of milliseconds relative to the detected delay on the HDMI output (typically introduced by the connected TV).

**USAGE:**

xConfiguration Audio Output Line [n] Delay Mode: **Mode**

where

- **n**: Unique ID that identifies the audio line output.
  - Range: 1..6 [SX80 MX700/MX800/MX800D CodecPro Room70G2]
  - Range: 1..1 [SX10 SX20]

- **Mode**: Fixed/RelativeToHDMI
  - **Fixed**: Any extra delay (DelayMs) added to the output, will be a fixed number of milliseconds.
  - **RelativeToHDMI**: Any extra delay (DelayMs) added to the output, will be relative to the detected delay on the HDMI output. The actual delay is HDMI-delay + DelayMs. The Audio Output Connectors Line [n] DelayMs status reports the actual delay.

**Default value:**

- **Fixed** [SX80 MX700/MX800/MX800D]
- **RelativeToHDMI** [SX10 SX20 CodecPro Room70G2]

xConfiguration Audio Output Line [n] Equalizer ID

**Applies to:** SX80 MX700/MX800/MX800D CodecPro Room70G2

**Requires user role:** ADMIN, INTEGRATOR

Select the equalizer ID for the audio source that is connected to the output line.

**USAGE:**

xConfiguration Audio Output Line [n] Equalizer ID: **ID**

where

- **n**: Unique ID that identifies the audio line output.
  - Range: 1..6
- **ID**: Integer (1..8)
  - Set the equalizer ID.
  - Default value: 1

xConfiguration Audio Output Line [n] Equalizer Mode

**Applies to:** SX80 MX700/MX800/MX800D CodecPro Room70G2

**Requires user role:** ADMIN, INTEGRATOR

Define the equalizer mode for the audio source that is connected to the line output.

**USAGE:**

xConfiguration Audio Output Line [n] Equalizer Mode: **Mode**

where

- **n**: Unique ID that identifies the audio line output.
  - Range: 1..6
- **Mode**: Off/On
  - **Off**: No equalizer.
  - **On**: Enable the equalizer for the audio line output.

**Default value:**

- **Off**
**xConfiguration Audio Output Line [n] Level**

*Applies to:* SX80, MX700/MX800/MX800D, CodecPro, Room70/Room55D, Room70G2

*Requires user role:* ADMIN, INTEGRATOR

Set the gain on the Line output connector. The gain should be adjusted to fit the audio input level of the connected device. The gain can be tuned in steps of 1 dB.

The maximum output level with 0 dB gain differs depending on the product: 22 dBu (SX80, MX700/MX800), 8 dBu (Room 70, Room 55 Dual), 18 dBu (Codec Pro, Room 70 G2).

Example: If the audio device that is connected to an SX80 has max input level 10 dBu, then you should set the gain to 10 dBu - 22 dBu = -12 dB.

**USAGE:**

xConfiguration Audio Output Line [n] Level: Level

where

- `n`: Unique ID that identifies the audio line output.
  - Range: 1..6 [SX80, MX700/MX800/MX800D, CodecPro, Room70G2]
  - Range: 1..1 [Room70/Room55D]

- `Level`: Integer (-24..0)
  - Range: Select the gain in decibel (dB).
  - Default value:
    - -10 [SX80, MX700/MX800/MX800D]
    - 0 [CodecPro, Room70/Room55D, Room70G2]

---

**xConfiguration Audio Output Line [n] Mode**

*Applies to:* SX80, MX700/MX800/MX800D, RoomKit, CodecPlus, CodecPro, Room55, Room70/Room55D, Room70G2

*Requires user role:* ADMIN, INTEGRATOR

Define the mode for the audio line output.

**USAGE:**

xConfiguration Audio Output Line [n] Mode: Mode

where

- `n`: Unique ID that identifies the audio line output.
  - Range: 1..6 [SX80, MX700/MX800/MX800D, CodecPro, Room70G2]
  - Range: 1..1 [RoomKit, CodecPlus, Room55, Room70/Room55D]

- `Mode`: Off/On
  - Off: Disable the audio line output.
  - On: Enable the audio line output.
  - Default value: On
**xConfiguration Audio Output Line [n] OutputType**

**Applies to:** RoomKit CodecPlus Room55 Room70/Room55D  
**Requires user role:** ADMIN, INTEGRATOR

The output type should be set to match the connected device.

**USAGE:**

```plaintext
xConfiguration Audio Output Line [n] OutputType: OutputType
```

where

- **n**: Unique ID that identifies the audio line output.  
  Range: 1..1
- **OutputType**:
  - **LineOut/Loudspeaker/Recorder/Subwoofer**  
  - **Loudspeaker**: Use Loudspeaker if a loudspeaker is connected to the line output. In this mode, the output level on that connector follows the master volume control, and the output signal includes all system sounds (ringtones, webex assistant etc.).
  - **Recorder**: Use Recorder if a recorder is connected to the line output. In this mode, the output level is fixed, and system sounds are not included. What is included is the sound from local presentation sources, the local microphones as well as any far end sources.
  - **Subwoofer**: Use Subwoofer if a subwoofer is connected to the line output. In this mode the bass is sent to LineOut and the rest of the audio range is played on the internal speaker.
  - **LineOut**: Use LineOut for other devices. In this mode, the internal speaker will play full range audio. The output level is fixed, and system sounds are not included. What is included is the sound from local presentation sources, as well as any far end sources.

**Default value:**

- **Loudspeaker**  
  - **RoomKit CodecPlus Room55**
- **LineOut**  
  - **Room70/Room55D**

**xConfiguration Audio SoundsAndAlerts RingTone**

**Applies to:** All products  
**Requires user role:** ADMIN, INTEGRATOR, USER

Define which ringtone to use for incoming calls.

**USAGE:**

```plaintext
xConfiguration Audio SoundsAndAlerts RingTone: RingTone
```

where

- **RingTone**:
  - **Sunrise/Mischief/Ripples/Reflections/Vibes/Delight/Playful/Ascent/Calculation/Mellow/Ringer**
  - Select a ringtone from the list.
  - **Default value:**  
    - **Sunrise**

**xConfiguration Audio SoundsAndAlerts RingVolume**

**Applies to:** All products  
**Requires user role:** ADMIN, INTEGRATOR, USER

Define the ring volume for incoming calls.

**USAGE:**

```plaintext
xConfiguration Audio SoundsAndAlerts RingVolume: RingVolume
```

where

- **RingVolume**:
  - **Integer (0..100)**
  - **Range**: The value goes in steps of 5 from 0 to 100 (from -34.5 dB to 15 dB). Volume 0 = Off.
  - **Default value:**
    - **50**  
      - **DX70/DX80 SX10 SX20 SX80 RoomKit RoomKitMini CodecPlus CodecPro Room55 Room70/Room55D Room70G2**
    - **40**  
      - **MX200G2/MX300G2**
    - **30**  
      - **MX700/MX800/MX800D**
xConfiguration Audio Ultrasound MaxVolume

Applies to: All products
Requires user role: ADMIN, INTEGRATOR

This setting applies to the Intelligent Proximity feature. Set the maximum volume of the ultrasound pairing message.

**USAGE:**

```
xConfiguration Audio Ultrasound MaxVolume: MaxVolume
```

where

```
MaxVolume:
Integer (0..90)  |  SX20  SX80  MX70G/MX800/MX90GD  CodecPlus  CodecPro
Integer (0..70)  |  SX10  MX200G2/MX300G2  RoomKit
Integer (0..60)  |  RoomKitMini
Integer (0..80)  |  Room70/Room55D  Room70G2
DX80: Integer (0..90)  |  DX70: Integer (0..60)  |  DX70/DX80
Integer (0..84)  |  Room55
```

Select a value in the specified range. If set to 0, the ultrasound is switched off.

Default value:

```
70  |  SX10  RoomKit
60  |  SX20  SX80  RoomKitMini  CodecPlus  CodecPro  Room70/Room55D  Room70G2
50  |  MX200G2/MX300G2
DX80: 70  |  DX70: 60  |  DX70/DX80
64  |  Room55
66  |  MX700/MX800/MX800D
```

---

CallHistory configuration

---

xConfiguration CallHistory Mode

Applies to: All products
Requires user role: ADMIN, INTEGRATOR

Determine whether or not information about calls that are placed or received are stored, including missed calls and calls that are not answered (call history). This determines whether or not the calls appear in the Recents list in the user interfaces.

**USAGE:**

```
xConfiguration CallHistory Mode: Mode
```

where

```
Mode:
Off/On
```

- **Off:** New entries are not added to the call history.
- **On:** New entries are stored in the call history list.

Default value:

```
On
```
Cameras configuration

**xConfiguration Cameras Camera [n] AssignedSerialNumber**

**Applies to:** SX80 MX700/MX800/MX800D CodecPlus CodecPro Room70/Room55D

**Requires user role:** ADMIN, INTEGRATOR

The camera ID is the number n in Camera [n]. By default, the camera ID is assigned automatically to a camera. If EDID information is not passed on from the camera to the codec, the camera ID is not persistent after a reboot. This means that a camera may get a new camera ID when the codec (video system) is restarted.

You should use the Cameras Camera AssignedSerialNumber setting to cater for configurations where the codec does not receive EDID information from multiple cameras. This setting allows you to manually assign a camera ID to a camera by associating the camera ID with the camera's serial number. The setting is persistent until the codec is factory reset.

Typical situations where the codec does not receive EDID information are: when you connect a Cisco TelePresence Precision 60 camera using 3G-SDI; when you connect a Cisco TelePresence Precision 40 (Cisco TelePresence PrecisionHD 1080p4xS2) camera; when you use an HDMI repeater that does not pass on EDID information.

**USAGE:**

```xConfiguration Cameras Camera [n] AssignedSerialNumber: "AssignedSerialNumber"
```

where

- n: Unique ID that identifies the camera.
  
  Range: 1..7 [ SX80 MX700/MX800/MX800D CodecPro ]
  Range: 1..3 [ CodecPlus Room70/Room55D ]

**AssignedSerialNumber:**

String (0, 20)

The camera's serial number.

Default value: ""

---

**xConfiguration Cameras Camera [n] Backlight DefaultMode**

**Applies to:** DX70/DX80 SX10 SX20 SX80 MX200G2/MX300G2 MX700/MX800/MX800D CodecPlus CodecPro Room70/Room55D Room70G2

**Requires user role:** ADMIN, INTEGRATOR

This configuration turns backlight compensation on or off. Backlight compensation is useful when there is much light behind the persons in the room. Without compensation the persons will easily appear very dark to the far end.

Not applicable for the Cisco Quad Camera and the integrated camera of Room 55 Dual, Room 70, and Room 70 G2. These cameras automatically adjust themselves based on the room lighting conditions.

**USAGE:**

```xConfiguration Cameras Camera [n] Backlight DefaultMode: DefaultMode
```

where

- n: Unique ID that identifies the camera.
  
  Range: 1..7 [ SX80 MX700/MX800/MX800D CodecPro Room70G2 ]
  Range: 1..1 [ DX70/DX80 SX10 SX20 MX200G2/MX300G2 ]
  Range: 1..3 [ CodecPlus Room70/Room55D ]

**DefaultMode:**

- Off/On
- Off: Turn off the camera backlight compensation.
- On: Turn on the camera backlight compensation.

Default value:

- Off
**xConfiguration Cameras Camera [n] Brightness Mode**

**Applies to:** SX10 SX20 SX80 MX200G2/MX300G2 MX700/MX800/MX800D CodecPlus CodecPro Room70/Room55D Room70G2

**Requires user role:** ADMIN, INTEGRATOR

Define the camera brightness mode.

Not applicable for the Cisco Quad Camera and the integrated camera of Room 55 Dual, Room 70, and Room 70 G2. These cameras automatically adjust themselves based on the room lighting conditions.

** USAGE:**

```
xConfiguration Cameras Camera [n] Brightness Mode: Mode
```

where

- `n`: Unique ID that identifies the camera.
  - Range: 1..7 [ SX80 MX700/MX800/MX800D CodecPro Room70G2 ]
  - Range: 1..1 [ SX10 SX20 MX200G2/MX300G2 ]
  - Range: 1..3 [ CodecPlus Room70/Room55D ]

**Mode:**

- `Auto/Manual`
  - `Auto`: The camera brightness is automatically set by the system.

**Default value:**

- `Auto`

**xConfiguration Cameras Camera [n] Brightness DefaultLevel**

**Applies to:** SX10 SX20 SX80 MX200G2/MX300G2 MX700/MX800/MX800D CodecPlus CodecPro Room70/Room55D Room70G2

**Requires user role:** ADMIN, INTEGRATOR

Define the brightness level. Requires the Cameras Camera [n] Brightness Mode to be set to Manual.

Not applicable for the Cisco Quad Camera and the integrated camera of Room 55 Dual, Room 70, and Room 70 G2. These cameras automatically adjust themselves based on the room lighting conditions.

** USAGE:**

```
xConfiguration Cameras Camera [n] Brightness DefaultLevel: DefaultLevel
```

where

- `n`: Unique ID that identifies the camera.
  - Range: 1..7 [ SX80 MX700/MX800/MX800D CodecPro Room70G2 ]
  - Range: 1..1 [ SX10 SX20 MX200G2/MX300G2 ]
  - Range: 1..3 [ CodecPlus Room70/Room55D ]

**Default Level:**

- `Integer (1..31)`

  The brightness level.

**Default value:**

- `20`
xConfiguration Cameras Camera [n] Flip
Applies to: SX10 SX20 SX80 MX700/MX800/MX800D CodecPro
Requires user role: ADMIN, INTEGRATOR
With Flip mode (vertical flip) you can flip the image upside down. Flipping applies both to the self-view and the video that is transmitted to the far end.

**USAGE:**

xConfiguration Cameras Camera [n] Flip: Flip

where

n: Unique ID that identifies the camera.
   Range: 1..7 [ SX80 CodecPro ]
   Range: 2..7 for single camera systems; 3..7 for dual camera systems [ MX700/MX800/MX800D ]
   Range: 1..1 [ SX10 SX20 ]

Flip:
   Auto/Off/On [ SX20 SX80 MX700/MX800/MX800D CodecPro ]
   Auto [ SX10 ]

Auto: If the camera detects that it is mounted upside down, the image is automatically flipped. If the camera cannot auto-detect whether it is mounted upside down or not, the image is not changed.

Off: Display the image on screen the normal way.

On: Display the image flipped upside down. This setting is used when a camera is mounted upside down, but cannot automatically detect which way it is mounted.

Default value:

Auto

---

xConfiguration Cameras Camera [n] Focus Mode
Applies to: SX10 SX20 SX80 MX200G2/MX300G2 MX700/MX800/MX800D CodecPlus CodecPro Room70/Room55D Room70G2
Requires user role: ADMIN, INTEGRATOR
Define the camera focus mode.

**USAGE:**

xConfiguration Cameras Camera [n] Focus Mode: Mode

where

n: Unique ID that identifies the camera.
   Range: 1..7 [ SX80 CodecPro Room70G2 ]
   Range: 2..7 for single camera systems; 3..7 for dual camera systems [ MX700/MX800/MX800D ]
   Range: 1..1 [ SX10 SX20 MX200G2/MX300G2 ]
   Range: 1..3 [ CodecPlus Room70/Room55D ]

Mode:
   Auto/AutoLimited/Manual [ SX10 SX20 MX200G2/MX300G2 MX700/MX800/MX800D CodecPlus ]
   Auto/Manual [ CodecPro Room70/Room55D Room70G2 ]

Auto: The auto focus works differently for different products. For Room 55 Dual, Room 70, Room 70 G2, and when using the Cisco Quad Camera with a codec (SX80 or Codec Plus), the camera will do single shot auto focusing once a call is connected, and when the view has changed. For SX10, SX20, MX200 G2, MX300 G2 and SX80 with a Cisco TelePresence Precision 40 or Cisco TelePresence PrecisionHD 12x camera, the camera will do single shot auto focusing once a call is connected, as well as after a pan, tilt, or zoom. For MX700/MX800 and when using a Cisco TelePresence Precision 60 camera with a codec (SX80 or Codec Plus), the camera will do continuous auto focusing. It will run auto focus once a call is connected, after pan, tilt, or zoom, and generally when the camera identifies a change in the scene.

AutoLimited: This mode only applies when using a Cisco TelePresence Precision 60 camera with a codec (SX80 or Codec Plus), and to MX700/MX800. In most cases this mode will operate the same way as auto focus. In some cases auto-limited will reduce the focus hunting that may occur. Problematic scenes have large areas with low or no contrast, for instance a painted wall with no details, or maybe a partly empty whiteboard. There’s a slightly higher chance of background focus with this mode, compared to auto focus.

Manual: Turn the auto focus off and adjust the camera focus manually.

Default value:

Auto
**xConfiguration Cameras Camera [n] Gamma Mode**

**Applies to:** SX20, SX80, MX200G2/MX300G2, MX700/MX800/MX800D, CodecPlus, CodecPro, Room70/Room55D, Room70G2

**Requires user role:** ADMIN, INTEGRATOR

This setting enables gamma corrections. Gamma describes the nonlinear relationship between image pixels and monitor brightness. Not applicable for the Cisco Quad Camera and the integrated camera of Room 55 Dual, Room 70, and Room 70 G2. These cameras automatically adjust themselves based on the room lighting conditions.

**USAGE:**

xConfiguration Cameras Camera [n] Gamma Mode: **Mode**

where

- **n**: Unique ID that identifies the camera.
  - Range: 1..7 [ SX80 MX700/MX800/MX800D CodecPro Room70G2 ]
  - Range: 1..1 [ SX20 MX200G2/MX300G2 ]
  - Range: 1..3 [ CodecPlus Room70/Room55D ]

**Mode**:

- **Auto/Manual**
- **Auto**: Auto is the default and the recommended setting.
  - **Manual**: In manual mode the gamma value is changed with the gamma level setting, ref. Cameras Camera [n] Gamma Level.

**Default value:**

- **Auto**

---

**xConfiguration Cameras Camera [n] Gamma Level**

**Applies to:** SX20, SX80, MX200G2/MX300G2, MX700/MX800/MX800D, CodecPlus, CodecPro, Room70/Room55D, Room70G2

**Requires user role:** ADMIN, INTEGRATOR

By setting the Gamma Level you can select which gamma correction table to use. This setting may be useful in difficult lighting conditions, where changes to the brightness setting does not provide satisfactory results. Requires the Cameras Camera [n] Gamma Mode to be set to Manual.

Not applicable for the Cisco Quad Camera and the integrated camera of Room 55 Dual, Room 70, and Room 70 G2. These cameras automatically adjust themselves based on the room lighting conditions.

**USAGE:**

xConfiguration Cameras Camera [n] Gamma Level: **Level**

where

- **n**: Unique ID that identifies the camera.
  - Range: 1..7 [ SX80 MX700/MX800/MX800D CodecPro Room70G2 ]
  - Range: 1..1 [ SX20 MX200G2/MX300G2 ]
  - Range: 1..3 [ CodecPlus Room70/Room55D ]

**Level**:

- **Integer (0..7)**
- **Define the gamma level.**

**Default value:**

- **0**
xConfiguration Cameras Camera [n] Mirror

Applies to: SX10 SX20 SX80 MX200G2/MX300G2 MX700/MX800/MX800D CodecPlus CodecPro Room70/Room55D Room70G2
Requires user role: ADMIN, INTEGRATOR

With Mirror mode (horizontal flip) you can mirror the image on screen. Mirroring applies both to the self-view and the video that is transmitted to the far end. Mirroring is automatically disabled when speaker tracking is on.
This setting is not applicable for the Cisco Quad Camera and the integrated camera of Room 55 Dual, Room 70, and Room 70 G2.

USAGE:

xConfiguration Cameras Camera [n] Mirror: Mirror

where

n: Unique ID that identifies the camera.
Range: 1..7 [ SX80 CodecPro Room70G2 ]
Range: 2..7 for single camera systems; 3..7 for dual camera systems [ MX700/MX800/MX800D ]
Range: 1..1 [ SX10 SX20 MX200G2/MX300G2 ]
Range: 1..3 [ CodecPlus Room70/Room55D ]
Mirror:
Auto/Off/On [ SX10 SX20 SX80 MX700/MX800/MX800D CodecPlus CodecPro Room70/Room55D Room70G2 ]
Off/On [ MX200G2/MX300G2 ]

Auto: If the camera detects that it is mounted upside down, the image is automatically mirrored. If the camera cannot auto-detect whether it is mounted upside down or not, the image is not changed. MX700/MX800 integrated cameras: Always display the image as other people see you.
Off: Display the image as other people see you. MX200 G2, MX700/MX800 integrated cameras: Display the image as you see yourself in a mirror.
On: Display the image as you see yourself in a mirror. MX200 G2, MX700/MX800 integrated cameras: Display the image as other people see you.

Default value:
Auto [ SX10 SX20 SX80 MX700/MX800/MX800D CodecPlus CodecPro Room70/Room55D Room70G2 ]
MX300G2: Off MX200G2: On [ MX200G2/MX300G2 ]

xConfiguration Cameras Camera [n] Whitebalance Mode

Applies to: SX10 SX20 SX80 MX200G2/MX300G2 MX700/MX800/MX800D CodecPlus CodecPro Room70/Room55D Room70G2
Requires user role: ADMIN, INTEGRATOR

Define the camera white balance mode.
Not applicable for the Cisco Quad Camera and the integrated camera of Room 55 Dual, Room 70, and Room 70 G2. These cameras automatically adjust themselves based on the room lighting conditions.

USAGE:

xConfiguration Cameras Camera [n] Whitebalance Mode: Mode

where

n: Unique ID that identifies the camera.
Range: 1..7 [ SX80 MX700/MX800/MX800D CodecPro Room70G2 ]
Range: 1..1 [ SX10 SX20 MX200G2/MX300G2 ]
Range: 1..3 [ CodecPlus Room70/Room55D ]

Mode:
Auto/Manual

Auto: The camera will continuously adjust the white balance depending on the camera view.

Default value:
Auto
xConfiguration Cameras Camera [n] Whitebalance Level

**Applies to:** SX10, SX20, SX80, MX200G2/MX300G2, MX700/MX800/MX800D, CodecPlus, CodecPro, Room70/Room55D, Room70G2

**Requires user role:** ADMIN, INTEGRATOR

Define the white balance level. Requires the Cameras Camera [n] Whitebalance Mode to be set to manual.

Not applicable for the Cisco Quad Camera and the integrated camera of Room 55 Dual, Room 70, and Room 70 G2. These cameras automatically adjust themselves based on the room lighting conditions.

**USAGE:**
xConfiguration Cameras Camera [n] Whitebalance Level: Level

**Level:**

where

- n: Unique ID that identifies the camera.
  - Range: 1..7 [SX80, MX700/MX800/MX800D, CodecPro, Room70G2]
  - Range: 1..1 [SX10, SX20, MX200G2/MX300G2]
  - Range: 1..3 [CodecPlus, Room70/Room55D]

**Level:**

Integer (1..16)
The white balance level.

Default value:

1

xConfiguration Cameras Camera Framerate

**Applies to:** RoomKit, RoomKitMini, Room55

**Requires user role:** ADMIN

As default, the camera outputs 30 frames per second. This allows for good quality both in close-ups and overview pictures for normal bandwidths and lighting conditions. If the conditions are better, a 60 frames per second output from the camera may give a better overall quality.

**USAGE:**
xConfiguration Cameras Camera Framerate: Framerate

**Framerate:**

where

- Framerate:
  - 30/60
  - 30: The camera outputs 30 frames per second.
  - 60: The camera outputs 60 frames per second.

Default value:

30
xConfiguration Cameras Preset TriggerAutofocus

 Applies to: SX20 SX80 MX200G2/MX300G2 MX700/MX800/MX800D
 Requires user role: ADMIN

 The current position (pan and tilt), zoom and focus are stored with a preset. Use this setting to determine if the camera should refocus or use the focus value that is stored with the preset.

 USAGE:

 xConfiguration Cameras Preset TriggerAutofocus: TriggerAutofocus

 where

 TriggerAutofocus: Auto/Off/On
 Auto: Whether the camera refocuses or not when selecting a preset, depends on the camera type.
 Off: The focus value that is stored with the preset will be used. The camera will not refocus when selecting a preset.
 On: The camera will refocus when selecting a preset. The focus value that is stored with the preset may be overridden.

 Default value:
 Auto

xConfiguration Cameras SpeakerTrack Mode

 Applies to: SX80 MX700/MX800/MX800D RoomKit RoomKitMini CodecPlus CodecPro Room55 Room70/Room55D Room70G2
 Requires user role: ADMIN, INTEGRATOR

 This setting applies only when using a camera with support for speaker tracking or best overview.

 Cisco Quad Camera: Speaker tracking uses automatic camera framing to select the best camera view based on where people are in the room. The Quad Camera uses an audio tracking technique that finds and captures a close-up of the active speaker.

 Cisco TelePresence SpeakerTrack 60 Camera: The dual camera assembly consists of two cameras and uses an audio tracking technique that finds and captures a close-up of the active speaker. When a change of speaker is detected, the system can switch automatically between the two cameras to always show the best camera view. Refer to the Cameras SpeakerTrack TrackingMode setting for different switching modes.

 Systems with a built-in speakertrack camera (Room Kit, Room 55, Room 55 Dual, Room 70, Room 70 G2): Speaker tracking uses automatic camera framing to select the best camera view based on where people are in the room. The camera uses an audio tracking technique that finds and captures a close-up of the active speaker.

 Systems with a camera that supports Best overview, but not speaker tracking (Room Kit Mini): Best overview uses automatic camera framing to select the best camera view based on where people are in the room.

 MX700 and MX800 with a dual camera (speaker tracking): The dual camera assembly consists of two cameras and uses an audio tracking technique that finds and captures a close-up of the active speaker. When a change of speaker is detected, the system can switch automatically between the two cameras to always show the best camera view. Refer to the Cameras SpeakerTrack TrackingMode setting for different switching modes.

 USAGE:

 xConfiguration Cameras SpeakerTrack Mode: Mode

 where

 Mode: Auto/Off

 Auto: Speaker tracking (not supported on Room Kit Mini) and best overview (not supported on SX80 and MX700/MX800) is switched on. The system will detect people in the room and automatically select the best camera framing. Users can switch the feature on or off instantly in the camera control panel on the Touch controller, but the feature is switched back on after each call so that the system is ready for the next user.

 Off: Speaker tracking (not supported on Room Kit Mini) and best overview (not supported on SX80 and MX700/MX800) is switched off. If you have a Cisco TelePresence
SpeakerTrack 60 Camera, or MX700/MX800 with a dual camera (speaker tracking), the two cameras will operate as individual cameras.

Default value:  

Auto

**xConfiguration Cameras SpeakerTrack Closeup**

*Applies to:* SX80, MX700/MX800/MX800D, RoomKit, CodecPlus, CodecPro, Room55, Room70/Room55D, Room70G2

*Requires user role:* ADMIN, INTEGRATOR, USER

This setting applies only when the Cameras SpeakerTrack Mode is set to Auto. When a person in the room speaks the system will find the person and select the best camera framing. This is called a closeup and may not include all the persons in the room. If you want all the persons in the room to be in the picture at all times you can turn off the closeup functionality.

**USAGE:**

```
xConfiguration Cameras SpeakerTrack Closeup: Closeup

where

Closeup:

Auto/Off

Auto: The system will zoom in on the persons speaking.

Off: The system will keep all the persons in the room in the camera framing at all times.

Default value: Auto
```

---

**xConfiguration Cameras SpeakerTrack TrackingMode**

*Applies to:* SX80, MX700/MX800/MX800D, CodecPro

*Requires user role:* ADMIN, INTEGRATOR

The speaker tracking algorithm can react to changes in two modes, one faster than the other. The mode determines when the camera view will change to a new speaker.

SX80, Codec Pro: This setting applies only when using a Cisco TelePresence SpeakerTrack 60 camera, and when Cameras SpeakerTrack Mode is set to Auto.

MX700, MX800: This setting applies only to systems with a dual camera (speaker tracking), and when Cameras SpeakerTrack Mode is set to Auto.

**USAGE:**

```
xConfiguration Cameras SpeakerTrack TrackingMode: TrackingMode

where

TrackingMode:

Auto/Conservative

[SX80, MX700/MX800/MX800D, CodecPro]

Default value:

Auto
```

---

---
xConfiguration Cameras SpeakerTrack ConnectorDetection Mode

**Applies to:** SX80, MX700/MX800/MX800D, CodecPro

**Requires user role:** ADMIN, INTEGRATOR

Define whether to automatically detect or manually configure which video input each individual camera is connected to. You should choose manual configuration in situations where the codec does not receive EDID information from the cameras. Typically, this will be when you use HDMI repeaters that do not pass on EDID information.

SX80, Codec Pro: This setting applies only when a Cisco TelePresence SpeakerTrack 60 camera is connected to the codec (video system).

MX700, MX800: Not applicable in this version.

**USAGE:**

xConfiguration Cameras SpeakerTrack ConnectorDetection Mode: **Mode**

where

**Mode:**

- **Auto/Manual** [SX80, CodecPro]
  
  **Auto:** Automatically detect which video inputs the cameras are connected to.

  **Manual:** Manually define which video inputs the cameras are connected to. Use the Cameras SpeakerTrack ConnectorDetection CameraLeft and Cameras SpeakerTrack ConnectorDetection CameraRight settings.

Default value:

- **Auto** [SX80, CodecPro]

xConfiguration Cameras SpeakerTrack ConnectorDetection CameraLeft

**Applies to:** SX80, MX700/MX800/MX800D, CodecPro

**Requires user role:** ADMIN, INTEGRATOR

Define the number of the video input that SpeakerTrack 60's left camera is connected to.

SX80, Codec Pro: This setting applies only when a Cisco TelePresence SpeakerTrack 60 camera is connected to the codec (video system). Furthermore, Cameras SpeakerTrack ConnectorDetection Mode must be set to Manual.

MX700, MX800: Not applicable in this version.

**USAGE:**

xConfiguration Cameras SpeakerTrack ConnectorDetection CameraLeft: **CameraLeft**

where

**CameraLeft:**

- **Integer (1..5)** [SX80, CodecPro]

  Set a valid video input number. For example, set to 1 if the left camera is connected to video input 1.

  Default value:

  - 1 [SX80, CodecPro]
xConfiguration Cameras SpeakerTrack ConnectorDetection CameraRight

Applies to: SX80, MX700/MX800/MX800D, CodecPro
Requires user role: ADMIN, INTEGRATOR

Define the number of the video input that SpeakerTrack 60’s right camera is connected to.
SX80, Codec Pro: This setting applies only when a Cisco TelePresence SpeakerTrack 60 camera is connected to the codec (video system). Furthermore, Cameras SpeakerTrack ConnectorDetection Mode must be set to Manual.
MX700, MX800: Not applicable in this version.

USAGE:
xConfiguration Cameras SpeakerTrack ConnectorDetection CameraRight: CameraRight

where

CameraRight:

"Integer (1..5) [SX80 CodecPro]

Set a valid video input number. For example, set to 2 if the right camera is connected to video input 2.
Default value:

2 [SX80 CodecPro]

xConfiguration Cameras SpeakerTrack Whiteboard Mode

Applies to: SX80, MX700/MX800/MX800D, RoomKit, CodecPlus, CodecPro, Room55, Room70/Room55D, Room70G2
Requires user role: ADMIN, INTEGRATOR, USER

The Snap to Whiteboard feature extends the speaker tracking functionality, thus you need a camera that supports speaker tracking. When a presenter is standing next to the whiteboard, the camera will capture both the presenter and the whiteboard if the Snap to Whiteboard feature is enabled. If the feature is disabled, only the presenter will be captured. The Snap to Whiteboard feature is set up from the Touch controller or web interface.

SX80, Codec Plus, Codec Pro: Applies only when the connected camera supports speaker tracking.

MX700, MX800: Applies only when the system has a dual camera (speaker tracking).

USAGE:
xConfiguration Cameras SpeakerTrack Whiteboard Mode: Mode

where

Mode:

"Off/On

Off: The Snap to Whiteboard feature is disabled.
On: The Snap to Whiteboard feature is enabled.
Default value:

Off
Conference configuration

xConfiguration Conference AutoAnswer Mode

Applies to: All products
Requires user role: ADMIN

Define the auto answer mode. Use the Conference AutoAnswer Delay setting if you want the system to wait a number of seconds before answering the call, and use the Conference AutoAnswer Mute setting if you want your microphone to be muted when the call is answered.

USAGE:

xConfiguration Conference AutoAnswer Mode: **Mode**

where

**Mode**:

**Off/On**

**Off**: You can answer incoming calls manually from the systems user interface.

**On**: The system automatically answers incoming calls, except if you are already in a call. You can answer or decline incoming calls manually when you are already engaged in a call.

Default value: **Off**

xConfiguration Conference AutoAnswer Mute

Applies to: All products
Requires user role: ADMIN

Define if the microphone shall be muted when an incoming call is automatically answered. Requires that AutoAnswer Mode is switched on.

USAGE:

xConfiguration Conference AutoAnswer Mute: **Mute**

where

**Mute**:

**Off/On**

**Off**: The incoming call will not be muted.

**On**: The incoming call will be muted when automatically answered.

Default value: **Off**

xConfiguration Conference AutoAnswer Delay

Applies to: All products
Requires user role: ADMIN

Define how long (in seconds) an incoming call has to wait before it is answered automatically by the system. Requires that AutoAnswer Mode is switched on.

USAGE:

xConfiguration Conference AutoAnswer Delay: **Delay**

where

**Delay**:

**Integer (0..50)**

The auto answer delay (seconds).

Default value: **0**
xConfiguration Conference DefaultCall Protocol

Applies to: All products

Requires user role: ADMIN

Define the Default Call Protocol to be used when placing calls from the system.

**USAGE:**

xConfiguration Conference DefaultCall Protocol: **Protocol**

where

**Protocol**:

Auto/H320/H323/Sip/Spark

- **Auto**: Enables auto-selection of the call protocol based on which protocols are available. If multiple protocols are available, the order of priority is: 1) SIP; 2) H323; 3) H320. If the system cannot register, the auto-selection chooses H323.
- **H320**: All calls are set up as H.320 calls (only applicable if used with Cisco TelePresence ISDN Link).
- **H323**: All calls are set up as H.323 calls.
- **Sip**: All calls are set up as SIP calls.
- **Spark**: Reserved for Webex registered systems. Do not use.

Default value:

Auto

xConfiguration Conference DefaultCall Rate

Applies to: All products

Requires user role: ADMIN, INTEGRATOR

Define the Default Call Rate to be used when placing calls from the system.

**USAGE:**

xConfiguration Conference DefaultCall Rate: **Rate**

where

**Rate**:

Integer (64..6000)  

- Integer (64..3072)  

The default call rate (kbps).

Default value:

6000

xConfiguration Conference DoNotDisturb DefaultTimeout

Applies to: All products

Requires user role: ADMIN, INTEGRATOR

This setting determines the default duration of a Do Not Disturb session, i.e. the period when incoming calls are rejected and registered as missed calls. The session can be terminated earlier by using the user interface.

**USAGE:**

xConfiguration Conference DoNotDisturb DefaultTimeout: **DefaultTimeout**

where

**DefaultTimeout**:

Integer (1..1440)

The number of minutes (maximum 1440 minutes = 24 hours) before the Do Not Disturb session times out automatically.

Default value:

60
xConfiguration Conference Encryption Mode

Applies to: All products
Requires user role: ADMIN

Define the conference encryption mode. A padlock with the text "Encryption On" or "Encryption Off" displays on screen for a few seconds when the conference starts.

All except SX20: NOTE: If the Encryption Option Key is not installed on the video system, the encryption mode is always Off.

SX20: NOTE: If the CE-NC software (no crypto) is installed on the video system, the encryption mode is always Off.

 USAGE:

xConfiguration Conference Encryption Mode: Mode

where

Mode:

Off/On/BestEffort

Off: The system will not use encryption.
On: The system will only allow calls that are encrypted.
BestEffort: The system will use encryption whenever possible.

> In Point to point calls: If the far end system supports encryption (AES-128), the call will be encrypted. If not, the call will proceed without encryption.
> In MultiSite calls: In order to have encrypted MultiSite conferences, all sites must support encryption. If not, the conference will be unencrypted.

Default value: BestEffort

xConfiguration Conference FarEndControl Mode

Applies to: All products
Requires user role: ADMIN

Lets you decide if the remote side (far end) should be allowed to select your video sources and control your local camera (pan, tilt, zoom).

 USAGE:

xConfiguration Conference FarEndControl Mode: Mode

where

Mode:

Off/On

Off: The far end is not allowed to select your video sources or to control your local camera.
On: Allows the far end to be able to select your video sources and control your local camera (pan, tilt, zoom). You will still be able to control your camera and select your video sources as normal.

Default value: On

xConfiguration Conference FarEndMessage Mode

Applies to: All products
Requires user role: ADMIN

Toggle whether it is allowed to send data between two codecs in a point-to-point call, for use with control systems or macros. Works with SIP calls only. This setting will enable/disable the use of the xCommand Call FarEndMessage Send command.

 USAGE:

xConfiguration Conference FarEndMessage Mode: Mode

where

Mode:

Off/On

Off: It is not possible to send messages between two codecs.
On: It is possible to send messages between two codecs in a point-to-point call.

Default value: Off
xConfiguration Conference MaxReceiveCallRate

Applies to: All products
Requires user role: ADMIN

Define the maximum receive bit rate to be used when placing or receiving calls. Note that this is the maximum bit rate for each individual call; use the Conference MaxTotalReceiveCallRate setting to set the aggregated maximum for all simultaneous active calls.

USAGE:
xConfiguration Conference MaxReceiveCallRate: MaxReceiveCallRate
where:

MaxReceiveCallRate:
Integer (64..6000) [ SX20 SX80 MX200G2/MX300G2 MX700/MX800/MX800D RoomKit RoomKitMini CodecPlus CodecPro Room55 Room70/Room55SD Room70G2 ]
Integer (64..3072) [ DX70/DX80 SX10 ]

The maximum receive call rate (kbps).
Default value:

6000 [ SX20 SX80 MX200G2/MX300G2 MX700/MX800/MX800D RoomKit RoomKitMini CodecPlus CodecPro Room55 Room70/Room55SD Room70G2 ]
3072 [ DX70/DX80 SX10 ]

xConfiguration Conference MaxTransmitCallRate

Applies to: All products
Requires user role: ADMIN

Define the maximum transmit bit rate to be used when placing or receiving calls. Note that this is the maximum bit rate for each individual call; use the Conference MaxTotalTransmitCallRate setting to set the aggregated maximum for all simultaneous active calls.

USAGE:
xConfiguration Conference MaxTransmitCallRate: MaxTransmitCallRate
where:

MaxTransmitCallRate:
Integer (64..6000) [ SX20 SX80 MX200G2/MX300G2 MX700/MX800/MX800D RoomKit RoomKitMini CodecPlus CodecPro Room55 Room70/Room55SD Room70G2 ]
Integer (64..3072) [ DX70/DX80 SX10 ]

The maximum transmit call rate (kbps).
Default value:

6000 [ SX20 SX80 MX200G2/MX300G2 MX700/MX800/MX800D RoomKit RoomKitMini CodecPlus CodecPro Room55 Room70/Room55SD Room70G2 ]
3072 [ DX70/DX80 SX10 ]
**xConfiguration Conference MaxTotalReceiveCallRate**

**Applies to:** All products

**Requires user role:** ADMIN

Define the maximum overall receive bit rate allowed.

This configuration applies when using a video system's built-in MultiSite feature (optional) to host a multipoint video conference. The bit rate will be divided fairly among all active calls at any time. This means that the individual calls will be up-speeded or down-speeded as appropriate when someone leaves or enters a multipoint conference, or when a call is put on hold (suspended) or resumed. The maximum receive bit rate for each individual call is defined in the Conference MaxReceiveCallRate setting.

DX70, DX80, and SX10 do not support multiple simultaneous calls, so the total receive call rate will be the same as the receive bit rate for one call (ref. Conference MaxReceiveCallRate setting).

**USAGE:**

```
xConfiguration Conference MaxTotalReceiveCallRate: MaxTotalReceiveCallRate
```

where

```
MaxTotalReceiveCallRate:

  Integer (64..6000) [ SX20 SX80 MX200G2/MX300G2 MX700/MX800/MX800D RoomKit RoomKitMini CodecPlus Room55 Room70/Room55D ]
  Integer (64..15000) [ CodecPro Room70G2 ]
  Integer (64..3072) [ DX70/DX80 SX10 ]
```

The maximum receive call rate (kbps).

**Default value:**

- 6000 [ SX20 SX80 MX200G2/MX300G2 MX700/MX800/MX800D RoomKit RoomKitMini CodecPlus Room55 Room70/Room55D ]
- 15000 [ CodecPro Room70G2 ]
- 3072 [ DX70/DX80 SX10 ]

---

**xConfiguration Conference MaxTotalTransmitCallRate**

**Applies to:** All products

**Requires user role:** ADMIN

Define the maximum overall transmit bit rate allowed.

This configuration applies when using a video system's built-in MultiSite feature (optional) to host a multipoint video conference. The bit rate will be divided fairly among all active calls at any time. This means that the individual calls will be up-speeded or down-speeded as appropriate when someone leaves or enters a multipoint conference, or when a call is put on hold (suspended) or resumed. The maximum transmit bit rate for each individual call is defined in the Conference MaxTransmitCallRate setting.

DX70, DX80, SX10: This product does not support multiple simultaneous calls, so the total transmit call rate will be the same as the transmit bit rate for one call (ref. Conference MaxTransmitCallRate setting).

**USAGE:**

```
xConfiguration Conference MaxTotalTransmitCallRate: MaxTotalTransmitCallRate
```

where

```
MaxTotalTransmitCallRate:

  Integer (64..6000) [ SX20 SX80 MX200G2/MX300G2 MX700/MX800/MX800D RoomKit RoomKitMini CodecPlus Room55 Room70/Room55D ]
  Integer (64..15000) [ CodecPro Room70G2 ]
  Integer (64..3072) [ DX70/DX80 SX10 ]
```

The maximum transmit call rate (kbps).

**Default value:**

- 6000 [ SX20 SX80 MX200G2/MX300G2 MX700/MX800/MX800D RoomKit RoomKitMini CodecPlus Room55 Room70/Room55D ]
- 15000 [ CodecPro Room70G2 ]
- 3072 [ DX70/DX80 SX10 ]
xConfiguration Conference Multipoint Mode

Applies to: SX20 SX80 MX200G2/MX300G2 MX700/MX800/MX800D RoomKit RoomKitMini CodecPlus CodecPro Room55 Room70/Room55D Room70G2

Requires user role: ADMIN

Define how the video system handles multiparty video conferences (ad hoc conferences). If registered to a Cisco TelePresence Video Communication Server (VCS), the video system can use its own built-in MultiSite feature. If registered to a Cisco Unified Communications Manager (CUCM) version 8.6.2 or newer, the video system can use either the CUCM conference bridge, or the video system's own built-in MultiSite feature. Which option to use, is set-up by CUCM.

The CUCM conference bridge allows you to set up conferences with many participants. The built-in MultiSite is optional and may not be available on all video systems.

SX20, MX200G2, MX300G2, Room Kit, Room Kit Mini, Codec Plus, Codec Pro, Room 55, Room 55 Dual, Room 70, Room 70 G2: The built-in MultiSite allows up to four participants (yourself included).

SX80, MX700, MX800: The built-in MultiSite allows up to five participants (yourself included) plus one additional audio call.

USAGE:

xConfiguration Conference Multipoint Mode: Mode

where

Mode:

Auto/CUCMMediaResourceGroupList/MultiSite/Off

Auto: The multipoint method is selected automatically; if no multipoint method is available, the Multipoint Mode will be set to Off.

CUCMMediaResourceGroupList: Multiparty conferences are hosted by the CUCM configured conference bridge. This setting is provisioned by CUCM in a CUCM environment, and should never be set manually by the user.

MultiSite: Multiparty conferences are set up using the built-in MultiSite feature. If MultiSite is selected when the MultiSite feature is not available, the Multipoint Mode will automatically be set to Off.

Off: Multiparty conferences are not allowed.

Default value:

Auto

xConfiguration Conference MultiStream Mode

Applies to: SX80 MX700/MX800/MX800D RoomKit RoomKitMini CodecPlus CodecPro Room55 Room70/Room55D Room70G2

Requires user role: ADMIN

The video system supports multistream video for conferences.

USAGE:

xConfiguration Conference MultiStream Mode: Mode

where

Mode:

Auto/Off

Auto: Multistream will be used when the conference infrastructure supports the feature.

Minimum versions required: CMS 2.2, CUCM 11.5, VCS X8.7.

Off: Multistream is disabled.

Default value:

Auto
GPIO configuration

xConfiguration GPIO Pin [n] Mode

Applies to: SX80 MX700/MX800/MX900D CodecPro Room70G2
Requires user role: ADMIN, INTEGRATOR

The four GPIO pins are configured individually. The state can be retrieved by xStatus GPIO Pin [1..4] State. The default pin state is High (+12 V). When activated as an output, a pin is set to 0 V (Low); when deactivated, it is set to +12 V (High). To activate a pin as an input, the voltage on the pin must be pulled down to 0 V; to deactivate it, raise the voltage to +12 V.

USAGE:

xConfiguration GPIO Pin [n] Mode: Mode

where

- GPIO pin number.
- Range: 1..4
- Mode:
  - InputAcceptAllCalls/InputDisconnectAllCalls/InputMuteMicrophones/InputNoAction/
  - OutputAllCallsEncrypted/OutputInCall/OutputManualState/OutputMicrophonesMuted/
  - OutputPresentationOn/OutputStandbyActive

InputAcceptAllCalls: When the pin is activated, the xCommand Call Accept command, which accepts all incoming calls, will be issued.

InputDisconnectAllCalls: When the pin is activated, the xCommand Call Disconnect command, which disconnects all calls, will be issued.

InputMuteMicrophones: When the pin is activated, the microphones will be muted. When deactivated, the microphones will be unmuted.

InputNoAction: The pin state can be set, but no operation is performed.

OutputAllCallsEncrypted: The pin is activated when all calls are encrypted, and deactivated when one or more calls are not encrypted.

OutputInCall: The pin is activated when in call, and deactivated when not in call.

OutputManualState: The pin state can be set by xCommand GPIO ManualState Set PinX: High/Low. It is set to +12 V or 0 V, respectively.

OutputMicrophonesMuted: The pin is activated when microphones are muted, and deactivated when not muted.

OutputPresentationOn: The pin is activated when presentation is active, and deactivated when presentation is not active.

OutputStandbyActive: The pin is activated when the system is in standby mode, and deactivated when no longer in standby.

Default value: InputNoAction
**H323 configuration**

**xConfiguration H323 Authentication Mode**

Applies to: All products  
Requires user role: ADMIN  

Define the authentication mode for the H.323 profile.

**USAGE:**

`xConfiguration H323 Authentication Mode: Mode`  
where  

- **Mode:**  
  - **Off/On**  
    - **Off:** The system will not try to authenticate itself to a H.323 Gatekeeper, but will still try a normal registration.  
    - **On:** If an H.323 Gatekeeper indicates that it requires authentication, the system will try to authenticate itself to the gatekeeper. Requires the H323 Authentication LoginName and H323 Authentication Password settings to be defined on both the codec and the Gatekeeper.  

Default value: Off

**xConfiguration H323 Authentication LoginName**

Applies to: All products  
Requires user role: ADMIN  

The system sends the H323 Authentication Login Name and the H323 Authentication Password to an H.323 Gatekeeper for authentication. The authentication is a one way authentication from the codec to the H.323 Gatekeeper, i.e. the system is authenticated to the gatekeeper. If the H.323 Gatekeeper indicates that no authentication is required, the system will still try to register. Requires the H.323 Authentication Mode to be enabled.

**USAGE:**

`xConfiguration H323 Authentication LoginName: "LoginName"`  
where  

- **LoginName:** String (0, 50)  
  - The authentication login name.  
  - Default value: ""  

**xConfiguration H323 Authentication Password**

Applies to: All products  
Requires user role: ADMIN  

The system sends the H323 Authentication Login Name and the H323 Authentication Password to an H.323 Gatekeeper for authentication. The authentication is a one way authentication from the codec to the H.323 Gatekeeper, i.e. the system is authenticated to the gatekeeper. If the H.323 Gatekeeper indicates that no authentication is required, the system will still try to register. Requires the H.323 Authentication Mode to be enabled.

**USAGE:**

`xConfiguration H323 Authentication Password: "Password"`  
where  

- **Password:** String (0, 50)  
  - The authentication password.  
  - Default value: ""
xConfiguration H323 CallSetup Mode
Applies to: All products
Requires user role: ADMIN
Defines whether to use a Gatekeeper or Direct calling when establishing H.323 calls.
Direct H.323 calls can be made also when H323 CallSetup Mode is set to Gatekeeper.

USAGE:
xConfiguration H323 CallSetup Mode: Mode
where
Mode:
  Direct/Gatekeeper
    Direct: You can only make an H.323 call by dialing an IP address directly.
    Gatekeeper: The system uses a Gatekeeper to make an H.323 call. When choosing this
    option, the H323 Gatekeeper Address must also be configured.
Default value:
  Gatekeeper

xConfiguration H323 Encryption KeySize
Applies to: All products
Requires user role: ADMIN
Define the minimum or maximum key size for the Diffie–Hellman key exchange method, which
is used when establishing the Advanced Encryption Standard (AES) encryption key.

USAGE:
xConfiguration H323 Encryption KeySize: KeySize
where
KeySize:
  Max1024bit/Min1024bit/Min2048bit
    Max1024bit: The maximum size is 1024 bit.
    Min1024bit: The minimum size is 1024 bit.
    Min2048bit: The minimum size is 2048 bit.
Default value:
  Min1024bit

xConfiguration H323 Gatekeeper Address
Applies to: All products
Requires user role: ADMIN
Define the IP address of the Gatekeeper. Requires H323 CallSetup Mode to be set to
Gatekeeper.

USAGE:
xConfiguration H323 Gatekeeper Address: "Address"
where
  Address:
    String (0, 255)
    A valid IPv4 address, IPv6 address or DNS name.
    Default value:
      *

xConfiguration H323 H323Alias E164
Applies to: All products
Requires user role: ADMIN
The H.323 Alias E.164 defines the address of the system, according to the numbering plan
implemented in the H.323 Gatekeeper. The E.164 alias is equivalent to a telephone number,
sometimes combined with access codes.

USAGE:
xConfiguration H323 H323Alias E164: "E164"
where
  E164:
    String (0, 30)
    The H.323 Alias E.164 address. Valid characters are 0-9, *, and #.
    Default value:
      **
xConfiguration H323 H323Alias ID

Applies to: All products
Requires user role: ADMIN

Define the H.323 Alias ID, which is used to address the system on a H.323 Gatekeeper and will be displayed in the call lists.

**USAGE:**
```
xConfiguration H323 H323Alias ID: "ID"
```
where

**ID:**
The H.323 Alias ID. Example: "firstname.lastname@company.com", "My H.323 Alias ID"

Default value: ""

xConfiguration H323 NAT Mode

Applies to: All products
Requires user role: ADMIN

The firewall traversal technology creates a secure path through the firewall barrier, and enables proper exchange of audio/video data when connected to an external video conferencing system (when the IP traffic goes through a NAT router). NOTE: NAT does not work in conjunction with gatekeepers.

**USAGE:**
```
xConfiguration H323 NAT Mode: Mode
```
where

**Mode:**

- **Auto**:
The system will determine if the H323 NAT Address or the real IP address should be used in signaling. This makes it possible to place calls to endpoints on the LAN as well as endpoints on the WAN. If the H323 NAT Address is wrong or not set, the real IP address will be used.

- **Off**:
The system will signal the real IP address.

- **On**:
The system will signal the configured H323 NAT Address instead of its real IP address in Q.931 and H.245. The NAT server address will be shown in the startup-menu as: "My IP Address: 10.0.2.1". If the H323 NAT Address is wrong or not set, H.323 calls cannot be set up.

Default value: **Off**
xConfiguration H323 NAT Address

Applies to: All products
Requires user role: ADMIN

Define the external/global IP address to the router with NAT support. Packets sent to the router will then be routed to the system. Note that NAT cannot be used when registered to a gatekeeper.

In the router, the following ports must be routed to the system's IP address:
* Port 1720
* Port 5555-6555
* Port 2326-2487

**USAGE:**

xConfiguration H323 NAT Address: "Address"

where

Address:

- String (0, 64)
- A valid IPv4 address or IPv6 address.

Default value:

""
xConfiguration HttpClient AllowHTTP

Applies to: All products
Requires user role: ADMIN

The HttpClient Mode setting is used to allow or prohibit communication with an external HTTP(S) server. The Mode setting does not distinguish between HTTP and HTTPS. You must use the HttpClient AllowHTTP setting to further allow or prohibit the use of HTTP.

USAGE:
xConfiguration HttpClient AllowHTTP: **AllowHTTP**

where:

<table>
<thead>
<tr>
<th>AllowHTTP:</th>
<th>False/True</th>
</tr>
</thead>
<tbody>
<tr>
<td>False:</td>
<td>The video system can communicate only over HTTPS.</td>
</tr>
<tr>
<td>True:</td>
<td>The video system can communicate over both HTTPS and HTTP.</td>
</tr>
</tbody>
</table>

Default value: **True**

xConfiguration HttpClient AllowInsecureHTTPS

Applies to: All products
Requires user role: ADMIN

You can choose whether or not to allow the video system to communicate with a server over HTTPS without checking the server’s certificate first.

Even if the video system is allowed to skip the certificate validation process, it doesn’t automatically do it. You must specifically set the AllowInsecureHTTPS parameter in each xCommand HttpClient command for data to be exchanged with the server without certificate validation.

USAGE:
xConfiguration HttpClient AllowInsecureHTTPS: **AllowInsecureHTTPS**

where:

<table>
<thead>
<tr>
<th>AllowInsecureHTTPS:</th>
<th>False/True</th>
</tr>
</thead>
<tbody>
<tr>
<td>False:</td>
<td>The video system always checks that the HTTPS server has a valid certificate. No communication with the server takes place if the certificate validation fails.</td>
</tr>
<tr>
<td>True:</td>
<td>The video system is allowed to skip the certificate validation process before communicating with the server.</td>
</tr>
</tbody>
</table>

Default value: **False**
Logging configuration

xConfiguration Logging External Mode

Applies to: All products
Requires user role: ADMIN

Determine whether or not to store the system logs on a remote syslog server. This setting has no effect if the Logging Mode setting is set to Off.

You must enter the address of the remote server in the Logging External Server Address setting. Unless otherwise specified in the Logging External Server Port setting, the standard syslog port is used.

USAGE:

xConfiguration Logging External Mode: Mode

where

Mode:

Off/On

Off: System logs will not be stored on the remote syslog server.

On: System logs will be stored on the remote syslog server.

Default value:

Off

xConfiguration Logging External Protocol

Applies to: All products
Requires user role: ADMIN

Determine which protocol to use toward the remote logging server. You can use either the syslog protocol over TLS (Transport Layer Security), or the syslog protocol in plaintext. For details about the syslog protocol, see RFC 5424.

USAGE:

xConfiguration Logging External Protocol: Protocol

where

Protocol:

Syslog/SyslogTLS

Syslog: Syslog protocol in plain text.

SyslogTLS: Syslog protocol over TLS.

Default value:

SyslogTLS

xConfiguration Logging External Server Address

Applies to: All products
Requires user role: ADMIN

The address of the remote syslog server.

USAGE:

xConfiguration Logging External Server Address: "Address"

where

Address:

String (0, 255)

A valid IPv4 address, IPv6 address or DNS name.

Default value:

""
xConfiguration Logging External Server Port

Applies to: All products
Requires user role: ADMIN

The port that the remote syslog server listens for messages on. If set to 0, the video system will use the standard syslog port. The standard syslog port is 514 for syslog, and 6514 for syslog over TLS.

**USAGE:**

xConfiguration Logging External Server Port: **Port**

where

**Port:**

- **Integer (0..65535)**
- The number of the port that the remote syslog server is using. 0 means that the video system uses the standard syslog port.

Default value:

514

---

Macros configuration

xConfiguration Macros Mode

Applies to: DX70/DX80 SX20 SX80 MX200G2/MX300G2 MX700/MX800/MX800D RoomKit RoomKitMini CodecPlus CodecPro Room55 Room70/Room55D Room70G2
Requires user role: ADMIN

Macros allow you to write snippets of JavaScript code that can automate parts of your video endpoint, thus creating custom behavior. Use of macros is disabled by default, but the first time you open the Macro Editor you will be asked whether to enable use of macros on the codec. Use this setting when you want to manually enable, or to permanently disable the use of macros on the codec. You can disable the use of macros within the Macro Editor. But this will not permanently disable macros from running, because every time the codec is reset the macros will be re-enabled automatically.

**USAGE:**

xConfiguration Macros Mode: **Mode**

where

**Mode:**

- **Off/On**
- **Off**: Permanently disable the use of macros on this video system.
- **On**: Enable the use of macros on this video system.

Default value:

Off

---

xConfiguration Logging Internal Mode

Applies to: All products
Requires user role: ADMIN

Determine whether or not to store the system logs on the video system (local files). These are the files that you get when you download the log bundles from the video system. This setting has no effect if the Logging Mode setting is set to Off.

**USAGE:**

xConfiguration Logging Internal Mode: **Mode**

where

**Mode:**

- **Off/On**
- **Off**: System logs will not be stored on the video system.
- **On**: System logs will be stored on the video system.

Default value:

On
**xConfiguration Macros AutoStart**

**Applies to:** DX70/DX80 SX20 SX80 MX200G2/MX300G2 MX700/MX800/MX800D RoomKit RoomKitMini CodecPlus CodecPro Room55 Room70/Room55D Room70G2

**Requires user role:** ADMIN

All the macros run in a single process on the video endpoint, called the macro runtime. It should be running by default, but you can choose to stop and start it manually. If you restart the video system, the runtime will automatically start again if auto start is enabled.

**USAGE:**

```
xConfiguration Macros AutoStart: AutoStart
where
  AutoStart:
    Off/On
  Off: The macro runtime will not start automatically after a restart of the video system.
  On: The macro runtime will start automatically after a restart of the video system.
  Default value:
    On
```

---

**Network configuration**

**xConfiguration Network [n] DNS DNSSEC Mode**

**Applies to:** All products

**Requires user role:** ADMIN

Domain Name System Security extensions (DNSSEC) is a set of extensions to DNS. It is used to authenticate DNS replies for zones that are signed. It will still allow unsigned zones.

**USAGE:**

```
xConfiguration Network [n] DNS DNSSEC Mode: Mode
where
  n: Index that identifies the network.
  Range: 1..1
  Mode:
    Off/On
    Off: Disable Domain Name System Security Extensions.
    On: Enable Domain Name System Security Extensions.
    Default value:
      Off
```
xConfiguration Network [n] DNS Domain Name

Applies to: All products
Requires user role: ADMIN, USER

The DNS Domain Name is the default domain name suffix which is added to unqualified names. Example: If the DNS Domain Name is "company.com" and the name to lookup is "MyVideoSystem", this will result in the DNS lookup "MyVideoSystem.company.com".

USAGE:
xConfiguration Network [n] DNS Domain Name: "Name"
where
  n: Index that identifies the network.
    Range: 1..1
  Name:
    String (0, 64)
    The DNS domain name.
    Default value: ""

xConfiguration Network [n] DNS Server [m] Address

Applies to: All products
Requires user role: ADMIN, USER

Define the network addresses for DNS servers. Up to three addresses may be specified. If the network addresses are unknown, contact your administrator or Internet Service Provider.

USAGE:
xConfiguration Network [n] DNS Server [m] Address: "Address"
where
  n: Index that identifies the network.
    Range: 1..1
  m: Index that identifies the DNS server. Maximum three DNS servers are allowed.
    Range: 1..3
  Address:
    String (0, 64)
    A valid IPv4 address or IPv6 address.
    Default value: ""
xConfiguration Network [n] IEEE8021X Mode

Applies to: All products
Requires user role: ADMIN, USER

The system can be connected to an IEEE 802.1X LAN network, with a port-based network access control that is used to provide authenticated network access for Ethernet networks.

**USAGE:**

```
xConfiguration Network [n] IEEE8021X Mode: Mode
```

where

- **n**: Index that identifies the network.
  - Range: 1..1

**Mode:**

- **Off/On**
  - **Off**: The 802.1X authentication is disabled.
  - **On**: The 802.1X authentication is enabled.

Default value: Off

---

xConfiguration Network [n] IEEE8021X TlsVerify

Applies to: All products
Requires user role: ADMIN, USER

Verification of the server-side certificate of an IEEE802.1x connection against the certificates in the local CA-list when TLS is used. The CA-list must be uploaded to the video system. This can be done from the web interface.

This setting takes effect only when Network [1] IEEE8021X Eap Tls is enabled (On).

**USAGE:**

```
xConfiguration Network [n] IEEE8021X TlsVerify: TlsVerify
```

where

- **n**: Index that identifies the network.
  - Range: 1..1

**TlsVerify:**

- **Off/On**
  - **Off**: When set to Off, TLS connections are allowed without verifying the server-side X.509 certificate against the local CA-list. This should typically be selected if no CA-list has been uploaded to the codec.
  - **On**: When set to On, the server-side X.509 certificate will be validated against the local CA-list for all TLS connections. Only servers with a valid certificate will be allowed.

Default value: Off
xConfiguration Network [n] IEEE8021X UseClientCertificate

Applies to: All products
Requires user role: ADMIN, USER

Authentication using a private key/certificate pair during an IEEE802.1x connection. The authentication X.509 certificate must be uploaded to the video system. This can be done from the web interface.

**USAGE:**

```

where

\[ n \] Index that identifies the network.

Range: 1..1

UseClientCertificate:

Off/On

- Off: When set to Off client-side authentication is not used (only server-side).
- On: When set to On the client (video system) will perform a mutual authentication TLS handshake with the server.

Default value:

Off
```

xConfiguration Network [n] IEEE8021X Identity

Applies to: All products
Requires user role: ADMIN, USER

Define the user name for 802.1X authentication.

**USAGE:**

```
xConfiguration Network [n] IEEE8021X Identity: "Identity"

where

\[ n \]: Index that identifies the network.

Range: 1..1

Identity:

String (0, 64)

The user name for 802.1X authentication.

Default value:

**
```

xConfiguration Network [n] IEEE8021X Password

Applies to: All products
Requires user role: ADMIN, USER

Define the password for 802.1X authentication.

**USAGE:**

```
xConfiguration Network [n] IEEE8021X Password: "Password"

where

\[ n \]: Index that identifies the network.

Range: 1..1

Password:

String (0, 50)

The password for 802.1X authentication.

Default value:

**
```
xConfiguration Network [n] IEEE8021X AnonymousIdentity

Applies to: All products
Requires user role: ADMIN, USER

The 802.1X Anonymous ID string is to be used as unencrypted identity with EAP (Extensible Authentication Protocol) types that support different tunneled identity, like EAP-PEAP and EAP-TTLS. If set, the anonymous ID will be used for the initial (unencrypted) EAP Identity Request.

**USAGE:**

where

- n: Index that identifies the network.
  - Range: 1..1
- AnonymousIdentity:
  - String (0, 64)
  - The 802.1X Anonymous ID string.
  - Default value: ""

xConfiguration Network [n] IEEE8021X Eap Md5

Applies to: All products
Requires user role: ADMIN, USER

Define the Md5 (Message-Digest Algorithm 5) mode. This is a Challenge Handshake Authentication Protocol that relies on a shared secret. Md5 is a Weak security.

**USAGE:**

xConfiguration Network [n] IEEE8021X Eap Md5: Md5
where

- n: Index that identifies the network.
  - Range: 1..1
- Md5:
  - Off/On
  - Off: The EAP-MD5 protocol is disabled.
  - On: The EAP-MD5 protocol is enabled.
  - Default value: On
xConfiguration Network [n] IEEE8021X Eap Ttls

Applies to: All products
Requires user role: ADMIN, USER

Define the TTLS (Tunneled Transport Layer Security) mode. Authenticates LAN clients without the need for client certificates. Developed by Funk Software and Certicom. Usually supported by Agere Systems, Proxim and Avaya.

USAGE:
xConfiguration Network [n] IEEE8021X Eap Ttls: Ttls
where
n: Index that identifies the network.
   Range: 1..1
Ttls: Off/On
   Off: The EAP-TTLS protocol is disabled.
   On: The EAP-TTLS protocol is enabled.
Default value: On

xConfiguration Network [n] IEEE8021X Eap Tls

Applies to: All products
Requires user role: ADMIN, USER

Enable or disable the use of EAP-TLS (Transport Layer Security) for IEEE802.1x connections. The EAP-TLS protocol, defined in RFC 5216, is considered one of the most secure EAP standards. LAN clients are authenticated using client certificates.

USAGE:
xConfiguration Network [n] IEEE8021X Eap Tls: Tls
where
n: Index that identifies the network.
   Range: 1..1
Tls: Off/On
   Off: The EAP-TLS protocol is disabled.
   On: The EAP-TLS protocol is enabled.
Default value: On
**xConfiguration Network [n] IEEE8021X Eap Peap**

**Applies to:** All products

**Requires user role:** ADMIN, USER

Define the Peap (Protected Extensible Authentication Protocol) mode. Authenticates LAN clients without the need for client certificates. Developed by Microsoft, Cisco and RSA Security.

**USAGE:**

```
xConfiguration Network [n] IEEE8021X Eap Peap: Peap
```

where

- **n**: Index that identifies the network.
  
  Range: 1..1

- **Peap**:
  
  **Off/On**

  **Off**: The EAP-PEAP protocol is disabled.

  **On**: The EAP-PEAP protocol is enabled.

- **Default value:**

  **On**

**xConfiguration Network [n] IPStack**

**Applies to:** All products

**Requires user role:** ADMIN, USER

Select if the system should use IPv4, IPv6, or dual IP stack, on the network interface. NOTE: After changing this setting you may have to wait up to 30 seconds before it takes effect.

**USAGE:**

```
xConfiguration Network [n] IPStack: IPStack
```

where

- **n**: Index that identifies the network.
  
  Range: 1..1

- **IPStack**:
  
  **Dual/IPv4/IPv6**

  **Dual**: When set to Dual, the network interface can operate on both IP versions at the same time, and can have both an IPv4 and an IPv6 address at the same time.

  **IPv4**: When set to IPv4, the system will use IPv4 on the network interface.

  **IPv6**: When set to IPv6, the system will use IPv6 on the network interface.

- **Default value:**

  **Dual**
xConfiguration Network [n] IPv4 Assignment
Applies to: All products
Requires user role: ADMIN, USER

Define how the system will obtain its IPv4 address, subnet mask and gateway address. When using DHCP for address assignment, the MAC address is used as client identifier in DHCP requests for the SX10, SX20, SX80, MX200 G2, MX300 G2, and Touch 10. "01" appended by the MAC address is used for the other products.

USAGE:
xConfiguration Network [n] IPv4 Assignment: Assignment
where
  n: Index that identifies the network.
      Range: 1..1
Assignment:
  Static/DHCP
    Static: The addresses must be configured manually using the Network IPv4 Address, Network IPv4 Gateway and Network IPv4 SubnetMask settings (static addresses).
    DHCP: The system addresses are automatically assigned by the DHCP server.
Default value:
  DHCP

xConfiguration Network [n] IPv4 Address
Applies to: All products
Requires user role: ADMIN, USER

Define the static IPv4 network address for the system. Applicable only when Network IPv4 Assignment is set to Static.

USAGE:
xConfiguration Network [n] IPv4 Address: "Address"
where
  n: Index that identifies the network.
      Range: 1..1
Address:
  String (0, 64)
  A valid IPv4 address.
  Default value:
    *

xConfiguration Network [n] IPv4 Gateway
Applies to: All products
Requires user role: ADMIN, USER

Define the IPv4 network gateway address. Applicable only when the Network IPv4 Assignment is set to Static.

USAGE:
xConfiguration Network [n] IPv4 Gateway: "Gateway"
where
  n: Index that identifies the network.
      Range: 1..1
Gateway:
  String (0, 64)
  A valid IPv4 address.
  Default value:
    *
xConfiguration Network [n] IPv4 SubnetMask

Applies to: All products

Requires user role: ADMIN, USER

Define the IPv4 network subnet mask. Applicable only when the Network IPv4 Assignment is set to Static.

**USAGE:**

```
xConfiguration Network [n] IPv4 SubnetMask: "SubnetMask"
```

where

- n: Index that identifies the network.
  - Range: 1..1
- SubnetMask:
  - String (0, 64)
  - A valid IPv4 address.
  - Default value: ""

xConfiguration Network [n] IPv6 Assignment

Applies to: All products

Requires user role: ADMIN, USER

Define how the system will obtain its IPv6 address and the default gateway address.

When using DHCPv6 for address assignment, the MAC address is used as client identifier in DHCP requests for the SX10, SX20, SX80, MX200 G2, MX300 G2, and Touch 10. "01" appended by the MAC address is used for the other products.

**USAGE:**

```
xConfiguration Network [n] IPv6 Assignment: Assignment
```

where

- n: Index that identifies the network.
  - Range: 1..1
- Assignment:
  - Static/DHCPv6/Autoconf
  - **Static**: The codec and gateway IP addresses must be configured manually using the Network IPv6 Address and Network IPv6 Gateway settings. The options, for example NTP and DNS server addresses, must either be set manually or obtained from a DHCPv6 server. The Network IPv6 DHCPOptions setting determines which method to use.
  - **DHCPv6**: All IPv6 addresses, including options, will be obtained from a DHCPv6 server. See RFC 3315 for a detailed description. The Network IPv6 DHCPOptions setting will be ignored.
  - **Autoconf**: Enable IPv6 stateless autoconfiguration of the IPv6 network interface. See RFC 4862 for a detailed description. The options, for example NTP and DNS server addresses, must either be set manually or obtained from a DHCPv6 server. The Network IPv6 DHCPOptions setting determines which method to use.
  - Default value: Autoconf
### xConfiguration Network [n] IPv6 Address

**Applies to:** All products

**Requires user role:** ADMIN, USER

Define the static IPv6 network address for the system. Applicable only when the Network IPv6 Assignment is set to Static.

**USAGE:**

```
xConfiguration Network [n] IPv6 Address: "Address"
```

where

- **n**: Index that identifies the network.
  - Range: 1..1
- **Address**: String (0, 64)
  - A valid IPv6 address including a network mask. Example: 2001:DB8::/48
  - Default value: ""

### xConfiguration Network [n] IPv6 Gateway

**Applies to:** All products

**Requires user role:** ADMIN, USER

Define the IPv6 network gateway address. This setting is only applicable when the Network IPv6 Assignment is set to Static.

**USAGE:**

```
xConfiguration Network [n] IPv6 Gateway: "Gateway"
```

where

- **n**: Index that identifies the network.
  - Range: 1..1
- **Gateway**: String (0, 64)
  - A valid IPv6 address.
  - Default value: ""

### xConfiguration Network [n] IPv6 DHCPOptions

**Applies to:** All products

**Requires user role:** ADMIN, USER

Retrieve a set of DHCP options, for example NTP and DNS server addresses, from a DHCPv6 server.

**USAGE:**

```
xConfiguration Network [n] IPv6 DHCPOptions: DHCPOptions
```

where

- **n**: Index that identifies the network.
  - Range: 1..1
- **DHCPOptions**: Off/On
  - **Off**: Disable the retrieval of DHCP options from a DHCPv6 server.
  - **On**: Enable the retrieval of a selected set of DHCP options from a DHCPv6 server.
  - Default value: On

### xConfiguration Network [n] MTU

**Applies to:** All products

**Requires user role:** ADMIN, USER

Define the Ethernet MTU (Maximum Transmission Unit) size. The MTU size must be supported by your network infrastructure. The minimum size is 576 for IPv4 and 1280 for IPv6.

**USAGE:**

```
xConfiguration Network [n] MTU: MTU
```

where

- **n**: Index that identifies the network.
  - Range: 1..1
- **MTU**: Integer (576..1500)
  - Set a value for the MTU (bytes).
  - Default value: 1500
xConfiguration Network [n] QoS Mode

Applies to: All products
Requires user role: ADMIN, USER

The QoS (Quality of Service) is a method which handles the priority of audio, video and data in the network. The QoS settings must be supported by the infrastructure. Diffserv (Differentiated Services) is a computer networking architecture that specifies a simple, scalable and coarse-grained mechanism for classifying, managing network traffic and providing QoS priorities on modern IP networks.

USAGE:
xConfiguration Network [n] QoS Mode: Mode
where
n: Index that identifies the network.
Range: 1..1
Mode:
Off/Diffserv
Off: No QoS method is used.
Diffserv: When you set the QoS Mode to Diffserv, the Network QoS Diffserv Audio, Network QoS Diffserv Video, Network QoS Diffserv Data, Network QoS Diffserv Signalling, Network QoS Diffserv ICMPv6 and Network QoS Diffserv NTP settings are used to prioritize packets.
Default value: Diffserv

xConfiguration Network [n] QoS Diffserv Audio

Applies to: All products
Requires user role: ADMIN, USER

This setting will only take effect if Network QoS Mode is set to Diffserv.
Define which priority Audio packets should have in the IP network.
The priority for the packets ranges from 0 to 63 - the higher the number, the higher the priority. The recommended class for Audio is CS4, which equals the decimal value 32. If in doubt, contact your network administrator.
The priority set here might be overridden when packets are leaving the network controlled by the local network administrator.

USAGE:
xConfiguration Network [n] QoS Diffserv Audio: Audio
where
n: Index that identifies the network.
Range: 1..1
Audio:
Integer (0..63)
Set the priority of the audio packets in the IP network - the higher the number, the higher the priority. 0 means "best effort".
Default value: 0
xConfiguration Network [n] QoS Diffserv Video

Applies to: All products
Requires user role: ADMIN, USER

This setting will only take effect if Network QoS Mode is set to Diffserv.

Define which priority Video packets should have in the IP network. The packets on the presentation channel (shared content) are also in the Video packet category. The priority for the packets ranges from 0 to 63 - the higher the number, the higher the priority. The recommended class for Video is CS4, which equals the decimal value 32. If in doubt, contact your network administrator.

The priority set here might be overridden when packets are leaving the network controlled by the local network administrator.

**USAGE:**

xConfiguration Network [n] QoS Diffserv Video: Video

where

- **n**: Index that identifies the network.
  
  Range: 1..1

- **Video**: Integer (0..63)
  
  Set the priority of the video packets in the IP network - the higher the number, the higher the priority. 0 means “best effort”.

  Default value: 0

xConfiguration Network [n] QoS Diffserv Data

Applies to: All products
Requires user role: ADMIN, USER

This setting will only take effect if Network QoS Mode is set to Diffserv.

Define which priority Data packets should have in the IP network.

The priority for the packets ranges from 0 to 63 - the higher the number, the higher the priority. The recommended value for Data is 0, which means best effort. If in doubt, contact your network administrator.

The priority set here might be overridden when packets are leaving the network controlled by the local network administrator.

**USAGE:**

xConfiguration Network [n] QoS Diffserv Data: Data

where

- **n**: Index that identifies the network.
  
  Range: 1..1

- **Data**: Integer (0..63)
  
  Set the priority of the data packets in the IP network - the higher the number, the higher the priority. 0 means “best effort”.

  Default value: 0
xConfiguration Network [n] QoS Diffserv Signalling

 Applies to: All products
 Requires user role: ADMIN, USER

 This setting will only take effect if Network QoS Mode is set to Diffserv.
 Define which priority Signalling packets that are deemed critical (time-sensitive) for the real-time operation should have in the IP network.
 The priority for the packets ranges from 0 to 63 - the higher the number, the higher the priority.
 The recommended class for Signalling is CS3, which equals the decimal value 24. If in doubt, contact your network administrator.
 The priority set here might be overridden when packets are leaving the network controlled by the local network administrator.

 USAGE:
 xConfiguration Network [n] QoS Diffserv Signalling: Signalling
 where
 n: Index that identifies the network.
 Range: 1..1
 Signalling:
 Integer (0..63)
 Set the priority of the signalling packets in the IP network - the higher the number, the higher the priority. 0 means "best effort".
 Default value:
 0

 xConfiguration Network [n] QoS Diffserv ICMPv6

 Applies to: All products
 Requires user role: ADMIN, USER

 This setting will only take effect if Network QoS Mode is set to Diffserv.
 Define which priority ICMPv6 packets should have in the IP network.
 The priority for the packets ranges from 0 to 63 - the higher the number, the higher the priority.
 The recommended value for ICMPv6 is 0, which means best effort. If in doubt, contact your network administrator.
 The priority set here might be overridden when packets are leaving the network controlled by the local network administrator.

 USAGE:
 xConfiguration Network [n] QoS Diffserv ICMPv6: ICMPv6
 where
 n: Index that identifies the network.
 Range: 1..1
 ICMPv6:
 Integer (0..63)
 Set the priority of the ICMPv6 packets in the IP network - the higher the number, the higher the priority. 0 means "best effort".
 Default value:
 0
xConfiguration Network [n] QoS Diffserv NTP

Applies to: All products
Requires user role: ADMIN, USER

This setting will only take effect if Network QoS Mode is set to Diffserv.
Define which priority NTP packets should have in the IP network.
The priority for the packets ranges from 0 to 63 - the higher the number, the higher the priority.
The recommended value for NTP is 0, which means "best effort". If in doubt, contact your network administrator.
The priority set here might be overridden when packets are leaving the network controlled by the local network administrator.

USAGE:
xConfiguration Network [n] QoS Diffserv NTP: NTP
where
  n: Index that identifies the network.
  Range: 1..1
  NTP:
    Integer (0..63)
    Set the priority of the NTP packets in the IP network - the higher the number, the higher the priority. 0 means "best effort".
Default value:
    0

xConfiguration Network [n] RemoteAccess Allow

Applies to: All products
Requires user role: ADMIN, USER

Define which IP addresses (IPv4/IPv6) are allowed for remote access to the codec from HTTP, HTTPS, SSH or Telnet.
A network mask (IP range) is specified by <ip address>/N, where N is 1-32 for IPv4, and N is 1-128 for IPv6. The /N is a common indication of a network mask where the first N bits are set. Thus 192.168.0.0/24 would match any address starting with 192.168.0, since these are the first 24 bits in the address. Multiple IP addresses are separated by a white space.
Telnet is only supported by SX Series, MX Series and DX70/DX80.

USAGE:
xConfiguration Network [n] RemoteAccess Allow: "Allow"
where
  n: Index that identifies the network.
  Range: 1..1
  Allow:
    String (0..255)
    A valid IPv4 address or IPv6 address.
Default value:
    **
xConfiguration Network [n] Speed

Applies to: All products
Requires user role: ADMIN, INTEGRATOR

Define the Ethernet link speed. We recommend not to change from the default value, which negotiates with the network to set the speed automatically. If you do not use auto-negotiation, make sure that the speed you choose is supported by the closest switch in your network infrastructure.

**USAGE:**

```
xConfiguration Network [n] Speed: Speed

where

n: Index that identifies the network.
    Range: 1..1

Speed:

Auto/10half/10full/100half/100full (SX10)
Auto/10half/10full/100half/100full/1000full (DX70/DX80 SX20 SX90 MX200G2/MX300G2 MX700/MX800/MX800D RoomKit RoomKitMini CodecPlus CodecPro Room55 Room70/Room55D Room70G2)

Auto: Auto-negotiate link speed.
10half: Force link to 10 Mbps half-duplex.
10full: Force link to 10 Mbps full-duplex.
100half: Force link to 100 Mbps half-duplex.
100full: Force link to 100 Mbps full-duplex.
1000full: Force link to 1 Gbps full-duplex.
```

Default value:

```
Auto
```

xConfiguration Network [n] VLAN Voice Mode

Applies to: All products
Requires user role: ADMIN, USER

Define the VLAN voice mode. The VLAN Voice Mode will be set to Auto automatically if you have Cisco UCM (Cisco Unified Communications Manager) as provisioning infrastructure. Note that Auto mode will NOT work if the NetworkServices CDP Mode setting is Off.

**USAGE:**

```
xConfiguration Network [n] VLAN Voice Mode: Mode

where

n: Index that identifies the network.
    Range: 1..1

Mode:

Auto/Manual/Off

Auto: The Cisco Discovery Protocol (CDP), if available, assigns an id to the voice VLAN. If CDP is not available, VLAN is not enabled.

Manual: The VLAN ID is set manually using the Network VLAN Voice VlanId setting. If CDP is available, the manually set value will be overruled by the value assigned by CDP.

Off: VLAN is not enabled.
```

Default value:

```
Auto
```
xConfiguration Network [n] VLAN Voice VlanId

Applies to: All products
Requires user role: ADMIN, USER

Define the VLAN voice ID. This setting will only take effect if Network VLAN Voice Mode is set to Manual.

USAGE:

```
xConfiguration Network [n] VLAN Voice VlanId: VlanId
```

where

- **n**: Index that identifies the network.
  - Range: 1..1
- **VlanId**: Integer (1..4094)
  Set the VLAN voice ID.
  Default value: 1

NetworkPort configuration

xConfiguration NetworkPort [n] Mode

Applies to: DX70/DX80
Requires user role: ADMIN

The video system has two network ports. The first network port is for connecting the video system to Ethernet LAN. The second network port (also called the computer network port) allows you to connect a computer to the Ethernet LAN via the video system. In this way, you only need one network wall socket to support both the video system and the computer.

If the video system is used in a public environment we recommend that you disable this network port, to prevent people from connecting a computer to your network through the video system.

You have to restart the video system for any change to this setting to take effect.

USAGE:

```
xConfiguration NetworkPort [n] Mode: Mode
```

where

- **n**: Unique ID that identifies the network port.
  - Range: 2..2
- **Mode**: Off/On
  - **Off**: The computer network port is disabled.
  - **On**: The computer network port is available for use.
  Default value: On
NetworkServices configuration

xConfiguration NetworkServices CDP Mode

Applies to: All products
Requires user role: ADMIN

Enable or disable the CDP (Cisco Discovery Protocol) daemon. Enabling CDP will make the endpoint report certain statistics and device identifiers to a CDP-enabled switch. If CDP is disabled, the Network VLAN Voice Mode: Auto setting will not work.

USAGE:

xConfiguration NetworkServices CDP Mode: Mode
where

Mode:

Off/On

Off: The CDP daemon is disabled.
On: The CDP daemon is enabled.

Default value:

On

xConfiguration NetworkServices H323 Mode

Applies to: All products
Requires user role: ADMIN

Define whether the system should be able to place and receive H.323 calls or not.

USAGE:

xConfiguration NetworkServices H323 Mode: Mode
where

Mode:

Off/On

Off: Disable the possibility to place and receive H.323 calls.
On: Enable the possibility to place and receive H.323 calls.

Default value:

Off

xConfiguration NetworkServices HTTP Mode

Applies to: All products
Requires user role: ADMIN

Define whether or not to allow access to the video system using the HTTP or HTTPS (HTTP Secure) protocols. Note that the video system’s web interface use HTTP or HTTPS. If this setting is switched Off, you cannot use the web interface.

For additional security (encryption and decryption of requests and pages that are returned by the web server), allow only HTTPS.

Note: The default value is HTTP+HTTPS for video systems that have been upgraded to CE9.4 (or later) from an earlier software version, provided that the video system has not been factory reset after the upgrade.

USAGE:

xConfiguration NetworkServices HTTP Mode: Mode
where

Mode:

Off/HTTP+HTTPS/HTTPS

Off: Access to the video system not allowed via HTTP or HTTPS.
HTTP+HTTPS: Access to the video system allowed via both HTTP and HTTPS.
HTTPS: Access to the video system allowed via HTTPS, but not via HTTP.

Default value:

HTTPS (changed from HTTP+HTTPS to HTTPS in CE9.4)
xConfiguration NetworkServices HTTP Proxy LoginName

Applies to: All products
Requires user role: ADMIN, USER

This is the user name part of the credentials for authentication towards the HTTP proxy. Requires that the NetworkServices HTTP Proxy Mode is set to Manual.

**USAGE:**
xConfiguration NetworkServices HTTP Proxy LoginName: "LoginName"

where

- **LoginName**:
  - String (0, 80)
  - The authentication login name.
Default value:"

xConfiguration NetworkServices HTTP Proxy Password

Applies to: All products
Requires user role: ADMIN, USER

This is the password part of the credentials for authentication towards the HTTP proxy. Requires that the NetworkServices HTTP Proxy Mode is set to Manual.

**USAGE:**
xConfiguration NetworkServices HTTP Proxy Password: "Password"

where

- **Password**:
  - String (0, 64)
  - The authentication password.
Default value:"

xConfiguration NetworkServices HTTP Proxy Mode

Applies to: All products
Requires user role: ADMIN, USER

The HTTP proxy for Cisco Webex can be set up manually, it can be auto-configured (PACUrl), fully automated (WPAD), or it can be turned off.

**USAGE:**
xConfiguration NetworkServices HTTP Proxy Mode: Mode

where

- **Mode**:
  - Manual/Off/PACUrl/WPAD
  - **Manual**: Enter the address of the proxy server in the NetworkServices HTTP Proxy URL setting. Optionally, also add the HTTP proxy login name and password in the NetworkServices HTTP Proxy LoginName/Password settings.
  - **Off**: The HTTP proxy mode is turned off.
  - **PACUrl**: The HTTP proxy is auto-configured. You must enter the URL for the PAC (Proxy Auto Configuration) script in the NetworkServices HTTP Proxy PACUrl setting.
  - **WPAD**: With WPAD (Web Proxy Auto Discovery) the HTTP proxy is fully automated and auto-configured.
Default value: Off
xConfiguration NetworkServices HTTP Proxy Url

Applies to: All products
Requires user role: ADMIN, USER

Set the URL of the HTTP proxy server. Requires that the NetworkServices HTTP Proxy Mode is set to Manual.

**USAGE:**

```
xConfiguration NetworkServices HTTP Proxy Url: "Url"
```

where

- **Url**:
  - String (0..255)
  - The URL of the HTTP proxy server.
  - Default value:"

xConfiguration NetworkServices HTTP Proxy PACUrl

Applies to: All products
Requires user role: ADMIN, USER

Set the URL of the PAC (Proxy Auto Configuration) script. Requires that the NetworkServices HTTP Proxy Mode is set to PACUrl.

**USAGE:**

```
xConfiguration NetworkServices HTTP Proxy PACUrl: "PACUrl"
```

where

- **PACUrl**:
  - String (0..255)
  - The URL of the PAC (Proxy Auto Configuration) script.
  - Default value:"

xConfiguration NetworkServices HTTPS Server MinimumTLSVersion

Applies to: All products
Requires user role: ADMIN

Set the lowest version of the TLS (Transport Layer Security) protocol that is allowed.

**USAGE:**

```
xConfiguration NetworkServices HTTPS Server MinimumTLSVersion: MinimumTLSVersion
```

where

- **MinimumTLSVersion**:
  - TLSv1.1/TLSv1.2
  - TLSv1.1: Support of TLS version 1.1 or higher.
  - TLSv1.2: Support of TLS version 1.2 or higher.
  - Default value:TLSv1.1

xConfiguration NetworkServices HTTPS StrictTransportSecurity

Applies to: All products
Requires user role: ADMIN

The HTTP Strict Transport Security header lets a web site inform the browser that it should never load the site using HTTP and should automatically convert all attempts to access the site using HTTP to HTTPS requests instead.

**USAGE:**

```
xConfiguration NetworkServices HTTPS StrictTransportSecurity: StrictTransportSecurity
```

where

- **StrictTransportSecurity**:
  - Off/On
  - Off: The HTTP strict transport security feature is disabled.
  - On: The HTTP strict transport security feature is enabled.
  - Default value:Off
xConfiguration NetworkServices HTTPS VerifyServerCertificate

Applies to: All products
Requires user role: ADMIN

When the video system connects to an external HTTPS server (like a phone book server or an external manager), this server will present a certificate to the video system to identify itself.

**USAGE:**

```
xConfiguration NetworkServices HTTPS VerifyServerCertificate: VerifyServerCertificate
where
  VerifyServerCertificate: Off/On
  Off: Do not verify server certificates.
  On: Requires the system to verify that the server certificate is signed by a trusted Certificate Authority (CA). This requires that a list of trusted CAs are uploaded to the system in advance.

Default value: Off
```

xConfiguration NetworkServices HTTPS VerifyClientCertificate

Applies to: All products
Requires user role: ADMIN

When the video system connects to a HTTPS client (like a web browser), the client can be asked to present a certificate to the video system to identify itself.

**USAGE:**

```
xConfiguration NetworkServices HTTPS VerifyClientCertificate: VerifyClientCertificate
where
  VerifyClientCertificate: Off/On
  Off: Do not verify client certificates.
  On: Requires the client to present a certificate that is signed by a trusted Certificate Authority (CA). This requires that a list of trusted CAs are uploaded to the system in advance.

Default value: Off
```
xConfiguration NetworkServices NTP Mode

Applies to: All products
Requires user role: ADMIN

The Network Time Protocol (NTP) is used to synchronize the system's time and date to a reference time server. The time server will be queried regularly for time updates.

USAGE:
xConfiguration NetworkServices NTP Mode: Mode

where

Mode:
- Auto: The system will use an NTP server for time reference. As default, the server address will be obtained from the network's DHCP server. If a DHCP server is not used, or if the DHCP server does not provide an NTP server address, the NTP server address that is specified in the NetworkServices NTP Server [n] Address setting will be used.
- Manual: The system will use the NTP server that is specified in the NetworkServices NTP Server [n] Address setting for time reference.
- Off: The system will not use an NTP server. The NetworkServices NTP Server [n] Address setting will be ignored.

Default value: Auto

xConfiguration NetworkServices NTP Server [n] Address

Applies to: All products
Requires user role: ADMIN

The address of the NTP server that will be used when NetworkServices NTP Mode is set to Manual, and when NetworkServices NTP Mode is set to Auto and no address is supplied by a DHCP server.

USAGE:
xConfiguration NetworkServices NTP Server [n] Address: "Address"

where

n: Unique ID for the NTP server.
- Range: 1..3

Address:
- String (0, 255)
- A valid IPv4 address, IPv6 address or DNS name.
- Default value: "0.tandberg.pool.ntp.org"
xConfiguration NetworkServices NTP Server [n] Key

Applies to: All products

Requires user role: ADMIN

To make sure that the NTP information comes from a trusted source, the video system must know the ID/key pair that the NTP source uses. Use the NetworkServices NTP Server [n] Key and NetworkServices NTP Server [n] KeyId settings for the key and ID respectively.

**USAGE:**
xConfiguration NetworkServices NTP Server [n] Key: "Key"

where
- \( n \): Unique ID for the NTP server.
  - Range: 1..3
- **Key**: String (0, 2045)
  The key, which is part of the ID/key pair that the NTP source uses.
  
  Default value:
  ""

xConfiguration NetworkServices NTP Server [n] KeyId

Applies to: All products

Requires user role: ADMIN

To make sure that the NTP information comes from a trusted source, the video system must know the ID/key pair that the NTP source uses. Use the NetworkServices NTP Server [n] Key and NetworkServices NTP Server [n] KeyId settings for the key and ID respectively.

**USAGE:**
xConfiguration NetworkServices NTP Server [n] KeyId: "KeyId"

where
- \( n \): Unique ID for the NTP server.
  - Range: 1..3
- **KeyId**: String (0, 10)
  The ID, which is part of the ID/key pair that the NTP source uses.
  
  Default value:
  ""
xConfiguration Network Services NTP Server [n] KeyAlgorithm

Applies to: All products
Requires user role: ADMIN

Choose the authentication hash function that the NTP server uses, and that the video system must use to authenticate the time messages.

 USAGE:

 xConfiguration Network Services NTP Server [n] KeyAlgorithm: KeyAlgorithm where

 n: Unique ID for the NTP server.
    Range: 1..3

 KeyAlgorithm:

 None/SHA1/SHA256

 None: The NTP server doesn’t use a hash function.

 SHA1: The NTP server uses the SHA-1 hash function.

 SHA256: The NTP server uses the SHA-256 hash function (from the SHA-2 family of hash functions).

 Default value: *

---

xConfiguration Network Services SNMP Mode

Applies to: All products
Requires user role: ADMIN, INTEGRATOR

SNMP (Simple Network Management Protocol) is used in network management systems to monitor network-attached devices (routers, servers, switches, projectors, etc) for conditions that warrant administrative attention. SNMP exposes management data in the form of variables on the managed systems, which describe the system configuration. These variables can then be queried (set to ReadOnly) and sometimes set (set to ReadWrite) by managing applications.

 USAGE:

 xConfiguration Network Services SNMP Mode: Mode where

 Mode:

 Off/ReadOnly/ReadWrite

 Off: Disable the SNMP network service.

 ReadOnly: Enable the SNMP network service for queries only.

 ReadWrite: Enable the SNMP network service for both queries and commands.

 Default value: ReadOnly

---

xConfiguration Network Services SIP Mode

Applies to: All products
Requires user role: ADMIN

Define whether the system should be able to place and receive SIP calls or not.

 USAGE:

 xConfiguration Network Services SIP Mode: Mode where

 Mode:

 Off/On

 Off: Disable the possibility to place and receive SIP calls.

 On: Enable the possibility to place and receive SIP calls.

 Default value: On
xConfiguration NetworkServices SNMP Host \([n]\) Address

Applies to: All products
Requires user role: ADMIN, INTEGRATOR

Define the address of up to three SNMP Managers.
The system's SNMP Agent (in the codec) responds to requests from SNMP Managers (a PC program etc.), for example about system location and system contact. SNMP traps are not supported.

**USAGE:**

```
xConfiguration NetworkServices SNMP Host \([n]\) Address: "Address"
```

where

- \( n \): Identifies the SNMP host. Maximum three SNMP hosts are allowed.
  - Range: 1..3
- **Address**:
  - String (0..255)
  - A valid IPv4 address, IPv6 address or DNS name.
  - Default value: ""

xConfiguration NetworkServices SNMP CommunityName

Applies to: All products
Requires user role: ADMIN, INTEGRATOR

Define the name of the Network Services SNMP Community. SNMP Community names are used to authenticate SNMP requests. SNMP requests must have a password (case sensitive) in order to receive a response from the SNMP Agent in the codec. The default password is "public". If you have the Cisco TelePresence Management Suite (TMS) you must make sure the same SNMP Community is configured there too. NOTE: The SNMP Community password is case sensitive.

**USAGE:**

```
xConfiguration NetworkServices SNMP CommunityName: "CommunityName"
```

where

- **CommunityName**:
  - String (0, 50)
  - The SNMP community name.
  - Default value: ""

xConfiguration NetworkServices SNMP SystemContact

Applies to: All products
Requires user role: ADMIN, INTEGRATOR

Define the name of the Network Services SNMP System Contact.

**USAGE:**

```
xConfiguration NetworkServices SNMP SystemContact: "SystemContact"
```

where

- **SystemContact**:
  - String (0, 50)
  - The name of the SNMP system contact.
  - Default value: ""
xConfiguration NetworkServices SNMP SystemLocation
Applies to: All products
Requires user role: ADMIN, INTEGRATOR

Define the name of the Network Services SNMP System Location.

USAGE:
xConfiguration NetworkServices SNMP SystemLocation: "SystemLocation"
where
SystemLocation:
  String (0, 50)
  The name of the SNMP system location.
  Default value:"

xConfiguration NetworkServices SSH Mode
Applies to: All products
Requires user role: ADMIN

SSH (or Secure Shell) protocol can provide secure encrypted communication between the codec and your local computer.

USAGE:
xConfiguration NetworkServices SSH Mode: Mode
where
Mode:
  Off/On
  Off: The SSH protocol is disabled. This is the factory setting.
  On: The SSH protocol is enabled.
  Default value: Off

xConfiguration NetworkServices SSH HostKeyAlgorithm
Applies to: All products
Requires user role: ADMIN

Choose the cryptographic algorithm that shall be used for the SSH host key. Choices are RSA (Rivest-Shamir-Adleman) with 2048 bits keysize, ECDSA (Elliptic Curve Digital Signature Algorithm) with NIST curve P-384, and EdDSA (Edwards-curve Digital Signature Algorithm) with ed25519 signature schema.

USAGE:
xConfiguration NetworkServices SSH HostKeyAlgorithm: HostKeyAlgorithm
where
HostKeyAlgorithm:
  ECDSA/RSA/ed25519
  ECDSA: Use the ECDSA algorithm (nist-384p).
  RSA: Use the RSA algorithm (2048 bits).
  ed25519: Use the ed25519 algorithm.
  Default value: RSA

xConfiguration NetworkServices Telnet Mode
Applies to: DX70/DX80 SX10 SX20 SX80 MX200G2/MX300G2 MX700/MX800/MX800D
Requires user role: ADMIN

Telnet is a network protocol used on the Internet or Local Area Network (LAN) connections.

USAGE:
xConfiguration NetworkServices Telnet Mode: Mode
where
Mode:
  Off/On
  Off: The Telnet protocol is disabled. This is the factory setting.
  On: The Telnet protocol is enabled.
  Default value: Off
xConfiguration NetworkServices UPnP Mode

**Applies to:** SX10 SX20 SX80 MX200G2/MX300G2 MX700/MX800/MX800D RoomKit RoomKitMini CodecPlus CodecPro Room55 Room70/Room70D Room70G2

**Requires user role:** ADMIN

Fully disable UPnP (Universal Plug and Play), or enable UPnP for a short time period after the video system has been switched on or restarted.

The default operation is that UPnP is enabled when you switch on or restart the video system. Then UPnP is automatically disabled after the timeout period that is defined in the NetworkServices UPnP Timeout setting. Use the video system's web interface to set the timeout.

When UPnP is enabled, the video system advertises its presence on the network. The advertisement permits a Touch controller to discover video systems automatically, and you do not need to manually enter the video system's IP address in order to pair the Touch controller.

**USAGE:**

```plaintext
xConfiguration NetworkServices UPnP Mode: Mode
```

where

- **Mode**:
  - **Off/On**
    - **Off**: UPnP is disabled. The video system does not advertise its presence, and you have to enter the video system's IP address manually in order to pair a Touch controller to the video system.
    - **On**: UPnP is enabled. The video system advertises its presence until the timeout period expires.

Default value:

- **On**
  - [ SX10 SX20 SX80 MX200G2/MX300G2 MX700/MX800/MX800D RoomKit RoomKitMini CodecPlus CodecPro Room55 Room70/Room70D Room70G2 ]

---

xConfiguration NetworkServices Websocket

**Applies to:** All products

**Requires user role:** ADMIN

It is possible to interact with the API of the video system over the WebSocket protocol, both the insecure and secure versions (ws and wss). A WebSocket is tied to HTTP, so that also HTTP or HTTPS must be enabled before you can use WebSockets (see the NetworkServices HTTP Mode setting).

**USAGE:**

```plaintext
xConfiguration NetworkServices Websocket: Websocket
```

where

- **Websocket**:
  - **FollowHTTPService/Off**
    - **FollowHTTPService**: Communication over the WebSocket protocol is allowed when HTTP or HTTPS is enabled.
    - **Off**: Communication over the WebSocket protocol is not allowed.

Default value:

- **Off**
xConfiguration NetworkServices WelcomeText

Applies to: All products
Requires user role: ADMIN

Choose which information the user should see when logging on to the codec through SSH or Telnet. Telnet is only supported by SX Series, MX Series and DX70/DX80.

USAGE:
xConfiguration NetworkServices WelcomeText: WelcomeText

where

WelcomeText:
Off/On

Off: The welcome text is: Login successful
On: The welcome text is: Welcome to <system name>; Software version; Software release date; Login successful.

Default value:
On

Peripherals configuration

xConfiguration Peripherals InputDevice Mode

Applies to: DX70/DX80 RoomKit RoomKitMini CodecPlus CodecPro Room55 Room70/Room55D Room70G2
Requires user role: ADMIN

Define whether or not to allow the use of a third-party input device, such as a USB keyboard or a wireless remote control with a USB dongle. The input device must advertise itself as a USB keyboard. You must define and implement the actions to be taken as response to key clicks yourself.

USAGE:
xConfiguration Peripherals InputDevice Mode: Mode

where

Mode:
Off/On

Off: A third-party USB input device is not allowed.
On: A third-party USB input device can be used to control certain functions on the video system.

Default value:
Off
xConfiguration Peripherals Profile Cameras

**Applies to:** SX10, SX20, SX80, MX200G2/MX300G2, MX700/MX800/MX800D, RoomKit, RoomKitMini, CodecPlus, CodecPro, Room55, Room70/Room55D, Room70G2

**Requires user role:** ADMIN, INTEGRATOR

Define the number of cameras that are expected to be connected to the video system. This information is used by the video system's diagnostics service. If the number of connected cameras does not match this setting, the diagnostics service will report it as an inconsistency.

**USAGE:**

```xConfiguration Peripherals Profile Cameras: Cameras
where
  Cameras:
  NotSet/Minimum1/0/1/2/3/4/5/6/7
  NotSet: No camera check is performed.
  Minimum1: At least one camera should be connected to the video system.
  0-7: Select the number of cameras that are expected to be connected to the video system.

  Default value:
    Minimum1```

xConfiguration Peripherals Profile ControlSystems

**Applies to:** All products

**Requires user role:** ADMIN, INTEGRATOR

Define if a third-party control system, for example Crestron or AMX, is expected to be connected to the video system. This information is used by the video system's diagnostics service. If the number of connected control systems does not match this setting, the diagnostics service will report it as an inconsistency. Note that only one third-party control system is supported.

If set to 1, the control system must send heartbeats to the video system using xCommand Peripherals Pair and HeartBeat commands. Failing to do so will cause the in-room control extensions to show a warning that the video system has lost connectivity to the control system.

**USAGE:**

```xConfiguration Peripherals Profile ControlSystems: ControlSystems
where
  ControlSystems:
  1/NotSet
  1: One third-party control system should be connected to the video system.
  NotSet: No check for a third-party control system is performed.

  Default value:
    NotSet```
**xConfiguration Peripherals Profile TouchPanels**

**Applies to:** SX10, SX20, SX80, MX200G2/MX300G2, MX700/MX800/MX800D, RoomKit, RoomKitMini, CodecPlus, CodecPro, Room55, Room70/Room55D, Room70G2

**Requires user role:** ADMIN, INTEGRATOR

Define the number of Cisco Touch controllers that are expected to be connected to the video system. This information is used by the video system's diagnostics service. If the number of connected Touch controllers does not match this setting, the diagnostics service will report it as an inconsistency.

**USAGE:**

```
xConfiguration Peripherals Profile TouchPanels: TouchPanels
```

where

- **TouchPanels:**
  - **NotSet**/Minimum1/0/1/2/3/4/5
  - **NotSet:** No touch panel check is performed.
  - **Minimum1:** At least one Cisco Touch controller should be connected to the video system.
  - 0-5: Select the number of Touch controllers that are expected to be connected to the video system. Note that only one Cisco Touch controller is officially supported.

**Default value:**

- **NotSet**: [ SX10, SX20 ]
- **Minimum1**: [ SX80, MX200G2/MX300G2, MX700/MX800/MX800D, RoomKit, RoomKitMini, CodecPlus, CodecPro, Room55, Room70/Room55D, Room70G2 ]

---

**Phonebook configuration**

**xConfiguration Phonebook Server [n] ID**

**Applies to:** All products

**Requires user role:** ADMIN

Define a name for the external phone book.

**USAGE:**

```
xConfiguration Phonebook Server [n] ID: "ID"
```

where

- **n**: Unique ID that identifies the phonebook server.
  - Range: 1..1
- **ID**: String (0, 64)
  - The name for the external phone book.
  - **Default value:**
    - **"**
xConfiguration Phonebook Server [n] Pagination

Applies to: All products
Requires user role: ADMIN

Configure if the phonebook server supports pagination (paging) or not. Pagination means that the server supports consecutive searches, and these searches can be relative to an offset. This allows the user interface to perform as many consecutive searches as required to get the complete search result.

If Pagination is Disabled the video system does a single search and returns a maximum of 100 entries in the search result. It is not possible to scroll to any further search results beyond that.

**USAGE:**
xConfiguration Phonebook Server [n] Pagination: **Pagination**

where

n: Unique ID that identifies the phonebook server.
Range: 1..1

**Pagination:**

Disabled/Enabled

**Disabled:** The phonebook server does not support pagination. The video system does a single search, and the maximum number of entries in the search result is 100.

**Enabled:** The phonebook server supports pagination.

Default value:

Enabled

xConfiguration Phonebook Server [n] Type

Applies to: All products
Requires user role: ADMIN

Select the phonebook server type.

**USAGE:**
xConfiguration Phonebook Server [n] Type: **Type**

where

n: Unique ID that identifies the phonebook server.
Range: 1..1

**Type:**

Off/CUCM/Spark/TMS/VCS

**Off:** Do not use a phonebook.

**CUCM:** The phonebook is located on the Cisco Unified Communications Manager.

**Spark:** The phonebook is located in the Cisco Webex cloud service.

**TMS:** The phonebook is located on the Cisco TelePresence Management Suite server.

**VCS:** The phonebook is located on the Cisco TelePresence Video Communication Server.

Default value:

Off
xConfiguration Phonebook Server [n] URL

Applies to: All products
Requires user role: ADMIN

Define the address (URL) to the external phone book server.

**USAGE:**

```
xConfiguration Phonebook Server [n] URL: "URL"
```

where
- **n**: Unique ID that identifies the phonebook server.
  - Range: 1..1
- **URL**: String (0..255)
  - A valid address (URL) to the phone book server.
  - Default value: ""

---

Provisioning configuration

xConfiguration Provisioning Connectivity

Applies to: All products
Requires user role: ADMIN, USER

This setting controls how the device discovers whether it should request an internal or external configuration from the provisioning server.

**USAGE:**

```
xConfiguration Provisioning Connectivity: Connectivity
```

where
- **Connectivity**: Internal/External/Auto
  - **Internal**: Request internal configuration.
  - **External**: Request external configuration.
  - **Auto**: Automatically discover using NAPTR queries whether internal or external configurations should be requested. If the NAPTR responses have the "e" flag, external configurations will be requested. Otherwise internal configurations will be requested.
  - Default value: 
  - **Auto**
**xConfiguration Provisioning ExternalManager Address**

**Applies to:** All products  
**Requires user role:** ADMIN, USER

Define the IP Address or DNS name of the external manager / provisioning system.

If an External Manager Address (and Path) is configured, the system will send a message to this address when starting up. When receiving this message the external manager / provisioning system can return configurations/commands to the unit as a result.

When using CUCM or TMS provisioning, the DHCP server can be set up to provide the external manager address automatically (DHCP Option 242 for TMS, and DHCP Option 150 for CUCM). An address set in the Provisioning ExternalManager Address setting will override the address provided by DHCP.

**USAGE:**

```
xConfiguration Provisioning ExternalManager Address: "Address"
```

where

- **Address**:
  - String (0, 64)
  - A valid IPv4 address, IPv6 address or DNS name.
  - Default value:"

**xConfiguration Provisioning ExternalManager AlternateAddress**

**Applies to:** All products  
**Requires user role:** ADMIN, USER

Only applicable when the endpoint is provisioned by Cisco Unified Communication Manager (CUCM) and an alternate CUCM is available for redundancy. Define the address of the alternate CUCM. If the main CUCM is not available, the endpoint will be provisioned by the alternate CUCM. When the main CUCM is available again, the endpoint will be provisioned by this CUCM.

**USAGE:**

```
xConfiguration Provisioning ExternalManager AlternateAddress: "AlternateAddress"
```

where

- **AlternateAddress**:
  - String (0, 64)
  - A valid IPv4 address, IPv6 address or DNS name.
  - Default value:"

**xConfiguration Provisioning ExternalManager Protocol**

**Applies to:** All products  
**Requires user role:** ADMIN, USER

Define whether to use the HTTP (unsecure communication) or HTTPS (secure communication) protocol when sending requests to the external manager / provisioning system.

The selected protocol must be enabled in the NetworkServices HTTP Mode setting.

**USAGE:**

```
xConfiguration Provisioning ExternalManager Protocol: Protocol
```

where

- **Protocol**:
  - HTTPS/HTTP
  - **HTTPS:** Send requests via HTTPS.  
  - **HTTP:** Send requests via HTTP.
  - Default value: HTTP
xConfiguration Provisioning ExternalManager Path

Applies to: All products
Requires user role: ADMIN, USER

Define the Path to the external manager / provisioning system. This setting is required when several management services reside on the same server, i.e. share the same External Manager address.

**USAGE:**
xConfiguration Provisioning ExternalManager Path: "Path"

where

Path:
String (0..255)
A valid path to the external manager or provisioning system.
Default value:
The

xConfiguration Provisioning ExternalManager Domain

Applies to: All products
Requires user role: ADMIN, USER

Define the SIP domain for the VCS provisioning server.

**USAGE:**
xConfiguration Provisioning ExternalManager Domain: "Domain"

where

Domain:
String (0, 64)
A valid domain name.
Default value:

xConfiguration Provisioning Mode

Applies to: All products
Requires user role: ADMIN, USER

It is possible to configure a video system using a provisioning system (external manager). This allows video conferencing network administrators to manage many video systems simultaneously. With this setting you choose which type of provisioning system to use. Provisioning can also be switched off. Contact your provisioning system provider/representative for more information.

**USAGE:**
xConfiguration Provisioning Mode: Mode

where

Mode:
Off/Auto/CUCM/Edge/Webex/TMS/VCS

Off: The video system is not configured by a provisioning system.
Auto: The provisioning server is automatically selected as set up in the DHCP server.
CUCM: Push configurations to the video system from CUCM (Cisco Unified Communications Manager).
Edge: Push configurations to the video system from CUCM (Cisco Unified Communications Manager). The system connects to CUCM via the Expressway infrastructure. In order to register over Expressway the encryption option key must be installed on the video system.
Webex: Push configurations to the video system from the Cisco Webex cloud service.
TMS: Push configurations to the video system from TMS (Cisco TelePresence Management System).
VCS: Push configurations to the video system from VCS (Cisco TelePresence Video Communication Server).
Default value:
Auto
xConfiguration Provisioning LoginName

Applies to: All products
Requires user role: ADMIN, USER

This is the username part of the credentials used to authenticate the video system with the provisioning server. This setting must be used when required by the provisioning server.

**USAGE:**

```
xConfiguration Provisioning LoginName: "LoginName"
```

where

```
LoginName:
  String (0, 80)
  A valid username.
  Default value: 
```

xConfiguration Provisioning Password

Applies to: All products
Requires user role: ADMIN, USER

This is the password part of the credentials used to authenticate the video system with the provisioning server. This setting must be used when required by the provisioning server.

**USAGE:**

```
xConfiguration Provisioning Password: "Password"
```

where

```
Password:
  String (0, 64)
  A valid password.
  Default value: 
```

Proximity configuration

xConfiguration Proximity Mode

Applies to: All products
Requires user role: ADMIN, USER

Determine whether the video system will emit ultrasound pairing messages or not. When the video system emits ultrasound, Proximity clients can detect that they are close to the video system. In order to use a client, at least one of the Proximity services must be enabled (refer to the Proximity Services settings). In general, Cisco recommends enabling all the Proximity services.

**USAGE:**

```
xConfiguration Proximity Mode: Mode
```

where

```
Mode:
  Off/On
  Off: The video system does not emit ultrasound, and Proximity services cannot be used.
  On: The video system emits ultrasound, and Proximity clients can detect that they are close to the video system. Enabled Proximity services can be used.
  Default value:
```

```
[ MX200G2/MX300G2 MX700/MX800/MX800D RoomKit RoomKitMini Room55 Room70/Room55D Room70G2 ]
```

```
[ DX70/DX80 SX10 SX20 SX80 CodecPlus CodecPro ]
```
xConfiguration Proximity Services CallControl

Applies to: All products
Requires user role: ADMIN, USER

Enable or disable basic call control features on Proximity clients. When this setting is enabled, you are able to control a call using a Proximity client (for example, dial, mute, adjust volume and hang up). This service is supported by mobile devices (iOS and Android). Proximity Mode must be On for this setting to take any effect.

USAGE:
xConfiguration Proximity Services CallControl: callcontrol

where

- callcontrol: Enabled/Disabled
  - Enabled: Call control from a Proximity client is enabled.
  - Disabled: Call control from a Proximity client is disabled.

Default value: Disabled

xConfiguration Proximity Services ContentShare FromClients

Applies to: All products
Requires user role: ADMIN, USER

Enable or disable content sharing from Proximity clients. When this setting is enabled, you can share content from a Proximity client wirelessly on the video system, e.g., share your laptop screen. This service is supported by laptops (OS X and Windows). Proximity Mode must be On for this setting to take any effect.

USAGE:
xConfiguration Proximity Services ContentShare FromClients: fromclients

where

- fromclients: Enabled/Disabled
  - Enabled: Content sharing from a Proximity client is enabled.
  - Disabled: Content sharing from a Proximity client is disabled.

Default value: Enabled

xConfiguration Proximity Services ContentShare ToClients

Applies to: All products
Requires user role: ADMIN, USER

Enable or disable content sharing to Proximity clients. When enabled, Proximity clients will receive the presentation from the video system. You can zoom in on details, view previous content and take snapshots. This service is supported by mobile devices (iOS and Android). Proximity Mode must be On for this setting to take any effect.

USAGE:
xConfiguration Proximity Services ContentShare ToClients: toclients

where

- toclients: Enabled/Disabled
  - Enabled: Content sharing to a Proximity client is enabled.
  - Disabled: Content sharing to a Proximity client is disabled.

Default value: Disabled
RoomAnalytics configuration

**xConfiguration RoomAnalytics AmbientNoiseEstimation Mode**

**Applies to:** RoomKit, RoomKitMini, CodecPlus, CodecPro, Room55, Room70/Room55D, Room70G2

**Requires user role:** ADMIN, INTEGRATOR, USER

The video system can estimate the stationary ambient noise level (background noise level) in the room. The result is reported in the RoomAnalytics AmbientNoise Level dBA status. The status is updated when a new ambient noise level is detected.

**USAGE:**

```
xConfiguration RoomAnalytics AmbientNoiseEstimation Mode: Mode
```

where

- **Mode:**
  - Off/On
  - **On:** The video system regularly estimates the stationary ambient noise level.
  - **Off:** The video system doesn’t estimate the stationary ambient noise level.

Default value: Off

**xConfiguration RoomAnalytics PeopleCountOutOfCall**

**Applies to:** SX80, RoomKit, RoomKitMini, CodecPlus, CodecPro, Room55, Room70/Room55D, Room70G2

**Requires user role:** ADMIN, INTEGRATOR, USER

By using face detection, the video system has the capability to find how many persons are in the room. By default, the system only counts people when in a call, or when displaying the self-view picture.

Codec Plus, Codec Pro, SX80: Applies only when the codec has a Cisco Quad Camera connected. MX700/MX800: Not applicable.

**USAGE:**

```
xConfiguration RoomAnalytics PeopleCountOutOfCall: PeopleCountOutOfCall
```

where

- **PeopleCountOutOfCall:**
  - Off/On
  - **Off:** The video system counts people only when the system is in a call, or when self-view is on.
  - **On:** The video system counts people as long as the video system is not in standby mode. This includes outside of call, even if self-view is off.

Default value: Off
xConfiguration RoomAnalytics PeoplePresenceDetector

**Applies to:** SX20, SX80, MX200G2/MX300G2, MX700/MX800/MX800D, RoomKit, RoomKitMini, CodecPlus, CodecPro, Room55, Room70/Room55D, Room70Q2

**Requires user role:** ADMIN, INTEGRATOR, USER

The video system has the capability to find whether or not people are present in the room, and report the result in the RoomAnalytics PeoplePresence status. This feature is based on ultrasound. It takes a minimum of 2 minutes to detect whether people are present or not in the room, and it may take up to 2 minutes for the status to change after the room becomes vacant.

**USAGE:**

xConfiguration RoomAnalytics PeoplePresenceDetector: **PeoplePresenceDetector**

where

- **PeoplePresenceDetector**:
  - Off/On
- **Off**: The video system's status does not show whether or not there are people present in the room.
- **On**: The video system's status shows whether or not there are people present in the room.

**Default value:** Off

---

SerialPort configuration

xConfiguration SerialPort Mode

**Applies to:** All products

**Requires user role:** ADMIN, INTEGRATOR

Enable/disable the serial port.

**USAGE:**

xConfiguration SerialPort Mode: **Mode**

where

- **Mode**:
  - Off/On
- **Off**: Disable the serial port.
- **On**: Enable the serial port.

**Default value:** On
xConfiguration SerialPort BaudRate

**Applies to:** SX20 SX80 MX700/MX800/MX800D RoomKit RoomKitMini CodecPlus CodecPro Room55 Room70/Room55D Room70G2

**Requires user role:** ADMIN, INTEGRATOR

Set the baud rate (data transmission rate, bits per second) for the serial port.

Other connection parameters for the serial port are: Data bits: 8; Parity: None; Stop bits: 1; Flow control: None.

**Usage:**

```
xConfiguration SerialPort BaudRate: BaudRate
```

where

```
BaudRate: 115200 [RoomKit RoomKitMini CodecPlus CodecPro Room55 Room70/Room55D Room70G2]
```

```
9600/19200/38400/57600/115200 [SX20 SX80 MX700/MX800/MX800D]
```

Choose a baud rate from the baud rates listed (bps).

Default value:

```
115200 [RoomKit RoomKitMini CodecPlus CodecPro Room55 Room70/Room55D Room70G2]
```

```
38400 [SX20]
```

---

xConfiguration SerialPort LoginRequired

**Applies to:** DX70/DX80 SX10 SX20 SX80 MX200G2/MX300G2 MX700/MX800/MX800D RoomKit RoomKitMini CodecPlus Room55 Room70/Room55D

**Requires user role:** ADMIN

Define if login shall be required when connecting to the serial port.

**Usage:**

```
xConfiguration SerialPort LoginRequired: LoginRequired
```

where

```
LoginRequired: Off/On
```

**Off:** The user can access the codec via the serial port without any login.

**On:** Login is required when connecting to the codec via the serial port.

Default value:

```
On
```
SIP configuration

xConfiguration SIP ANAT
Applies to: All products
Requires user role: ADMIN

ANAT (Alternative Network Address Types) enables media negotiation for multiple addresses and address types, as specified in RFC 4091.

**USAGE:**

```
xConfiguration SIP ANAT: ANAT
where
  ANAT:
    Off/On
    Off: Disable ANAT.
    On: Enable ANAT.
    Default value: Off
```

xConfiguration SIP Authentication UserName
Applies to: All products
Requires user role: ADMIN

This is the user name part of the credentials used to authenticate towards the SIP proxy.

**USAGE:**

```
xConfiguration SIP Authentication UserName: "UserName"
where
  UserName:
    String (0, 128)
    A valid username.
    Default value: ""
```

xConfiguration SIP Authentication Password
Applies to: All products
Requires user role: ADMIN

This is the password part of the credentials used to authenticate towards the SIP proxy.

**USAGE:**

```
xConfiguration SIP Authentication Password: "Password"
where
  Password:
    String (0, 128)
    A valid password.
    Default value: ""
```

xConfiguration SIP DefaultTransport
Applies to: All products
Requires user role: ADMIN

Select the transport protocol to be used over the LAN.

**USAGE:**

```
xConfiguration SIP DefaultTransport: DefaultTransport
where
  DefaultTransport:
    Auto/TCP/Tls/UDP
    TCP: The system will always use TCP as the default transport method.
    UDP: The system will always use UDP as the default transport method.
    Tls: The system will always use TLS as the default transport method. For TLS connections a SIP CA-list can be uploaded to the video system. If no such CA-list is available on the system then anonymous Diffie Hellman will be used.
    Auto: The system will try to connect using transport protocols in the following order: TLS, TCP, UDP.
    Default value: Auto
```

**xConfiguration SIP DisplayName**

*Applies to: All products*

*Requires user role: ADMIN*

When configured the incoming call will report the display name instead of the SIP URI.

**USAGE:**

```
xConfiguration SIP DisplayName: "DisplayName"
```

where

```
DisplayName: String (0, 550)
```

The name to be displayed instead of the SIP URI.

```
Default value:"
```

---

**xConfiguration SIP Ice DefaultCandidate**

*Applies to: All products*

*Requires user role: ADMIN*

The ICE protocol needs some time to reach a conclusion about which media route to use (up to the first 5 seconds of a call). During this period media for the video system will be sent to the Default Candidate as defined in this setting.

**USAGE:**

```
xConfiguration SIP Ice DefaultCandidate: DefaultCandidate
```

where

```
DefaultCandidate: Host/Rflx/Relay
```

```
Host: Send media to the video system's private IP address.
```

```
Rflx: Send media to the video system's public IP address, as seen by the TURN server.
```

```
Relay: Send media to the IP address and port allocated on the TURN server.
```

```
Default value:"
```

---

**xConfiguration SIP Ice Mode**

*Applies to: All products*

*Requires user role: ADMIN*

ICE (Interactive Connectivity Establishment, RFC 5245) is a NAT traversal solution that the video systems can use to discover the optimized media path. Thus the shortest route for audio and video is always secured between the video systems.

**USAGE:**

```
xConfiguration SIP Ice Mode: Mode
```

where

```
Mode: Auto/Off/On
```

```
Auto: ICE is enabled if a TURN server is provided, otherwise ICE is disabled.
```

```
Off: ICE is disabled.
```

```
On: ICE is enabled.
```

```
Default value:"
```

---

**xConfiguration SIP ListenPort**

*Applies to: All products*

*Requires user role: ADMIN*

Turn on or off the listening for incoming connections on the SIP TCP/UDP ports. If turned off, the endpoint will only be reachable through the SIP registrar (CUCM or VCS). As a security measure, SIP ListenPort should be Off when the endpoint is registered to a SIP Proxy.

**USAGE:**

```
xConfiguration SIP ListenPort: ListenPort
```

where

```
ListenPort: Off/On
```

```
Off: Listening for incoming connections on the SIP TCP/UDP ports is turned off.
```

```
On: Listening for incoming connections on the SIP TCP/UDP ports is turned on.
```

```
Default value:"
```

---
xConfiguration SIP Proxy [n] Address
Applies to: All products
Requires user role: ADMIN

The Proxy Address is the manually configured address for the outbound proxy. It is possible to use a fully qualified domain name, or an IP address. The default port is 5060 for TCP and UDP but another one can be provided.

USAGE:

\[
xConfiguration SIP Proxy \ [n]\ Address: \ "Address"\\
\]
where

\[n\]: Index that identifies the proxy (maximum 4 proxys can be defined).
Range: 1..4

\[Address\]:
\[String (0..255)\]
A valid IPv4 address, IPv6 address or DNS name.
Default value:
""

xConfiguration SIP Turn Server
Applies to: All products
Requires user role: ADMIN

Define the address of the TURN (Traversal Using Relay NAT) server. It is used as a media relay fallback and it is also used to discover the endpoint's own public IP address.

USAGE:

\[
xConfiguration SIP Turn Server: \ "Server"\\
\]
where

\[Server\]:
\[String (0..255)\]
The preferred format is DNS SRV record (e.g. _turn._udp.<domain>), or it can be a valid IPv4 or IPv6 address.
Default value:
""

xConfiguration SIP Turn UserName
Applies to: All products
Requires user role: ADMIN

Define the user name needed for accessing the TURN server.

USAGE:

\[
xConfiguration SIP Turn UserName: \ "UserName"\\
\]
where

\[UserName\]:
\[String (0, 128)\]
A valid user name.
Default value:
""

xConfiguration SIP Turn Password
Applies to: All products
Requires user role: ADMIN

Define the password needed for accessing the TURN server.

USAGE:

\[
xConfiguration SIP Turn Password: \ "Password"\\
\]
where

\[Password\]:
\[String (0, 128)\]
A valid password.
Default value:
""
xConfiguration SIP URI

Applies to: All products
Requires user role: ADMIN

The SIP URI (Uniform Resource Identifier) is the address that is used to identify the video system. The URI is registered and used by the SIP services to route inbound calls to the system. The SIP URI syntax is defined in RFC 3261.

**USAGE:**
xConfiguration SIP URI: "URI"
where

- **URI:**
  - String (0..255)
  - An address (URI) that is compliant with the SIP URI syntax.
  - Default value:"

Standby configuration

xConfiguration Standby BootAction

Applies to: SX10 SX20 SX80 MX200G2/MX300G2 MX700/MX800/MX800D RoomKit RoomKitMini CodecPlus CodecPro Room55 Room70/Room55D Room70G2
Requires user role: ADMIN, INTEGRATOR, USER

Define the camera position after a restart of the codec.

**USAGE:**
xConfiguration Standby BootAction: **BootAction**
where

- **BootAction:**
  - None/DefaultCameraPosition/RestoreCameraPosition
  - None: No action.
  - RestoreCameraPosition: When the video system restarts, the camera returns to the position that it had before the restart.
  - DefaultCameraPosition: When the video system restarts, the camera moves to the factory default position.
  - Default value: DefaultCameraPosition [ SX80 MX200G2/MX300G2 MX700/MX800/MX800D RoomKit RoomKitMini CodecPlus CodecPro Room55 Room70/Room55D Room70G2 ]
  - RestoreCameraPosition [ SX10 SX20 ]
xConfiguration Standby Control
Applies to: All products
Requires user role: ADMIN, INTEGRATOR
Define whether the system should go into standby mode or not.

USAGE:
xConfiguration Standby Control: Control
where
Control:
  Off/On
  Off: The system will not enter standby mode.
  On: The system will enter standby mode when the Standby Delay has timed out. Requires the Standby Delay to be set to an appropriate value.
Default value:
  On

xConfiguration Standby Delay
Applies to: All products
Requires user role: ADMIN, INTEGRATOR
Define how long (in minutes) the system shall be in idle mode before it goes into standby mode. Requires the Standby Control to be enabled.

USAGE:
xConfiguration Standby Delay: Delay
where
Delay:
  Integer (1..480)
  Set the standby delay (minutes).
Default value:
  10

xConfiguration Standby StandbyAction
Applies to: SX10 SX20 SX80 MX200G2/MX300G2 MX700/MX800/MX800D RoomKit RoomKitMini CodecPlus CodecPro Room55 Room70/Room55D Room70G2
Requires user role: ADMIN, INTEGRATOR
Define the camera position when going into standby mode.

USAGE:
xConfiguration Standby StandbyAction: StandbyAction
where
StandbyAction:
  None/PrivacyPosition
  None: No action.
  PrivacyPosition: When the video system enters standby, the camera turns to a sideways position for privacy.
Default value:
  PrivacyPosition

xConfiguration Standby WakeupAction
Applies to: SX10 SX20 SX80 MX200G2/MX300G2 MX700/MX800/MX800D RoomKit RoomKitMini CodecPlus CodecPro Room55 Room70/Room55D Room70G2
Requires user role: ADMIN, INTEGRATOR, USER
Define the camera position when leaving standby mode.

USAGE:
xConfiguration Standby WakeupAction: WakeupAction
where
WakeupAction:
  None/RestoreCameraPosition/DefaultCameraPosition
  None: No action.
  RestoreCameraPosition: When the video system leaves standby, the camera returns to the position that it had before entering standby.
  DefaultCameraPosition: When the video system leaves standby, the camera moves to the factory default position.
Default value:
  RestoreCameraPosition
xConfiguration Standby WakeupOnMotionDetection

Applies to: All products
Requires user role: ADMIN, INTEGRATOR

Automatic wake up on motion detection is a feature that will sense when a person walks into the room. The feature is based on ultrasound detection.

**USAGE:**
xConfiguration Standby WakeupOnMotionDetection: **WakeupOnMotionDetection**
where

- **WakeupOnMotionDetection:**
  - **Off/On**
  - **Off:** The wake up on motion detection is disabled.
  - **On:** When people walk into the room the system will automatically wake up from standby. Not applicable for DX70 and SX10.

Default value:
- **On** [ MX200G2/MX300G2 MX700/MX800/MX800D RoomKit RoomKitMini Room55 Room70/Room55D Room70G2 ]
- **Off** [ DX70/DX80 SX10 SX20 SX80 CodecPlus CodecPro ]

---

xConfiguration Standby PowerSave

Applies to: MX700/MX800/MX800D
Requires user role: ADMIN

You can reduce the video system's power consumption during out-of-office hours with this setting. The Power Save mode is an extension to the regular standby mode.

When the video system enters power save mode, power is cut to some of the video system's modules, for example the integrated cameras. The codec and Touch controller behaves like in regular standby. The video system wakes up from power save mode when you tap the touch panel.

Waking up the video system from power save mode takes longer than waking it up from regular standby, because the cameras must boot. You can make calls right away, but there is no outgoing video until the cameras has completed their boot process.

**USAGE:**
xConfiguration Standby PowerSave: **PowerSave**
where

- **PowerSave:**
  - **Never/OutsideOfficeHours**
  - **Never:** The video system will never go into power save mode; only to regular standby.
  - **OutsideOfficeHours:** The video system will go into power save mode during out-of-office hours. You must provide the office hours with the following settings: Time WorkWeek FirstDayOfWeek, Time WorkWeek LastDayOfWeek, Time WorkDay Start, and Time WorkDay End.

Default value:
- **Never**
SystemUnit configuration

xConfiguration SystemUnit Name

Applies to: All products
Requires user role: ADMIN

Define the system name. The system name will be sent as the hostname in a DHCP request and when the codec is acting as an SNMP Agent.

USAGE:

xConfiguration SystemUnit Name: "Name"

where

Name: String (0, 50)
Define the system name.
Default value: ""

xConfiguration SystemUnit CrashReporting Mode

Applies to: All products
Requires user role: ADMIN

If the video system (codec) crashes, the system can automatically send logs to the Cisco Automatic Crash Report tool (ACR) for analyses. The ACR tool is for Cisco internal usage only and not available to customers.

USAGE:

xConfiguration SystemUnit CrashReporting Mode: Mode

where

Mode:

Off/On
Off: No logs will be sent to ACR tool.
On: The logs will automatically be sent to ACR tool.
Default value:

Off [ DX70/DX80 SX10 SX20 SX80 MX200G2/MX300G2 MX700/MX800/MX800D ]
On [ RoomKit RoomKitMini CodecPlus CodecPro Room55 Room70/Room55D Room70G2 ]

xConfiguration SystemUnit CrashReporting Url

Applies to: All products
Requires user role: ADMIN

If the video system (codec) crashes, the system can automatically send logs to the Cisco Automatic Crash Report tool (ACR) for analyses. The ACR tool is for Cisco internal usage only and not available to customers.

USAGE:

xConfiguration SystemUnit CrashReporting Url: "Url"

where

Url:

String (0..255)
The URL to the Cisco Automatic Crash Report tool (ACR).
Default value:

** [ DX70/DX80 SX10 SX20 SX80 MX200G2/MX300G2 MX700/MX800/MX800D ]
*acr.cisco.com* [ RoomKit RoomKitMini CodecPlus CodecPro Room55 Room70/Room55D Room70G2 ]
Time configuration

xConfiguration Time TimeFormat

Applies to: All products
Requires user role: ADMIN, USER

Define the time format.

USAGE:
xConfiguration Time TimeFormat: TimeFormat
where
TimeFormat:
24H/12H
24H: Set the time format to 24 hours.
12H: Set the time format to 12 hours (AM/PM).
Default value: 24H

xConfiguration Time DateFormat

Applies to: All products
Requires user role: ADMIN, USER

Define the date format.

USAGE:
xConfiguration Time DateFormat: DateFormat
where
DateFormat:
DD_MM_YY/MM_DD_YY/YY_MM_DD
DD_MM_YY: The date January 30th 2010 will be displayed: 30.01.10
MM_DD_YY: The date January 30th 2010 will be displayed: 01.30.10
YY_MM_DD: The date January 30th 2010 will be displayed: 10.01.30
Default value: DD_MM_YY

xConfiguration Time Zone

Applies to: All products
Requires user role: ADMIN, INTEGRATOR, USER

Define the time zone for the geographical location of the video system. The information in the value space is from the tz database, also called the IANA Time Zone Database.

USAGE:
xConfiguration Time Zone: Zone
where
Zone:
xConfiguration Time WorkDay Start

Applies to: MX700/MX800/MX800D
Requires user role: ADMIN, USER

The Time WorkWeek FirstDayOfWeek, Time WorkWeek LastDayOfWeek, Time WorkDay Start, and Time WorkDay End settings are available so that you can specify when the regular working hours are, and thereby also find the out-of-office hours. Knowing the out-of-office hours is required if you want to use the power save mode, which is set up using the Standby PowerSave setting.

**USAGE:**

xConfiguration Time WorkDay Start: "Start"
where
  Start:
    String (5, 5)
    The working day start time, using the 24-hour clock.
    Default value: "07:00"

xConfiguration Time WorkDay End

Applies to: MX700/MX800/MX800D
Requires user role: ADMIN, USER

The Time WorkWeek FirstDayOfWeek, Time WorkWeek LastDayOfWeek, Time WorkDay Start, and Time WorkDay End settings are available so that you can specify when the regular working hours are, and thereby also find the out-of-office hours. Knowing the out-of-office hours is required if you want to use the power save mode, which is set up using the Standby PowerSave setting.

**USAGE:**

xConfiguration Time WorkDay End: "End"
where
  End:
    String (5, 5)
    The working day end time, using the 24-hour clock.
    Default value: "18:00"

xConfiguration Time WorkWeek FirstDayOfWeek

Applies to: MX700/MX800/MX800D
Requires user role: ADMIN, USER

The Time WorkWeek FirstDayOfWeek, Time WorkWeek LastDayOfWeek, Time WorkDay Start, and Time WorkDay End settings are available so that you can specify when the regular working hours are, and thereby also find the out-of-office hours. Knowing the out-of-office hours is required if you want to use the power save mode, which is set up using the Standby PowerSave setting.

**USAGE:**

xConfiguration Time WorkWeek FirstDayOfWeek: FirstDayOfWeek
where
  FirstDayOfWeek:
    Monday/Tuesday/Wednesday/Thursday/Friday/Saturday/Sunday
    The first day of the working week.
    Default value: Monday

xConfiguration Time WorkWeek LastDayOfWeek

Applies to: MX700/MX800/MX800D
Requires user role: ADMIN, USER

The Time WorkWeek FirstDayOfWeek, Time WorkWeek LastDayOfWeek, Time WorkDay Start, and Time WorkDay End settings are available so that you can specify when the regular working hours are, and thereby also find the out-of-office hours. Knowing the out-of-office hours is required if you want to use the power save mode, which is set up using the Standby PowerSave setting.

**USAGE:**

xConfiguration Time WorkWeek LastDayOfWeek: LastDayOfWeek
where
  LastDayOfWeek:
    Monday/Tuesday/Wednesday/Thursday/Friday/Saturday/Sunday
    The last day of the working week.
    Default value: Friday
UserInterface configuration

xConfiguration UserInterface Accessibility IncomingCallNotification

Applies to: All products
Requires user role: ADMIN, INTEGRATOR, USER

You can enable an incoming call notification with amplified visuals. The screen and Touch 10 will flash red/white approximately once every second (1.75 Hz) to make it easier for hearing impaired users to notice an incoming call. If the system is already in a call the screen will not flash as this will disturb the on-going call, instead you will get a normal notification on screen and touch panel.

USAGE:

xConfiguration UserInterface Accessibility IncomingCallNotification: IncomingCallNotification

where

IncomingCallNotification:

AmplifiedVisuals/Default

AmplifiedVisuals: Enable the amplified visuals on screen and touch panel when the video system receives a call.
Default: Enable the default behavior with a notification on screen and touch panel.
Default value:

Default

xConfiguration UserInterface Branding AwakeBranding Colors

Applies to: All products
Requires user role: ADMIN, INTEGRATOR

If the video system is set up with branding customizations, this setting affects the colors of the logo that is shown when the video system is awake. You can choose whether you want to show the logo in full color, or reduce the opacity of the logo so that it blends in more naturally with the background and other elements on the screen.

USAGE:

xConfiguration UserInterface Branding AwakeBranding Colors: Colors

where

Colors:

Auto/Native

Auto: The opacity of the logo is reduced.
Native: The logo has full colors.
Default value:

Auto
xConfiguration UserInterface ContactInfo Type
Applies to: All products
Requires user role: ADMIN
Choose which type of contact information to show in the user interface.

**USAGE:**
`xConfiguration UserInterface ContactInfo Type: Type`
where
- **Type:**
  - *Auto:* Show the address which another system should dial to reach this video system. The address depends on the default call protocol and system registration.
  - *None:* Do not show any contact information.
  - *IPv4:* Show the system's IPv4 address.
  - *IPv6:* Show the system's IPv6 address.
  - *H323Id:* Show the system's H.323 ID (refer to the H323 H323Alias ID setting).
  - *H320Number:* Show the system's H.320 number as contact information (only supported if used with Cisco TelePresence ISDN Link).
  - *E164Alias:* Show the system's H.323 E164 Alias as contact information (refer to the H323 H323Alias E164 setting).
  - *SipUri:* Show the system's SIP URI (refer to the SIP URI setting).
  - *SystemName:* Show the system's name (refer to the SystemUnit Name setting).
  - *DisplayName:* Show the system's display name (refer to the SIP DisplayName setting).

Default value:
- *Auto*

xConfiguration UserInterface CustomMessage
Applies to: All products
Requires user role: ADMIN, INTEGRATOR
A custom message can be displayed, in the lower left side of the screen, in awake mode.

**USAGE:**
`xConfiguration UserInterface CustomMessage: "CustomMessage"`
where
- **CustomMessage:** String (0, 128)
  - Add a custom message. Add an empty string to remove a custom message.
  - Default value:
    - *

xConfiguration UserInterface KeyTones Mode
Applies to: All products
Requires user role: ADMIN, USER
You can configure the system to make a keyboard click sound effect (key tone) when typing text or numbers in the user interface.

**USAGE:**
`xConfiguration UserInterface KeyTones Mode: Mode`
where
- **Mode:**
  - *Off/On*
  - *Off:* There is no key tone sound effect.
  - *On:* The key tone sound effect is turned on.

Default value:
- *Off [ DX70/DX80 ]*
- *On [ SX10 SX20 SX80 MX200G2/MX300G2 MX700/MX800/MX800D RoomKit RoomKitMini CodecPro CodecPlus Room55 Room70/Room55D Room70G2 ]*
xConfiguration UserInterface Features Call End

Applies to: All products
Requires user role: ADMIN, INTEGRATOR

Choose whether or not to remove the default End Call button from the user interface. The setting removes only the button, not its functionality as such.

**USAGE:**

xConfiguration UserInterface Features Call End: \texttt{End}

where

\texttt{End}: Auto/Hidden
- Auto: Shows the default button in the user interface.
- Hidden: Removes the default button from the user interface.

Default value:
- Auto

xConfiguration UserInterface Features Call MidCallControls

Applies to: All products
Requires user role: ADMIN, INTEGRATOR

Choose whether or not to remove the default Hold, Transfer, and Resume in-call buttons from the user interface. The setting removes only the buttons, not their functionality as such.

**USAGE:**

xConfiguration UserInterface Features Call MidCallControls: \texttt{MidCallControls}

where

\texttt{MidCallControls}: Auto/Hidden
- Auto: Shows the default buttons in the user interface.
- Hidden: Removes the default buttons from the user interface.

Default value:
- Auto

xConfiguration UserInterface Features Call VideoMute

Applies to: SX10 SX20 SX80 MX200G2/MX300G2 MX700/MX800/MX800D RoomKit RoomKitMini CodecPlus CodecPro Room55 Room70/Room55D Room70G2
Requires user role: ADMIN, INTEGRATOR

Choose whether or not to show the default "Turn video off" button in the user interface.

**USAGE:**

xConfiguration UserInterface Features Call VideoMute: \texttt{VideoMute}

where

\texttt{VideoMute}: Auto/Hidden
- Auto: Shows the "Turn video off" button in the user interface if this feature is supported in the ongoing call.
- Hidden: The "Turn video off" button is never shown in the user interface.

Default value:
- Auto
xConfiguration UserInterface Features HideAll

Applies to: All products
Requires user role: ADMIN, INTEGRATOR

Choose whether or not to remove all default buttons from the user interface. The setting removes only the buttons, not their functionality as such.

USAGE:
xConfiguration UserInterface Features HideAll: HideAll

where

HideAll:
False/True
False: Shows all default buttons in the user interface.
True: Removes all default buttons from the user interface.
Default value:
False

xConfiguration UserInterface Features Share Start

Applies to: All products
Requires user role: ADMIN, INTEGRATOR

Choose whether or not to remove the default buttons and other UI elements for sharing and previewing content, both in call and out of call, from the user interface. The setting removes only the buttons and UI elements, not their functionality as such. You can share content using Proximity or the Cisco Webex Teams app still.

USAGE:
xConfiguration UserInterface Features Share Start: Start

where

Start:
Auto/Hidden
Auto: Shows the default buttons and UI elements in the user interface.
Hidden: Removes the default buttons and UI elements from the user interface.
Default value:
Auto

xConfiguration UserInterface Features Whiteboard Start

Applies to: DX70/DX80
Requires user role: ADMIN, INTEGRATOR

Choose whether or not to remove the default Whiteboard button from the user interface. The setting removes only the button, not its functionality as such. This setting only applies to Cisco Webex registered devices.

USAGE:
xConfiguration UserInterface Features Whiteboard Start: Start

where

Start:
Auto/Hidden
Auto: Shows the default button in the user interface.
Hidden: Removes the default button from the user interface.
Default value:
Auto

xConfiguration UserInterface Language

Applies to: All products
Requires user role: ADMIN, USER

Select the language to be used in the user interface. If the language is not supported, the default language (English) will be used.

USAGE:
xConfiguration UserInterface Language: Language

where

Language:
Arabic/Catalan/ChineseSimplified/ChineseTraditional/Czech/Danish/Dutch/English/EnglishUK/Finnish/French/FrenchCanadian/German/Hebrew/Hungarian/Italian/Japanese/Korean/Norwegian/Polish/Portuguese/PortugueseBrazilian/Russian/Spanish/SpanishLatin/Swedish/Turkish
Select a language from the list.
Default value:
English
xConfiguration UserInterface OSD HalfwakeMessage

Applies to: All products
Requires user role: ADMIN

A custom message can be displayed in the middle of the main screen when the system is in the half wake state. The custom message will replace the default message, which gives instructions how to start using the video system. You can also delete the default message, without adding a custom message.

USAGE:
xConfiguration UserInterface OSD HalfwakeMessage: "HalfwakeMessage"

where

HalfwakeMessage:
String (0, 128)
The custom message. An empty string: Restore the default message. A space only: There will be no message at all.

Default value: ""

xConfiguration UserInterface OSD Output

Applies to: All products
Requires user role: ADMIN, INTEGRATOR

Define on which monitor on-screen information and indicators (OSD) should be displayed. If the video system is controlled with a remote control also the on-screen menus appear on this monitor.

USAGE:
xConfiguration UserInterface OSD Output: Output
where

Output:
xConfiguration UserInterface OSD Output: Output
where

Output: 1 [ SX10 Room55 ]
Auto/1/2 [ SX20 MX200G2/MX300G2 RoomKit CodecPlus Room70/Room55D ]
Auto/1/2/3 [ SX80 MX700/MX800/MX800D CodecPro Room70G2 ]
Auto [ DX70/DX80 RoomKitMini ]

Auto: For systems with integrated screen, the on-screen information and indicators are sent to the integrated screen. If the system has two integrated screens, the left monitor is used.

For systems without integrated screens, the system detects when a monitor is connected to a video output, and sends the on-screen information and indicators to the first monitor you connect. If you have a multi-monitor setup, and all monitors are connected before switching on the system, the on-screen information and indicators are sent to the video output with the lowest number, starting with Output Connector 1 (HDMI 1).

1..n: The system sends the on-screen information and indicators to the specified output. Choose n to send the on-screen information and indicators to the system's Output Connector n.

For systems with integrated screens, the lowest numbers refer to the integrated screens.

Default value:

1 [ SX10 MX700/MX800/MX800D CodecPro Room55 Room70G2 ]
Auto [ DX70/DX80 SX20 SX80 MX200G2/MX300G2 RoomKit RoomKitMini CodecPlus Room70/Room55D ]
xConfiguration UserInterface Phonebook Mode

Applies to: All products
Requires user role: ADMIN, INTEGRATOR

This setting determines if a user is allowed to add or change a contact in the Directory and Favorites list from the user interface of the video system.

**USAGE:**
xConfiguration UserInterface Phonebook Mode: Mode

where

 Mode:

**ReadOnly/ReadWrite**

**ReadOnly:** You neither can add a contact to the Favorites list, edit a contact in the Favorites list, nor edit any contact from the Directory or Favorites list before calling.

**ReadWrite:** You are able to add a contact to the Favorites list, edit a contact in the Favorites list, and edit a contact from the Directory or Favorites list before calling.

Default value:

**ReadWrite**

xConfiguration UserInterface Security Mode

Applies to: All products
Requires user role: ADMIN

This setting allows you to prevent important system information from being exposed in the user interface (drop down menu and Settings panel), for example the contact information and IP addresses of the video system, touch controller, and UCM/VCS registrars. It is important to note that such information is not hidden when navigating further into the Settings panel.

If you want to fully prevent that people without administrator rights can see the contact information, IP addresses, MAC address, serial number, and software version, you must also set the UserInterface SettingsMenu Mode to Locked, and of course have a passphrase for all user accounts with administrator rights.

**USAGE:**
xConfiguration UserInterface Security Mode: Mode

where

 Mode:

**Normal/Strong**

**Normal:** IP addresses and other system information are shown on the user interface.

**Strong:** Contact information and IP addresses are not displayed on the user interface (drop down menu and Settings panel).

Default value:

**Normal**
xConfiguration UserInterface SettingsMenu Mode

Applies to: All products
Requires user role: ADMIN

The Settings panel in the user interface (Touch 10 or on-screen) can be protected by the video system's admin password. If this password is blank, anyone can access the settings in the Settings panel, and for example factory reset the system. If authentication is enabled, all settings that require authentication have a padlock icon. You will be prompted to enter the administrator's user name and passphrase when you select the setting. Some settings do not require authentication, they do not have a padlock icon.

**USAGE:**

xConfiguration UserInterface SettingsMenu Mode: Mode

where

Mode:

Locked/Unlocked

Locked: Authentication with administrator's username and passphrase is required.

Unlocked: No authentication is required.

Default value: Unlocked

xConfiguration UserInterface SettingsMenu Visibility

Applies to: All products
Requires user role: ADMIN

Choose whether or not to show the system name (or contact information) in the upper left corner of the user interface, and the associated drop down menu and Settings panel.

**USAGE:**

xConfiguration UserInterface SettingsMenu Visibility: Visibility

where

Visibility:

Auto/Hidden

Auto: Shows the system name with drop down menu and Settings panel in the upper left corner of the user interface.

Hidden: Doesn't show the system name with drop down menu and Settings panel in the upper left corner of the user interface.

Default value:

Auto

xConfiguration UserInterface UsbPromotion

Applies to: RoomKitMini
Requires user role: ADMIN

Choose whether or not to show on the halfwake screen, a text that informs you that you can use the video system as a USB camera.

**USAGE:**

xConfiguration UserInterface UsbPromotion: UsbPromotion

where

UsbPromotion:

Off/On

Off: The USB camera information text is not shown.

On: The USB camera information text is shown.

Default value:

Off
xConfiguration UserInterface WebcamOnlyMode

Applies to: RoomKitMini

Requires user role: ADMIN

This video system can be used as a web camera, and as a normal video system. It can be used as a web camera even if it is not registered to any on-premise or cloud call service (such as CUCM, VCS, and Webex).

This setting determines if the user interface shall be adapted to a web camera only scenario when the video system is not registered.

**USAGE:**

```plaintext
xConfiguration UserInterface WebcamOnlyMode: WebcamOnlyMode
```

where

- **WebcamOnlyMode:**
  - **Auto/Off**
    - **Auto:** If the video system is registered to a call service, the full user interface will be shown. If the video system is not registered, and therefore cannot be used for calling, irrelevant user interface elements are removed.
    - **Off:** The system will always show the full user interface.

Default value:
- **Auto**

UserManagement configuration

xConfiguration UserManagement LDAP Admin Filter

Applies to: All products

Requires user role: ADMIN

The LDAP filter is used to determine which users should be granted administrator privileges.

You always have to set either an LDAP Admin Group or an LDAP Admin Filter. An LDAP Admin Filter takes precedence, so if the UserManagement LDAP Admin Filter is set, the UserManagement LDAP Admin Group setting is ignored.

**USAGE:**

```plaintext
xConfiguration UserManagement LDAP Admin Filter: "Filter"
```

where

- **Filter:**
  - **String (0, 1024)**

Refer to the LDAP specification for the syntax of this string. Example:

```
(!(memberof=CN=admin group, OU=company groups, DC=company, DC=com)
(sAMAccountName=username))
```

Default value:
- **"\"**
xConfiguration UserManagement LDAP Admin Group

Applies to: All products
Requires user role: ADMIN

Members of this AD (Active Directory) group will be given administrator access. This setting is a shorthand for saying (memberOf:1.2.840.113556.1.4.1941:=<group name>). You always have to set either an LDAP Admin Group or an LDAP Admin Filter. An LDAP Admin Filter takes precedence, so if the UserManagement LDAP Admin Filter is set, the UserManagement LDAP Admin Group setting is ignored.

Usage:

```xConfiguration UserManagement LDAP Admin Group: "Group"
where
  Group:
    String (0..255)
    The distinguished name of the AD group. Example: "CN=admin group, OU=company groups, DC=company, DC=com"
    Default value: **
```

xConfiguration UserManagement LDAP BaseDN

Applies to: All products
Requires user role: ADMIN

The distinguishing name of the entry at which to start a search (base).

Usage:

```xConfiguration UserManagement LDAP BaseDN: "BaseDN"
where
  BaseDN:
    String (0..255)
    The distinguishing name of the base. Example: "DC=company, DC=com"
    Default value: **```

xConfiguration UserManagement LDAP Attribute

Applies to: All products
Requires user role: ADMIN

The attribute used to map to the provided username. If not set, sAMAccountName is used.

Usage:

```xConfiguration UserManagement LDAP Attribute: "Attribute"
where
  Attribute:
    String (0..255)
    The attribute name.
    Default value: **```

xConfiguration UserManagement LDAP Encryption

Applies to: All products
Requires user role: ADMIN

Define how to secure the communication between the video system and the LDAP server. You can override the port number by using the UserManagement LDAP Server Port setting.

Usage:

```xConfiguration UserManagement LDAP Encryption: Encryption
where
  Encryption:
    LDAPS/None/STARTTLS
    LDAPS: Connect to the LDAP server on port 636 over TLS (Transport Layer Security).
    None: Connect to LDAP server on port 389 with no encryption.
    STARTTLS: Connect to LDAP server on port 389, then send STARTTLS to enable TLS encryption.
    Default value: LDAPS
```

Copyright © 2019 Cisco Systems, Inc. All rights reserved.
xConfiguration UserManagement LDAP MinimumTLSVersion

Applies to: All products
Requires user role: ADMIN

Set the lowest version of the TLS (Transport Layer Security) protocol that is allowed.

**Usage:**

```markdown
xConfiguration UserManagement LDAP MinimumTLSVersion: MinimumTLSVersion
```

where

- **MinimumTLSVersion**: TLSv1.0/TLSv1.1/TLSv1.2
  - **TLSv1.0**: Support TLS version 1.0 or higher.
  - **TLSv1.1**: Support TLS version 1.1 or higher.
  - **TLSv1.2**: Support TLS version 1.2 or higher.

Default value: TLSv1.2

xConfiguration UserManagement LDAP Mode

Applies to: All products
Requires user role: ADMIN

The video system supports the use of an LDAP (Lightweight Directory Access Protocol) server as a central place to store and validate user names and passwords. Use this setting to configure whether or not to use LDAP authentication. Our implementation is tested for the Microsoft Active Directory (AD) service.

If you switch on LDAP Mode, make sure to configure the other UserManagement LDAP settings to suit your setup. Here is a few examples.

**Example 1:**
- UserManagement LDAP Mode: On
- UserManagement LDAP Address: "192.0.2.20"
- UserManagement LDAP BaseDN: "DC=company, DC=com"
- UserManagement LDAP Admin Group: "CN=admin group, OU=company groups, DC=company, DC=com"

**Example 2:**
- UserManagement LDAP Mode: On
- UserManagement LDAP Address: "192.0.2.20"
- UserManagement LDAP BaseDN: "DC=company, DC=com"
- UserManagement LDAP Admin Filter: "(&(memberof=CN=admin group, OU=company groups, DC=company, DC=com)(sAMAccountName=username))"

**Usage:**

```markdown
xConfiguration UserManagement LDAP Mode: Mode
```

where

- **Mode**: Off/On
  - **Off**: LDAP authentication is not allowed.
  - **On**: LDAP authentication is allowed.

Default value: Off
xConfiguration UserManagement LDAP Server Address

Applies to: All products
Requires user role: ADMIN

Set the IP address or hostname of the LDAP server.

**USAGE:**

```markdown
xConfiguration UserManagement LDAP Server Address: "Address"
```

- **Address:**
  - **String (0..255)**
  - A valid IPv4 address, IPv6 address or hostname.
  - Default value:
  - ""

xConfiguration UserManagement LDAP Server Port

Applies to: All products
Requires user role: ADMIN

Set the port to connect to the LDAP server on. If set to 0, use the default for the selected protocol (see the UserManagement LDAP Encryption setting).

**USAGE:**

```markdown
xConfiguration UserManagement LDAP Server Port: Port
```

- **Port:**
  - **Integer (0..65535)**
  - The LDAP server port number.
  - Default value:
  - 0

xConfiguration UserManagement LDAP VerifyServerCertificate

Applies to: All products
Requires user role: ADMIN

When the video system connects to an LDAP server, the server will identify itself to the video system by presenting its certificate. Use this setting to determine whether or not the video system will verify the server certificate.

**USAGE:**

```markdown
xConfiguration UserManagement LDAP VerifyServerCertificate: VerifyServerCertificate
```

- **VerifyServerCertificate:**
  - **Off/On**
  - **Off:** The video system will not verify the LDAP server’s certificate.
  - **On:** The video system must verify that the LDAP server’s certificate is signed by a trusted Certificate Authority (CA). The CA must be on the list of trusted CAs that are uploaded to the system in advance. Use the video system's web interface to manage the list of trusted CAs (see more details in the administrator guide).
  - Default value:
  - **On**
Video configuration

xConfiguration Video DefaultMainSource

**Applies to:** All products

**Requires user role:** ADMIN, USER

Define which video input source to be used as the default main video source when you start a call.

**USAGE:**

xConfiguration Video DefaultMainSource: `DefaultMainSource`

where

DefaultMainSource:

`1/2/3/4/5/6`  [CodecPro ]
`1/2/3/4`  [SX80 MX700/MX800/MX800D Room70G2 ]
`1/2`  [SX20 ]
`1`  [DX70/DX80 SX10 RoomKitMini ]

`1/2/3`  [MX200G2/MX300G2 RoomKit CodecPlus Room55 Room70/Room55D ]

The source that is used as the default main video source.

Default value:

`1`

xConfiguration Video Input Connector [n] CameraControl CameraId

**Applies to:** All products

**Requires user role:** ADMIN, INTEGRATOR

The camera ID is a unique identifier of the camera that is connected to this video input. For systems with more than one camera you can use the xStatus Camera API command to see the IDs of the different cameras.

**USAGE:**

xConfiguration Video Input Connector [n] CameraControl CameraId: `CameraId`

where

`n`: Unique ID that identifies the video input connector.

- Range: 1..6  [CodecPro Room70G2 ]
- Range: 1..3  [SX80 CodecPlus Room55 Room70/Room55D ]
- Range: 1..2  [DX70/DX80 SX20 RoomKit RoomKitMini ]
- Range: 1..5  [MX200G2/MX300G2 ]
- Range: 1..4  [MX700/MX800/MX800D ]

CameraId:

Connector n: 1/2/3/4/5/6/7  [CodecPlus CodecPro Room70/Room55D Room70G2 ]
Connector n: 1  [DX70/DX80 SX10 SX20 MX200G2/MX300G2 RoomKit RoomKitMini Room55 ]
Connector 1,2,3,4: 1/2/3/4/5/6/7   Connector 5: 1  [MX700/MX800/MX800D ]

For systems with more than one camera, select the ID of the camera. For systems with one camera the value is fixed and cannot be changed.

Default value:

Connector n: n  [CodecPlus CodecPro Room70/Room55D Room70G2 ]
Connector n: 1  [DX70/DX80 SX10 SX20 MX200G2/MX300G2 RoomKit RoomKitMini Room55 ]
Connector n: 1   Connector 5: 1  [MX700/MX800/MX800D ]
**xConfiguration Video Input Connector [n] CameraControl Mode**

**Applies to:** All products

**Requires user role:** ADMIN, INTEGRATOR

Define whether the camera on this video input connector can be controlled or not. Some connectors cannot be controlled (Off is the only available value).

**USAGE:**

xConfiguration Video Input Connector [n] CameraControl Mode: **Mode**

where

- **n** Unique ID that identifies the video input connector.
  - Range: 1..6 [CodecPro Room70G2]
  - Range: 1..3 [SX10 CodecPlus Room55 Room70/Room55D]
  - Range: 1..2 [DX70/DX80 SX20 RoomKit RoomKitMini]
  - Range: 1..5 [MX80 MX700/MX800/MX800D]
  - Range: 1..4 [MX200G2/MX300G2]

**Mode:**

- **Connector n:** Off/On
  - CodecPro Room70G2
  - CodecPlus Room55 Room70/Room55D
  - DX70/DX80 SX20 RoomKit RoomKitMini
  - MX80 MX700/MX800/MX800D
  - MX200G2/MX300G2

**Default value:**

- **Connector n:** On
  - CodecPlus Room70G2
  - CodecPlus Room70G2
  - CodecPlus Room70G2
  - CodecPlus Room70G2
  - CodecPlus Room70G2

**xConfiguration Video Input Connector [n] CEC Mode**

**Applies to:** RoomKit RoomKitMini CodecPlus CodecPro Room55 Room70/Room55D Room70G2

**Requires user role:** ADMIN, INTEGRATOR

The video input (HDMI) supports Consumer Electronics Control (CEC). When this setting is enabled, information about the connected device (for example device type and device name) is available in the video system status (Video Input Connector[n] ConnectedDevice CEC [n]), provided that the connected device also supports CEC.

If you have Cisco Quad Camera, do not switch off CEC on that connector because then there will be no sound on the speakers on the camera. CEC is required for HDMI ARC (Audio Return Channel), which is the channel used for sending audio from the codec to the camera.

**USAGE:**

xConfiguration Video Input Connector [n] CEC Mode: **Mode**

where

- **n** Unique ID that identifies the video input connector.
  - Range: 1..5 [CodecPro Room70G2]
  - Range: 1..3 [CodecPlus Room70/Room55D]
  - Range: 1..2 [Room55]
  - Range: 1..2 [RoomKit RoomKitMini]

**Mode:**

- **Connector n:** Off/On
  - CodecPro Room70G2
  - CodecPlus Room70/Room55D
  - Room55
  - RoomKit RoomKitMini

- **Other connectors:** Off/On
  - Room70/Room55D

**Default value:**

- **On**
xConfiguration Video Input Connector [n] DviType

Applies to: SX20 SX80 MX200G2/MX300G2 MX700/MX800/MX800D

Requires user role: ADMIN

The official DVI standard supports both digital and analog signals. In most cases the default AutoDetect setting can detect whether the signal is analog RGB or digital. However, in some rare cases when DVI-I cables are used (these cables can carry both the analog and digital signals) the auto detection fails. This setting makes it possible to override the AutoDetect and select the correct DVI video input.

**USAGE:**

xConfiguration Video Input Connector [n] DviType: DviType

where

- **n**: Unique ID that identifies the video input connector.
  - Range: 4..4 [SX80 MX700/MX800/MX800D]
  - Range: 2..2 [SX20 MX200G2/MX300G2]
- **DviType**: AutoDetect/Digital/AnalogRGB/AnalogYPbPr
  - **AutoDetect**: Set to AutoDetect to automatically detect if the signal is analog RGB or digital.
  - **Digital**: Set to Digital to force the DVI video input to Digital when using DVI-I cables with both analog and digital pins and AutoDetect fails.
  - **AnalogRGB**: Set to AnalogRGB to force the DVI video input to AnalogRGB when using DVI-I cables with both analog and digital pins and AutoDetect fails.
  - **AnalogYPbPr**: Set to AnalogYPbPr to force the DVI video input to AnalogYPbPr, as the component (YPbPr) signal cannot be auto detected.

Default value: AutoDetect

xConfiguration Video Input Connector [n] HDCP Mode

Applies to: CodecPlus CodecPro Room55 Room70/Room55D Room70G2

Requires user role: ADMIN, INTEGRATOR

One of the video system’s HDMI inputs can be configured to support HDCP protected content (High-bandwidth Digital Content Protection, version 1.4). This allows customers to re-purpose a video system’s screen by connecting devices such as a Google ChromeCast, an AppleTV, or an HDTV decoder. This type of content cannot be shared while in a call. When the input connector is configured to support HDCP, it is reserved for this type of content. This means that you can’t share any content from this specific connector while in a call, regardless of what is connected, nor can you take web snapshots of this source.

The screens, on which the protected content is displayed, must support HDCP. For Codec Plus, Room 70 (Single and Dual), and Room 55 Dual, the protected content is always displayed on the screen that is connected to output connector 1; for Codec Pro and Room 70 G2 (Single and Dual), it’s displayed on screens connected to output connector 1 and 2; and for Room 55, it’s displayed on the integrated screen. The integrated screens of all Room systems support HDCP.

Note: If you have connected an external screen to Room 55 (not Room 55 Dual), you cannot display HDCP content, not even on the integrated screen.

**USAGE:**

xConfiguration Video Input Connector [n] HDCP Mode: Mode

where

- **n**: Unique ID that identifies the video input connector.
  - Range: 1..3 [CodecPlus Room70/Room55D]
  - Range: 1..5 [CodecPro Room70G2]
  - Range: 2..3 [Room55]
- **Mode**: Connector 1,3: Off, Connector 2: Off/On
  - **Off**: Disable support for HDCP protected content on this video input connector.
  - **On**: Enable support for HDCP protected content this video input connector.

Default value: Off
xConfiguration Video Input Connector [n] InputSourceType

Applies to: All products
Requires user role: ADMIN, INTEGRATOR

Select which type of input source is connected to the video input.
If the video system has an integrated camera, Connector 1 refers to the integrated camera; if the video system has two integrated cameras (dual camera), Connector 1 and Connector 2 refers to the integrated cameras.

**USAGE:**
xConfiguration Video Input Connector [n] InputSourceType: 

where

- **n**: Unique ID that identifies the video input connector.
  - Range: 1..6
    - CodecPro Room70G2
    - Room70/Room55/Room55D
    - SX10 CodecPlus Room55
    - SX80 RoomKit Mini

- **InputSourceType**: 
  - Connector n: PC/camera/document_camera/mediaplayer/whiteboard/other
  - Camera: Use this when a camera is connected to the video input.
  - Document camera: Use this when a document camera is connected to the video input.
  - Mediaplayer: Use this when a media player is connected to the video input.
  - Whiteboard: Use this when a whiteboard camera is connected to the video input.
  - Other: Use this when the other options do not match.

- Default value:
  - Connector 1,2,6: camera
  - Connector 3,4: PC

- **Name**

Applies to: All products
Requires user role: ADMIN, INTEGRATOR

Define a name for the video input connector.

**USAGE:**
xConfiguration Video Input Connector [n] Name: 

where

- **n**: Unique ID that identifies the video input connector.
  - Range: 1..6
    - CodecPro Room70G2
    - Room70/Room55/Room55D
    - SX10 CodecPlus Room55
    - SX80 RoomKit Mini

- **Name**:
  - String (0, 50)

Name for the video input connector.

Default value:
- Connector 1: "Camera 1" Connector 2: "Camera 2" Connector 3: "PC 1 (HDMI)"
  - Connector 4: "PC 2 (HDMI)"  Connector 5: "PC 3 (HDMI)"  Connector 6: "Camera 3 (SDI)"
    - CodecPro Room70G2
- Connector 1: "Camera" Connector 2: "PC 1 (HDMI)" Connector 3: "PC 2 (HDMI)"
  - CodecPlus Room70/Room55D
- Connector 1: "Camera" Connector 2,3: 
  - Room55
- Connector 1: "Camera" Connector 2: "PC"
  - RoomKit Mini
- Connector 1,2: " Camera 1" Connector 2: " Camera 2" for single camera systems, "Camera 2" for dual camera systems
  - RoomKit Mini
- Connector 1: "Camera 1"  Connector 2: " Camera 5" for single camera systems, "Camera 2" for dual camera systems
  - CodecPlus Room70/Room55D
- Connectors 1: " Camera 1"  Connectors 2-5: " Camera 2" for dual camera systems
  - CodecPro Room70G2
- Connectors 1: " Camera 1"  Connectors 2,5: " Camera 2" for dual camera systems
  - CodecPro Room70G2
xConfiguration Video Input Connector [n] PreferredResolution

Applies to: RoomKit RoomKitMini CodecPlus CodecPro Room55 Room70/Room55D Room70G2

Requires user role: ADMIN, INTEGRATOR

Define the screen resolution and refresh rate that the video system advertises as its preferred resolution to the source devices that connect to the system via HDMI (for example a laptop). The logic for selection of the resolution on the source side will choose this resolution and refresh rate automatically, unless it is overridden manually by the source device (for example the laptop's display configuration software).

Note that the formats 2560_1440_60 and 3840_2160_30 use about twice the amount of data compared to the 1920_1080_60 format, and requires a presentation cable (or adapter) that is qualified for at least HDMI 1.4b data rates.

**USAGE:**

xConfiguration Video Input Connector [n] PreferredResolution:

where

- **n**: Unique ID that identifies the video input connector.
  - Range: 1..5 [CodecPro Room70G2]
  - Range: 2..3 [Room55]
  - Range: 1..3 [CodecPlus Room70/Room55D]
  - Range: 2..2 [RoomKit RoomKitMini]

**PreferredResolution:**

- **Connector 1**: 1920_1080_60
  - **Connector 3,4,5**: 1920_1080_60/2560_1440_60/3840_2160_30 [CodecPro Room70G2]
  - **Connector 2**: 1920_1080_60/2560_1440_60/3840_2160_30 [CodecPlus Room70/Room55D]

**1920_1080_60**: The resolution is 1920 x 1080, and the refresh rate is 60 Hz.

**2560_1440_60**: The resolution is 2560 x 1440, and the refresh rate is 60 Hz.

**3840_2160_30**: The resolution is 3840 x 2160, and the refresh rate is 30 Hz.

Default value:

- **1920_1080_60** [CodecPro Room70G2]
- **Connector n**: 1920_1080_60 [RoomKit RoomKitMini CodecPlus Room55 Room70/Room55D]

---

xConfiguration Video Input Connector [n] PresentationSelection

Applies to: All products

Requires user role: ADMIN, INTEGRATOR

Define how the video system will behave when you connect a presentation source to the video input. If the video system is in standby mode, it will wake up when you connect a presentation source. Sharing the presentation with the far end requires additional action (select Share on the user interface) except when this setting is set to AutoShare.

For systems with more than one camera: Any input source can be used as a presentation source; normally, the main camera will not be used as a presentation source.

For systems with an integrated camera: The integrated camera is not available as a presentation source.

**USAGE:**

xConfiguration Video Input Connector [n] PresentationSelection:

**PresentationSelection**

where

- **n**: Unique ID that identifies the video input connector.
  - Range: 1..6 [CodecPro Room70G2]
  - Range: 1..3 [CodecPlus Room70/Room55D]
  - Range: 2..2 [CodecPlus Room70/Room55D]
  - Range: 1..2 [CodecPlus Room70/Room55D]
  - Range: 1..4 [CodecPlus Room70/Room55D]
  - Range: 2..4 [CodecPlus Room70/Room55D]

**PresentationSelection:**

- **Connector 1**: Manual
  - **Connector 2**: AutoShare/Desktop/Manual/OnConnect
    - **Connector 1**: AutoShare/Desktop/Manual/OnConnect
      - **Connector 2**: AutoShare/Desktop/Manual/OnConnect for single camera systems, and Manual for dual camera systems
      - **Connector 3,4**: AutoShare/Desktop/Manual/OnConnect
      - **Connector 5,6**: AutoShare/Desktop/Manual/OnConnect

**AutoShare**: While in a call, the content on the video input will automatically be presented to the far end as well as on the local screen when you connect the cable, or when the source is activated otherwise (for example when a connected computer wakes up from sleep mode). You do not have to select Share on the user interface. If a presentation source is already connected when you make or answer a call, you have to manually select Share on the user interface.

**Desktop**: The content on the video input will be presented on the screen when you connect the cable, or when the source is activated otherwise (for example when a
connected computer wakes up from sleep mode). This applies both when idle and in a call. Also, the content on the video input will stay on the screen when you leave the call, provided that it was the active input at the time of leaving.

**Manual**: The content on the video input will not be presented on the screen until you select Share from the user interface.

**OnConnect**: The content on the video input will be presented on screen when you connect the cable, or when the source is activated otherwise (for example when a connected computer wakes up from sleep mode). Otherwise, the behavior is the same as in manual mode.

Default value:

- **CodecPro Room70G2**: Connector 3, 4, 5: OnConnect, Connector 1, 2, 6: Manual
- **CodecPlus Room70/Room55D**: Connector n: Desktop
- **DX70/DX80 RoomKit RoomKitMini Room55**: Connector n: OnConnect
- **SX10 MX200G2/MX300G2 RoomKit Mini Room55**: Connector n: OnConnect
- **SX20 MX700/MX800/MX800D**: Connector 1, 2: Manual, Connector 3, 4: OnConnect
- **S X80 MX700/MX800/MX800D**: Connector 1: Manual, Connector 2: OnConnect
- **MX200G2/MX300G2 RoomKit RoomKitMini Room55**: Connector 1: Motion, Connector 2: Sharpness
- **MX700/MX800/MX800D**: Connector 1, 2, 5: Motion, Connector 3, 4: Sharpness

### xConfiguration Video Input Connector [n] Quality

**Applies to**: All products

**Requires user role**: ADMIN, INTEGRATOR

When encoding and transmitting video there is a trade-off between high resolution and high frame rate. For some video sources it is more important to transmit high frame rate than high resolution and vice versa. This setting specifies whether to give priority to high frame rate or to high resolution.

If a Quad Camera, SpeakerTrack 60 camera, or Precision 60 camera is detected by the video system this setting is automatically set to Motion. If a user changes this setting manually, it will be set back to Motion after a restart or a camera reconnect.

**USAGE:**

xConfiguration Video Input Connector [n] Quality: **Quality**

where

- n: Unique ID that identifies the video input connector.

**Connector n**: Motion/Sharpness

- **Motion**: Gives the highest possible frame rate. Used when there is a need for higher frame rates, typically when a large number of participants are present or when there is a lot of motion in the picture.

- **Sharpness**: Gives the highest possible resolution. Used when you want the highest quality of detailed images and graphics.

Default value:

- **CodecPro Room70G2**: Connector 3, 4, 5: Sharpness, Connector 1, 2, 6: Motion
- **CodecPlus Room70/Room55D**: Connector 2, 3: Sharpness
- **DX70/DX80 SX10 MX200G2/MX300G2 RoomKit Mini Room55**: Connector 2: Sharpness, Connector 1: Motion
- **MX200G2/MX300G2 RoomKit RoomKitMini Room55**: Connector 1: Motion, Connector 2: Sharpness
- **MX700/MX800/MX800D**: Connector 1, 2, 5: Motion, Connector 3, 4: Sharpness
xConfiguration Video Input Connector [n] Visibility

Applies to: All products
Requires user role: ADMIN, INTEGRATOR

Define the visibility of the video input connector in the menus on the user interface.
For systems with an integrated camera: Connector 1 is the system’s integrated camera and is not available as a presentation source.

USAGE:

xConfiguration Video Input Connector [n] Visibility: Visibility

where

n: Unique ID that identifies the video input connector.

Visibility:

Connector n: Always/IfSignal/Never  [ SX20/SX80 MX700/MX800/MX800D CodecPlus CodecPro Room55 Room70/Room55D Room70G2 ]
Connector 1: Never  Connector 2: Always/IfSignal/Never  [ DX70/DX80 RoomKit RoomKitMini ]
Connector 1: Never  Connector 2: Other connectors: Always/IfSignal/Never  [ SX10 MX200G2/MX300G2 MX300G2 ]
Always: The menu selection for the video input connector will always be visible on the user interface.
IfSignal: The menu selection for the video input connector will only be visible when something is connected to the video input.
Never: The input source is not expected to be used as a presentation source, and will not show up on the user interface.

Default value:

Connector 1: Never  Other connectors: IfSignal  [ CodecPro Room70G2 ]
Connector 1: Never  Other connectors: Always  [ CodecPlus Room55 Room70/Room55D ]
Connector 1: Never  Connector 2: Always  [ RoomKit RoomKitMini ]
Connector 1: Never  Connector 2: IfSignal  [ DX70/DX80 ]
Connector 1: Never  Connector 2: Always  Connector 3: IfSignal  [ SX10 ]
Connector 1: Never  Connector 2: Always  Connector 3: IfSignal  [ MX700/MX800/MX800D ]
Connector 1: IfSignal  Connector 2: Always  [ SX20 ]

xConfiguration Video Monitors

Applies to: DX70/DX80 SX10 SX20 SX80 MX200G2/MX300G2 MX700/MX800/MX800D RoomKit CodecPlus CodecPro Room55 Room70/Room55D Room70G2

Requires user role: ADMIN, INTEGRATOR

A monitor role is assigned to each screen/output. The monitor role for DX70, DX80, and SX10, which only support one screen, is First. The monitor role for the integrated screen of MX200 G2 and MX300 G2 is First; the monitor role for the optional external screen is Second. For the other products the monitor role is set using the Video Output Connector [n] MonitorRole setting. The monitor role decides which layout (call participants and presentation) will appear on a screen. Screens with different monitor roles will have different layouts; screens with the same monitor role will get the same layout (except for SX20). SX20 does not support the same layout on two screens.

The monitor layout mode that is set in the Video Monitors setting should reflect the number of different layouts you want in your room setup. Note that some screens can be reserved for presentations.

USAGE:

xConfiguration Video Monitors: Monitors

where

Monitors:

Auto/Single/Dual/DualPresentationOnly  [ SX20/SX80 MX700/MX800/MX800D CodecPro CodecPlus Room55 Room70/Room55D Room70G2 ]
Auto/Single/Dual/DualPresentationOnly/TriplePresentationOnly/Triple  [ SX10 MX200G2/MX300G2 ]
Auto/DualPresentationOnly  [ MX200G2/MX300G2 ]
Auto: The number of screens connected to the video system is automatically detected, and the layout is distributed on the screens according to the monitor role.
Single: The layout is shown on the video system's screen. If the video system has more than one screen, the same layout is shown on all screens (except for SX20). For SX20 with two screens, one of them will be disabled.
Dual: The layout is distributed on screens with monitor role First and Second. If a presentation is part of the layout, all participants in the call are shown on screens with monitor role First, and the presentation is shown on screens with monitor role Second.
DualPresentationOnly: All participants in the call are shown on screens with monitor role First. If a presentation is part of the layout, the presentation is shown on screens with monitor role Second.
Triple: The layout is distributed on screens with monitor role First, Second and Third. Screens with monitor role Second are used first, then First, and finally Third. If a presentation is part of the layout, all participants in the call are shown on screens with monitor role First and Second, and the presentation is shown on the screen with monitor role Third.
**TriplePresentationOnly:** All participants in the call are distributed on screens with monitor role First and Second. Screens with monitor role Second are used first, then First. If a presentation is part of the layout, the presentation is shown on the screen with monitor role Third.

Default value:

- **Auto** [ SX20 SX80 MX200G2/MX300G2 MX700/MX800/MX800D RoomKit CodecPlus CodecPro Room55 Room70/Room55D Room70G2 ]
- **Single** [ DX70/DX80 SX10 ]

---

**xConfiguration Video Output Connector [n] CEC Mode**

**Applies to:** SX10 SX20 SX80 MX200G2/MX300G2 MX700/MX800/MX800D RoomKit RoomKitMini CodecPlus CodecPro Room55 Room70/Room55D Room70G2

**Requires user role:** ADMIN, INTEGRATOR

This video output (HDMI) supports Consumer Electronics Control (CEC).

When this setting is On, the system will use CEC to set the screen in standby when the system itself enters standby. Likewise the system will wake up the screen when the system itself wakes up from standby.

The active video input on a screen is sometimes changed by a user. When a call is started the video system detects if the active video input has been switched to another input on the screen. The video system then switches the input back so the video system is the active video input source (not supported by SX20, SX80, and MX series).

If the video system is not the active input source when the video system goes into standby the screen will not be set to standby (not supported by SX20, SX80, and MX series).

It's a prerequisite that the screen that is connected to the output is CEC compatible and that CEC is enabled on the screen.

Note that the different manufacturers use different marketing names for CEC, for example Anynet+ (Samsung); Aquos Link (Sharp); BRAVIA Sync (Sony); HDMI-CEC (Hitachi); Kuro Link (Pioneer); CE-Link and Regza Link (Toshiba); RIHD (Onkyo); HDAVI Control, EZ-Sync, VIERA Link (Panasonic); EasyLink (Philips); and NetCommand for HDMI (Mitsubishi).

**USAGE:**

```
xConfiguration Video Output Connector [n] CEC Mode: Mode
```

where

- **n** Unique ID that identifies the video output connector.
- **Mode**
  - **Off/On**
    - **Off:** CEC is disabled.
    - **On:** CEC is enabled.

**Default value:**

- **On** [ SX10 RoomKit RoomKitMini CodecPlus CodecPro Room55 ]
- **Off** [ SX20 SX80 MX200G2/MX300G2 MX700/MX800/MX800D Room70/Room55D Room70G2 ]
xConfiguration Video Output Connector [n] MonitorRole

**Applies to:** SX20 SX80 MX700/MX800/MX800D RoomKit RoomKitMini CodecPlus CodecPro Room55 Room70/Room55D Room70G2

**Requires user role:** ADMIN, INTEGRATOR

The monitor role describes which video streams will be shown on the screen connected to this video output. Together the Video Monitors setting and the MonitorRole settings for all outputs define which layout (video streams) will be shown on each screen. This setting is not applicable for Room Kit Mini, since it supports only one screen.

**USAGE:**

```bash
xConfiguration Video Output Connector [n] MonitorRole: MonitorRole
```

where

- **n:** Unique ID that identifies the video output connector.
  - Range: 1..3 [ SX80 MX700/MX800/MX800D CodecPro Room70G2 ]
  - Range: 2..2 [ Room55 ]
  - Range: 1..2 [ SX20 RoomKit CodecPlus Room70/Room55D ]
  - Range: 1..1 [ RoomKitMini ]

**MonitorRole:**

- **Auto/First/Second/PresentationOnly** [ SX20 RoomKit CodecPlus Room55 Room70/Room55D ]
- **Auto/First/Second/Third/PresentationOnlyRecorder** [ SX80 MX700/MX800/MX800D CodecPro Room70G2 ]

**Auto:** The system will detect when a screen is connected, and a monitor role (First, Second, Third) that corresponds with the Video Monitors setting will be assigned automatically.

First/Second/Third: Define the role of the screen in a multi-screen setup. In a single-screen setup, there is no difference between First, Second and Third.

**PresentationOnly:** Show presentation video stream if active, and nothing else. Screens/outputs with this monitor role are ignored by the Video Monitors setting.

**Recorder:** Show all participants, including the local main video (self-view). If active, also show the presentation. Screens/outputs with this monitor role are ignored by the Video Monitors setting.

Default value:

- **Connector n:** Auto [ SX80 MX700/MX800/MX800D RoomKit CodecPlus CodecPro Room55 Room70G2 ]
- **Dual:** Connector 1,2: Auto
- **Single:** Connector 1: Auto
- **PresentationOnly:** [ Room70/Room55D ]
- **Connector 1:** First
- **Connector 2:** Second [ SX20 ]

xConfiguration Video Output Connector [n] OverscanLevel

**Applies to:** SX10 SX20 MX200G2/MX300G2

**Requires user role:** ADMIN

Some monitors may not present the entire image that they receive. This means that the outer parts of the image that is sent from the video system may be cut off when displayed on the monitor.

Use this setting to instruct the video system not to use the outer part of the available frame. This part might be cut off by the monitor. Both the video and messages on screen will be scaled in this case.

**USAGE:**

```bash
xConfiguration Video Output Connector [n] OverscanLevel: OverscanLevel
```

where

- **n:** Unique ID that identifies the video output connector.
  - Range: 1..1 [ SX10 ]
  - Range: 1..2 [ SX20 ]
  - Range: 2..2 [ MX200G2/MX300G2 ]

**OverscanLevel:**

- **None/Medium/High**
- **None:** The video system will use all of the output resolution.
- **Medium:** The video system will not use the outer 3% of the output resolution.
- **High:** The video system will not use the outer 6% of the output resolution.

Default value:

- **None**
xConfiguration Video Output Connector [n] Resolution

Applies to: All products

Requires user role: ADMIN, INTEGRATOR, USER

Define the resolution and refresh rate for the connected screen.

The formats larger than 1920_1200_60 requires use of high quality display cables. For guaranteed operation, use display cables that are pre-qualified from Cisco for use at 3840_2160_60, or use a cable that has passed the “Premium HDMI certification” program. Some UHD TVs/displays only enable 3840_2160_30 (30 Hz) and not 3840_2160_60 (60 Hz) as their default configuration. In such cases the corresponding setting on the TV/display must be reconfigured to allow 3840_2160_60 for the HDMI input where the video system is connected.

USAGE:

xConfiguration Video Output Connector [n] Resolution:

Resolution

where

n: Unique ID that identifies the video output connector.

Range: 1..1 [ DX70/DX80 SX10 RoomKitMini ]
Range: 1..2 [ SX20 MX200G2/MX300G2 RoomKit CodecPlus Room55 Room70/Room55D ]
Range: 1..3 [ SX80 CodecPro Room70G2 ]
Range: 2..3 for MX800 Single; not available for MX700 and MX800 Dual [ MX700/MX800/ MX800D ]

Resolution:

1920_1080_60 [ DX70/DX80 ]
Connector 1: 3840_2160_60 Connector 2: Auto [ Room55 ]
Connector n: Auto [ SX10 SX20 SX80 MX700/MX800/MX800D RoomKit RoomKitMini CodecPlus CodecPro Room70/Room55D Room70G2 ]
Connector 1: 1920_1080_60 Connector 2: Auto [ MX200G2/MX300G2 ]
Connector n: Auto [ SX10 ]
Connector n: Auto/1280_720_50/1280_720_60/1920_1080_50 [ SX20 ]
Connector n: Auto/1280_720_50/1280_720_60/1920_1080_50/1920_1200_60 [ SX80 MX700/MX800/MX800D ]
Connector 1: 1920_1080_60 Connector 2: Auto/1024_768_60/1360_768_60/1366_768_60/1600_900_60/1600_900_70/1680_1050_60/1920_1080_50/1920_1080_60/1920_1200_50/1920_1200_60 [ SX80 MX700/MX800/MX800D ]
Connector 1: 1920_1080_60 Connector 2: Auto/1024_768_60/1024_768_60/1280_720_50/1280_720_50/1280_720_60/1280_720_60/1920_1080_50/1920_1080_60/1920_1200_50/1920_1200_60 [ SX80 MX700/MX800/MX800D ]
Connector n: Auto/1024_768_60/1024_768_60/1280_720_50/1280_720_50/1280_720_60/1280_720_60/1920_1080_50/1920_1080_60/1920_1200_50/1920_1200_60 [ SX80 MX700/MX800/MX800D ]
Connector n: Auto/1024_768_60/1024_768_60/1280_720_50/1280_720_50/1280_720_60/1280_720_60/1920_1080_50/1920_1080_60/1920_1200_50/1920_1200_60 [ SX80 MX700/MX800/MX800D ]
Connector 1: 1920_1080_60 Connector 2: Auto/1024_768_60/1024_768_60/1280_720_50/1280_720_50/1280_720_60/1280_720_60/1920_1080_50/1920_1080_60/1920_1200_50/1920_1200_60 [ SX80 MX700/MX800/MX800D ]
Connector n: Auto/1024_768_60/1024_768_60/1280_720_50/1280_720_50/1280_720_60/1280_720_60/1920_1080_50/1920_1080_60/1920_1200_50/1920_1200_60 [ SX80 MX700/MX800/MX800D ]

Default value:

1280_720_50: The resolution is 1280 x 720, and the refresh rate is 50 Hz.
1280_720_60: The resolution is 1280 x 720, and the refresh rate is 60 Hz.
1920_1080_50: The resolution is 1920 x 1080, and the refresh rate is 50 Hz.
1920_1080_60: The resolution is 1920 x 1080, and the refresh rate is 60 Hz.
1920_1200_50: The resolution is 1920 x 1200, and the refresh rate is 50 Hz.
1920_1200_60: The resolution is 1920 x 1200, and the refresh rate is 60 Hz.
2560_1440_60: The resolution is 2560 x 1440, and the refresh rate is 60 Hz.
3840_2160_30: The resolution is 3840 x 2160, and the refresh rate is 30 Hz.
3840_2160_60: The resolution is 3840 x 2160, and the refresh rate is 60 Hz.

Auto: The system will automatically try to set the optimal resolution based on negotiation with the connected monitor.

Usage:
xConfiguration Video Presentation DefaultSource

Applies to: All products
Requires user role: ADMIN, USER

Define which video input source to use as a default presentation source. This setting may be used by the API and 3rd party user interfaces. It is not relevant when using the user interfaces provided by Cisco.

**USAGE:**

xConfiguration Video Presentation DefaultSource: `DefaultSource`
where:

- `DefaultSource`:
  - 1/2/3/4/5  [ CodecPro Room70G2 ]
  - 1/2/3/4  [ SX80 MX700/MX800/MX800D ]
  - 1/2/3  [ CodecPlus Room55 Room70/Room55D ]
  - 1/2  [ SX20 RoomKit RoomKitMini ]
  - 2  [ DX70/DX80 SX10 MX200G2/MX300G2 ]

The video input source to use as default presentation source.

Default value:

- 3  [ SX80 MX700/MX800/MX9000 CodecPro Room70G2 ]
- 2  [ DX70/DX80 SX10 SX20 MX200G2/MX300G2 RoomKit RoomKitMini CodecPlus Room55 Room70/ Room55D ]

---

xConfiguration Video Presentation Priority

Applies to: All products
Requires user role: ADMIN

Determine how to distribute the bandwidth between the presentation channel and the main video channel.

**USAGE:**

xConfiguration Video Presentation Priority: `Priority`
where:

- `Priority`:
  - `Equal`/High/Low

  - `Equal`: The available bandwidth is shared equally between the presentation channel and the main video channel.
  - `High`: The presentation channel is assigned a larger portion of the available bandwidth at the expense of the main video channel.
  - `Low`: The main video channel is assigned a larger portion of the available bandwidth at the expense of the presentation channel.

Default value:

- `Equal`
xConfiguration Video Selfview Default FullscreenMode

**Applies to:** All products

**Requires user role:** ADMIN, INTEGRATOR

Define if the main video source (self-view) shall be shown in full screen or as a small picture-in-picture (PiP) after a call. The setting only takes effect when self-view is switched on (see the Video Selfview Default Mode setting).

**USAGE:**

```xConfiguration Video Selfview Default FullscreenMode: FullscreenMode```

where

- **FullscreenMode:**
  - **Off/Current/On**
  - **Off:** Self-view will be shown as a PiP.
  - **Current:** The size of the self-view picture will be kept unchanged when leaving a call, i.e. if it was a PiP during the call, it remains a PiP after the call; if it was full screen during the call, it remains full screen after the call.
  - **On:** The self-view picture will be shown in full screen.

**Default value:**

- **Current**

xConfiguration Video Selfview Default Mode

**Applies to:** All products

**Requires user role:** ADMIN, INTEGRATOR

Define if the main video source (self-view) shall be displayed on screen after a call. The position and size of the self-view window is determined by the Video Selfview Default PiPPosition and the Video Selfview Default FullscreenMode settings respectively.

**USAGE:**

```xConfiguration Video Selfview Default Mode: Mode```

where

- **Mode:**
  - **Off/Current/On**
  - **Off:** Self-view is switched off when leaving a call.
  - **Current:** Self-view is left as is, i.e. if it was on during the call, it remains on after the call; if it was off during the call, it remains off after the call.
  - **On:** Self-view is switched on when leaving a call.

**Default value:**

- **Current**
xConfiguration Video Selfview Default OnMonitorRole

**Applies to:** DX70/DX80, SX20, SX80, MX200G2/MX300G2, MX700/MX800/MX800D, RoomKit, RoomKitMini, CodecPlus, CodecPro, Room55, Room70/Room70G2

**Requires user role:** ADMIN, INTEGRATOR

Define which screen/output to display the main video source (self-view) after a call. The value reflects the monitor roles of the different outputs.

A monitor role is assigned to each screen. The monitor role for DX70 and DX80 is First (no support for an external screen). The monitor role for the integrated screen of MX200 G2 and MX300 G2 is First; the monitor role for the optional external screen is Second. For the other products the monitor role is set using the Video Output Connector [n] MonitorRole setting.

The OnMonitorRole setting applies both when self-view is displayed in full screen, and when it is displayed as picture-in-picture (PiP).

**USAGE:**

xConfiguration Video Selfview Default OnMonitorRole: **OnMonitorRole**

where

**OnMonitorRole:**

- Current/First/Second: [ SX20, MX200G2/MX300G2, RoomKit, RoomKitMini, CodecPlus, Room55, Room70/Room70G2 ]
- Current/First/Second/Third: [ SX80, MX700/MX800/MX800D, CodecPro, Room70G2 ]
- First: [ DX70/DX80 ]

**Current:** When leaving a call, the self-view picture will be retained on the same output as it was during the call.

**First:** The self-view picture will be shown on outputs with monitor role First.

**Second:** The self-view picture will be shown on outputs with monitor role Second.

**Third:** The self-view picture will be shown on outputs with monitor role Third.

Default value:

- Current: [ SX20, SX80, MX200G2/MX300G2, MX700/MX800/MX800D, RoomKit, RoomKitMini, CodecPlus, CodecPro, Room55, Room70/Room70G2 ]
- First: [ DX70/DX80 ]

---

xConfiguration Video Selfview Default PIPPosition

**Applies to:** All products

**Requires user role:** ADMIN, INTEGRATOR

Define the position on screen of the small self-view picture-in-picture (PiP) after a call. The setting only takes effect when self-view is switched on (see the Video Selfview Default Mode setting) and fullscreen view is switched off (see the Video Selfview Default FullscreenMode setting).

**USAGE:**

xConfiguration Video Selfview Default PIPPosition: **PIPPosition**

where

**PIPPosition:**

- Current/UpperLeft/UpperCenter/UpperRight/CenterLeft/CenterRight/LowerLeft/LowerRight

**Current:** The position of the self-view PiP will be kept unchanged when leaving a call.

**UpperLeft:** The self-view PiP will appear in the upper left corner of the screen.

**UpperCenter:** The self-view PiP will appear in the upper center position.

**UpperRight:** The self-view PiP will appear in the upper right corner of the screen.

**CenterLeft:** The self-view PiP will appear in the center left position.

**CenterRight:** The self-view PiP will appear in the center right position.

**LowerLeft:** The self-view PiP will appear in the lower left corner of the screen.

**LowerRight:** The self-view PiP will appear in the lower right corner of the screen.

Default value: **Current**
xConfiguration Video Selfview Mirrored
Applies to: DX70/DX80
Requires user role: ADMIN, INTEGRATOR

You can configure the video system to show the self-view image the way other people see you, or as you would see yourself in a mirror.
This setting has no effect on the video that is sent to the far end.

** USAGE:**

```
xConfiguration Video Selfview Mirrored: Mirrored
where
  Mirrored:
    Off/On
    Off: Display the self-view image as other people see you.
    On: Display the self-view image as you see yourself in a mirror.
  Default value:
    On
```

xConfiguration Video Selfview OnCall Mode
Applies to: All products
Requires user role: ADMIN, INTEGRATOR

This setting is used to switch on self-view for a short while when setting up a call. The Video Selfview OnCall Duration setting determines for how long it remains on. This applies when self-view in general is switched off.

** USAGE:**

```
xConfiguration Video Selfview OnCall Mode: Mode
where
  Mode:
    Off/On
    Off: Self-view is not shown automatically during call setup.
    On: Self-view is shown automatically during call setup.
  Default value:
    On
```

xConfiguration Video Selfview OnCall Duration
Applies to: All products
Requires user role: ADMIN, INTEGRATOR

This setting only has an effect when the Video Selfview OnCall Mode setting is switched On. In this case, the number of seconds set here determines for how long self-view is shown before it is automatically switched off.

** USAGE:**

```
xConfiguration Video Selfview OnCall Duration: Duration
where
  Duration:
    Integer (1..60)
  Range: Choose for how long self-view remains on. The valid range is between 1 and 60 seconds.
  Default value:
    10
```
Chapter 4

xCommand commands
Description of the xCommand commands

In this chapter, you can find a complete list of all xCommand type commands with parameters.

We recommend you visit our web site regularly for updated versions of the manual.

xCommand Video Selfview Set ........................................................................... 302
Audio commands

The xCommand Audio LocalInput, xCommand Audio LocalOutput, xCommand Audio RemoteOutput commands are mainly intended for internal use by the Audio Console application, which currently is available for SX80 and Codec Pro. Audio Console provides a graphical interface for the setup and configuration of audio chains.

An audio chain consists of a physical input connector that is assigned to a virtual local input, which in turn is connected to a virtual local output, to which a physical output connector is assigned. The commands listed above define the logical connection between the physical connectors and the virtual input and outputs, and also how the virtual inputs impose such things as gain, equalization and channel mixing to the signal.

When a call is made, the remote (from the far end) input signal is automatically added to all local outputs. Likewise, all local inputs are automatically added to the remote (to the far end) output gate.

Remember that xCommands are not persistent over a reboot. Therefore you have to include the commands in a startup script, or use the macro framework, in order to make the audio chain configuration persistent. A startup script is automatically generated and activated if you use Audio Console to set up the audio chains.

For more information about startup scripts, macros and Audio Console see the Administrator Guide and Customization Guide of the video system.

xCommand Audio Diagnostics Advanced Run

Applies to: All products
Requires user role: ADMIN, USER

This command sends out a noise signal sequentially on all audio output connectors and measures the room impulse response (RIR) between the output and the microphones. If a RIR is detected, the detected number of microphones (input), the detected number of output connectors, and the detected delay between the output and input is reported back.

Example:
```
xCommand Audio Diagnostics Advanced Run Volume: 50 MeasurementLength: 1
Result returned -> OK
```

```
*r AdvancedRunResult (status=OK):
*r AdvancedRunResult HdmiSpeakersDelay: "100 ms"
*r AdvancedRunResult NumHdmiSpeakersDetected: 2
*r AdvancedRunResult NumMicsDetected: 1
** end
```

**end

** USAGE:

```
xCommand Audio Diagnostics Advanced Run [MeasurementLength: MeasurementLength] 
[Volume: Volume]
```

where

**MeasurementLength:**

Integer (1..100)

The length of the measurement in number of seconds. In a noisy environment a longer measurement duration will give a more reliable and robust result.

Default value: 3

**Volume:**

Integer (0..50)

The volume of the test signal. In a noisy environment a higher volume gives more reliable and robust results.

Default value: 20
xCommand Audio Diagnostics MeasureDelay

Applies to: All products
Requires user role: ADMIN, USER

This command measures the audio delay/latency in a device connected to the video system. A typical use case is to measure the delay in a TV connected to the video system via the HDMI connector. If the delay in a TV is too high, the real-time experience of a video call will be substantially degraded. If the delay is more than 50 ms we recommend the user to find a TV setting that has shorter delay. Typical TV settings that can reduce the delay are: Gaming Mode and PC Mode.

This command will measure the delay between output and input (microphone). This means that if you are using an external acoustic echo canceller or audio mixer, this command will also measure the delay of these devices.

**USAGE:**

xCommand Audio Diagnostics MeasureDelay [MeasurementLength: MeasurementLength] [Output: Output] [Volume: Volume]

where

MeasurementLength:

- Integer (1..100)
  The length of the measurement in number of seconds. In a noisy environment a longer measurement duration will give a more reliable and robust result.
  Default value: 6

Output:

- HDMI/Line/Internal/All
  HDMI: Measure the delay of the device connected to the HDMI output.
  Line: Measure the delay of the device connected to the Line output (only available on video systems that have a Line output).
  Internal: Measure the delay of the internal loudspeaker (only available on video systems that have an internal loudspeaker).
  All: Will measure the maximum delay of all outputs.
  Default value: HDMI

Volume:

- Integer (0..50)
  The volume of the test signal. In a noisy environment a higher volume gives more reliable and robust results.
  Default value: 20

xCommand Audio Equalizer List

Applies to: SX80, MX700, MX800, MX800D, CodecPro, Room70G2
Requires user role: ADMIN

This command lists the current equalizer parameters. If no EqualizerId is specified, the command lists all 8 equalizers.

**USAGE:**

xCommand Audio Equalizer List [EqualizerId: EqualizerId]

where

EqualizerId:

- Integer (1..8)
  Each EqualizerId has 6 second-order filter sections with these parameters: FilterType, Frequency, Gain and Q-value.
xCommand Audio Equalizer Update

Applies to: SX80  MX700/MX800/MX800D CodecPro  Room70G2
Requires user role: ADMIN

This command sets the equalizer parameters for the selected EqualizerId and Section. Each of
the 8 available equalizers consist of 6 cascaded second-order IIR filters.

**USAGE:**

```
xCommand Audio Equalizer Update EqualizerId: EqualizerId FilterType: FilterType
Frequency: "Frequency" Gain: "Gain" Q: "Q" Section: Section
```

where

- **EqualizerId**
  - Integer (1..8)
- **FilterType**
  - highpass/highshelf/lowpass/lowshelf/none/peaking
- **Frequency**
  - String (0, 32)
- **Gain**
  - String (0, 32)
- **Q**
  - String (0, 32)
- **Section**
  - Integer (1..6)

xCommand Audio LocalInput Add

Applies to: SX80  MX700/MX800/MX800D CodecPro  Room70G2
Requires user role: ADMIN

Create a virtual local input, and generate an identifier for it (InputId). A local input is associated
with a set of input connectors, and you can specify the following: a name for the local input,
how to mix the signals from the associated input connectors, the use of Automatic Gain Control
(AGC) and mute, whether to make a mono or stereo signal, and whether to use direct mode to
bypass input processing.

The maximum number of local input modules is 8. You get an error message if you exceed the
limit.

This command is mainly intended for internal use by the Audio Console. If you don’t use Audio
Console, you need to manually add the command in a startup script, or use the macro frame-
work, in order to make the definition persistent over a reboot.

**USAGE:**

```
xCommand Audio LocalInput Add [InputId: InputId] [Name: "Name"] [AGC: AGC]
[Channels: Channels] [Direct: Direct] [MixerMode: MixerMode] [Mute: Mute]
```

where

- **InputId**
  - Integer (0..65534)
  - A unique identifier for the local input. If you don’t specify an InputId, the system will
    automatically create one for you. We recommend that you specify the InputId yourself in
    case you need to refer to the local input at a later stage.
- **Name**
  - String (0, 255)
  - Choose a name that describes the local input. If you don’t specify a name, the string will
    be empty.
- **AGC**
  - On/Off
  - **On**: Adjusts the gain continuously to maintain a constant sound level (default).
  - **Off**: No automatic gain control.
- **Channels**
  - Integer (1..2)
  - 1: Mixes the input signals into a mono signal (default).
  - 2: Mixes the input signals into a stereo signal.
- **Direct**
  - On/Off
On: Bypass input processing such as acoustic echo cancellation and noise reduction, regardless of the configuration for each connected input connector. Bypassing the input processing reduces the audio input delay, which is useful when doing local sound reinforcement.

Off: All regular input processing is performed, according to the configuration of each connector (default).

MixerMode:
- Auto/Fixed/GainShared
  - Auto: If one input signal is dominating, the signal on the other connectors are attenuated with 20 dB each.
  - Fixed: The input signals all have the same weight, and consequently they are mixed together with equal gains (default).
  - GainShared: If one or some of the input signals dominate, the rest of the input signals are attenuated by a few dB so that the total gain of the mixed signal remains the same all the time.

Auto and GainShared are intended for the microphone inputs; Fixed is recommended for Line and HDMI inputs.

Mute:
- On: Mutes the mix of input signals (default).
- Off: No muting.

**xCommand Audio LocalInput AddConnector**

**Applications to:** SX80 MX700/MX800/MX800D CodecPro Room70G2

**Requires user role:** ADMIN

Attach an input connector to the local input given by the input ID. You have to specify both the connector's type and number (ConnectorType, ConnectorId) to uniquely identify the connector. A connector can only be attached to one local input.

Run xStatus Audio Input LocalInput to get an overview of all local inputs.

This command is mainly intended for internal use by the Audio Console. If you don't use Audio Console, you need to manually add the command in a startup script, or use the macro framework, in order to make the definition persistent over a reboot.

**USAGE:**

```
xCommand Audio LocalInput AddConnector InputId: InputId ConnectorType: ConnectorType Connecto```rId: ConnectorId

**where**

**InputId:**
- Integer (0..65534)
  - The unique identifier of the local input. It was generated when the local input was created with the xCommand Audio LocalInput Add command.

**ConnectorType:**
- HDMI/Line/Microphone [ SX80 MX700/MX800/MX800D ]
- HDMI/ARC/Microphone [ CodecPro Room70G2 ]
  - Select the connector type.

**ConnectorId:**
- Integer (1..3) for an HDMI connector; Integer (1..4) for a Line connector; Integer (1..8) for a microphone connector [ SX80 MX700/MX800/MX800D ]
- Integer (1..5) for an HDMI connector; Integer (1..3) for an HDMI with ARC (Audio Return Channel) connector; Integer (1..8) for a microphone connector [ CodecPro Room70G2 ]
  - Select a connector. The connectors' numbers are printed on the codec connector panel.
xCommand Audio LocalInput Remove

Applies to: SX80 MX700/MX800/MX800D CodecPro Room70G2
Requires user role: ADMIN

Remove the local input given by the input ID.

Run xStatus Audio Input LocalInput to get an overview of all local inputs.
This command is mainly intended for internal use by the Audio Console. If you don’t use Audio Console, you need to manually add the command in a startup script, or use the macro framework, in order to make the definition persistent over a reboot.

**USAGE:**

xCommand Audio LocalInput Remove InputId: \texttt{InputId}

where

\texttt{InputId}: Integer (0..65534)

The unique identifier of the local input. It was generated when the local input was created with the xCommand Audio LocalInput Add command.

xCommand Audio LocalInput RemoveConnector

Applies to: SX80 MX700/MX800/MX800D CodecPro Room70G2
Requires user role: ADMIN

Detach an input connector from the local input given by the input ID. You need to enter both the connector’s type and number (ConnectorType, ConnectorId) to uniquely identify the connector.

Run xStatus Audio Input LocalInput to get an overview of all local inputs.
This command is mainly intended for internal use by the Audio Console. If you don’t use Audio Console, you need to manually add the command in a startup script, or use the macro framework, in order to make the definition persistent over a reboot.

**USAGE:**

xCommand Audio LocalInput RemoveConnector InputId: \texttt{InputId} ConnectorType: \texttt{ConnectorType} ConnectorId: \texttt{ConnectorId}

where

\texttt{InputId}: Integer (0..65534)

The unique identifier for the local input. It was generated when the local input was created with the xCommand Audio LocalInput Add command.

\texttt{ConnectorType}:

HDMI/Line/Microphone \[ SX80 MX700/MX800/MX800D \]
HDMI/ARC/Microphone \[ CodecPro Room70G2 \]

Select the connector type.

\texttt{ConnectorId}:

Integer (1..3) for an HDMI connector; Integer (1..4) for a Line connector; Integer (1..8) for a microphone connector \[ SX80 MX700/MX800/MX800D \]
Integer (1..5) for an HDMI connector; Integer (1..3) for an HDMI with ARC (Audio Return Channel) connector; Integer (1..8) for a microphone connector \[ CodecPro Room70G2 \]

Select a connector. The connectors' numbers are printed on the codec connector panel.
xCommand Audio LocalInput Update

Applies to: SX80 MX700/MX800/MX800D CodecPro Room70G2

Requires user role: ADMIN

Update the settings of the local input given by the input ID.

Run xStatus Audio Input LocalInput to get an overview of all local inputs.

This command is mainly intended for internal use by the Audio Console. If you don’t use Audio Console, you need to manually add the command in a startup script, or use the macro framework, in order to make the definition persistent over a reboot.

**USAGE:**

```
xCommand Audio LocalInput Update InputId: [InputId] [Name: ""Name"] [AGC: AGC] [Channels: Channels] [Direct: Direct] [MixerMode: MixerMode] [Mute: Mute]
```

where

- **InputId**: Integer (0..65534)
  - The unique identifier for the local input. It was generated when the local input was created with the xCommand Audio LocalInput Add command.

- **Name**: String (0, 255)
  - Choose a name that describes the local input.

- **AGC**: On/Off
  - **On**: Adjust the gain continuously to maintain a constant sound level.
  - **Off**: No automatic gain control.

- **Channels**: Integer (1..2)
  - 1: Mix the input signals into a mono signal.
  - 2: Mix the input signals into a stereo signal.

- **Direct**: On/Off
  - **On**: Bypass input processing such as acoustic echo cancellation and noise reduction, regardless of the configuration for each connected input connector. Bypassing the input processing reduces the audio input delay, which is useful when doing local sound reinforcement.
  - **Off**: All regular input processing is performed, according to the configuration of each connector.

- **MixerMode**: Auto/Fixed/GainShared
  - **Auto**: If one input signal is dominating, the signal on the other connectors are attenuated with 20 dB each.
  - **Fixed**: The input signals all have the same weight, and consequently they are mixed together with equal gains.
  - **GainShared**: If one or some of the input signals dominate, the rest of the input signals are attenuated by a few dB so that the total gain of the mixed signal remains the same all the time.

- **Mute**: On/Off
  - **On**: Mutes the mix of input signals.
  - **Off**: No muting.
xCommand Audio LocalOutput Add

Applies to: SX80 MX700/MX800/MX800D CodecPro Room70G2

Requires user role: ADMIN

Create a virtual local output and generate an identifier for it (OutputId). A local output is a mix of local inputs and the remote input signals. Use the xCommand Audio LocalOutput ConnectInput command to specify which local inputs to include. The remote input signal (from far-end) is by default automatically added to this local output when in a call. Use the AutoconnectRemote parameter if you want to override the default behavior. A local output is associated with a set of output connectors, which all receive the same signal.

The maximum number of local output modules is 6. You get an error message if you exceed the limit.

This command is mainly intended for internal use by the Audio Console. If you don't use Audio Console, you need to manually add the command in a startup script, or use the macro framework, in order to make the definition persistent over a reboot.

**USAGE:**

```
xCommand Audio LocalOutput Add [OutputId: OutputId] [Name: "Name"]
[AutoconnectRemote: AutoconnectRemote] [Loudspeaker: Loudspeaker] [Channels: Channels] [VolumeControlled: VolumeControlled]
```

where

- **OutputId:**
  - Integer (0..65534)
  - A unique identifier for the local output. If you don't specify an OutputId, the system will automatically create one for you. We recommend that you specify the OutputId yourself in case you need to refer to the output module at a later stage.
  - Default value: 0

- **Name:**
  - String (0, 255)
  - Choose a name that describes the local output.
  - Default value: ""

- **AutoconnectRemote:**
  - On/Off
  - **On:** The remote input signal is automatically added to the local output when in a call.
  - Default value: On

- **Loudspeaker:**
  - On/Off
  - Choose On if at least one of the associated connectors are connected to a loudspeaker. This is important because it tells the echo canceler to use this signal as a reference signal.
  - Default value: Off

- **Channels:**
  - Integer (1..2)
  - 1: Mix the local and remote input signals into a mono signal.
  - 2: Mix the local and remote input signals into a stereo signal.
  - Default value: 1

- **VolumeControlled:**
  - On/Off
  - **On:** The volume will change according to the level set with the volume controls on the user interface, or with the xCommand Audio Volume commands. If Loudspeaker is On, VolumeControlled is forced to On no matter what you specify here.
  - **Off:** The volume is neither influenced by the volume controls on the user interface, nor the xCommand Audio Volume commands.
  - Default value: Off

On: Choose On if at least one of the associated connectors are connected to a loudspeaker. This is important because it tells the echo canceler to use this signal as a reference signal.

Off: Choose Off if no loudspeaker is connected to the associated connectors. Note that only one of the local outputs should have a loudspeaker connected.

Default value: Off
xCommand Audio LocalOutput AddConnector

Applies to: SX80  MX700/MX800/MX800D  CodecPro  Room70G2
Requires user role: ADMIN

Attach an output connector to the local output given by the output ID. You have to specify both the connector’s type and number (ConnectorType, ConnectorId) to uniquely identify the connector. A connector can only be attached to one local output.

Run xStatus Audio Output LocalOutput to get an overview of all local outputs.

This command is mainly intended for internal use by the Audio Console. If you don’t use Audio Console, you need to manually add the command in a startup script, or use the macro framework, in order to make the definition persistent over a reboot.

USAGE:

xCommand Audio LocalOutput AddConnector OutputId: OutputId ConnectorType: ConnectorType ConnectorId: ConnectorId

where

OutputId:
- Integer (0..65534)
  - The unique identifier of the local output. It was generated when the local output was created with the xCommand Audio LocalOutput Add command.

ConnectorType:
- HDMI/Line [ SX80 CodecPro ]
- HDMI/Line/ARC [ MX700/MX800/MX800D Room70G2 ]
  - Select the connector type.

ConnectorId:
- Integer (1..2) for an HDMI connector; Integer (1..6) for a Line connector [ SX80 MX700/MX800/MX800D ]
- Integer (1..3) for an HDMI connector; Integer (1..6) for a Line out connectors; Integer (1..1) for an HDMI with ARC (Audio Return Channel) connector [ CodecPro Room70G2 ]
  - Select a connector. The connectors' numbers are printed on the codec connector panel.

xCommand Audio LocalOutput ConnectInput

Applies to: SX80  MX700/MX800/MX800D  CodecPro  Room70G2
Requires user role: ADMIN

Connect a local or remote input to a local output by giving their IDs as parameters. A local input can be connected to any number of local outputs. Likewise, any number of local inputs can be connected to each local output. Note that the remote input signal (from far-end) is automatically added to all local outputs when a call is made, and automatically disconnected when the call is ended.

Run xStatus Audio Output LocalOutput to get an overview of all local outputs, xStatus Audio Input LocalInput to get an overview of all local inputs, and xStatus Audio Input RemotelInput to see the remote input details.

This command is mainly intended for internal use by the Audio Console. If you don’t use Audio Console, you need to manually add the command in a startup script, or use the macro framework, in order to make the definition persistent over a reboot.

USAGE:

xCommand Audio LocalOutput ConnectInput OutputId: OutputId InputId: InputId [ InputGain: InputGain ]

where

OutputId:
- Integer (0..65534)
  - The unique identifier of the local output. It was generated when the local output was created with the xCommand Audio LocalOutput Add command.

InputId:
- Integer (0..65534)
  - The unique identifier of the local or remote input. The local input’s ID was generated when the local input was created with the xCommand Audio LocalInput Add command. The remote input’s ID was generated automatically when the call was made.

InputGain:
- Integer (-54..15)
  - Set the gain on the input signal. The gain can also be negative (attenuation). The value -54 dB equals Off.
  - Default value: 0
xCommand Audio LocalOutput DisconnectInput

**Applies to:** SX80  MX700/MX800/MX800D  CodecPro  Room70G2

**Requires user role:** ADMIN

Disconnect a local or remote input from a local output. Note that the remote input signal (from far-end) is automatically disconnected when a call is ended.

Run xStatus Audio Output LocalOutput to get an overview of all local outputs, xStatus Audio Input LocalInput to get an overview of all local inputs, and xStatus Audio Input RemoteInput to see the remote input details.

This command is mainly intended for internal use by the Audio Console. If you don’t use Audio Console, you need to manually add the command in a startup script, or use the macro framework, in order to make the definition persistent over a reboot.

**USAGE:**

```
xCommand Audio LocalOutput DisconnectInput OutputId: OutputId InputId: InputId
```

where

```
OutputId:

Integer (0..65534)
```

The unique identifier of the local output. It was generated when the local output was created with the xCommand Audio LocalOutput Add command.

```
InputId:

Integer (0..65534)
```

The unique identifier of the local or remote input. The local input’s ID was generated when the local input was created with the xCommand Audio LocalInput Add command. The remote input’s ID was generated automatically when the call was made.

xCommand Audio LocalOutput Remove

**Applies to:** SX80  MX700/MX800/MX800D  CodecPro  Room70G2

**Requires user role:** ADMIN

Remove the local output given by the output ID.

Run xStatus Audio Output LocalOutput to get an overview of all local outputs.

This command is mainly intended for internal use by the Audio Console. If you don’t use Audio Console, you need to manually add the command in a startup script, or use the macro framework, in order to make the definition persistent over a reboot.

**USAGE:**

```
xCommand Audio LocalOutput Remove OutputId: OutputId
```

where

```
OutputId:

Integer (0..65534)
```

The unique identifier of the local output. It was generated when the local output was created with the xCommand Audio LocalOutput Add command.
xCommand Audio LocalOutput RemoveConnector

Applies to: SX80  MX700/MX800/MX800D  CodecPro  Room70G2
Requires user role: ADMIN

Detach an output connector from the local output given by the output ID. You need to enter both the connector's type and number (ConnectorType, ConnectorId) to uniquely identify the connector.

Run xStatus Audio Output LocalOutput to get an overview of all local outputs.
This command is mainly intended for internal use by the Audio Console. If you don’t use Audio Console, you need to manually add the command in a startup script, or use the macro framework, in order to make the definition persistent over a reboot.

USAGE:
```plaintext
xCommand Audio LocalOutput RemoveConnector OutputId: OutputId ConnectorType: ConnectorType ConnectorId: ConnectorId
```
where
- **OutputId**: Integer (0..65534)
  - The unique identifier of the local output. It was generated when the local output was created with the xCommand Audio LocalOutput Add command.
- **ConnectorType**: HDMI/Line [ SX80 CodecPro ]
  - Select the connector type.
- **ConnectorId**: Integer (1..2) for an HDMI connector; Integer (1..6) for a Line connector [ SX80 MX700/MX800/MX800D ]
  - Select a connector. The connectors' numbers are printed on the codec connector panel.

xCommand Audio LocalOutput Update

Applies to: SX80  MX700/MX800/MX800D  CodecPro  Room70G2
Requires user role: ADMIN

Update the settings of the local output given by the output ID.
Run xStatus Audio Output LocalOutput to get an overview of all local outputs.
This command is mainly intended for internal use by the Audio Console. If you don’t use Audio Console, you need to manually add the command in a startup script, or use the macro framework, in order to make the definition persistent over a reboot.

USAGE:
```plaintext
xCommand Audio LocalOutput Update OutputId: OutputId [Name: "Name"] [AutoconnectRemote: AutoconnectRemote] [Loudspeaker: Loudspeaker] [Channels: Channels] [VolumeControlled: VolumeControlled]
```
where
- **OutputId**: Integer (0..65534)
  - The unique identifier of the local output. It was generated when the local output was created with the xCommand Audio LocalOutput Add command.
- **Name**: String (0, 255)
  - Choose a name that describes the local output.
- **AutoconnectRemote**: On/Off
  - **On**: The remote input signal is automatically added to the local output when in a call.
  - **Off**: The remote input signal is not added to the local output.
- **Loudspeaker**: On/Off
  - **On**: Choose On if at least one of the associated connectors are connected to a loudspeaker. This is important because it tells the echo canceler to use this signal as a reference signal.
  - **Off**: Choose Off if no loudspeaker is connected to the associated connectors. Note that only one of the local outputs should have a loudspeaker connected.
- **Channels**: Integer (1..2)
  - **1**: Mix the local and remote input signals into a mono signal.
  - **2**: Mix the local and remote input signals into a stereo signal.
VolumeControlled:

**On/Off**

**On:** The volume will change according to the level set by the volume controls on the user interface, or the xCommand Audio Volume commands. If Loudspeaker is On, VolumeControlled is forced to On no matter what you specify here.

**Off:** The volume is neither influenced by the volume controls on the user interface, nor the xCommand Audio Volume commands.

**xCommand Audio LocalOutput UpdateInputGain**

**Applies to:** SX80, MX700/MX800/MX800D, CodecPro, Room70G2

**Requires user role:** ADMIN

Update the gain of a local or remote input that is connected to a local output. Note that the remote input signal (from far-end) is automatically added to all local outputs when a call is made, and automatically disconnected when the call is ended.

Run xStatus Audio Output LocalOutput to get an overview of all local outputs, xStatus Audio Input LocalInput to get an overview of all local inputs, and xStatus Audio Input RemotelInput to see the remote input details.

This command is mainly intended for internal use by the Audio Console. If you don't use Audio Console, you need to manually add the command in a startup script, or use the macro framework, in order to make the definition persistent over a reboot.

**USAGE:**

```
xCommand Audio LocalOutput UpdateInputGain OutputId: OutputId InputId: InputId [InputGain: InputGain]
```

where

- **OutputId**: `Integer (0..65534)`
  The unique identifier of the local output. It was generated when the local output was created with the xCommand Audio LocalOutput Add command.

- **InputId**: `Integer (0..65534)`
  The unique identifier of the local or remote input. The local input’s ID was generated when the local input was created with the xCommand Audio LocalInput Add command. The remote input’s ID was generated automatically when the call was made.

- **InputGain**: `Integer (-54..15)`
  Set the gain on the input signal. The gain can also be negative (attenuation). The value -54 dB equals Off.
  Default value: 0
xCommand Audio Microphones Mute

Applies to: All products
Requires user role: ADMIN, INTEGRATOR, USER
Mute all microphones.

**USAGE:**

```plaintext
xCommand Audio Microphones Mute
```

xCommand Audio Microphones ToggleMute

Applies to: All products
Requires user role: ADMIN, INTEGRATOR, USER
Toggle the microphone between muted and unmuted.

**USAGE:**

```plaintext
xCommand Audio Microphones ToggleMute
```

xCommand Audio Microphones Unmute

Applies to: All products
Requires user role: ADMIN, INTEGRATOR, USER
Unmute all microphones.

**USAGE:**

```plaintext
xCommand Audio Microphones Unmute
```

xCommand Audio RemoteOutput ConnectInput

Applies to: SX80, MX700/MX800/MX800D, CodecPro, Room70G2
Requires user role: ADMIN

Connect an input to a remote output by giving their IDs as parameters. An input can be connected to any number of remote output gates, and any number of inputs can be connected to one remote output gate. Note that all local inputs are automatically added to all remote output gates when a call is made, and automatically disconnected when the call is ended. Run xStatus Audio Input LocalInput to get an overview of all local inputs.

This command is mainly intended for internal use by the Audio Console. It is only applicable during a call.

**USAGE:**

```plaintext
xCommand Audio RemoteOutput ConnectInput OutputId: OutputId InputId: InputId
[InputGain: InputGain]
```

Where

- **OutputId**
  - Integer (0..65534)
  - The unique identifier of the remote output. It was automatically generated when the call was made.

- **InputId**
  - Integer (0..65534)
  - The unique identifier of the input. It was either generated when the input was created with the xCommand Audio Local Input Add command, or when the call was set up (remote input).

- **InputGain**
  - Integer (-54..15)
  - Set the gain on the input signal. The gain can also be negative (attenuation). The value -54 dB equals Off.
  - Default value: 0
xCommand Audio RemoteOutput DisconnectInput

Applies to: SX80 MX700/MX800/MX800D CodecPro Room70G2

Requires user role: ADMIN

Disconnect an input from a remote output by giving their IDs as parameters. Note that the remote output is automatically removed when the call has ended.

Run xStatus Audio Output RemoteOutput to get an overview of the remote outputs, and xStatus Audio Input LocalInput to get an overview of all local inputs.

This command is mainly intended for internal use by the Audio Console. It is only applicable during a call.

**USAGE:**

```plaintext
xCommand Audio RemoteOutput DisconnectInput OutputId: OutputId InputId: InputId
```

where

- **OutputId**: Integer (0..65534)
  
  The unique identifier of the remote output. It was automatically generated when the call was made.

- **InputId**: Integer (0..65534)
  
  The unique identifier of the input. It was either generated when the input was created with the xCommand Audio Local Input Add command, or when the call was set up (remote input).

xCommand Audio RemoteOutput UpdateInputGain

Applies to: SX80 MX700/MX800/MX800D CodecPro Room70G2

Requires user role: ADMIN

Update the gain of an input that is connected to a remote output. Note that the remote output is automatically removed when the call has ended.

Run xStatus Audio Output RemoteOutput to get an overview of the remote outputs, and xStatus Audio Input LocalInput to get an overview of all local inputs.

This command is mainly intended for internal use by the Audio Console. It is only applicable during a call.

**USAGE:**

```plaintext
xCommand Audio RemoteOutput UpdateInputGain OutputId: OutputId InputId: InputId [InputGain: InputGain]
```

where

- **OutputId**: Integer (0..65534)
  
  The unique identifier of the remote output. It was automatically generated when the call was made.

- **InputId**: Integer (0..65534)
  
  The unique identifier of the input. It was either generated when the input was created with the xCommand Audio Local Input Add command, or when the call was set up (remote input).

- **InputGain**: Integer (-54..15)
  
  Set the gain on the input signal. The gain can also be negative (attenuation). The value -54 dB equals Off.

  Default value: 0
xCommand Audio Select

Applies to: DX70/DX80
Requires user role: ADMIN, USER
Select which type of audio device to use (built-in loudspeakers and microphone, headsets, or handset).

**USAGE:**

xCommand Audio Select Device: **Device**

where

**Device:**

- Internal/HeadsetBluetooth/HeadsetAnalog/HeadsetUSB/HandsetUSB

Choose whether to use the built-in loudspeakers and microphone (internal), a Bluetooth headset, an analog headset (DX70 only), a USB headset, or a USB handset.

xCommand Audio Setup Clear

Applies to: SX80 MX700/MX800/MX800D CodecPro Room70G2
Requires user role: ADMIN
Remove all local inputs and local outputs.

**USAGE:**

xCommand Audio Setup Clear

xCommand Audio Setup Reset

Applies to: SX80 MX700/MX800/MX800D CodecPro Room70G2
Requires user role: ADMIN
This command resets the audio setup of the video system (as set up using the Audio Console application or API commands). In effect it removes all local inputs and local outputs, sets connectors and groups back to their default values, and rebuilds the audio setup the same way as after a restart.

**USAGE:**

xCommand Audio Setup Reset

xCommand Audio Sound Play

Applies to: All products
Requires user role: ADMIN, INTEGRATOR, USER
Play a specified audio sound.

**USAGE:**

xCommand Audio Sound Play [Loop: **Loop**] Sound: **Sound**

where

**Loop:**

- Off/On

Determines whether or not to loop the playout of the audio sound. The sound is looped by default. Irrespective of how this parameter is set, some of the sounds (Busy, CallWaiting, Dial, Ringing, and SpecialInfo) will play until the Audio Sound Stop command is issued. Default value: Off

**Sound:**

- Alert/Announcement/Binding/Bump/Busy/CallDisconnect/CallInitiate/CallWaiting/ Dial/KeyInput/KeyInputDelete/KeyTone/Nav/NavBack/Notification/OK/Pairing/
PresentationConnect/Ringing/SignIn/SpecialInfo/StartListening/TelephoneCall/VideoCall/
VolumeAdjust/WakeUp

Choose which ringtone to play.

xCommand Audio Sound Stop

Applies to: All products
Requires user role: ADMIN, INTEGRATOR, USER
Stop playing audio sound.

**USAGE:**

xCommand Audio Sound Stop
**xCommand Audio SpeakerCheck**

**Applies to:** MX700/MX800/MX800D  Room70/Room55D  Room70G2

**Requires user role:** ADMIN, INTEGRATOR, USER

Runs a test that you can use to check that all the internal speakers are connected correctly. A test tone will be emitted from each speaker in sequence, from left to right. If the speakers don’t play in correct order, reconnect the loudspeaker cables to obtain the correct sequence. All speakers are part of the test sequence, and you must be in the same room as the video system to verify that the test sequence plays correctly.

The video system uses the connected microphones to listen for the test signal, and the result of the test is returned in the API.

**USAGE:**

```bash
xCommand Audio SpeakerCheck [MeasurementLength: MeasurementLength] [Volume: Volume]
```

where

- **MeasurementLength:**
  - ```Integer (1..5)```
  - Test signal duration for each speaker in seconds.
  - Default value: 1

- **Volume:**
  - ```Integer (1..30)```
  - Test signal level.
  - Default value: 1

**xCommand Audio SoundsAndAlerts Ringtone List**

**Applies to:** All products

**Requires user role:** ADMIN, INTEGRATOR, USER

List all available ringtones. Use the `xConfiguration Audio SoundsAndAlerts RingTone` setting to choose a ringtone.

**USAGE:**

```bash
xCommand Audio SoundsAndAlerts Ringtone List
```

**xCommand Audio SoundsAndAlerts Ringtone Play**

**Applies to:** All products

**Requires user role:** ADMIN, INTEGRATOR, USER

Play one of the available ringtones. Use the `xCommand Audio SoundsAndAlerts Ringtone List` command to get a list of the available ringtones.

**USAGE:**

```bash
xCommand Audio SoundsAndAlerts Ringtone Play [Loop: Loop] RingTone: "RingTone"
```

where

- **Loop:**
  - ```On/Off```
  - Repeats the chosen ringtone in a loop. To turn off the audio, use the `Audio SoundsAndAlerts Ringtone Stop` command.
  - Default value: Off

- **RingTone:**
  - ```String (1, 100)```
  - The name of the ringtone.

**xCommand Audio SoundsAndAlerts Ringtone Stop**

**Applies to:** All products

**Requires user role:** ADMIN, INTEGRATOR, USER

Stops the chosen ringtone from playing. To start playing the ringtone again, use the `Audio SoundsAndAlerts Ringtone Play` command.

**USAGE:**

```bash
xCommand Audio SoundsAndAlerts Ringtone Stop
```
xCommand Audio Volume Decrease

Applies to: All products
Requires user role: ADMIN, USER

Decrease the volume on the endpoint. By default, the volume is decreased by 5 steps (each step is 0.5 dB). Use the Steps parameter if you want to override the default behavior.

Note that DX70 an DX80 has several audio devices: built-in loudspeakers, headsets, and handset. This command affects only one device at a time. You can use the optional Device parameter to specify which device to address. If you don’t specify a device, the most recently selected device is chosen (see xStatus Audio SelectedDevice). Also refer to xCommand Audio Select.

**USAGE:**

```
xCommand Audio Volume Decrease [Device: Device] [Steps: Steps]
```

where

- **Device**: [ DX70/DX80 ]
  - Internal/HeadsetBluetooth/HeadsetAnalog/HeadsetUSB/HandsetUSB
    - Choose whether to decrease the volume on the built-in loudspeakers (internal), a Bluetooth headset, an analog headset (DX70 only), a USB headset, or a USB handset.

- **Steps**: Integer (1...10)
  - Choose the number of steps to decrease the volume with. One step is 0.5 dB.
  - Default value: 5

xCommand Audio Volume Increase

Applies to: All products
Requires user role: ADMIN, USER

Increase the volume on the endpoint. By default, the volume is increased by 5 steps (each step is 0.5 dB). Use the Steps parameter if you want to override the default behavior.

Note that DX70 an DX80 has several audio devices: built-in loudspeakers, headsets, and handset. This command affects only one device at a time. You can use the optional Device parameter to specify which device to address. If you don’t specify a device, the most recently selected device is chosen (see xStatus Audio SelectedDevice). Also refer to xCommand Audio Select.

**USAGE:**

```
xCommand Audio Volume Increase [Device: Device] [Steps: Steps]
```

where

- **Device**: [ DX70/DX80 ]
  - Internal/HeadsetBluetooth/HeadsetAnalog/HeadsetUSB/HandsetUSB
    - Choose whether to increase the volume on the built-in loudspeakers (internal), a Bluetooth headset, an analog headset (DX70 only), a USB headset, or a USB handset.

- **Steps**: Integer (1...10)
  - Choose the number of steps to increase the volume with. One step is 0.5 dB.
  - Default value: 5

xCommand Audio Volume Mute

Applies to: All products
Requires user role: ADMIN, USER

Mute the volume on the endpoint.

Note that DX70 an DX80 has several audio devices: built-in loudspeakers, headsets, and handset. This command affects only the selected device. Refer to the xStatus Audio SelectedDevice and xCommand Audio Select commands for more information about the selected device.

**USAGE:**

```
xCommand Audio Volume Mute
```
xCommand Audio Volume Set

Applies to: All products
Requires user role: ADMIN, USER

Set the volume on the endpoint to a specified level.
Note that DX70 an DX80 has several audio devices: built-in loudspeakers, headsets, and handset. This command affects only one device at a time. You can use the optional Device parameter to specify which device to address. If you don’t specify a device, the most recently selected device is chosen (see xStatus Audio SelectedDevice). Also refer to xCommand Audio Select.

USAGE:
```
xCommand Audio Volume Set [Device: Device] Level: Level
```
where
```
Device: [ DX70/DX80 ]
   Internal/HeadsetBluetooth/HeadsetAnalog/HeadsetUSB/HandsetUSB
```
Choose whether to set the volume on the built-in loudspeakers (internal), a Bluetooth headset, an analog headset (DX70 only), a USB headset, or a USB handset.
```
Level: Integer (0..100)
```
Select the gain level. 70 equals 0 dB gain, and 100 equals 15 dB gain.

xCommand Audio Volume SetToDefault

Applies to: All products
Requires user role: ADMIN, USER

Set the volume to the default level that is defined in the xConfiguration Audio DefaultVolume setting.
Note that DX70 an DX80 has several audio devices: built-in loudspeakers, headsets, and handset. This command affects only one device at a time. You can use the optional Device parameter to specify which device to address. If you don’t specify a device, the most recently selected device is chosen (see xStatus Audio SelectedDevice). Also refer to xCommand Audio Select.

USAGE:
```
xCommand Audio Volume SetToDefault [Device: Device]
```
where
```
Device: [ DX70/DX80 ]
   Internal/HeadsetBluetooth/HeadsetAnalog/HeadsetUSB/HandsetUSB
```
Choose whether to set the volume on the built-in loudspeakers (internal), a Bluetooth headset, an analog headset (DX70 only), a USB headset, or a USB handset.

xCommand Audio Volume ToggleMute

Applies to: All products
Requires user role: ADMIN, USER

Toggle the loudspeaker between muted and unmuted.

USAGE:
```
xCommand Audio Volume ToggleMute
```

xCommand Audio Volume Unmute

Applies to: All products
Requires user role: ADMIN, USER

Set the volume on the endpoint back on after muting.

USAGE:
```
xCommand Audio Volume Unmute
```
xCommand Audio VuMeter Start

Applies to: All products
Requires user role: ADMIN, USER

Start a VU meter to show the audio signal level on the specified connector. You have to specify both the connector's type and number (ConnectorType, ConnectorId) to uniquely identify the connector. The VU meter measures the input level for frequencies below 20 kHz.

**USAGE:**

```
xCommand Audio VuMeter Start ConnectorID: ConnectorID ConnectorType: 
```

where

**ConnectorID:**

- Integer (1..8) for Microphone; Integer (1..4) for Line; Integer (1..3) for HDMI [SX80 MX700/ MX800/MX800D ]
- Integer (1..8) for Microphone; Integer (1..5) for HDMI [CodecPro Room70G2 ]
- Integer (1..2) for Microphone; Integer (1..1) for Line [SX20 ]
- Integer (1..2) for Microphone; Integer (1..1) for HDMI [SX10 RoomKit CodecPlus Room55 Room70/ Room55D ]
- Integer (1..1) for Microphone; Integer (1..1) for HDMI [RoomKitMini ]
- Integer (1..3) for Microphone; Integer (1..1) for Line; Integer (1..2) for HDMI [MX200G2/ MX300G2 ]
- Integer(1..1) [DX70/DX80 ]

Select a connector number.

Note the following if the ConnectorType is Microphone: If the video system has a built-in microphone, that microphone will be Microphone [1]. The external microphones connected to the input connectors starts from Microphone [2]. For DX70 and DX80, Microphone [1] refers to the selected audio device, which may be either the built-in microphone, or a connected headset or handset. Refer to the xStatus Audio SelectedDevice and xCommand Audio Select commands for more information about the selected device.

**ConnectorType:**

- HDMI/Line/Microphone [SX80 MX200G2/MX300G2 MX700/MX800/MX800D ]
- Line/Microphone [SX20 ]
- HDMI/Microphone [DX70/DX80 SX10 RoomKit RoomKitMini CodecPlus CodecPro Room55 Room70/ Room55D Room70G2 ]

Select the connector type.

**IncludePairingQuality:**

Off/On

The system can measure the pairing quality (value 0 to 100). With no other ultrasound sources in the same room this value will be high, but if there are other ultrasound sources in the same room the value will be low. To monitor the pairing quality, sign in to the video system's web interface, navigate to Setup > Peripherals > Microphones and tick the Show Pairing Rate check box. Or, use the xFeedback and xEvents commands to monitor the value. Read more about the xFeedback and xEvents commands in the API introduction section in this guide.

Default value: Off
xCommand Audio VuMeter Stop

Applies to: All products
Requires user role: ADMIN, USER

Stop the VU meter on the specified connector. You have to specify both the connector’s type and number (ConnectorType, ConnectorId) to uniquely identify the connector.

**USAGE:**

```
xCommand Audio VuMeter Stop ConnectorID: ConnectorID ConnectorType: ConnectorType
```

where

```
ConnectorID:  
   Integer (1..8) for Microphone; Integer (1..4) for Line; Integer (1..3) for HDMI [ SX80 MX700/ MX800/MX800D ]
   Integer (1..8) for Microphone; Integer (1..5) for HDMI [ CodecPro Room70G2 ]
   Integer (1..2) for Microphone; Integer (1..1) for Line [ SX20 ]
   Integer (1..2) for Microphone; Integer (1..1) for Line [ SX10 RoomKit CodecPlus Room55 Room70/ Room55D ]
   Integer (1..1) for Microphone; Integer (1..1) for HDMI [ RoomKitMini ]
   Integer (1..3) for Microphone; Integer (1..1) for Line; Integer (1..2) for HDMI [ MX200G2/ MX300G2 ]
   Integer(1..1) [ DX70/DX80 ]
```

Select a connector number.

Note the following if the ConnectorType is Microphone: If the video system has a built-in microphone, that microphone will be Microphone [1]. The external microphones connected to the input connectors starts from Microphone [2]. For DX70 and DX80, Microphone [1] refers to the selected audio device, which may be either the built-in microphone, or a connected headset or handset. Refer to the xStatus Audio SelectedDevice and xCommand Audio Select commands for more information about the selected device.

**ConnectorType:**

```
HDMI/Line/Microphone [ SX80 MX200G2/MX300G2 MX700/MX800/MX800D ]
Line/Microphone [ SX20 ]
HDMI/Microphone [ DX70/DX80 SX10 RoomKit RoomKitMini CodecPlus CodecPro Room55 Room70/ Room55D Room70G2 ]
```

Select the connector type.

---

xCommand Audio VuMeter StopAll

Applies to: All products
Requires user role: ADMIN, USER

Stop all VU meters.

**USAGE:**

```
xCommand Audio VuMeter StopAll
```
Bookings commands

xCommand Bookings Clear
Applies to: All products
Requires user role: ADMIN, USER
Clear the current stored list of bookings.

USAGE:
   xCommand Bookings Clear

xCommand Bookings Get
Applies to: All products
Requires user role: ADMIN, USER
Get the booking information for a specific ID.

USAGE:
   xCommand Bookings Get Id: "Id"
   where
   Id:
       String (0, 128)
       The booking ID of a call or conference.

xCommand Bookings List
Applies to: All products
Requires user role: ADMIN, USER
List the stored bookings for the system. The list of booking details is received from the management system. All parameters are optional, and can be used to limit the search result. If no parameters are set, past, present and future bookings are all listed. To avoid listing bookings from yesterday and before, use DayOffset = 0.

USAGE:
   xCommand Bookings List [Days: Days] [DayOffset: DayOffset] [Limit: Limit] [Offset: Offset]
   where
   Days:
       Integer (1..365)
       Number of days to retrieve bookings from.
   DayOffset:
       Integer (0..365)
       Which day to start the search from (today: 0, tomorrow: 1, ...).
       Default value: 0
   Limit:
       Integer (1..65534)
       Max number of bookings to list.
   Offset:
       Integer (0..65534)
       Offset number of bookings for this search.
       Default value: 0
xCommand Bookings NotificationSnooze

Applies to: All products
Requires user role: ADMIN, USER

Sets notifications for the stored bookings in this video system to snooze.

**USAGE:**
```
xCommand Bookings NotificationSnooze [Id: "Id"] [SecondsToSnooze: SecondsToSnooze]
```
where
- **Id:**
  - String (0..128)
  - The ID of the notification snooze setting.
- **SecondsToSnooze:**
  - Integer (1..3600)
  - The duration of the snooze period, in seconds.
  - Default value: 300

---

Call commands

**xCommand Call Accept**

Applies to: All products
Requires user role: ADMIN, USER

Accept an incoming call. If no CallId is specified, all incoming calls are accepted.

**USAGE:**
```
xCommand Call Accept [CallId: CallId]
```
where
- **CallId:**
  - Integer (0..65534)
  - The CallId is returned when the xCommand Dial command is run. During the call you can run the xStatus Call command to see the CallId.
  - Default value: 0

**xCommand Call Disconnect**

Applies to: All products
Requires user role: ADMIN, INTEGRATOR, USER

Disconnect a call.

**USAGE:**
```
xCommand Call Disconnect [CallId: CallId]
```
where
- **CallId:**
  - Integer (0..65534)
  - The CallId is returned when the xCommand Dial command is run. During the call you can run the xStatus Call command to see the CallId.
  - Default value: 0
xCommand Call DTMFSend
Applies to: All products
Requires user role: ADMIN, USER
Send DTMF tones to the far end.

**USAGE:**
xCommand Call DTMFSend [CallId: CallId] DTMFString: "DTMFString"
where
  CallId:
    Integer (0..65534)
    The CallId is returned when the xCommand Dial command is run. During the call you can run the xStatus Call command to see the CallId.
    Default value: -1
  DTMFString:
    String (0..32)
    Enter the DTMF string.

xCommand Call FarEndControl Camera Move
Applies to: All products
Requires user role: ADMIN, USER
Move the far end camera (the remote camera).
NOTE: The far end camera moves in the specified direction until the stop command (ref: xCommand FarEndControl Camera Stop) is issued.

**USAGE:**
xCommand Call FarEndControl Camera Move [CallId: CallId] Value: Value
where
  CallId:
    Integer (0..65534)
    The CallId is returned when the xCommand Dial command is run. During the call you can run the xStatus Call command to see the CallId.
    Default value: -1
  Value:
    Left/Right/Up/Down/ZoomIn/ZoomOut
    Select the action for how to move the camera.

xCommand Call FarEndControl Camera Stop
Applies to: All products
Requires user role: ADMIN, USER
Stop the far end camera after the xCommand FarEndControl Camera Move has been issued.

**USAGE:**
xCommand Call FarEndControl Camera Stop [CallId: CallId]
where
  CallId:
    Integer (0..65534)
    The CallId is returned when the xCommand Dial command is run. During a call you can run the xStatus Call command to see the CallId.
    Default value: -1
xCommand Call FarEndControl RoomPreset Activate

Applies to: All products
Requires user role: ADMIN, USER

While in a call, this command is used to activate a preset on the far end codec. The preset covers the far end codec's camera positions and input video switcher settings.
The preset must be stored on the far end codec beforehand, either by using the xCommand Preset Store command locally on the far end codec, or by using the xCommand FarEndControl Preset Store command from a remote codec.

Note: The far end codec's xConfiguration Conference FarEndControl Mode setting must be switched On for the FarEndControl commands to work.

USAGE:
```plaintext
xCommand Call FarEndControl RoomPreset Activate [CallId: CallId] PresetId: PresetId
```
where
```
CallId:
   Integer (0..65534)
The CallId is required to identify the far end codec only when in a Multipoint call. The CallId is returned when issuing the xCommand Dial command. During a call you can run the xStatus Call command to see the CallId.
Default value: -1

PresetId:
   Integer (1..15)
The ID of the preset that is stored on the far end codec.
```

xCommand Call FarEndControl Source Select

Applies to: All products
Requires user role: ADMIN, USER

Select which video input source to use as the main source on the far end system.

USAGE:
```plaintext
xCommand Call FarEndControl Source Select [CallId: CallId] SourceId: SourceId
```
where
```
CallId:
   Integer (0..65534)
The CallId is returned when the xCommand Dial command is run. During a call you can run the xStatus Call command to see the CallId.
Default value: -1

SourceId:
   Integer (0..15)
Select a video input source on the far end.
```
xCommand Call FarEndMessage Send

Applies to: All products
Requires user role: ADMIN, USER

Send data between two codecs in a point-to-point call, for use with control systems or macros. Works with SIP calls only. Requires that the Conference FarEndMessage Mode is set to On.

**USAGE:**

```
xCommand Call FarEndMessage Send Text: "Text" Type: "Type" [CallId: CallId]
```

where

**Text:**

String (1, 1450)

Enter the message to be sent to the far end.

**Type:**

String (0, 255)

Enter the message type to be sent to the far end.

**CallId:**

Integer (0..65534)

The CallID is returned when the xCommand Dial command is run. During a call you can run the xStatus Call command to see the CallId.

xCommand Call FarEndMessage SStringSend

Applies to: SX80
Requires user role: ADMIN, USER

Send data between two codecs in a point-to-point call, for use with control systems or macros. Works with H.323 and SIP calls. Uses the H.224 data channel (UDP). We recommend to use the new version of the command: xCommand Call FarEndMessage Send.

**USAGE:**

```
xCommand Call FarEndMessage SStringSend Message: "Message" [CallId: CallId]
```

where

**Message:**

String (0, 255)

Enter the message to be sent to the far end.

**CallId:**

Integer (0..65534)

The CallID is returned when the xCommand Dial command is run. During a call you can run the xStatus Call command to see the CallId.

xCommand Call FarEndMessage TStringSend

Applies to: SX80
Requires user role: ADMIN, USER

Send data between two codecs in a point-to-point call, for use with control systems or macros. Works with H.323 calls only. Uses the H.245 control channel (TCP).

**USAGE:**

```
xCommand Call FarEndMessage TStringSend Message: "Message" CallId: CallId
```

where

**Message:**

String (0, 255)

Enter the message to be sent to the far end.

**CallId:**

Integer (0..65534)

The CallID is returned when the xCommand Dial command is run. During a call you can run the xStatus Call command to see the CallId.
xCommand Call Forward
Applies to: All products
Requires user role: ADMIN, USER
Specifies what number or URI you want to forward your incoming calls to. The display name is a local reference for the forwarded destination. A message, together with the local reference, is shown on screen when you have configured the system to forward all calls.

USAGE:
xCommand Call Forward DisplayName: "DisplayName" Number: "Number"

where
DisplayName:
String (0, 255)
The local reference for the forwarded destination.
Number:
String (0, 255)
The directory number or URI which you want to forward the incoming calls to.

xCommand Call Ignore
Applies to: All products
Requires user role: ADMIN, USER
Turns off the ringtone for the incoming call. The call can still be answered.

USAGE:
xCommand Call Ignore CallId: CallId

where
CallId:
Integer (0..65534)
The CallID is returned when the xCommand Dial command is run. During a call you can run the xStatus Call command to see the CallId.

xCommand Call Join
Applies to: All products
Requires user role: ADMIN, USER
Internal usage only.

USAGE:
xCommand Call Join [CallId: CallId] [Reason: Reason]

where
CallId:
Integer (0..65534)
The CallID is returned when the xCommand Dial command is run. During a call you can run the xStatus Call command to see the CallId.

Default value: 0
Reason:
Conference/Transfer/Other
Internal usage only.
Default value: Other
**xCommand Call Reject**

**Applies to:** All products

**Requires user role:** ADMIN, USER

Reject incoming call. If no call id is specified, all incoming calls are rejected.

**Usage:**

```
xCommand Call Reject [CallId: CallId]
```

where

**CallId:**

- `Integer (0..65534)`
  - The CallId is returned when the xCommand Dial command is run. During a call you can run the xStatus Call command to see the CallId.
  - Default value: 0

**xCommand Call Resume**

**Applies to:** All products

**Requires user role:** ADMIN, USER

Resume a call that have been put on hold.

**Usage:**

```
xCommand Call Resume [CallId: CallId]
```

where

**CallId:**

- `Integer (0..65534)`
  - The CallId is returned when the xCommand Dial command is run. During a call you can run the xStatus Call command to see the CallId.
  - Default value: 0

**xCommand Call UnattendedTransfer**

**Applies to:** All products

**Requires user role:** ADMIN, USER

Transfers an ongoing call to another participant. Fully supported for SIP calls only.

**Usage:**

```
xCommand Call UnattendedTransfer CallId: CallId Number: "Number"
```

where

**CallId:**

- `Integer (0..65534)`
  - The CallId is returned when the xCommand Dial command is run. During a call you can run the xStatus Call command to see the CallId.

**Number:**

- `String (0, 255)`
  - The number the call is transferred to.
CallHistory commands

xCommand CallHistory AcknowledgeAllMissedCalls
Applies to: All products
Requires user role: ADMIN, USER
Turns off the missed calls indicator on the touch controller for all missed calls.

USAGE:
  xCommand CallHistory AcknowledgeAllMissedCalls

xCommand CallHistory AcknowledgeMissedCall
Applies to: All products
Requires user role: ADMIN, USER
Turns off the missed calls indicator on the touch controller for the specified call.

USAGE:
  xCommand CallHistory AcknowledgeMissedCall CallHistoryId: CallHistoryId
  [AcknowledgeConsecutiveDuplicates: AcknowledgeConsecutiveDuplicates]
  where
    CallHistoryId: Integer (1..2147483647)
    CallHistoryId for the call in question. Run xCommand CallHistory Get to get the id number.
    AcknowledgeConsecutiveDuplicates: False/True
    You can include or exclude all surrounding calls with duplicate information.
    Default value: False

xCommand CallHistory DeleteAll
Applies to: All products
Requires user role: ADMIN, USER
Deletes all information on previous calls.

USAGE:
  xCommand CallHistory DeleteAll [Filter: Filter]
  where
    Filter: All/Missed/Placed/Received
    You can filter which calls to delete.
    Default value: All

xCommand CallHistory DeleteEntry
Applies to: All products
Requires user role: ADMIN, USER
Deletes all information on the specified call.

USAGE:
  xCommand CallHistory DeleteEntry CallHistoryId: CallHistoryId
  [DeleteConsecutiveDuplicates: DeleteConsecutiveDuplicates]
  where
    CallHistoryId: Integer (1..2147483647)
    CallHistoryId for the call in question. Run xCommand CallHistory Get to get the id number.
    DeleteConsecutiveDuplicates: False/True
    You can delete the surrounding calls with duplicate information or not.
    Default value: False
**xCommand CallHistory Get**

**Applies to:** All products

**Requires user role:** ADMIN, USER

Retrieve all information on previous calls made on the video system.

**USAGE:**

```
xCommand CallHistory Get [Filter: Filter] [Offset: Offset] [Limit: Limit] [DetailLevel: DetailLevel] [SearchString: "SearchString"] [CallHistoryId: CallHistoryId]
```

**where**

- **Filter:**
  - All/Missed/AnsweredElsewhere/Forwarded/Placed/NoAnswer/Received/Rejected/UnacknowledgedMissed
  - You can filter which calls to retrieve.
  - Default value: All

- **Offset:**
  - Integer (0..65534)
  - Sets the call from which to start.
  - Default value: 0

- **Limit:**
  - Integer (0..65534)
  - Defines the amount of calls in the output.
  - Default value: 65534

- **DetailLevel:**
  - Basic/Full
  - Sets the level of detail for the information on these calls.
  - Default value: Basic

- **SearchString:**
  - String (0, 255)
  - Allows you to set the command to apply to a specified display name or call back number.
  - Default value: ""

- **CallHistoryId:**
  - Integer (1..2147483647)
  - CallHistoryId for the call in question.

**xCommand CallHistory Recents**

**Applies to:** All products

**Requires user role:** ADMIN, USER

Retrieve aggregated information on previous calls made on the video system.

**USAGE:**

```
xCommand CallHistory Recents [Filter: Filter] [Offset: Offset] [Limit: Limit] [DetailLevel: DetailLevel] [SearchString: "SearchString"] [Order: Order]
```

**where**

- **Filter:**
  - All/Missed/AnsweredElsewhere/Forwarded/Placed/NoAnswer/Received/Rejected/UnacknowledgedMissed
  - You can filter which calls to retrieve.
  - Default value: All

- **Offset:**
  - Integer (0..65534)
  - Sets the call from which to start.
  - Default value: 0

- **Limit:**
  - Integer (0..65534)
  - Defines the amount of calls in the output.
  - Default value: 65534

- **DetailLevel:**
  - Basic/Full
  - Sets the level of detail for the information on these calls.
  - Default value: Basic

- **SearchString:**
  - String (0, 255)
  - Allows you to set the command to apply to a specified display name or call back number.
  - Default value: ""

- **Order:**
  - OccurrenceTime/OccurrenceFrequency
  - Defines the order in which the previous calls are presented.
  - Default value: OccurrenceTime
Camera commands

xCommand Camera PositionReset

 Applies to: SX10  SX20  SX80  MX200G2/MX300G2  MX700/MX800/MX800D  CodecPlus  CodecPro  Room70/Room55D  Room70G2

Requires user role: ADMIN, INTEGRATOR, USER

Reset the camera position to default position.

USAGE:

xCommand Camera PositionReset [Axis: Axis] CameraId: CameraId

where

Axis:  
All/Focus/PanTilt/Zoom
Select which function to reset. If not specified all are reset.
Default value: All

CameraId:
  
Integer (1..1) [SX10 SX20 MX200G2/MX300G2]
Integer (1..7) [MX700/MX800/MX800D CodecPlus CodecPro Room70/Room55D Room70G2]
The ID of the camera preset you want to reset.

xCommand Camera PositionSet

 Applies to: SX10  SX20  SX80  MX200G2/MX300G2  MX700/MX800/MX800D  RoomKit  RoomKitMini  CodecPlus  CodecPro  Room70/Room55D  Room70G2

Requires user role: ADMIN, INTEGRATOR, USER

Set the camera position.

USAGE:

xCommand Camera PositionSet CameraId: CameraId [Focus: Focus] [Lens: Lens] [Pan: Pan] [Tilt: Tilt] [Zoom: Zoom]

where

CameraId:
  
Integer (1..1) [SX10 SX20 MX200G2/MX300G2 RoomKit RoomKitMini Room55]
Integer (1..7) [SX80 MX700/MX800/MX800D CodecPlus CodecPro Room70/Room55D Room70G2]
The ID of the camera preset you want to reset.

Focus:
  
Integer (0..65535)
Focus the camera near or far.

Lens:
  
Wide/Center/Left/Right
Sets the camera's lens position.

Pan:
  
Integer (-10000..10000)
Move the camera to the left or right.

Tilt:
  
Integer (-2500..2500)
Move the camera up or down.

Zoom:
  
Integer (0..11800)
Zoom in or out.
xCommand Camera Preset Activate

Applies to: SX10  SX20  SX80  MX200G2/MX300G2  MX700/MX800/MX800D  RoomKit  RoomKitMini  CodecPlus
CodecPro  Room55  Room70/Room55D  Room70G2

Requires user role: ADMIN, USER

Activate one of the stored camera presets.
Note that the xCommand Camera Preset commands applies to an individual camera. This is in contrast to the xCommand Preset commands where a single preset covers ALL connected cameras plus the Video Input switcher settings.

USAGE:
xCommand Camera Preset Activate PresetId: PresetId

where

PresetId:
Integer (1..35)
The ID of the camera preset you want to activate.

xCommand Camera Preset Edit

Applies to: SX10  SX20  SX80  MX200G2/MX300G2  MX700/MX800/MX800D  RoomKit  RoomKitMini  CodecPlus
CodecPro  Room55  Room70/Room55D  Room70G2

Requires user role: ADMIN, USER

Edit a stored camera preset. You can change the name of the camera preset and its position in the list that is returned by the xCommand Camera Preset List command. You can also change whether or not this preset is the default position for the associated camera.

Note that the xCommand Camera Preset commands applies to an individual camera. This is in contrast to the xCommand Preset commands where a single preset covers ALL connected cameras and the Video Input switcher settings.

USAGE:
xCommand Camera Preset Edit PresetId: PresetId [ListPosition: ListPosition] [Name: "Name"] [DefaultProsition: DefaultProsition]

where

PresetId:
Integer (1..35)
The ID of the camera preset you want to edit.

ListPosition:
Integer (1..35)
The position in the list returned by the xCommand Camera Preset List command.

Name:
String (0, 255)
The name of the camera preset. It will be used in the list returned by the xCommand Camera Preset List command.

DefaultProsition:
False/True
Defines whether or not this preset is the default position for the associated camera. Note that each camera can only have one default position, so if set, the old default preset will automatically be marked as not default.

xCommand Camera Preset ActivateDefaultPosition

Applies to: SX10  SX20  SX80  MX200G2/MX300G2  MX700/MX800/MX800D  RoomKit  RoomKitMini  CodecPlus
CodecPro  Room55  Room70/Room55D  Room70G2

Requires user role: ADMIN, USER

Sets the cameras to their default position, if one is defined. The default position is defined by xCommand Camera Preset Store or by xCommand Camera Preset Edit. Only one default position can be defined per camera.

USAGE:
xCommand Camera Preset ActivateDefaultPosition [CameraId: CameraId]

where

CameraId:
Integer (1,..1) [ SX10  SX20  MX200G2/MX300G2  RoomKit  RoomKitMini  Room55 ]
Integer (1,..7) [ SX80  MX700/MX800/MX800D  CodecPlus  CodecPro  Room70/Room55D  Room70G2 ]
The ID of the camera preset you want to activate. If CameraId is not specified, all cameras will be set in their respective default position, if one is defined.
xCommand Camera Preset List

Applies to: SX10 SX20 SX80 MX200G2/MX300G2 MX700/MX800/MX800D RoomKit RoomKitMini CodecPro Room55 Room70/Room55D Room70G2

Requires user role: ADMIN, USER

List information about available camera presets.

Note that the xCommand Camera Preset commands applies to an individual camera. This is in contrast to the xCommand Preset commands where a single preset covers ALL connected cameras plus the Video Input switcher settings.

**USAGE:**

```
xCommand Camera Preset List [CameraID: CameraId] [DefaultPosition: DefaultPosition]
```

where

- **CameraId**: Integer (1..1) [ SX10 SX20 SX80 MX200G2/MX300G2 RoomKit RoomKitMini Room55 ]
- **DefaultPosition**: Integer (1..7) [ SX80 MX700/MX800/MX800D CodecPro CodecPro Room70/Room55D Room70G2 ]

Only list presets for the specified camera.

**DefaultPosition:**

- **False/True**
  - List default positions only, or only those that are not default positions.

xCommand Camera Preset Remove

Applies to: SX10 SX20 SX80 MX200G2/MX300G2 MX700/MX800/MX800D RoomKit RoomKitMini CodecPro Room55 Room70/Room55D Room70G2

Requires user role: ADMIN, USER

Remove a camera preset.

Note that the xCommand Camera Preset commands applies to an individual camera. This is in contrast to the xCommand Preset commands where a single preset covers ALL connected cameras plus the Video Input switcher settings.

**USAGE:**

```
xCommand Camera Preset Remove PresetId: PresetId
```

where

- **PresetId**: Integer (1..35)
  - The ID of the camera preset you want to remove.

xCommand Camera Preset Show

Applies to: SX10 SX20 SX80 MX200G2/MX300G2 MX700/MX800/MX800D RoomKit RoomKitMini CodecPro Room55 Room70/Room55D Room70G2

Requires user role: ADMIN, USER

Shows the preset details for the requested PresetId.

**USAGE:**

```
xCommand Camera Preset Show PresetId: PresetId
```

where

- **PresetId**: Integer (1..35)
  - The ID of the camera preset you wish to see.
xCommand Camera Preset Store

**Applies to:** SX10  SX20  SX80  MX200G2/MX300G2  MX700/MX800/MX800D  RoomKit  RoomKitMini  CodecPlus  CodecPro  Room55  Room70/Room55D  Room70G2

Requires user role: ADMIN, USER

Store the current position (pan and tilt), zoom and focus of the chosen camera. The camera is identified by the CameraId parameter.

Note that the xCommand Camera Preset commands applies to an individual camera. This is in contrast to the xCommand Preset commands where a single preset covers ALL connected cameras plus the Video Input switcher settings. The xCommand Camera Preset commands are useful when you want to handle multiple camera positions individually per camera, rather than working with complete sets of camera positions. The individual camera presets are not available for far end control.

**USAGE:**

```
xCommand Camera Preset Store [PresetId: PresetId] CameraId: CameraId [ListPosition: ListPosition] [Name: "Name"] [TakeSnapshot: TakeSnapshot] [DefaultProsition: DefaultProsition]
```

where

- **PresetId**: Integer (1..35)
  The ID of this camera preset. If not set explicitly, the codec will assign a preset ID automatically.

- **CameraId**: Integer (1..1) [ SX10  SX20  MX200G2/MX300G2  RoomKit  RoomKitMini  Room55 ]
  Integer (1..7) [ SX80  MX700/MX800/MX800D  CodecPlus  CodecPro  Room70/Room55D  Room70G2 ]
  Select the camera for which to store the preset position.

- **ListPosition**: Integer (1..35)
  The new camera preset's position in the list returned by the xCommand Camera Preset List command.

- **Name**: String (0, 255)
  The name of the new camera preset. It will be used in the list returned by the xCommand Camera Preset List command.

- **TakeSnapshot**: False/True
  Allow or disallow snapshot of the preview.

- **DefaultProsition**: False/True
  Defines whether or not this preset shall be the default position of the associated camera.
  Note that each camera can hold only one default position, so if set, the old default preset will automatically be marked as not default.
xCommand Camera Ramp

Applies to: SX10 SX20 SX80 MX200G2/MX300G2 MX700/MX800/MX800D RoomKit RoomKitMini CodecPlus CodecPro Room55 Room70/Room70G2 Room70G2

Requires user role: ADMIN, INTEGRATOR, USER

Move the camera in a specified direction. The camera moves at specified speed until a stop command is issued. In a daisy chain, you need to know the CameraId for the camera you want to address. Be aware that pan and tilt can be operated simultaneously, but no other combinations. In the latter case only the first operation specified is executed. For example, if you try to run both zoom and pan at the same time, only zoom is executed.

NOTE: You must run a stop command to stop the camera, see the example below.

USAGE:

xCommand Camera Ramp CameraId: CameraId [Pan: Pan] [PanSpeed: PanSpeed] [Tilt: Tilt] [TiltSpeed: TiltSpeed] [Zoom: Zoom] [ZoomSpeed: ZoomSpeed] [Focus: Focus]

where

CameraId:

Integer (1..7) [ SX80 MX700/MX800/MX800D CodecPlus CodecPro Room70/Room55 Room70G2 ]
Integer (1..1) [ SX10 SX20 MX200G2/MX300G2 RoomKit RoomKitMini Room55 ]

Select the camera.

Pan:

Left/Right/Stop

Move the camera to the Left or Right, followed by Stop.

PanSpeed:

Integer (1..15)

Set the pan speed.

Tilt:

Down/Up/Stop

Move the camera Up or Down, followed by Stop.

TiltSpeed:

Integer (1..15)

Set the tilt speed.

Zoom:

In/Out/Stop

Zoom the camera In or Out, followed by Stop.

ZoomSpeed:

Integer (1..15)

Set the zoom speed.

Focus:

Far/Near/Stop

Focus the camera Far or Near, followed by Stop.

xCommand Camera TriggerAutofocus

Applies to: SX10 SX20 SX80 MX200G2/MX300G2 MX700/MX800/MX800D CodecPlus CodecPro Room70/Room55 Room70G2

Requires user role: ADMIN, USER

Trigger the auto-focus functionality. The camera must support auto-focus functionality. If the camera is daisy chained, the CameraId is given by its place in the chain.

USAGE:

xCommand Camera TriggerAutofocus CameraId: CameraId

where

CameraId:

Integer (1..7) [ SX80 MX700/MX800/MX800D CodecPlus CodecPro Room70/Room55 Room70G2 ]
Integer (1..1) [ SX10 SX20 MX200G2/MX300G2 ]

Select the camera to auto-focus.
Cameras commands

xCommand Cameras AutoFocus Diagnostics Start

Applies to: SX80 MX700/MX800/MX800D RoomKit RoomKitMini CodecPlus CodecPro Room55 Room70/Room55D Room70G2
Requires user role: ADMIN, INTEGRATOR
Start diagnostics on auto focus.

USAGE:
xCommand Cameras AutoFocus Diagnostics Start CameraId: CameraId
where
    CameraId:
        1..7 { SX80 MX700/MX800/MX800D CodecPlus CodecPro Room70/Room55D Room70G2 }

Select which camera to diagnose.

xCommand Cameras AutoFocus Diagnostics Stop

Applies to: SX80 MX700/MX800/MX800D RoomKit RoomKitMini CodecPlus CodecPro Room55 Room70/Room55D Room70G2
Requires user role: ADMIN, INTEGRATOR
Stop diagnostics on auto focus.

USAGE:
xCommand Cameras AutoFocus Diagnostics Stop CameraId: CameraId
where
    CameraId:
        1..7 { SX80 MX700/MX800/MX800D CodecPlus CodecPro Room70/Room55D Room70G2 }

Select which camera to diagnose.

xCommand Cameras PresenterTrack ClearPosition

Applies to: SX80 MX700/MX800/MX800D CodecPro Room70G2
Requires user role: ADMIN, INTEGRATOR, USER
Clear the stored presenter tracking camera position for the overview image of the stage. The PresenterTrack feature will still work after the camera position has been cleared, but the camera will not view a predefined position upon activation.
For SX80 and Codec Pro: This setting applies only when using a Precision 60 camera or SpeakerTrack 60 camera.

USAGE:
xCommand Cameras PresenterTrack ClearPosition
xCommand Cameras PresenterTrack Set

**Applies to:** SX80  MX700/MX800/MX800D  CodecPro  Room70G2 

**Requires user role:** ADMIN, INTEGRATOR, USER

Set the presenter tracking mode.

This command takes effect only if the PresenterTrack feature is enabled. Sign in to the video system's web interface and use the Cameras PresenterTrack Enabled setting to enable or disable the feature.

For SX80 and Codec Pro: This setting applies only when using a Precision 60 camera or SpeakerTrack 60 camera.

**USAGE:**

xCommand Cameras PresenterTrack Set Mode: **Mode**

where

**Mode:**

- **Off**/Follow/Diagnostic/Background/Setup/Persistent
  - **Off:** Turn off presenter tracking.
  - **Follow:** Turn on presenter tracking. This is the default mode when the feature is activated from the Touch user interface. Presenter tracking is automatically turned off when camera moves to a different preset, when another camera is selected, or when standby is activated.
  - **Diagnostic:** Turn on diagnostic mode in order to troubleshoot presenter tracking, or to see exactly what happens on the video system screen. In diagnostics mode there are several activities on the screen. The screen will show the overview image, and the rectangles/squares listed below will be visible:
    - RED: The trigger zone.
    - YELLOW: The cropped image of the presenter. Visible only when a face is being tracked.
    - GREEN: Indicates that a face is detected and that it is tracked.
    - GREEN BLINKING FILLED: Indicates a positive face detection. If the tracked individual does not get a valid face-read the square becomes red.
    - RED BLINKING FILLED: Indicates a false face detection. After some seconds the tracking stops.
    - BLUE: A face is detected but the face is not tracked.
  - **Background:** This setting is used by the codec's internal scripts. Turns on presenter tracking with no cropping of the image.
  - **Setup:** This setting is used by the codec’s web interface to show the trigger zone on the video system screen when setting up the PresenterTrack feature.
  - **Persistent:** This setting is used by the codec’s internal scripts. Turns on presenter tracking in persistent mode. Persistent mode is automatically turned off when camera moves to a different preset.

xCommand Cameras PresenterTrack StorePosition

**Applies to:** SX80  MX700/MX800/MX800D  CodecPro  Room70G2 

**Requires user role:** ADMIN, INTEGRATOR, USER

Store the current position of the presenter tracking camera for the overview image of the stage. The presenter tracking camera will move to this position when activating the feature.

For SX80 and Codec Pro: This setting applies only when using a Precision 60 camera or SpeakerTrack 60 camera.

**USAGE:**

xCommand Cameras PresenterTrack StorePosition

xCommand Cameras SpeakerTrack Activate

**Applies to:** SX80  MX700/MX800/MX800D  RoomKit  RoomKitMini  CodecPlus  CodecPro  Room55  Room70/Room55D  Room70G2 

**Requires user role:** ADMIN, USER

Activate SpeakerTrack or Best Overview mode. Requires that xConfiguration Cameras SpeakerTrack Mode is set to Auto (default).

This command applies only to video systems with cameras that support speaker tracking or best overview.

**USAGE:**

xCommand Cameras SpeakerTrack Activate
xCommand Cameras SpeakerTrack Deactivate

Applies to: SX80  MX700/MX800/MX800D  RoomKit  RoomKitMini  CodecPlus  CodecPro  Room55  Room70/Room55D  Room70G2

Requires user role: ADMIN, USER

Deactivate SpeakerTrack or Best Overview mode.
This command applies only to video systems with cameras that support speaker tracking or best overview.

USAGE:

```
xCommand Cameras SpeakerTrack Deactivate
```

---

xCommand Cameras SpeakerTrack Diagnostics Start

Applies to: SX80  MX700/MX800/MX800D  RoomKit  RoomKitMini  CodecPlus  CodecPro  Room55  Room70/Room55D  Room70G2

Requires user role: ADMIN, INTEGRATOR, USER

Starts diagnostics on the camera's tracking.
This command applies only to video systems with cameras that support speaker tracking or best overview.
The Tracking parameter only applies to the SpeakerTrack 60 camera and MX700/MX800 with dual camera.

USAGE:

```
xCommand Cameras SpeakerTrack Diagnostics Start
```

**Tracking parameter**

```
[Tracking: Tracking]
```

where

- `Tracking`: Displays diagnostics from both cameras simultaneously. In this mode the tracking is determined by who is talking in the room identical to SpeakerTrack's standard behavior.
- `Off`: Displays diagnostics from one camera at a time. Diagnostics is switched from one camera to the other in 15 seconds intervals, and camera related diagnostics are shown for the active camera. Both cameras stay in full wide position. Use Tracking: Off when you wish to see the tracking diagnostics from one camera at a time.

Default value: On

---

xCommand Cameras SpeakerTrack Diagnostics Stop

Applies to: SX80  MX700/MX800/MX800D  RoomKit  RoomKitMini  CodecPlus  CodecPro  Room55  Room70/Room55D  Room70G2

Requires user role: ADMIN, INTEGRATOR, USER

Stops diagnostics on the camera's tracking.

USAGE:

```
xCommand Cameras SpeakerTrack Diagnostics Stop
```

---

xCommand Cameras SpeakerTrack Whiteboard ActivatePosition

Applies to: SX80  MX700/MX800/MX800D  RoomKit  CodecPlus  CodecPro  Room55  Room70/Room55D  Room70G2

Requires user role: ADMIN, USER

Moves the specified camera to the position stored with xCommand Cameras SpeakerTrack Whiteboard StorePosition.

USAGE:

```
xCommand Cameras SpeakerTrack Whiteboard ActivatePosition CameraId: CameraId [WhiteboardId: WhiteboardId]
```

where

- `CameraId`: 
  - `Integer(1..1)` 
  - `Integer(1..2)` 
  - `Integer(1..7)` 
  - `Integer(1..8)` 

  The ID of the camera that is being positioned.

- `WhiteboardId`: 
  - `Integer(1..8)` 

  The id set for the camera position used for the snap-to-whiteboard feature. Currently only id 1 can be used.

Default value: 1

---
xCommand Cameras SpeakerTrack Whiteboard AlignPosition

 Applies to: SX80, MX700/MX800/MX800D, RoomKit, CodecPlus, CodecPro, Room55, Room70/Room55D, Room70G2

 Requires user role: ADMIN, USER

 Only applicable for MX700 and MX800 with a dual camera, and for SX80 and Codec Pro with a SpeakerTrack 60 camera. Not applicable for any other products.

 Align the position of the second camera to the first camera’s stored position. You must also set the distance to a whiteboard.

 USAGE:

 xCommand Cameras SpeakerTrack Whiteboard AlignPosition CameraId: CameraId
 Distance: Distance

 where

 CameraId: [ SX80, MX700/MX800/MX800D, CodecPro, Room70G2 ]
 Integer (1..7)
 The ID of the camera that is being positioned.

 Distance: [ SX80, MX700/MX800/MX800D, CodecPro, Room70G2 ]
 Integer (300..1500)
 Set distance to whiteboard in centimeters. Use an accurate measurement for the feature to work seamlessly.

 xCommand Cameras SpeakerTrack Whiteboard SetDistance

 Applies to: SX80, MX700/MX800/MX800D, RoomKit, CodecPlus, CodecPro, Room55, Room70/Room55D, Room70G2

 Requires user role: ADMIN, USER

 Set the cameras distance to the whiteboard. This information is needed by the camera to frame the whiteboard automatically.

 USAGE:

 xCommand Cameras SpeakerTrack Whiteboard SetDistance Distance: Distance
 [WhiteboardId: WhiteboardId]

 where

 Distance: Integer (0..65534)
 Set distance to whiteboard in centimeters. Use an accurate measurement for the feature to work seamlessly.

 WhiteboardId: Integer (1..8)
 The id set for the camera position used for the snap-to-whiteboard feature. Currently only id 1 can be used.

 Default value: 1
xCommand Cameras SpeakerTrack Whiteboard StorePosition

**Applies to:** SX80, MX700/MX800/MX800D, RoomKit, CodecPlus, CodecPro, Room55, Room70/Room55D, Room70G2

**Requires user role:** ADMIN, USER

Store the position of the specified camera as the Snap to Whiteboard position. Frame the image so that there is room around the whiteboard for the speaker. To use the Snap to Whiteboard feature it must be enabled with xConfiguration Cameras SpeakerTrack Whiteboard Mode and tracking must be enabled with xConfiguration Cameras SpeakerTrack Mode.

*Note:* For MX700 and MX800 with a dual camera, and for SX80 and Codec Pro with a SpeakerTrack 60 camera, you must store a snap-to-whiteboard position for both cameras.

**USAGE:**

```
xCommand Cameras SpeakerTrack Whiteboard StorePosition CameraId: CameraId [WhiteboardId: WhiteboardId]
```  

where

- **CameraId:**
  - `Integer(1..1)` [RoomKit, Room55, Room70/Room55D]
  - `Integer(1..2)` [CodecPlus]
  - `Integer(1..7)` [SX80, MX700/MX800/MX800D, CodecPro, Room70G2]
  
- **WhiteboardId:**  
  - `Integer(1..8)`
  
  You can give the position an id number. Currently the only id that can be used is 1.
  
  Default value: 1

---

**Conference commands**

xCommand Conference Call AuthenticationResponse

**Applies to:** All products

**Requires user role:** ADMIN, USER

This command is only available for Cisco Webex registered devices. The command gives a response to an authentication request based on the Conference Call[n] AuthenticationRequest status.

**USAGE:**

```
xCommand Conference Call AuthenticationResponse [CallId: CallId] ParticipantRole: ParticipantRole [Pin: Pin]
```  

where

- **CallId:**  
  - `Integer(1..65534)`
  
  Unique identifier of the call. During a call you can run the xStatus Call command to see the CallId.
  
  Default value: 0

- **ParticipantRole:** Host/Panelist/Guest
  - **Host:** Join as host.
  - **Panelist:** Join as panelist.
  - **Guest:** Join as guest.

- **Pin:**  
  - `String(0, 32)`
  
  PIN code. Must be provided if joining as host, panelist or as guest when the Conference Call[n] AuthenticationRequest status indicates that a PIN code must provided.
  
  Default value: ""
xCommand Conference DoNotDisturb Activate

Applies to: All products
 Requires user role: ADMIN, INTEGRATOR, USER

This command switches on the Do Not Disturb mode, and the Timeout parameter allows you to control when it is switched off again. When Do Not Disturb is switched on, all incoming calls are rejected and registered as missed calls. The calling side receives a busy signal.

USAGE:

xCommand Conference DoNotDisturb Activate [Timeout: Timeout]
where

Timeout:

Integer (1..1440)
Set the number of minutes before Do Not Disturb is switched off. If not set, Do Not Disturb times out after 1440 minutes (24 hours).

xCommand Conference DoNotDisturb Deactivate

Applies to: All products
 Requires user role: ADMIN, INTEGRATOR, USER

Switch off the Do Not Disturb mode. When Do Not Disturb is switched off incoming calls come through as normal.

USAGE:

xCommand Conference DoNotDisturb Deactivate

xCommand Conference Participant Admit

Applies to: All products
 Requires user role: ADMIN, USER

Admits or lets in a participant that is waiting to be admitted into the call or meeting. This command is only available Cisco Webex registered devices.

A participant is waiting to be admitted if he has status "waiting" in the result from the Conference ParticipantList Search command (*r ParticipantListSearchResult Participant [n] Status = "waiting").

USAGE:

xCommand Conference Participant Admit CallId: CallId ParticipantId: "ParticipantId"
where

CallId:

Integer (0..65534)
Unique identifier of the call. During a call you can run the xStatus Call command to see the CallId.

ParticipantId:

String (0, 255)
Unique identifier of a participant in the call.
xCommand Conference Participant Disconnect

Applies to: All products
Requires user role: ADMIN, USER

Disconnects the participant from a call or meeting. It is only possible to disconnect a partici-
\[pant if the Conference Call[n] Capabilities ParticipantDisconnect status for the meeting shows
Available.

USAGE:
\[xCommand Conference Participant Disconnect CallId: \(CallId\) ParticipantId: \("ParticipantId"\)
where
\[CallId:
\[Integer (0..65534)
Unique identifier of the call. During a call you can run the xStatus Call command to see the
CallId.
\[ParticipantId:
\[String (0, 255)
Unique identifier of a participant in the call.

xCommand Conference Participant Mute

Applies to: All products
Requires user role: ADMIN, USER

Mutes the participant in the call or meeting. It is only possible to mute a participant if the
Conference Call[n] Capabilities ParticipantMute status shows Available.

USAGE:
\[xCommand Conference Participant Mute AudioMute: \(AudioMute\) CallId: \(CallId\)
ParticipantId: \("ParticipantId"\)
where
\[AudioMute:
\[On/Off
Indicate the desired mute state of the participant.
\[CallId:
\[Integer (0..65534)
Unique identifier of the call. During a call you can run the xStatus Call command to see the
CallId.
\[ParticipantId:
\[String (0, 255)
Unique identifier of a participant in the call.
xCommand Conference Participant Search

Applies to: All products
Requires user role: ADMIN, USER

Searches the list of participants in the call or meeting. There is a participant list that can be searched only if the Conference Call[n] Capabilities ParticipantList status shows Available.

USAGE:
xCommand Conference Participant Search [CallId: \CallId\] [Limit: \Limit\] [Offset: \Offset\] [SearchString: "\SearchString"]

where

CallId:
  Integer (0..65534)
  Unique identifier of the call. During a call you can run the xStatus Call command to see the CallId.
  Default value: 0

Limit:
  Integer (0..65534)
  Limit the number of records (participants) in the result set to this number. For example, if the limit is set to 10, the result set will contain only 10 entries even if the total number of hits is larger.
  Default value: 200

Offset:
  Integer (0..65534)
  Get records starting with this offset in a search.
  Default value: 0

SearchString:
  String (0,255)
  URI or DisplayName. Leave this parameter empty if you want the search to return all participants in the call.
  Default value: ""

xCommand Conference Recording Pause

Applies to: All products
Requires user role: ADMIN, USER

Define if the recording of a meeting shall be paused. When you are recording a meeting, you can use this setting if you want to pause the recording. You can resume the recording by using the command Conference Recording Resume.

USAGE:
xCommand Conference Recording Pause [CallId: \CallId\]

where

CallId:
  Integer (1..65534)
  Identify CallID for the remote participant.

xCommand Conference Recording Resume

Applies to: All products
Requires user role: ADMIN, USER

Define if the recording of a meeting shall be resumed. When you are recording a meeting, you can use this setting if you want to resume a recording that has previously been paused.

USAGE:
xCommand Conference Recording Resume [CallId: \CallId\]

where

CallId:
  Integer (1..65534)
  Identify CallID for the remote participant.
xCommand Conference Recording Start
Applies to: All products
Requires user role: ADMIN, USER
Define if the meeting shall be recorded. Once you are in a meeting, you can use this setting if you want to start recording. Note that the recording commands are only available if your infrastructure (Cisco Meeting Server) supports recording.

 USAGE:
 xCommand Conference Recording Start [CallId: CallId]
 where
   CallId: Integer (1..65534)
   Identify CallID for the remote participant.

xCommand Conference Recording Stop
Applies to: All products
Requires user role: ADMIN, USER
Define if the recording of a meeting shall be stopped. When you are recording a meeting, you can use this setting to stop recording.

 USAGE:
 xCommand Conference Recording Stop [CallId: CallId]
 where
   CallId: Integer (1..65534)
   Identify CallID for the remote participant.

xCommand Conference SpeakerLock Release
Applies to: All products
Requires user role: ADMIN, USER
Releases locked speaker set by xCommand Conference SpeakerLock Set. Default voice switching is switched back on.

 USAGE:
 xCommand Conference SpeakerLock Release

xCommand Conference SpeakerLock Set
Applies to: All products
Requires user role: ADMIN, USER
For manually locking one of the speakers to the prominent speaker position. This overrides the default voice switching.

 USAGE:
 xCommand Conference SpeakerLock Set Target: Target [CallId: CallId]
 where
   Target: Local/Remote
   Identifies local or remote participant.
   CallId: Integer (0..65534)
   Identify CallID for the remote participant. Only relevant if Target is set to "remote".
   Default value: 0
Diagnostics commands

xCommand Diagnostics Run

**Applies to:** All products
**Requires user role:** ADMIN

This command runs self-diagnostics commands on the system.

**USAGE:**
xCommand Diagnostics Run [ResultSet: ResultSet]

where

ResultSet:
- Alerts/All/None

You can filter the diagnostics results to alerts, all or none. If not set, the result will show all results.

Default value: Alerts

Dial commands

xCommand Dial

**Applies to:** All products
**Requires user role:** ADMIN, INTEGRATOR, USER

Dial out from the system. Returns information about the CallId and ConferenceId, which are required for some of the other commands.

**USAGE:**
xCommand Dial Number: "Number" [Protocol: Protocol] [CallRate: CallRate] [CallType: CallType] [BookingId: "BookingId"] [Appearance: Appearance] [DisplayName: "DisplayName"] [TrackingData: "TrackingData"]

where

Number:
- String (0, 255)
  - Enter the number or address.

Protocol:
- H320/H323/Sip/Spark
  - Select the call protocol.

CallRate:
- Integer (64..6000)
  - Set the call rate.

CallType:
- Audio/Video/Auto
  - Select a call type (audio or video). By selecting Auto, the system will detect the call type automatically.

BookingId:
- String (0, 255)
  - Any identifier that an external booking system (e.g. TMS, CTS-MAN) can use for its own references to match placed calls with the booking systems internal identifier for a meeting. This can be any string, e.g. a GUID. The booking Id is supplied in call logs, call events etc for the call.
  - Default value: ""
Appearance:
- Integer (1..999999999)
  Not applicable. For internal usage only.

DisplayName:
- String (0, 255)
  The display name of the remote participant.
  Default value: ""

TrackingData:
- String (0, 255)
  Adds a tag to a call, so that it can be identified in the call history.
  Default value: ""

---

**GPIO commands**

**xCommand GPIO ManualState Set**

**Applies to:** SX80, MX700/MX800/MX800D, CodecPro, Room70G2

Requires user role: ADMIN, USER

Set the state of a GPIO pin that is configured to OutputManualState mode (ref. xConfiguration GPIO Pin [1..4] Mode).

**USAGE:**

```
```

where
- **Pin1:**
  - High/Low
- **Pin2:**
  - High/Low
- **Pin3:**
  - High/Low
- **Pin4:**
  - High/Low
HttpClient commands

xCommand HttpClient Allow Hostname Add

 Applies to: All products
 Requires user role: ADMIN

 Adds an HTTP(S) server to the list of allowed servers (hosts).

 The HttpClient Allow Hostname commands let you set up and maintain a list of up to ten allowed
 hosts. As long as the list is not empty, you can send HTTP(S) requests only to the servers in
 the list. The check against the list is performed both when using insecure (HTTP) and secure
 (HTTPS) transfer of data.

 USAGE:
 xCommand HttpClient Allow Hostname Add Expression: "Expression"
 where
   Expression: String (2, 200)
               Regular expression that matches a host name or IP address of an HTTP(S) server.

xCommand HttpClient Allow Hostname Clear

 Applies to: All products
 Requires user role: ADMIN

 Removes all HTTP(S) servers from the list of allowed servers (hosts), leaving you with an empty
 list.

 USAGE:
 xCommand HttpClient Allow Hostname Clear

xCommand HttpClient Allow Hostname List

 Applies to: All products
 Requires user role: ADMIN

 Returns the list of allowed HTTP(S) servers (hosts).

 The HttpClient Allow Hostname commands let you set up and maintain a list of up to ten allowed
 hosts. As long as the list is not empty, you can send HTTP(S) requests only to the servers in
 the list. The check against the list is performed both when using insecure (HTTP) and secure
 (HTTPS) transfer of data.

 USAGE:
 xCommand HttpClient Allow Hostname List

xCommand HttpClient Allow Hostname Remove

 Applies to: All products
 Requires user role: ADMIN

 Removes an HTTP(S) server from the list of allowed servers (hosts). Use the HttpClient Allow
 Hostname List command to find the identifier of each entry in the list.

 USAGE:
 xCommand HttpClient Allow Hostname Remove Id: Id
 where
   Id: integer (0..9)
       The identifier of the HTTP(S) server you want to remove from the list.
**xCommand HttpClient Post**

**Applies to:** All products  
**Requires user role:** ADMIN  

Sends an HTTP(S) Post request to the server that is specified in the `Url` parameter.  

You can use the `AllowInsecureHTTPS` parameter to specify whether or not to validate the server’s certificate before sending data over HTTPS. This parameter has no effect unless the `xConfiguration HttpClient AllowInsecureHTTPS` is set to On.  

This is a multiline command, so the payload (data) follows after the parameters.

**USAGE:**

```
xCommand HttpClient Post [AllowInsecureHTTPS: AllowInsecureHTTPS] [Header: "Header"] [Timeout: Timeout] Url: "Url"
```

where

- **AllowInsecureHTTPS**:  
  - `False/True`  
  - If set to True the video system skips the certificate validation process, and sends data to the server anyway. If set to False, the server certificate is checked, and data is not sent to the server if the certificate validation fails.  
  - Default value: `False`

- **Header**:  
  - `String (0, 1024)`  
  - An HTTP header field. You can add up 20 Header parameters in one command, each holding one HTTP header field.

- **Timeout**:  
  - `Integer (1..30)`  
  - Timeout period in seconds. If the request is not completed during this period, the API will return an error.  
  - Default value: 30

- **Url**:  
  - `String (8, 2048)`  
  - The URL that the request will be sent to: `<Protocol> + <Host name or IP address of an HTTP(S) server> + <Path>`.  

**xCommand HttpClient Put**

**Applies to:** All products  
**Requires user role:** ADMIN  

Sends an HTTP(S) Put request to the server that is specified in the `Url` parameter.

You can use the `AllowInsecureHTTPS` parameter to specify whether or not to validate the server’s certificate before sending data over HTTPS. This parameter has no effect unless the `xConfiguration HttpClient AllowInsecureHTTPS` is set to On.

This is a multiline command, so the payload (data) follows after the parameters.

**USAGE:**

```
xCommand HttpClient Put [AllowInsecureHTTPS: AllowInsecureHTTPS] [Header: "Header"] [Timeout: Timeout] Url: "Url"
```

where

- **AllowInsecureHTTPS**:  
  - `False/True`  
  - If set to True the video system skips the certificate validation process, and sends data to the server anyway. If set to False, the server certificate is checked, and data is not sent to the server if the certificate validation fails.  
  - Default value: `False`

- **Header**:  
  - `String (0, 1024)`  
  - An HTTP header field. You can add up 20 Header parameters in one command, each holding one HTTP header field.

- **Timeout**:  
  - `Integer (1..30)`  
  - Timeout period in seconds. If the request is not completed during this period, the API will return an error.  
  - Default value: 30

- **Url**:  
  - `String (8, 2048)`  
  - The URL that the request will be sent to: `<Protocol> + <Host name or IP address of an HTTP(S) server> + <Path>`.

- **Introduction**, **About the API**, **xConfiguration**, **xCommand**, **xStatus**, **Appendices**
HttpFeedback commands

**xCommand HttpFeedback Deregister**

*Applies to: All products*
*Requires user role: ADMIN*

Deregister the HTTP feedback over HTTP(S).

**USAGE:**

```plaintext
xCommand HttpFeedback Deregister FeedbackSlot: <FeedbackSlot>
```

where

- **FeedbackSlot**:  
  - Integer (1..4)
  - Deregister the feedback slot that was registered using the xCommand HttpFeedback Register command.

**xCommand HttpFeedback Enable**

*Applies to: All products*
*Requires user role: ADMIN*

Re-enables a previously registered feedback slot after it has failed and become deactivated.

**USAGE:**

```plaintext
xCommand HttpFeedback Enable FeedbackSlot: <FeedbackSlot>
```

where

- **FeedbackSlot**:  
  - Integer (1..4)
  - Specifies the feedback slot that is enabled.

**xCommand HttpFeedback Register**

*Applies to: All products*
*Requires user role: ADMIN*

Register the system to a HTTP(S) server to return XML feedback over HTTP(S) to specific URLs.

**USAGE:**

```plaintext
```

where

- **FeedbackSlot**:  
  - Integer (1..4)
  - The codec can register up to 4 slots of servers requesting HTTP feedback. Set the registering to one of them.
  - **Note:** Avoid using FeedbackSlot 3 in an environment where Cisco TelePresence Management Suite (TMS) is used as TMS uses this feedback slot to register its expressions.

- **Format**:  
  - XML/JSON
  - Set the format for the feedback from the HTTP server to XML or JSON.
  - Default value: XML

- **ServerUrl**:  
  - String (1, 2048)
  - The URL to the HTTP server where you want the codec to post the HTTP feedback messages to.

- **Expression**:  
  - String (1, 255)
  - The XPath expression specifies which parts of the Status, Configuration or Event XML documents are monitored. You can have from 0 to 15 XPath expressions in the same command.
Macros commands

xCommand Macros Log Clear
Applies to: DX70/DX80 SX70 SX80 MX200G2/MX300G2 MX700/MX800/MX800D RoomKit RoomKitMini CodecPlus CodecPro Room55 Room70/Room55D Room70G2
Requires user role: ADMIN
Clears the Macros Logs.

USAGE:
  xCommand Macros Log Clear

xCommand Macros Log Get
Applies to: DX70/DX80 SX70 SX80 MX200G2/MX300G2 MX700/MX800/MX800D RoomKit RoomKitMini CodecPlus CodecPro Room55 Room70/Room55D Room70G2
Requires user role: ADMIN
Shows the logs for all running macros and for the runtime itself.

USAGE:
  xCommand Macros Log Get Offset: Offset
  where
  Offset: Integer (0..65534)
  Shows lines with the same or higher Offset than the one provided.
  Default value: 0

xCommand Macros Macro Activate
Applies to: DX70/DX80 SX70 SX80 MX200G2/MX300G2 MX700/MX800/MX800D RoomKit RoomKitMini CodecPlus CodecPro Room55 Room70/Room55D Room70G2
Requires user role: ADMIN
Activates a macro created on this video system.

USAGE:
  xCommand Macros Macro Activate Name: "Name"
  where
  Name: String (0..255)
  Specifies the name of the macro to activate.

xCommand Macros Macro Deactivate
Applies to: DX70/DX80 SX70 SX80 MX200G2/MX300G2 MX700/MX800/MX800D RoomKit RoomKitMini CodecPlus CodecPro Room55 Room70/Room55D Room70G2
Requires user role: ADMIN
Deactivates a macro currently running on this video system.

USAGE:
  xCommand Macros Macro Deactivate Name: "Name"
  where
  Name: String (0..255)
  The name of the macro to deactivate.
xCommand Macros Macro Get

**Applies to:** DX70/DX80 SX20 SX80 MX200G2/MX300G2 MX700/MX800/MX800D RoomKit RoomKitMini CodecPlus CodecPro Room55 Room70/Room55D Room70G2

**Requires user role:** ADMIN

Shows the details of a macro created on this video system.

**USAGE:**

```
xCommand Macros Macro Get [Content: Content] [Name: "Name"]
```

where

- **Content:**
  - False/True
  - Shows the content for the specified Macro or not.
  - Default value: False

- **Name:**
  - String (0..255)
  - The name of the macro.

xCommand Macros Macro Remove

**Applies to:** DX70/DX80 SX20 SX80 MX200G2/MX300G2 MX700/MX800/MX800D RoomKit RoomKitMini CodecPlus CodecPro Room55 Room70/Room55D Room70G2

**Requires user role:** ADMIN

Removes a macro created on this video system.

**USAGE:**

```
xCommand Macros Macro Remove Name: "Name"
```

where

- **Name:**
  - String (0..255)
  - The name of the macro that is removed.

xCommand Macros Macro RemoveAll

**Applies to:** DX70/DX80 SX20 SX80 MX200G2/MX300G2 MX700/MX800/MX800D RoomKit RoomKitMini CodecPlus CodecPro Room55 Room70/Room55D Room70G2

**Requires user role:** ADMIN

Removes all of the macros created on this video system.

**USAGE:**

```
xCommand Macros Macro RemoveAll
```

xCommand Macros Macro Rename

**Applies to:** DX70/DX80 SX20 SX80 MX200G2/MX300G2 MX700/MX800/MX800D RoomKit RoomKitMini CodecPlus CodecPro Room55 Room70/Room55D Room70G2

**Requires user role:** ADMIN

Renames a macro created on this video system.

**USAGE:**

```
xCommand Macros Macro Rename Name: "Name" NewName: "NewName" [Overwrite: Overwrite]
```

where

- **Name:**
  - String (0..255)
  - The name of the macro that is renamed.

- **NewName:**
  - String (0..255)
  - The new name of the macro.

- **Overwrite:**
  - False/True
  - Overwrites the existing content or not.
  - Default value: False
xCommand Macros Macro Roles Set

 Applies to: DX70/DX80  SX20  SX80  MX200G2/MX300G2  MX700/MX800/MX800D  RoomKit  RoomKitMini  CodecPlus  CodecPro  Room55  Room70/Room55D  Room70G2  
 Requires user role: ADMIN  
 Sets the role for a macro.

 USAGE:
 xCommand Macros Macro Roles Set Name: "Name" [Role: Role]  
 where
 Name: 
 String (0..255)  
 The name of the macro that is set.
 Role: 
 Admin/Audit/User/Integrator/RoomControl  
 The role that is set for this macro.
 Default value: Admin

xCommand Macros Macro Save

 Applies to: DX70/DX80  SX20  SX80  MX200G2/MX300G2  MX700/MX800/MX800D  RoomKit  RoomKitMini  CodecPlus  CodecPro  Room55  Room70/Room55D  Room70G2  
 Requires user role: ADMIN  
 Saves the details of a macro. This is a multiline command.

 USAGE:
 xCommand Macros Macro Save Name: "Name" [Overwrite: Overwrite] [Transpile: Transpile]  
 where
 Name: 
 String (0..255)  
 The name of the macro that is saved.
 Overwrite: 
 False/True  
 Overwrites the existing content or not.
 Default value: True
 Transpile: 
 False/True  
 Translates current JavaScript language features into EcmaScript 5.0/5.1.
 Default value: True

xCommand Macros Runtime Restart

 Applies to: DX70/DX80  SX20  SX80  MX200G2/MX300G2  MX700/MX800/MX800D  RoomKit  RoomKitMini  CodecPlus  CodecPro  Room55  Room70/Room55D  Room70G2  
 Requires user role: ADMIN  
 Restarts all of the macros set up on this device.

 USAGE:
 xCommand Macros Runtime Restart
xCommand Macros Runtime Start

**Applies to:** DX70/DX80 SX20 SX80 MX200G2/MX300G2 MX700/MX800/MX800D RoomKit RoomKitMini CodecPlus CodecPro Room55 Room70/Room55D Room70G2

Requires user role: ADMIN

Starts all of the macros set up on this device.

**USAGE:**

```
xCommand Macros Runtime Start
```

---

**Message commands**

xCommand Message Send

**Applies to:** All products

Requires user role: ADMIN, INTEGRATOR

Triggers a Message Send event which sends text to any listening clients.

**USAGE:**

```
xCommand Message Send Text: "Text"
```

where

- **Text:**
  - **String (0..255)**
  - The text that the message contains.

---

xCommand Macros Runtime Status

**Applies to:** DX70/DX80 SX20 SX80 MX200G2/MX300G2 MX700/MX800/MX800D RoomKit RoomKitMini CodecPlus CodecPro Room55 Room70/Room55D Room70G2

Requires user role: ADMIN

Shows the current status of the macros runtime on this device.

**USAGE:**

```
xCommand Macros Runtime Status
```

---

xCommand Macros Runtime Stop

**Applies to:** DX70/DX80 SX20 SX80 MX200G2/MX300G2 MX700/MX800/MX800D RoomKit RoomKitMini CodecPlus CodecPro Room55 Room70/Room55D Room70G2

Requires user role: ADMIN

Stops all of the macros set up on this device.

**USAGE:**

```
xCommand Macros Runtime Stop
```
Peripherals commands

xCommand Peripherals Connect

Applies to: All products
Requires user role: ADMIN, INTEGRATOR, ROOMCONTROL, USER

Register peripherals that are connected to the codec, such as control systems and touch panels. The registered peripherals are displayed on the web interface under Configuration > Peripherals.

This command should be used when the peripheral connects to the codec for the first time or when the software version on the peripheral has changed. The list of connected devices is available with the command xStatus Peripherals ConnectedDevice [n] Status.

USAGE:

```
xCommand Peripherals Connect [HardwareInfo: "HardwareInfo"] ID: "ID" [Name: "Name"] [NetworkAddress: "NetworkAddress"] [SerialNumber: "SerialNumber"] [SoftwareInfo: "SoftwareInfo"] Type: "Type"
```

where

- **HardwareInfo**: String (0, 100)
  - The device's hardware number.
  - Default value: ""

- **ID**: String (1, 100)
  - A unique ID for the device you are connecting to, typically a MAC address.

- **Name**: String (0, 100)
  - Define a name for the device.
  - Default value: ""

- **NetworkAddress**: String (0, 100)
  - Network address for the device you are connecting to.
  - Default value: ""

- **SerialNumber**: String (0, 100)

- **SoftwareInfo**: String (0, 100)
  - Software version the device is running.
  - Default value: ""

- **Type**: Byod/ControlSystem/Other/TouchPanel
  - Define the type of device you are connecting to.

xCommand Peripherals HeartBeat

Applies to: All products
Requires user role: ADMIN, INTEGRATOR, ROOMCONTROL, USER

When a peripheral is registered as a connected device, you can set it to send a heartbeat to the codec to let the codec know that it is still connected.

This will keep the device on the xStatus Peripherals ConnectedDevice list. If the peripheral is not set to send a heartbeat, the device will disappear from the list after a while.

Note: Does not apply to cameras.

USAGE:

```
xCommand Peripherals HeartBeat ID: "ID" [Timeout: "Timeout"]
```

where

- **ID**: String (1, 100)
  - A unique ID for the device you are connecting to, typically a MAC address.

- **Timeout**: Integer (1..65535)
  - Set how long the device will send heartbeat.
  - Default value: 60
xCommand Peripherals List
Applies to: All products
Requires user role: ADMIN, INTEGRATOR, ROOMCONTROL
Lists all currently and previously connected peripherals.

**USAGE:**
xCommand Peripherals List [Connected: Connected] [Type: Type]
where
  Connected: False/True
  Limit the search to currently connected devices.
  Type: All/ControlSystem/ISDNLink/Other/TouchPanel
  Limit the search by device type.
  Default value: All

xCommand Peripherals Pairing DeviceDiscovery Start
Applies to: All products
Requires user role: ADMIN
Start device discovery to detect ISDN Links in the same network.

**USAGE:**
xCommand Peripherals Pairing DeviceDiscovery Start [AutoPairing: AutoPairing] [DeviceType: DeviceType] [Timeout: Timeout]
where
  AutoPairing: On/Off
  You can select to automatically pair the detected device to the endpoint.
  Default value: Off
  DeviceType: ISDNLink
  Only look for ISDN Link.
  Timeout: Integer (3..60)
  Set a maximum time for the search from 3 to 60 seconds.
  Default value: 10

xCommand Peripherals Pairing Pair
Applies to: All products
Requires user role: ADMIN
Pair an ISDN Link to an endpoint.

**USAGE:**
xCommand Peripherals Pairing Pair MacAddress: "MacAddress"
where
  MacAddress: String (1, 1450)
  Enter the MAC address for the ISDN Link you wish to pair to the endpoint.
xCommand Peripherals Pairing Unpair

Applies to: All products
Requires user role: ADMIN, USER

Unpair endpoint from an ISDN Link, when the two have contact.

**USAGE:**

```
xCommand Peripherals Pairing Unpair MacAddress: "MacAddress"
```

where

MacAddress:

- String (1, 100)
  - Enter the MAC address for the ISDN Link you wish to unpair from the endpoint.

xCommand Peripherals Purge

Applies to: All products
Requires user role: ADMIN, USER

Force unpair an endpoint from an ISDN Link when a connection has been lost. Note: You must also unpair the ISDN Link to be able to pair it to another endpoint.

**USAGE:**

```
xCommand Peripherals Purge ID: "ID"
```

where

ID:

- String (1, 100)
  - Mac address of the ISDN Link in the format "xxxxxx:xxxxxx".

Phonebook commands

xCommand Phonebook Contact Add

Applies to: All products
Requires user role: ADMIN, USER

Add a new contact to the local phonebook. The command returns the ContactId, which is a unique string that identifies the contact; typically the format is "localContactId-n".

You can add several contact methods to a contact using the xCommand Phonebook ContactMethod Add command. Note that only the first contact method will appear in the Favorites list on the Cisco Touch controller. All contact methods are available on the other UIs.

**USAGE:**

```
xCommand Phonebook Contact Add Name: "Name" [Number: "Number"] [CallRate: CallRate] [CallType: CallType] [Device: Device] [FolderId: "FolderId"] [ImageURL: "ImageURL"] [Protocol: Protocol] [Tag: Tag] [Title: "Title"]
```

where

Name:

- String (0, 255)
  - The name of the contact.

Number:

- String (0, 255)
  - The phone number or address of the contact.

CallRate:

- Integer (0..6000)
  - Set a call rate.
  - Default value: 0

CallType:

- Audio/Video/Auto
  - Select a call type (audio or video). By selecting Auto, the system will detect the call type automatically.

Device:

- Mobile/Other/Telephone/Video
  - Select the device type.

FolderId:
String (0, 255)
The unique identifier for the folder that you want to store the contact in. The identifier will be returned by an xCommand Phonebook Search command. It was also returned when the xCommand Phonebook Folder Add command was issued to make the folder.

ImageURL:
String (0, 255)
Currently not in use.

Protocol:
Auto/H320/H323/SIP/Spark
Select the Auto, Spark, SIP, H323 or H320 protocol.

Tag:
Untagged/Favorite
Tag the contact as a Favorite, or untag an already tagged contact.

Title:
String (0, 255)
The title of the contact.

xCommand Phonebook Contact Delete
Applies to: All products
Requires user role: ADMIN, USER
Delete an existing contact from the local phonebook.

USAGE:
xCommand Phonebook Contact Delete ContactId: "ContactId"
where
ContactId:
String (0, 255)
The unique identifier for the contact. The identifier will be returned by an xCommand Phonebook Search command. It was also returned when the xCommand Phonebook Contact Add command was issued to make the contact.

xCommand Phonebook Contact Modify
Applies to: All products
Requires user role: ADMIN, USER
Modify contact details of an existing contact in the local phonebook. The following parameters can be changed using this command: Name, FolderId, ImageURL and Title. You must use the xCommand Phonebook ContactMethod Modify command to change the other parameters: Number, Protocol, CallRate, CallType and Device.

USAGE:
xCommand Phonebook Contact Modify ContactId: "ContactId" [Name: "Name"] [FolderId: "FolderId"] [ImageURL: "ImageURL"] [Tag: Tag] [Title: "Title"]
where
ContactId:
String (0, 255)
The unique identifier for the contact you want to modify. The identifier will be returned by an xCommand Phonebook Search command. It was also returned when the xCommand Phonebook Contact Add command was issued to make the contact.

Name:
String (0, 255)
The name of the contact.

FolderId:
String (0, 255)
A unique identifier for the folder. The identifier will be returned by an xCommand Phonebook Search command. It was also returned when the xCommand Phonebook Folder Add command was issued.

ImageURL:
String (0, 255)
Currently not in use.

Tag:
Untagged/Favorite
Tag the contact as a Favorite, or untag an already tagged contact.

Title:
String (0, 255)
The title of the contact.
xCommand Phonebook ContactMethod Add

Applies to: All products
Requires user role: ADMIN, USER

Add contact details for an existing contact in the local phonebook. The command returns the ContactMethodId, which is a unique string that identifies the contact method; typically the format is "n".

You can add several contact methods to a contact. Note that only the first contact method will appear in the Favorites list on the video system's user interface. The first contact method may have been created when issuing the xCommand Phonebook Contact Add command to make the contact. All contact methods are available in the API and on the web interface.

USAGE:

xCommand Phonebook ContactMethod Add ContactId: "ContactId" [CallRate: CallRate] [CallType: CallType] [Device: Device] Number: "Number" [Protocol: Protocol]

where

ContactId:
String (0, 255)
The unique identifier for the contact that you want to add a contact method to. The identifier will be returned by an xCommand Phonebook Search command. It was also returned when the xCommand Phonebook Contact Add command was issued to make the contact.

CallRate:
Integer (0..6000)
Set a call rate.
Default value: 0

CallType:
Audio/Video/Auto
Select a call type (audio or video). By selecting Auto, the system will detect the call type automatically.
Default value: Auto

Device:
Mobile/Other/Telephone/Video
Set which type of device to call to.

Number:
String (0, 255)
The phone number or address of the contact.

Protocol:
Auto/H320/H323/SIP/Spark
Select protocol.

xCommand Phonebook ContactMethod Delete

Applies to: All products
Requires user role: ADMIN, USER

Delete a contact method from an existing contact in the local phonebook.

USAGE:

xCommand Phonebook ContactMethod Delete ContactId: "ContactId" ContactMethodId: "ContactMethodId"

where

ContactId:
String (0, 255)
The unique identifier for the contact you want to change. The identifier will be returned by an xCommand Phonebook Search command. It was also returned when the xCommand Phonebook Contact Add command was issued to make the contact.

ContactMethodId:
String (0, 255)
The unique identifier for the contact method you want to delete. The identifier will be returned by an xCommand Phonebook Search command. It was also returned when the xCommand Phonebook ContactMethod Add command was issued to make the contact.
xCommand Phonebook ContactMethod Modify

Applies to: All products
Requires user role: ADMIN, USER
Modify details about the contact method for an existing contact in the local phonebook.

USAGE:
```
xCommand Phonebook ContactMethod Modify ContactId: "ContactId" ContactMethodId: "ContactMethodId" [Device: Device] [Number: "Number"] [Protocol: Protocol] [CallRate: CallRate] [CallType: CallType]
```
where
```
ContactId:
  String (0, 255)
The unique identifier for the contact. The identifier will be returned by an xCommand Phonebook Search command. It was also returned when the xCommand Phonebook Contact Add command was issued to make the contact.

ContactMethodId:
  String (0, 255)
The unique identifier for the contact method you want to modify. The identifier will be returned by an xCommand Phonebook Search command. It was also returned when the xCommand Phonebook ContactMethod Add or xCommand Phonebook Contact Add commands were issued to make the contact.

Device:
  Mobile/Other/Telephone/Video
  Set which type of device to call to.

Number:
  String (0, 255)
The phone number or address of the contact.

Protocol:
  Auto/H320/H323/SIP/Spark
  Select protocol.

CallRate:
  Integer (0..6000)
  Set a call rate.
  Default value: 0

CallType:
  Audio/Video/Auto
  Select a call type (audio or video). By selecting Auto, the system will detect the call type automatically.
  Default value: Auto
```

xCommand Phonebook Folder Add

Applies to: All products
Requires user role: ADMIN, USER
Phonebook entries can be stored in folders. Use this command to add a folder to the local phonebook. The command returns the FolderId, which is a unique string that identifies the folder; typically the format is "localGroupld-n".

USAGE:
```
xCommand Phonebook Folder Add Name: "Name" [ParentFolderId: "ParentFolderId"]
```
where
```
Name:
  String (0, 255)
The name of the folder.

ParentFolderId:
  String (0, 255)
The unique identifier for the parent folder. The identifier will be returned by an xCommand Phonebook Search command. It was also returned when the xCommand Phonebook Folder Add command was issued to make the parent folder.
xCommand Phonebook Folder Delete

Applies to: All products
Requires user role: ADMIN, USER

Delete an existing folder from the local phonebook.

**USAGE:**

```plaintext
xCommand Phonebook Folder Delete FolderId: "FolderId"

where
FolderId:
  String (0, 255)
  The unique identifier for the folder. The identifier will be returned by an xCommand Phonebook Search command. It was also returned when the xCommand Phonebook Folder Add command was issued to make the folder.
```

xCommand Phonebook Folder Modify

Applies to: All products
Requires user role: ADMIN, USER

Modify an existing phonebook folder.

**USAGE:**

```plaintext
xCommand Phonebook Folder Modify FolderId: "FolderId" [Name: "Name"] [ParentFolderId: "ParentFolderId"]

where
FolderId:
  String (0, 255)
  The unique identifier for the folder. The identifier will be returned by an xCommand Phonebook Search command. It was also returned when the xCommand Phonebook Folder Add command was issued to make the folder.
Name:
  String (0, 255)
  The name of the contact.
ParentFolderId:
  String (0, 255)
  The unique identifier for the parent folder. The identifier will be returned by an xCommand Phonebook Search command. It was also returned when the xCommand Phonebook Folder Add command was issued to make the parent folder.
```
xCommand Phonebook Search

Applies to: All products

Requires user role: ADMIN, USER

The search command lets you search in both the local and corporate phone books. A search gives a ResultSet.

The total number of folders and contacts (TotalRows) is always included in the result set when searching the local phone book. When searching a corporate phonebook the total number of folders and contacts may not be included. Whether it is included or not depends on the backend corporate phonebook service (e.g. CUCM, VCS, TMS) and its version.

**USAGE:**

```
xCommand Phonebook Search [PhonebookId: "PhonebookId"] [PhonebookType: PhonebookType] [SearchString: "SearchString"] [SearchField: SearchField] [SearchFilter: SearchFilter] [ContactType: ContactType] [Offset: Offset] [FolderId: "FolderId"] [Limit: Limit] [ContactMethodLimit: ContactMethodLimit] [Recursive: Recursive] [Tag: Tag]
```

where

- **PhonebookId**:
  - String (0, 255)
  - The identifier of the phonebook server that will be searched. See the xConfiguration Phonebook Server ID setting.

- **PhonebookType**:
  - Corporate/Local
  - Define whether to search the local phone book or the corporate phonebook.
  - Default value: Local

- **SearchString**:
  - String (0, 255)
  - Search for entries containing this string (note that the entry does not have to begin with the string). If no FolderId is specified, all folders / phonebook directories will be searched.

- **SearchField**:
  - Name/Number
  - Currently not in use.

- **SearchFilter**:
  - All/Rooms/People
  - Only available for Cisco Webex registered devices. Filter search results by choosing the type of results you want to see. You can select rooms, people, or search in all directories.

- **ContactType**:
  - Any/Folder/Contact
  - Search all contact types, or limit the search to folders or individual contacts.
  - Default value: Any

- **Offset**:
  - Integer (0..65534)
  - Get records starting with this offset in a search. The default value is 0. Offset is used together with Limit to support paging.
  - Default value: 0

- **FolderId**:
  - String (0, 255)
  - Search only in the specified folder. The FolderId (string) is listed in the ResultSet of a search result containing folders.

- **Limit**:
  - Integer (0..65534)
  - Limit the number of records in the result set to this number. For example, if the limit is set to 10, the ResultSet will contain only 10 entries (Contacts and Folders) even if the total number of hits is larger. The maximum limit is 1000.
  - Default value: 50

- **ContactMethodLimit**:
  - Integer (0..10)
  - Limit the number of records in the result set to this number. For example, if the limit is set to 2, the ResultSet will contain only 2 entries even if the total number of hits is larger.
  - Default value: 0

- **Recursive**:
  - False/True
  - This parameter will only have effect when searching the local phone book. The setting determines whether a local phone book search should be limited to the given FolderId, or also recursively search in its subfolders. If not specified, the search will be recursive.
  - When issuing the command without specifying any parameters, all folders, contacts and contact methods in the local phone book will be returned.
  - Default value: True

- **Tag**:
  - Untagged/Favorite
  - Limits the search to contacts that have been tagged as favorite or the untagged contacts.
Presentation commands

xCommand Presentation Start

**Applies to:** All products

Requires user role: ADMIN, USER

Open a media stream from the selected presentation source.

You can combine multiple presentation sources in a single presentation video stream (the maximum number of different input sources depend on the type of video system) by adding multiple ConnectorIds or PresentationSources in the same command. The order in which you write them in the command determines the order in which the sources show up on the screen. You can't use a mix of identifier types in the same command; use either ConnectorId or PresentationSource.

**USAGE:**

```
xCommand Presentation Start [ConnectorId: ConnectorId] [Instance: Instance] [Layout: Layout] [PresentationSource: PresentationSource] [SendingMode: SendingMode]
```

where

- **ConnectorId:**
  - Integer (1..6) [CodecPro Room70G2]
  - Integer (1..4) [SX80 MX700/MX800/MX800D]
  - Integer (1..3) [DX70/DX80 SX20 MX200G2/MX300G2 RoomKit RoomKitMini]
  - Integer (1..2) [CodecPlus Room55 Room70/Rom55D]
  - Integer (2..3) [SX10]

Select the video input source to be used for presentation, identified by connectorId.

- **Instance:**
  - New/1/2/3/4/5/6
  - Select which local presentation instance you wish to start.

- **Layout:**
  - Equal/Prominent
  - Select the layout of the presentation if the stream is composed of multiple input sources.
  - **Equal:** The presentations are shown in same-sized images. There can be a maximum of four images on screen.
  - **Prominent:** The first presentation source is shown as a large image, and the next presentation sources are shown as smaller images placed below.

- **PresentationSource:**
  - Integer (1..6) [CodecPro Room70G2]
  - Integer (1..4) [SX80 MX700/MX800/MX800D]
  - Integer (1..3) [DX70/DX80 SX20 MX200G2/MX300G2 RoomKit RoomKitMini]
  - Integer (1..2) [CodecPlus Room55 Room70/Rom55D]
  - Integer (2..3) [SX10]

Select the video input source to be used for presentation, identified by source number.

- **SendingMode:**
  - LocalRemote/LocalOnly
  - Select whether the presentation is shown local and/or remote.
  - **LocalRemote:** The presentation is shown both local and remote.
  - **LocalOnly:** The presentation is shown locally.

Default value: LocalRemote

xCommand Presentation Stop

**Applies to:** All products

Requires user role: ADMIN, USER

Stop the media stream from the presentation source.

**USAGE:**

```
xCommand Presentation Stop [Instance: Instance] [PresentationSource: PresentationSource]
```

where

- **Instance:**
  - 1/2/3/4/5/6
  - Select which local presentation you wish to stop, identified by presentation instance.

- **PresentationSource:**
  - Integer (1..6) [CodecPro Room70G2]
  - Integer (1..4) [SX80 MX700/MX800/MX800D]
  - Integer (1..3) [DX70/DX80 SX20 MX200G2/MX300G2 RoomKit RoomKitMini]
  - Integer (2..3) [SX10]

Select which local presentation you wish to stop, identified by source number.
Provisioning commands

xCommand Provisioning CompleteUpgrade

Applies to: All products
Requires user role: ADMIN, USER

Starts installing the software upgrade if you wish to install it before it is set to do so.

**USAGE:**

```
xCommand Provisioning CompleteUpgrade
```

xCommand Provisioning PostponeUpgrade

Applies to: All products
Requires user role: ADMIN, USER

Postpones the installing of the software upgrade.

**USAGE:**

```
xCommand Provisioning PostponeUpgrade SecondsToPostpone: SecondsToPostpone
```

where

- **SecondsToPostpone:**
  - **Integer (0..65534)**
  - Set how long to postpone the upgrade. The value is in seconds.

xCommand Provisioning CUCM ExtensionMobility Login

Applies to: All products
Requires user role: ADMIN, USER

Login command for the Extension Mobility service. You log in to the Extension Mobility service with a user name (UserId) and pin code (Pin). The user name and pin code are set up in CUCM. CUCM also supports multiple profiles for a user.

If you, for a user that has multiple profiles, submit a login command with only user name and pin code, CUCM will send a list of available profiles back to the video system. Then the video system will create corresponding ExtensionMobilityProfileSelection Profile events, so that a new login command, which contains the Profile parameter in addition to the user name and pin code, can be submitted.

**USAGE:**

```
xCommand Provisioning CUCM ExtensionMobility Login UserId: "UserId" Pin: "Pin"
[Profile: "Profile"]
```

where

- **UserId:**
  - **String (1, 255)**
  - A valid user name, as set up in CUCM.

- **Pin:**
  - **String (1, 255)**
  - A valid pin code for the user, as set up in CUCM.

- **Profile:**
  - **String (1, 255)**
  - A valid profile for the user, as set up in CUCM. This parameter applies only if the user has multiple profiles.

xCommand Provisioning CUCM ExtensionMobility Logout

Applies to: All products
Requires user role: ADMIN, USER

This command will log you out of your Extension Mobility profile.

**USAGE:**

```
xCommand Provisioning CUCM ExtensionMobility Logout
```
xCommand Provisioning RoomType Activate

Applies to: SX80, MX700/MX800/MX800D, CodecPro, Room70G2

Requires user role: ADMIN, INTEGRATOR

Activate a room type template, that has been configured from the web interface.

**USAGE:**

```
xCommand Provisioning RoomType Activate Name: Name
```

where

- **Name**: Briefing/Classroom/Standard
  - **Briefing**: Activate the briefing room template.
  - **Classroom**: Activate the class room template.
  - **Standard**: Turn off room templates.

xCommand Provisioning Service Fetch

Applies to: All products

Requires user role: ADMIN

Add or update the customization template that details the custom elements of the video system. Examples of custom elements are: branding images, macros, favorites, sign-in banner, and in-room control panels.

**USAGE:**

```
xCommand Provisioning Service Fetch [Checksum: "Checksum"] [ChecksumType: ChecksumType] [Mode: Mode] [Origin: Origin] URL: "URL"
```

where

- **Checksum**: String (0..128)
  - The checksum is used to ensure the integrity of the downloaded customization template. When using HTTP, it is mandatory to add a checksum. When using HTTPS, it is mandatory to add a checksum only if you are downloading the template from a server that presents an unsigned certificate, or a self-signed certificate that is not in the CA list of the video system (not trusted).
- **ChecksumType**: SHA512
  - The algorithm that is used to calculate the checksum.
  - Default value: SHA512
- **Mode**: Add/Replace
  - If the mode is set to Add, all items listed in the uploaded file are added to the existing customization template. If the mode is set to Replace, the newer customization template that is uploaded, is compared against the previously uploaded template. Items that are not present in the newer file are removed. In both cases, items with the same name are overwritten.
  - Default value: Add
- **Origin**: Other/Provisioning
  - Specifies whether the customization template is used for provisioning or for another purpose. When the value is Provisioning, the configurations (xConfiguration) in the template are ignored, and the provisioning system (CUCM or TMS) can set configurations like they normally do. CUCM always acts as if this parameter is set to Provisioning.
  - Note that some configurations may be specific to one video system, and you may end up...
with video systems that you cannot reach if you provision those configurations to more than one system.

Default value: Other

**URL**:
String (0..128)
The URL of the customization template.

---

## Proximity commands

### xCommand Proximity Services Activate

**Applies to**: All products

Requires user role: ADMIN, USER

Reactivate the Proximity services that were deactivated with xCommand Proximity Services Deactivate.

**USAGE**:

```
xCommand Proximity Services Activate
```

### xCommand Proximity Services Deactivate

**Applies to**: All products

Requires user role: ADMIN, USER

This command deactivates all proximity services on the endpoint. To reactivate proximity services use the command xCommand Proximity Services Activate.

**USAGE**:

```
xCommand Proximity Services Deactivate
```
RoomPreset commands

xCommand RoomPreset Activate

Applies to: SX10  SX20  SX80  MX200G2/MX300G2  MX700/MX800/MX800D  RoomKit  RoomKitMini  CodecPlus  CodecPro  Room55  Room70/Room55D  Room70G2

Requires user role: ADMIN, USER

Activate one of the locally stored presets.

Note that information about all video input sources, and pan, tilt, zoom and focus values for all cameras are included in the same preset. In contrast, the xCommand Camera Preset commands applies to individual cameras only.

USAGE:

xCommand RoomPreset Activate PresetId: \texttt{PresetId}

where

\begin{itemize}
  \item \texttt{PresetId}
    \begin{itemize}
      \item Integer (1..15)
    \end{itemize}
  \end{itemize}

  The ID of the preset you want to activate.

xCommand RoomPreset Clear

Applies to: SX10  SX20  SX80  MX200G2/MX300G2  MX700/MX800/MX800D  RoomKit  RoomKitMini  CodecPlus  CodecPro  Room55  Room70/Room55D  Room70G2

Requires user role: ADMIN, USER

Delete a preset.

Note that information about all video input sources, and pan, tilt, zoom and focus values for all cameras are included in the same preset. In contrast, the xCommand Camera Preset commands applies to individual cameras only.

USAGE:

xCommand RoomPreset Clear PresetId: \texttt{PresetId}

where

\begin{itemize}
  \item \texttt{PresetId}
    \begin{itemize}
      \item Integer (1..15)
    \end{itemize}
  \end{itemize}

  The ID of the preset you want to delete.

xCommand RoomPreset Store

Applies to: SX10  SX20  SX80  MX200G2/MX300G2  MX700/MX800/MX800D  RoomKit  RoomKitMini  CodecPlus  CodecPro  Room55  Room70/Room55D  Room70G2

Requires user role: ADMIN, USER

Store the connector selections for all video input sources and the current position (pan and tilt), zoom and focus values for all cameras.

Note that information about all video input sources, and pan, tilt, zoom and focus values for all cameras are included in the same preset. The system may hold 15 such predefined video input presets. These presets are available for far end control, i.e. they are referred in the PresetId parameter of the xCommand FarEndControl Preset Activate command. In contrast, the xCommand Camera Preset commands applies to individual cameras only. Those presets are not available for far end control.

USAGE:

xCommand RoomPreset Store \texttt{[Description: "Description"]} PresetId: \texttt{PresetId} Type: \texttt{Type}

where

\begin{itemize}
  \item \texttt{Description}
    \begin{itemize}
      \item String (0, 255)
    \end{itemize}
  \end{itemize}

  Enter a description of the camera preset.

\begin{itemize}
  \item \texttt{PresetId}
    \begin{itemize}
      \item Integer (1..15)
    \end{itemize}
  \end{itemize}

  The ID of this preset.

\begin{itemize}
  \item \texttt{Type}
    \begin{itemize}
      \item \texttt{All}/\texttt{Camera}
    \end{itemize}
  \end{itemize}

  Not applicable. If you want to ensure that a preset only affects camera positions we recommend that you select Camera.
Security commands

xCommand Security Certificates CA Add
Applies to: All products
Requires user role: ADMIN
Uploads CA security certificates to this device. This is a multiline command.

 USAGE:
xCommand Security Certificates CA Add

xCommand Security Certificates CA Delete
Applies to: All products
Requires user role: ADMIN
Deletes a CA security certificate from this device.

 USAGE:
xCommand Security Certificates CA Delete Fingerprint: "Fingerprint"

where
Fingerprint:
String (0..128)
The unique Identifier for the certificate that is deleted. You can get the fingerprint ID by running xCommand Security Certificates CA Show.

xCommand Security Certificates Services Activate
Applies to: All products
Requires user role: ADMIN
Activates a security certificate on this device.

 USAGE:
xCommand Security Certificates Services Activate Fingerprint: "Fingerprint"

where
Fingerprint:
String (0..128)
The unique Identifier for the certificate that is activated. You can get the fingerprint ID by running xCommand Security Certificates Services Show.

Purpose:
802.1X/HTTPS/Audit/SIP)
The type of service which applies to this certificate.

xCommand Security Certificates Services Activate Fingerprint: "Fingerprint"

where
Fingerprint:
String (0..128)
The unique Identifier for the certificate that is activated. You can get the fingerprint ID by running xCommand Security Certificates Services Show.

Purpose:
802.1X/HTTPS/Audit/SIP)
The type of service which applies to this certificate.
xCommand Security Certificates Services Add

Applies to: All products
Requires user role: ADMIN

Uploads security certificates to this device. This is a multiline command.

**USAGE:**
xCommand Security Certificates Services Add [PrivateKeyPassword:
"PrivateKeyPassword"]
where
  PrivateKeyPassword:
  String (0..128)
  Stores the details of the private key for the password.
  Default value: ""

xCommand Security Certificates Services Deactivate

Applies to: All products
Requires user role: ADMIN

Deactivates security certificates on this device.

**USAGE:**
xCommand Security Certificates Services Deactivate Fingerprint: "Fingerprint"
where
  Fingerprint:
  String (0..128)
  The unique Identifier for the certificate that is deactivated. You can get the fingerprint ID by running xCommand Security Certificates Services Show.

xCommand Security Certificates Services Delete

Applies to: All products
Requires user role: ADMIN

Deletes security certificates from this device.

**USAGE:**
xCommand Security Certificates Services Delete Fingerprint: "Fingerprint"
where
  Fingerprint:
  String (0..128)
  The unique Identifier for the certificate that is deleted. You can get the fingerprint ID by running xCommand Security Certificates Services Show.

xCommand Security Certificates Services Show

Applies to: All products
Requires user role: ADMIN, USER

Shows details for security certificates on this device.

**USAGE:**
xCommand Security Certificates Services Show [Filter: Filter] [Format: Format]
where
  Filter:
    802.1X/HTTPS/Audit/SIP
    Filters the results according to the chosen service.
  Format:
    PEM/Text
    Specifies the format of the results.
  Default value: Text
**xCommand Security FIPSMode Activate**

**Applies to:** All products

**Requires user role:** ADMIN

Activate FIPS (140-2) mode. Activating FIPS mode implies a reset to factory defaults. While in FIPS mode, the following limitations apply: All calls are encrypted. Unencrypted communication protocols like Telnet and HTTP cannot be used. IEEE802.1x and SNMP are disabled. The remote support user is not available. Digest access authentication is not supported between the video system and an HTTP Proxy, because Digest access authentication is using MD5 cryptographic hashing, which is not allowed in FIPS. This last limitation only affects Webex registered video systems, since an HTTP Proxy is used only for the Webex solution.

To exit FIPS mode, perform a factory reset.

**USAGE:**

```
xCommand Security FIPSMode Activate Confirm: Confirm
```

where

```
Confirm:
  Yes
```

Confirms setting the video system in FIPS mode.

---

**xCommand Security Persistency**

**Applies to:** All products

**Requires user role:** ADMIN

Set the following features to persistent or non-persistent mode. In non-persistent mode the information gathered by the specified feature does not persist a reboot of the system. Persistent mode is the default. This command reboots the system.

**USAGE:**

```
xCommand Security Persistency Configurations: Configurations CallHistory: CallHistory InternalLogging: InternalLogging LocalPhonebook: LocalPhonebook DHCP: DHCP ConfirmAndReboot: ConfirmAndReboot
```

where

```
Configurations:
  NonPersistent/Persistent
  In non-persistent mode, all configurations are set back to default when the system reboots.

CallHistory:
  NonPersistent/Persistent
  In non-persistent mode call history is deleted when the system reboots.

InternalLogging:
  NonPersistent/Persistent
  In non-persistent mode eventlog is deleted when the system reboots.

LocalPhonebook:
  NonPersistent/Persistent
  In non-persistent mode local phone book is deleted when the system reboots.

DHCP:
  NonPersistent/Persistent
  In non-persistent mode all IP related information is deleted when the system reboots.

ConfirmAndReboot:
  Yes
  Reboots the system.
xCommand Security Session Get

Applies to: All products
Requires user role: ADMIN, AUDIT, INTEGRATOR, ROOMCONTROL, USER

Shows details of your current session.

**USAGE:**

xCommand Security Session Get

---

xCommand Security Session List

Applies to: All products
Requires user role: ADMIN

List active sessions.

**USAGE:**

xCommand Security Session List

---

xCommand Security Session Terminate

Applies to: All products
Requires user role: ADMIN

Terminate a session.

**USAGE:**

xCommand Security Session Terminate

---

Standby commands

xCommand Standby Activate

Applies to: All products
Requires user role: ADMIN, INTEGRATOR, USER

Set the system in standby mode, which turns off the video outputs and put the camera into sleep mode.

**USAGE:**

xCommand Standby Activate

---

xCommand Standby Deactivate

Applies to: All products
Requires user role: ADMIN, INTEGRATOR, USER

Bring the system out of standby mode.

**USAGE:**

xCommand Standby Deactivate

---

xCommand Standby Halfwake

Applies to: All products
Requires user role: ADMIN, INTEGRATOR

Sets the system to "Halfwake" state. This state informs the user from the UI, to pick up a remote or to tap the touch device to get started.

**USAGE:**

xCommand Standby Halfwake
**xCommand Standby ResetHalfwakeTimer**

*Applies to: All products*

Requires user role: ADMIN, USER

Sets a temporary Halfwake timer delay. If the system is in Halfwake mode when the reset timer is set, the system is brought out of Halfwake mode. When left idle for the given delay the system goes into halfwake mode.

**USAGE:**

```
xCommand Standby ResetHalfwakeTimer Delay: Delay
```

where

```
Delay: Integer (1..480)
```

Set the delay in minutes.

**xCommand Standby ResetTimer**

*Applies to: All products*

Requires user role: ADMIN, USER

Set a temporary standby delay. If the system is in standby mode when the reset timer is set, the system is brought out of standby mode. When left idle for the given delay the system goes into standby mode. Setting the reset timer does not affect the Standby Delay in the Advanced configuration menu (or by xConfiguration Standby Delay). Next time this delay is the valid standby delay.

**USAGE:**

```
xCommand Standby ResetTimer Delay: Delay
```

where

```
Delay: Integer (1..480)
```

Set the delay in minutes.

**SystemUnit commands**

**xCommand SystemUnit Boot**

*Applies to: All products*

Requires user role: ADMIN, INTEGRATOR, USER

Reboot the system.

**USAGE:**

```
xCommand SystemUnit Boot [Action: Action]
```

where

```
Action: Restart/Shutdown
```

As a default the system restarts after a reboot. By selecting Shutdown, the system will not restart.

Default value: Restart
xCommand SystemUnit FactoryReset

Applies to: All products
Requires user role: ADMIN, USER

Reset the codec to factory default settings. The call logs are deleted and all system parameters are reset to default values. All files that have been uploaded to the codec are deleted. Option key(s) are not affected. Use the parameter Keep in order to choose which configurations and files to keep when you factory reset the system.

As a default the system restarts after the factory reset, but other behaviors can be forced by selecting a different TrailingAction.

USAGE:
```
xCommand SystemUnit FactoryReset Confirm: Confirm [Keep: Keep] [TrailingAction: TrailingAction]
```

where

Confirm:
- Yes
  Include to confirm your choice.

Keep:
```
Certificates/HTTP/LocalSetup/Network/Provisioning/SerialPort/Webex
```
Select which configurations and files to keep when you factory reset the system. You can have up to 7 CallId parameters in the same command.

Certificates:
- Client and CA certificates.

HTTP:
```
xConfiguration NetworkServices HTTP Mode
xConfiguration NetworkServices HTTPS Server MinimumTLSVersion
xConfiguration NetworkServices HTTPS StrictTransportSecurity
xConfiguration NetworkServices HTTPS VerifyClientCertificate
xConfiguration NetworkServices HTTPS VerifyServerCertificate
```

LocalSetup:
```
xConfiguration Audio DefaultVolume
xConfiguration Audio SoundsAndAlerts RingVolume
xConfiguration Time Zone
xConfiguration UserInterface Language
xConfiguration Video Output Connector OverscanLevel
```

Network:
```
xCommand Camera Preset Store
```

xConfiguration Network 1
- xConfiguration NetworkServices Wifi Allowed
- xConfiguration NetworkServices Wifi Enabled

Provisioning:
- xConfiguration Provisioning Mode

SerialPort:
```
xConfiguration SerialPort Mode
xConfiguration SerialPort BaudRate
xConfiguration SerialPort LoginRequired
```

Spark:
```
xConfiguration Spark ServiceOverrides GdsBaseUrl
xConfiguration Spark ServiceOverrides U2CBaseUrl
xConfiguration Spark ServiceOverrides WdmBaseUrl
```

TrailingAction:
```
NoAction/Restart/Shutdown
```
Select Shutdown or NoAction to override the default behavior (Restart).
Default value: Restart

xCommand SystemUnit FirstTimeWizard Stop

Applies to: All products
Requires user role: ADMIN, INTEGRATOR, USER

Stops the wizard which appears the first time you start the system, so the system can be set up without it. The wizard only appears again if the system is reset to its factory default settings.

USAGE:
```
xCommand SystemUnit FirstTimeWizard Stop
```
xCommand SystemUnit Notifications RemoveAll

Applies to: All products
Requires user role: ADMIN

Clears the list of system notifications that are reported by xStatus SystemUnit Notifications Text/Type.

USAGE:
   xCommand SystemUnit Notifications RemoveAll

xCommand SystemUnit OptionKey Add

Applies to: All products
Requires user role: ADMIN

Add an option key to support additional features.

USAGE:
   xCommand SystemUnit OptionKey Add Key: "Key"
   where
      Key: String (16, 24)
         The key you have received for the option you wish to switch on.

xCommand SystemUnit OptionKey List

Applies to: All products
Requires user role: ADMIN

List all option keys.

USAGE:
   xCommand SystemUnit OptionKey List

xCommand SystemUnit OptionKey Remove

Applies to: All products
Requires user role: ADMIN

Remove a specified option key.

USAGE:
   xCommand SystemUnit OptionKey Remove Type: Type
   where
      Type:
         RemoteMonitoring ( DX70/DX80 )
         Encryption/RemoteMonitoring  ( SX10 )
         MultiSite/RemoteMonitoring   ( SX20 )
         Encryption/MultiSite/RemoteMonitoring  ( SX80 MX200G2/MX300G2 MX700/MX800/MX800D RoomKit Mini CodecPlus CodecPro Room55 Room70/Room55D Room70G2 )

xCommand SystemUnit OptionKey RemoveAll

Applies to: All products
Requires user role: ADMIN

Remove all option keys.

USAGE:
   xCommand SystemUnit OptionKey RemoveAll Confirm: Confirm
   where
      Confirm:
         Yes
xCommand SystemUnit ProductPlatform Set
Applies to: SX80 MX700/MX800/MX800D CodecPlus CodecPro Room70/Room55D Room70G2
Requires user role: ADMIN
Select the product platform for your video system. This command is typically used after a video system has been in for repair and the product platform don’t match the actual product. Use with caution.

**USAGE:**
```
xCommand SystemUnit ProductPlatform Set Platform: Platform
```
where
```
Platform:
ROOM70D/ROOM70S [ CodecPro Room70G2 ]
ROOM55D/ROOM70S/ROOM70D [ CodecPlus Room70/Room55D ]
MX700/MX700ST/MX800/MX800ST/MX800D [ SX80 MX700/MX800/MX800D ]
ROOM55D: The platform is set to Room 55 Dual.
ROOM70S: For Codec Plus and Room 70, the platform is set to Room 70 Single. For Codec Pro and Room 70 G2, the platform is set to Room 70 Single G2.
ROOM70D: For Codec Plus and Room 70, the platform is set to Room 70 Dual. For Codec Pro and Room 70 G2, the platform is set to Room 70 Dual G2.
MX700: The platform is set to MX700 (dual screen, single camera).
MX700ST: The platform is set to MX700 (dual screen, dual camera)
MX800: The platform is set to MX800 (single screen, single camera).
MX800ST: The platform is set to MX800 (single screen, dual camera).
MX800D: The platform is set to MX800 Dual (dual screen, dual camera).
```

xCommand SystemUnit SignInBanner Clear
Applies to: All products
Requires user role: ADMIN
Clear the sign in banner set with xCommand SystemUnit SignInBanner Set.

**USAGE:**
```
xCommand SystemUnit SignInBanner Clear
```

xCommand SystemUnit SignInBanner Get
Applies to: All products
Requires user role: ADMIN, USER
Get the custom message set with xCommand SystemUnit SignInBanner Set.

**USAGE:**
```
xCommand SystemUnit SignInBanner Get
```

xCommand SystemUnit SignInBanner Set
Applies to: All products
Requires user role: ADMIN
Set a sign in banner with a custom message on the system's user interface. This is a multiline command.

Use:
```
xCommand SystemUnit SignInBanner Set <enter>
Banner text <enter>
```

**USAGE:**
```
xCommand SystemUnit SignInBanner Set
```

xCommand SystemUnit SoftReset
Applies to: All products
Requires user role: ADMIN, USER
Reset most parameters to their default values. This does not include parameters associated with room setup, such as camera position, language, and volume.

**USAGE:**
```
xCommand SystemUnit SoftReset Confirm: Confirm
```
where
```
Confirm: Yes
```
**xCommand SystemUnit SoftwareUpgrade**

**Applies to:** All products  
**Requires user role:** ADMIN

Initiate a software upgrade by fetching the software from a given URL.

**USAGE:**  
```bash  
xCommand SystemUnit SoftwareUpgrade URL: "URL" [Forced: Forced]  
```

where  

- **URL:**  
  - **String (0, 255)**  
  - The URL to the software package location.

- **Forced:**  
  - **False/True**  
  - You can force a system to accept a software upgrade immediately, without giving users a chance to acknowledge or postpone the update.

  Default value: True

**xCommand SystemUnit WelcomeBanner Clear**

**Applies to:** All products  
**Requires user role:** ADMIN

Clear the welcome banner set with xCommand SystemUnit WelcomeBanner Set.

**USAGE:**  
```bash  
xCommand SystemUnit WelcomeBanner Clear  
```

**xCommand SystemUnit WelcomeBanner Get**

**Applies to:** All products  
**Requires user role:** ADMIN, AUDIT, INTEGRATOR, ROOMCONTROL, USER

Get the custom message set with xCommand SystemUnit WelcomeBanner Set.

**USAGE:**  
```bash  
xCommand SystemUnit WelcomeBanner Get  
```

**xCommand SystemUnit WelcomeBanner Set**

**Applies to:** All products  
**Requires user role:** ADMIN

Set up a welcome banner that the user sees after they sign in to the device’s web interface or the command line interface. The banner can for example contain information that the user needs to get started or things they need to be aware of when changing settings. This is a multi-line command.

**Use:**  
```bash  
xCommand SystemUnit WelcomeBanner Set <enter>  
Banner text <enter>  
. <enter>  
```

**USAGE:**  
```bash  
xCommand SystemUnit WelcomeBanner Set  
```
Time commands

xCommand Time DateTime Get

**Applies to:** All products

Requires user role: ADMIN, USER

Read the time and date from the system.

**USAGE:**

```
xCommand Time DateTime Get
```

xCommand Time DateTime Set

**Applies to:** All products

Requires user role: ADMIN, USER

Set the date and time for the system, if not available from NTP (Network Time Protocol).

**USAGE:**

```
xCommand Time DateTime Set [Year: Year] [Month: Month] [Day: Day] [Hour: Hour] [Minute: Minute] [Second: Second]
```

where

- **Year:** Integer (2015..2037)
- **Month:** Integer (1..12)
- **Day:** Integer (1..31)
- **Hour:** Integer (0..23)
- **Minute:** Integer (0..59)
- **Second:** Integer (0..59)

UserInterface commands

xCommand UserInterface Branding Clear

**Applies to:** DX70/DX80  SX20  SX80  MX200G2/MX300G2  MX700/MX800/MX800D  RoomKit  RoomKitMini  CodecPlus  CodecPro  Room55  Room70/Room55D  Room70G2

Requires user role: ADMIN, INTEGRATOR

Clears all branding information from this device.

**USAGE:**

```
xCommand UserInterface Branding Clear
```

xCommand UserInterface Branding Delete

**Applies to:** DX70/DX80  SX20  SX80  MX200G2/MX300G2  MX700/MX800/MX800D  RoomKit  RoomKitMini  CodecPlus  CodecPro  Room55  Room70/Room55D  Room70G2

Requires user role: ADMIN, INTEGRATOR, USER

Deletes the chosen image from this device.

**USAGE:**

```
xCommand UserInterface Branding Delete Type: Type
```

where

- **Type:** Background/Branding/HalfwakeBackground/HalfwakeBranding [ DX70/DX80  SX20  SX80  MX200G2/MX300G2  MX700/MX800/MX800D  RoomKit  RoomKitMini  CodecPlus  CodecPro  Room55  Room70/Room55D  Room70G2 ]

Specifies which image to delete from this device.
xCommand UserInterface Branding Get

**Applies to:** DX70/DX80 SX20 SX80 MX200G2/MX300G2 MX700/MX800/MX800D RoomKit RoomKitMini CodecPlus CodecPro Room55 Room70/Room55D Room70Q2

**Requires user role:** ADMIN, INTEGRATOR, USER

Shows the chosen image in base64/encoded format in the requested size, if available.

**USAGE:**
```
xCommand UserInterface Branding Get [Size: Size] Type: Type
```
where

- **Size:**
  - Large/Small/Thumbnail
  - Specifies the size in which to show the image.
  - Default value: Large

- **Type:**
  - Background/Branding/HalfwakeBackground/HalfwakeBranding
  - Specifies which image to show.

xCommand UserInterface Branding Updated

**Applies to:** DX70/DX80 SX20 SX80 MX200G2/MX300G2 MX700/MX800/MX800D RoomKit RoomKitMini CodecPlus CodecPro Room55 Room70/Room55D Room70Q2

**Requires user role:** ADMIN, INTEGRATOR, USER

Updates the chosen branding image.

**USAGE:**
```
xCommand UserInterface Branding Updated Type: Type
```
where

- **Type:**
  - Background/Branding/HalfwakeBackground/HalfwakeBranding
  - Specifies which image to update.

xCommand UserInterface Branding Upload

**Applies to:** DX70/DX80 SX20 SX80 MX200G2/MX300G2 MX700/MX800/MX800D RoomKit RoomKitMini CodecPlus CodecPro Room55 Room70/Room55D Room70Q2

**Requires user role:** ADMIN, INTEGRATOR, USER

Uploads a branding image to this device, which displays in the chosen area. This is a multiline command.

**USAGE:**
```
xCommand UserInterface Branding Upload Type: Type
```
where

- **Type:**
  - Background/Branding/HalfwakeBackground/HalfwakeBranding
  - Specifies the area in which the uploaded image is to display.

xCommand UserInterface Extensions Clear

**Applies to:** All products

**Requires user role:** ADMIN, INTEGRATOR, ROOMCONTROL

Delete all user interface extensions (widgets) from the video system.

**USAGE:**
```
xCommand UserInterface Extensions Clear
```

xCommand UserInterface Extensions List

**Applies to:** All products

**Requires user role:** INTEGRATOR, ROOMCONTROL, USER

List all user interface extensions (widgets) that exist on the video system.

**USAGE:**
```
xCommand UserInterface Extensions List
```
xCommand UserInterface Extensions Panel Clicked

**Applies to:** All products

**Requires user role:** ADMIN, INTEGRATOR, ROOMCONTROL, USER

Creates an event when the user clicks an in-room control panel.

**USAGE:**

```xml
<xCommand UserInterface Extensions Panel Clicked PanelId: "PanelId"

where

PanelId:

  String (0..255)

  The unique identifier of the in-room control panel.
```

---

xCommand UserInterface Extensions Panel Close

**Applies to:** All products

**Requires user role:** ADMIN, INTEGRATOR, ROOMCONTROL, USER

Closes an opened in-room control panel.

**USAGE:**

```xml
<xCommand UserInterface Extensions Panel Close PanelId: "PanelId"

where

PanelId:

  String (0..255)

  The unique identifier of the in-room control panel.
```

---

xCommand UserInterface Extensions Panel Open

**Applies to:** All products

**Requires user role:** ADMIN, INTEGRATOR, ROOMCONTROL, USER

Opens the in-room control panel that has the given PanelId. If the panel has multiple pages you can specify which page to open by including the PageId parameter.

**USAGE:**

```xml
<xCommand UserInterface Extensions Panel Open PanelId: "PanelId" [PageId: "PageId"]

where

PanelId:

  String (0..255)

  The unique identifier of the in-room control panel.

PageId:

  String (0..255)

  The unique identifier of a page on an in-room control panel.
```

---

xCommand UserInterface Extensions Panel Remove

**Applies to:** All products

**Requires user role:** ADMIN, INTEGRATOR, ROOMCONTROL

Removes the in-room control panel from the user interface of this video system.

**USAGE:**

```xml
<xCommand UserInterface Extensions Panel Remove PanelId: "PanelId"

where

PanelId:

  String (0..255)

  The unique identifier of the in-room control panel.
```
xCommand UserInterface Extensions Panel Save
Applies to: All products
Requires user role: ADMIN, INTEGRATOR, ROOMCONTROL

Adds an in-room control panel to the current configuration. The panel will be added to the
configuration, but if a panel with the same panel ID already exists, it will be overwritten. This is a
multiline command.

USAGE:
xCommand UserInterface Extensions Panel Save PanelId: "PanelId"
where
  PanelId:
    String (0..255)
    The unique identifier of the in-room control panel.

xCommand UserInterface Extensions Panel Update
Applies to: All products
Requires user role: ADMIN, INTEGRATOR, ROOMCONTROL, USER

Update the name of the in-room control panel that has the given PanelId. This is the name that
you see just below the button on the user interface.

USAGE:
xCommand UserInterface Extensions Panel Update PanelId: "PanelId" Name: "Name"
where
  PanelId:
    String (0..255)
    The unique identifier of the in-room control panel.
  Name:
    String (0..255)
    The new name of the in-room control panel.

xCommand UserInterface Extensions Set
Applies to: All products
Requires user role: ADMIN, INTEGRATOR, ROOMCONTROL

Set the configuration scheme you have chosen in the user interface extensions (widgets)
for your video system. Updates the UserInterface Extensions status tree. This is a multiline
command.

USAGE:
xCommand UserInterface Extensions Set ConfigId: "ConfigId"
where
  ConfigId:
    String (0, 40)
    The unique identifier for the configuration.

xCommand UserInterface Extensions Widget Action
Applies to: All products
Requires user role: ADMIN, INTEGRATOR, ROOMCONTROL, USER

Sets the action of the given widget. Updates the UserInterface Extensions status tree.

USAGE:
xCommand UserInterface Extensions Widget Action [Type: "Type"] [Value: "Value"]
WidgetId: "WidgetId"
where
  Type:
    String (0..255)
    The type of widget that is set.
  Value:
    String (0..255)
    The value of the widget. The range of values depends on the widget type.
  WidgetId:
    String (0..255)
    The unique identifier for the widget.
xCommand UserInterface Extensions Widget SetValue

Applies to: All products

Requires user role: ADMIN, INTEGRATOR, ROOMCONTROL

Set the value of the given widget. Updates the UserInterface Extensions status tree. Returns an error if the value is out of range.

**USAGE:**

```
xCommand UserInterface Extensions Widget SetValue Value: "Value" WidgetId: "WidgetId"
```

where

- **Value**: String (0, 255)
  - The value of the widget. The range of values depends on the widget type.
- **WidgetId**: String (0, 255)
  - The unique identifier for the widget.

xCommand UserInterface Extensions Widget UnsetValue

Applies to: All products

Requires user role: ADMIN, INTEGRATOR, ROOMCONTROL

Empties the value of the given widget. Updates the UserInterface Extensions status tree and notifies the user interface that this widget is no longer selected.

**USAGE:**

```
xCommand UserInterface Extensions Widget UnsetValue WidgetId: "WidgetId"
```

where

- **WidgetId**: String (0, 255)
  - The unique identifier for the widget.

xCommand UserInterface Message Alert Clear

Applies to: All products

Requires user role: ADMIN, INTEGRATOR, ROOMCONTROL, USER

Remove the message which was displayed using the UserInterface Message Alert Display command. This is required when the Duration parameter is not set.

**USAGE:**

```
xCommand UserInterface Message Alert Clear
```

xCommand UserInterface Message Alert Display

Applies to: All products

Requires user role: ADMIN, INTEGRATOR, ROOMCONTROL

Display a message on screen. Optionally you can keep the message for a specified duration of time. If Duration is not set, the command must be followed by a UserInterface Message Alert Clear command.

**USAGE:**

```
xCommand UserInterface Message Alert Display [Title: "Title"] Text: "Text" [Duration: Duration]
```

where

- **Title**: String (0, 255)
  - The title of the message.
  - Default value: ""
- **Text**: String (0, 255)
  - The message to be displayed. The <p> and <br> HTML tags will result in line breaks as normal; any other tags will appear as plain text.
- **Duration**: Integer (0..3600)
  - How long (in seconds) the message is to be displayed on the screen. If set to 0 (zero) the message is displayed until a UserInterface Message Alert Clear command is sent.
  - Default value: 0
xCommand UserInterface Message Prompt Clear

Applies to: All products
Requires user role: ADMIN, INTEGRATOR, ROOMCONTROL, USER

Remove the window which was displayed using the UserInterface Message Prompt Display command. This is required when the Duration parameter is not set.
Use the xFeedback commands to monitor the feedback from the user. Read more about the xFeedback commands in the API introduction section in this guide.

USAGE:
```
xCommand UserInterface Message Prompt Clear [FeedbackId: "FeedbackId"]
```
where
```
FeedbackId:
String (0, 255)
The FeedbackId corresponds to the FeedbackId given by the UserInterface Message Prompt Display command.
Default value: ""
```

xCommand UserInterface Message Prompt Display

Applies to: All products
Requires user role: ADMIN, INTEGRATOR, ROOMCONTROL

Display a small window on screen with a title, text and up to five options for response from the user. The message is displayed on screen until the user gives a response, or until the system receives a UserInterface Message Prompt Clear command.
Use the xFeedback commands to monitor the feedback from the user. Read more about the xFeedback commands in the API introduction section in this guide.

USAGE:
```
xCommand UserInterface Message Prompt Display [Title: "Title"] Text: "Text" [FeedbackId: "FeedbackId"] [Duration: Duration] [Option.1: "Option.1"] [Option.2: "Option.2"] [Option.3: "Option.3"] [Option.4: "Option.4"] [Option.5: "Option.5"]
```
where
```
Title:
String (0, 255)
The title of the message.

Text:
String (0, 255)
Enter the text line to be displayed. The <p> and <br> HTML tags will result in line breaks as normal; any other tags will appear as plain text.

FeedbackId:
String (0, 255)
To identify the feedback enter a FeedbackId.

Duration:
Integer (0, 3600)
How long (in seconds) the message window is to be displayed on the screen. If set to 0 (zero) the message window is displayed until a UserInterface Message Prompt Clear command is sent.
Default value: 0

Option.1:
String (0, 255)
The text to appear on feedback option 1.

Option.2:
String (0, 255)
The text to appear on feedback option 2.
Option.3:
String (0, 255)
The text to appear on feedback option 3.

Option.4:
String (0, 255)
The text to appear on feedback option 4.

Option.5:
String (0, 255)
The text to appear on feedback option 5.

xCommand UserInterface Message Prompt Response

Applies to: All products
Requires user role: ADMIN, INTEGRATOR, ROOMCONTROL, USER

Give a response to the UserInterface Message Prompt Display command. This command is executed when the user selects an option in the user interface.
Use the xFeedback commands to monitor the feedback from the user. Read more about the xFeedback commands in the API introduction section in this guide.

USAGE:
xCommand UserInterface Message Prompt Response [FeedbackId: "FeedbackId"]
where
FeedbackId:
String (0, 255)
The FeedbackId corresponds to the FeedbackId given by the UserInterface Message Prompt Display command.
Default value: ""

xCommand UserInterface Message TextInput Clear

Applies to: All products
Requires user role: ADMIN, INTEGRATOR, ROOMCONTROL, USER

Remove the text input message which was displayed using the UserInterface Message TextInput Display command. This is required when the Duration parameter is not set.
Use the xFeedback commands to monitor the feedback from the user. Read more about the xFeedback commands in the API introduction section in this guide.

USAGE:
xCommand UserInterface Message TextInput Clear [FeedbackId: "FeedbackId"]
where
FeedbackId:
String (0, 255)
The FeedbackId corresponds to the FeedbackId given by the UserInterface Message TextInput Display command.
Default value: ""
xCommand UserInterface Message TextInput Display

Applies to: All products
Requires user role: ADMIN, INTEGRATOR, ROOMCONTROL

Displays an input dialog box to which a user can respond. This is only supported for devices with a touch-based user interface. The message is displayed on screen until the user gives a response, or until the system receives a UserInterface Message TextInput Clear command. Use the xFeedback commands to monitor the feedback from the user. Read more about the xFeedback commands in the API introduction section in this guide.

USAGE:
xCommand UserInterface Message TextInput Display [Duration: Duration] [FeedbackId: "FeedbackId"] [InputText: "InputText"] [InputType: InputType] [KeyboardState: KeyboardState] [Placeholder: "Placeholder"] [SubmitText: "SubmitText"] Text: "Text" [Title: "Title"]

where

Duration:
Integer (0..3600)
How long (in seconds) the message is to be displayed on the screen. If set to 0 (zero) the message is displayed until a UserInterface Message TextInput Clear command is sent.
Default value: 0

FeedbackId:
String (0..255)
To identify the feedback enter a FeedbackId.

InputText:
String (0..255)
Text that is pre-populated in the text input field when the dialog box opens. Before submitting the response, you can edit this text, or delete it and enter your own text.
If this parameter is not included, the content of the Placeholder parameter is shown in the text input field when the dialog box opens.
Default value: ""

InputType:
SingleLine/Numeric/Password/PIN
The type of text input dialog box that is displayed. This also determines the keyboard layout that it displayed.
Default value: SingleLine

KeyboardState:
Open/Closed
Specifies if the device’s keyboard should open when the text input message displays.
Default value: Open

Placeholder:
String (0..255)
Placeholder text that is displayed in the text input field until you start typing. If the InputText parameter is included, the Placeholder parameter has no effect.
Default value: ""

SubmitText:
String (0..32)
The text that is shown on the Submit button.
Default value: "OK"

Text:
String (0..128)
The message that is to be displayed to the user. The <p> and <br> HTML tags will result in line breaks as normal; any other tags will appear as plain text.

Title:
String (0..40)
The title of the input dialog box.
Default value: ""
**xCommand UserInterface Message TextInput Response**

**Applies to:** All products

**Requires user role:** ADMIN, INTEGRATOR, ROOMCONTROL, USER

Give a response to the UserInterface Message TextInput Display command. This command is executed when the user submits the reply that he has entered in the text input field in the user interface.

Use the xFeedback commands to monitor the feedback from the user. Read more about the xFeedback commands in the API introduction section in this guide.

**USAGE:**

```plaintext
xCommand UserInterface Message TextInput Response [FeedbackId: "FeedbackId"]
  Text: "Text"
where
  FeedbackId:
      String (0, 255)
      To identify the feedback enter a FeedbackId.
  Text:
      String (0, 255)
      The message that is to be displayed to the user.
```

**xCommand UserInterface Message TextLine Clear**

**Applies to:** All products

**Requires user role:** ADMIN, INTEGRATOR, ROOMCONTROL, USER

Remove the text line which was displayed by the UserInterface Message TextLine Display command. This is required when the Duration parameter is not set.

**USAGE:**

```plaintext
xCommand UserInterface Message TextLine Clear
```

**xCommand UserInterface Message TextLine Display**

**Applies to:** All products

**Requires user role:** ADMIN, INTEGRATOR, ROOMCONTROL

Display a text line on screen. Optionally you can place the text line at a specified location and for a specified duration of time. If Duration is not set, the command must be followed by the UserInterface Message TextLine Clear command.

**USAGE:**

```plaintext
xCommand UserInterface Message TextLine Display Text: "Text" [X: X] [Y: Y] [Duration: Duration]
where
  Text:
      String (0, 140)
      The text line to be displayed. The <p> and <br> HTML tags will result in line breaks as normal; any other tags will appear as plain text.
  X:
      Integer (1..10000)
      Enter the X-coordinate (horizontal) on screen. X=0 is in the upper left corner.
      Default value: 0
  Y:
      Integer (1..10000)
      Enter the Y-coordinate (vertical) on screen. Y=0 is in the upper left corner.
      Default value: 0
  Duration:
      Integer (0..3600)
      How long (in seconds) the text line is to be displayed on the screen. If set to 0 (zero) the text line is displayed until a UserInterface Message TextLine Clear command is sent.
      Default value: 0
```
xCommand UserInterface OSD Key Click

Applies to: DX70/DX80 SX10 SX20
Requires user role: ADMIN

Emulates a remote control key press, followed by a key release.

**USAGE:**
xCommand UserInterface OSD Key Click Key: Key
where
    Key: 0/1/2/3/4/5/6/7/8/9/C/Call/Disconnect/Down/F1/F2/F3/F4/F5/Grab/Home/Layout/Left/
        Mute/MuteMic/Ok/PhoneBook/Presentation/Right/Selfview/Square/SrcAux/SrcCamera/
        SrcDocCam/SrcPc/SrcVcr/Star/Up/VolumeDown/VolumeUp/ZoomIn/ZoomOut/+/-
    Define the remote key to press.

xCommand UserInterface OSD Key Press

Applies to: DX70/DX80 SX10 SX20
Requires user role: ADMIN

Emulates a remote control key press without releasing it. The Key Press command must be
followed
by a Key Release command to emulate releasing the key.

**USAGE:**
xCommand UserInterface OSD Key Press Key: Key
where
    Key: 0/1/2/3/4/5/6/7/8/9/C/Call/Disconnect/Down/F1/F2/F3/F4/F5/Grab/Home/Layout/Left/
        Mute/MuteMic/Ok/PhoneBook/Presentation/Right/Selfview/Square/SrcAux/SrcCamera/
        SrcDocCam/SrcPc/SrcVcr/Star/Up/VolumeDown/VolumeUp/ZoomIn/ZoomOut/+/-
    Define the remote key to press.

xCommand UserInterface OSD Key Release

Applies to: DX70/DX80 SX10 SX20
Requires user role: ADMIN

Emulates a remote control key release. The Key Release command is issued after a Key Press
command.

**USAGE:**
xCommand UserInterface OSD Key Release Key: Key
where
    Key: 0/1/2/3/4/5/6/7/8/9/C/Call/Disconnect/Down/F1/F2/F3/F4/F5/Grab/Home/Layout/Left/
        Mute/MuteMic/Ok/PhoneBook/Presentation/Right/Selfview/Square/SrcAux/SrcCamera/
        SrcDocCam/SrcPc/SrcVcr/Star/Up/VolumeDown/VolumeUp/ZoomIn/ZoomOut/+/-
    Define the remote key to release.
xCommand UserInterface Presentation ExternalSource Add

Applies to: All products
Requires user role: ADMIN, INTEGRATOR, ROOMCONTROL

Establish and set up an input source that is connected to the video system via an external switch.

**USAGE:**

```
xCommand UserInterface Presentation ExternalSource Add ConnectorId: <ConnectorId> SourceIdentifier: "<SourceIdentifier>" Name: "<Name>" Type: <Type>
```

where

- **ConnectorId:**
  - Integer (2..3) [ SX10 ]
  - Integer (1..3) [ SX20 ]
  - Integer (1..5) [ MX200G2/MX300G2 ]
  - Integer (2..4) [ MX700/MX800/MX800D ]
  - Integer (0..5) [ RoomKit RoomKitMini CodecPlus CodecPro Room55 Room70/Room55D Room70G2 ]
  - Integer (2..2) [ DX70/DX80 ]

  The ID of the video system connector that the external switch is connected to.

- **SourceIdentifier:**
  - String (0, 40)

  A unique string that identifies the input source. The identifier is used by other commands and events when addressing this specific input source.

- **Name:**
  - String (0, 40)

  The name of the input source. This name will be displayed on the user interface.

- **Type:**
  - camera/desktop/document_camera/mediaplayer/PC/whiteboard/other

  The type of input source. The type determines which icon to display on the user interface.

xCommand UserInterface Presentation ExternalSource List

Applies to: All products
Requires user role: ADMIN, INTEGRATOR, ROOMCONTROL

Returns the current list of external input sources.

**USAGE:**

```
xCommand UserInterface Presentation ExternalSource List
```

xCommand UserInterface Presentation ExternalSource Remove

Applies to: All products
Requires user role: ADMIN, INTEGRATOR, ROOMCONTROL

Remove the input source (specified by the SourceIdentifier) from the list of external input sources.

**USAGE:**

```
xCommand UserInterface Presentation ExternalSource Remove SourceIdentifier: "<SourceIdentifier>"
```

where

- **SourceIdentifier:**
  - String (0, 40)

  The unique string that identifies this input source. It was defined when the source was created with the UserInterface Presentation ExternalSource Add command.

xCommand UserInterface Presentation ExternalSource RemoveAll

Applies to: All products
Requires user role: ADMIN, INTEGRATOR, ROOMCONTROL

Remove all input sources from the list of external input sources.

**USAGE:**

```
xCommand UserInterface Presentation ExternalSource RemoveAll
```
xCommand UserInterface Presentation ExternalSource Select

Applies to: All products

Requires user role: ADMIN, INTEGRATOR, ROOMCONTROL, USER

Starts to present the input source (specified by the SourceIdentifier) if it is in Ready state (see the UserInterface Presentation ExternalSource State Set command). The input source will be shown in the user interface sharetray as “Presenting”.

USAGE:

xCommand UserInterface Presentation ExternalSource Select SourceIdentifier: "SourceIdentifier"

where

SourceIdentifier:

String (0, 40)
The unique string that identifies this input source. It was defined when the source was created with the UserInterface Presentation ExternalSource Add command.

xCommand UserInterface Presentation ExternalSource State Set

Applies to: All products

Requires user role: ADMIN, INTEGRATOR, ROOMCONTROL

Set or change the state of the input source (specified by the SourceIdentifier).

USAGE:

xCommand UserInterface Presentation ExternalSource State Set SourceIdentifier: "SourceIdentifier" State: State [ErrorReason: "ErrorReason"]

where

SourceIdentifier:

String (0, 40)
The unique string that identifies this input source. It was defined when the source was created with the UserInterface Presentation ExternalSource Add command.

State:

Hidden/Ready/NotReady/Error

Ready: The input source will be presented when someone selects it (taps it on the user interface, or when the UserInterface Presentation ExternalSource Select command is issued).

NotReady: The input source is not ready, and cannot be selected.

Error: The input source is in an erroneous state. The ErrorReason parameter may be used to inform the user about the reason for failure.

Hidden: The input source will not be displayed in the user interface sharetray.

ErrorReason:

String (0, 80)
This string is displayed in the user interface sharetray, given that the State parameter is set to Error.

Default value: ""
UserManagement commands

xCommand UserManagement RemoteSupportUser Create
Applies to: All products
Requires user role: ADMIN

Create a remote support user passphrase that Technical Assistance Center (TAC) can use to access the system for troubleshooting.

USAGE:
```
xCommand UserManagement RemoteSupportUser Create [ExpiryDays: \text{ExpiryDays}] 
```
where

- \text{ExpiryDays}: Integer (1..31)
  - Define the duration for the passphrase validity. Default is 7 days.

xCommand UserManagement RemoteSupportUser Delete
Applies to: All products
Requires user role: ADMIN

Delete the remote support user created with the command xCommand UserManagement RemoteSupportUser Create.

USAGE:
```
xCommand UserManagement RemoteSupportUser Delete 
```

xCommand UserManagement RemoteSupportUser DisablePermanently
Applies to: All products
Requires user role: ADMIN

Disable the creation of new remote support users. To enable the remote support user again you must factory reset your system.

USAGE:
```
xCommand UserManagement RemoteSupportUser DisablePermanently Confirm: Confirm
```
where

- \text{Confirm}: Yes

xCommand UserManagement RemoteSupportUser GetState
Applies to: All products
Requires user role: ADMIN

Retrieves the state of the generated remote support user, if one exists.

USAGE:
```
xCommand UserManagement RemoteSupportUser GetState 
```
xCommand UserManagement User Add

Applies to: All products
Requires user role: ADMIN

Adds a new user to this device.

**USAGE:**

```bash
xCommand UserManagement User Add [Active: Active] [ClientCertificateDN:
"ClientCertificateDN"] [Passphrase: "Passphrase"] [PassphraseChangeRequired:
PassphraseChangeRequired] [PinChangeRequired: PinChangeRequired] [Role: Role] [
ShellLogin: ShellLogin] Username: "Username" [YourPassphrase: "YourPassphrase"]
```

where

- **Active:**
  - False/True
  - Specifies whether this is an active user or not.

- **ClientCertificateDN:**
  - String (0..255)
  - Identifies a user who logs in with a client certificate instead of a username and password.

- **Passphrase:**
  - String (0..255)
  - Specifies a Passphrase for the user.

- **PassphraseChangeRequired:**
  - False/True
  - Specifies whether the user’s passphrase requires changing or not.

- **PinChangeRequired:**
  - False/True
  - Specifies whether a user’s PIN requires changing or not.

- **Role:**
  - Admin/Audit/Integrator/RoomControl/User
  - Sets the user’s role.

- **ShellLogin:**
  - False/True
  - Specifies whether the user should have a shell login or not.

- **Username:**
  - String (0..127)
  - Specifies the user’s username.

- **YourPassphrase:**
  - String (0..255)
  - The user’s passphrase.

xCommand UserManagement User Delete

Applies to: All products
Requires user role: ADMIN

Deletes a user from this device.

**USAGE:**

```bash
xCommand UserManagement User Delete Username: "Username" [YourPassphrase:
"YourPassphrase"]
```

where

- **Username:**
  - String (0..127)
  - Specifies the username of the user that is deleted.

- **YourPassphrase:**
  - String (0..255)
  - The passphrase of the user that is deleted.
xCommand UserManagement User Get

Applies to: All products
Requires user role: ADMIN

Shows the details of users on this device.

USAGE:

```cshell
[Username: "Username"]
```

where

- **ClientCertificateDN**:
  - String (0..255)
  - Identifies a user who logs in with a client certificate instead of a username and password.
- **Username**:
  - String (0..127)
  - Specify a username to show the details of a particular user.

xCommand UserManagement User List

Applies to: All products
Requires user role: ADMIN

Shows the list of users on this device.

USAGE:

```cshell
xCommand UserManagement User List [Limit: Limit] [Offset: Offset]
```

where

- **Limit**:
  - Integer (0..65536)
  - Limits the number of results that are shown.
  - Default value: 0
- **Offset**:
  - Integer (0..65536)
  - Shows lines with the same or higher Offset than the one provided.
  - Default value: 0

xCommand UserManagement User Modify

Applies to: All products
Requires user role: ADMIN

Modifies the details of a particular user.

USAGE:

```cshell
xCommand UserManagement User Modify [Active: Active] [AddRole: AddRole]
[ClientCertificateDN: "ClientCertificateDN"] [PassphraseChangeRequired:
PassphraseChangeRequired] [PinChangeRequired: PinChangeRequired] [RemoveRole:
RemoveRole] [ShellLogin: ShellLogin] Username: "Username" [YourPassphrase:
"YourPassphrase"]
```

where

- **Active**:
  - False/True
  - Specifies whether this is an active user or not.
- **AddRole**:
  - Admin/Audit/Integrator/RoomControl/User
  - Adds a new role for the specified user.
- **ClientCertificateDN**:
  - String (0..255)
  - Identifies a user who logs in with a client certificate instead of a username and password.
- **PassphraseChangeRequired**:
  - False/True
  - Specifies whether the user's passphrase requires changing or not.
- **PinChangeRequired**:
  - False/True
  - Specifies whether a user's PIN requires changing or not.
- **RemoveRole**:
  - Admin/Audit/Integrator/RoomControl/User
  - Removes a role from the specified user.
- **ShellLogin**:
  - False/True
  - Specifies whether the user should have a shell login or not.
- **Username**:
  - String (0..127)
Specifies the user’s username.

Specifies the user’s username.
*YourPassphrase*: String (0..255)

The user’s passphrase.

### xCommand UserManagement User Passphrase Change

**Applies to:** All products

**Requirements:** user role: ADMIN, AUDIT, INTEGRATOR, ROOMCONTROL, USER

Change the passphrase for the user you logged in as. If you are logged in as the administrator, this will change the administrator passphrase.

**Usage:**

```
xCommand UserManagement User Passphrase Change NewPassphrase: "NewPassphrase"
OldPassphrase: "OldPassphrase"
```

where

- **NewPassphrase**: String (0, 255)
- **OldPassphrase**: String (0, 255)

### xCommand UserManagement User Passphrase Set

**Applies to:** All products

**Requirements:** user role: ADMIN

Set a user passphrase for the specified user. You must be logged in as an administrator to set a user passphrase.

**Usage:**

```
xCommand UserManagement User Passphrase Set NewPassphrase: "NewPassphrase"
Username: "Username" [YourPassphrase: "YourPassphrase"]
```

where

- **NewPassphrase**: String (0, 255)
- **Username**: String (0, 127)
- **YourPassphrase**: String (0, 255)

### xCommand UserManagement User Unblock

**Applies to:** All products

**Requirements:** user role: ADMIN

Unblocks a user who is blocked out because of too many failed login attempts.

**Usage:**

```
xCommand UserManagement User Unblock Username: "Username" [YourPassphrase: "YourPassphrase"]
```

where

- **Username**: String (0, 127)
- **YourPassphrase**: String (0, 255)
Video commands

xCommand Video ActiveSpeakerPIP Set

Applies to: All products
Requires user role: ADMIN, USER

Sets position for the active speakers PIP (picture in picture).

USAGE:
xCommand Video ActiveSpeakerPIP Set Position: Position
where
  Position: CenterLeft/CenterRight/LowerLeft/LowerRight/UpperCenter/UpperLeft/UpperRight
Select one of the predefined positions.

xCommand Video CEC Input KeyClick

Applies to: RoomKit  RoomKitMini  CodecPlus  CodecPro  Room55  Room70/Room55D  Room70G2
Requires user role: ADMIN, INTEGRATOR

Mimics a remote control key click event from the input device.

USAGE:
xCommand Video CEC Input KeyClick ConnectorId: ConnectorId [Key: Key] [LogicalAddress: LogicalAddress] [NamedKey: NamedKey]
where
  ConnectorId: Integer (1..5) [CodecPro Room70G2]
  Integer (1..3) [RoomKit RoomKitMini CodecPlus Room55 Room70/Room55D]
The unique identifier of the connector.
  Key: Integer (0..255)
The CEC specified key code for the key that is sent to the logical address of the device as if it was pushed on a remote control.
  LogicalAddress: Integer (0..15)
The logical address of the connected device.
  NamedKey: Up/Down/Right/Left/Ok/Back/Stop/Play
The name of the key that is sent to the logical address of the device as if it was pushed on a remote control.
xCommand Video CEC Output KeyClick

Applies to: SX10 SX20 SX80 MX200G2/MX300G2 MX700/MX800/MX800D RoomKit RoomKitMini CodecPlus CodecPro Room55 Room70/Room55D Room70G2

Requires user role: ADMIN, INTEGRATOR

Mimics a remote control key click event from this device.

USAGE:

xCommand Video CEC Output KeyClick ConnectorId: ConnectorId [Key: Key]
LogicalAddress: LogicalAddress [NamedKey: NamedKey]

where

ConnectorId:
Integer (1..1) [ SX10 ]
Integer (1..3) [ SX20 SX80 MX200G2/MX300G2 MX700/MX800/MX800D RoomKit RoomKitMini CodecPlus CodecPro Room55 Room70/Room55D Room70G2 ]

The unique identifier of the connector.

Key:
Integer (0..255)
The CEC specified key code for the key that is sent to the logical address of the device as if it was pushed on a remote control.

LogicalAddress:
Integer (0..15)
The logical address of the connected device.

NamedKey:
Up/Down/Right/Left/Ok/Back/Stop/Play)
The name of the key that is sent to the logical address of the device as if it was pushed on a remote control.

xCommand Video CEC Output SendActiveSourceRequest

Applies to: SX10 SX20 SX80 MX200G2/MX300G2 MX700/MX800/MX800D RoomKit RoomKitMini CodecPlus CodecPro Room55 Room70/Room55D Room70G2

Requires user role: ADMIN, INTEGRATOR

A request from this device which discovers whether the connected device is active.

USAGE:

xCommand Video CEC Output SendActiveSourceRequest [ConnectorId: ConnectorId]

where

ConnectorId:
Integer (1..1) [ SX10 ]
Integer (1..3) [ SX20 SX80 MX200G2/MX300G2 MX700/MX800/MX800D RoomKit RoomKitMini CodecPlus CodecPro Room55 Room70/Room55D Room70G2 ]

The unique identifier of the connector.

xCommand Video Input MainVideo Mute

Applies to: All products

Requires user role: ADMIN, INTEGRATOR, USER

Stop sending video from the video system. Selfview is also turned off. This command does not affect the presentation channel.

USAGE:

xCommand Video Input MainVideo Mute

xCommand Video Input MainVideo Unmute

Applies to: All products

Requires user role: ADMIN, INTEGRATOR, USER

Start sending video from the video system if previously turned off using the Video Input MainVideo Mute command (or, if available, the "Turn off video" button on the user interface). Selfview is also available.

USAGE:

xCommand Video Input MainVideo Unmute
xCommand Video Input SetMainVideoSource

**Applies to:** DX70/DX80 SX20 SX80 MX200G2/MX300G2 MX700/MX800/MX800D RoomKit RoomKitMini CodecPlus CodecPro Room55 Room70/Room55D Room70G2

**Requires user role:** ADMIN, INTEGRATOR, USER

Set which input source is the main video source. You can identify the input source by either the physical connector that it is connected to (ConnectorId) or the logical source identifier (SourceId).

You can combine up to four input sources in a single main video stream (the maximum number of different input sources depend on the type of video system) by adding multiple ConnectorIds or SourceIds in the same command. There cannot be a mix of identifier types in the same command; use either ConnectorId or SourceId. DX70 and DX80 don’t support such combination of input sources.

**USAGE:**

```
xCommand Video Input SetMainVideoSource [ConnectorId: ConnectorId] [Layout: Layout] [PIPPosition: PIPPosition] [PIPSize: PIPSize] [SourceId: SourceId]
```

where

- **ConnectorId:**
  - `Integer (1..n)`
  - The identifier (ID) of the connector. Connector [n] has ID n. Run the following API command to find the ID: xStatus Video Input Connector.

- **Layout:**
  - `Equal/PIP/Prominent`
  - Sets the layout of the main video source if the main video source is composed of multiple input sources.

- **PIPPosition:**
  - `LowerLeft/LowerRight/UpperLeft/UpperRight`
  - Select the PIP position of the main video source if the main video source is composed of multiple input sources.

- **PIPSize:**
  - `Auto/Large`
  - Select the PIP size of the main video source if the main video source is composed of multiple input sources.

- **SourceId:**
  - `Integer (1..n)`
  - The identifier (ID) of the input source. Input Source [n] has ID n. Run the following API command to find the ID: xStatus Video Input Source.

xCommand Video Input Source SetActiveConnector

**Applies to:** SX10 SX80 MX200G2/MX300G2 MX700/MX800/MX800D

**Requires user role:** ADMIN, USER

Select which connector is active.

On SX80, MX700 and MX800, Input Connector 4 (DVI-I) and Connector 5 (S-Video/Composite) cannot be active simultaneously.

**USAGE:**

```
xCommand Video Input Source SetActiveConnector [ConnectorId: ConnectorId]
```

where

```
ConnectorId:
- `integer (4..5) [sx80 mx700/mx800/mx800d]`
- `integer (2..4) [mx200g2/mx300g2]`
- `integer (2..3) [sx10]`
```

The identifier (ID) of the connector. Connector [n] has ID n. Check the Video Input Connector status to find the connector IDs. On SX80 and MX700/MX800, the connector ID is also printed on the codec connector panel.
xCommand Video Layout LayoutFamily Set

Applies to: All products
Requires user role: ADMIN, USER

Select the screen layout mode.

USAGE:
```
xCommand Video Layout LayoutFamily Set [Target: Target] LayoutFamily: LayoutFamily [CustomLayoutName: "CustomLayoutName"]
```

where
- **Target**: Local/Remote
  Select if the target is the local layout or the remote layout.
- **LayoutFamily**: auto/custom/equal/overlay/prominent/single
  Select a layout family.
- **CustomLayoutName**: String (1, 128)
  Enter a name for the layout.

xCommand Video Matrix Assign

Applies to: SX20 SX80 MX200G2/MX300G2 MX700/MX800/MX800D RoomKit CodecPlus CodecPro Room70/Room70G2
Requires user role: ADMIN, INTEGRATOR, USER

Video Matrix commands are a smart overlay to the xCommand Video Layout commands to make it easy to do simple video compositions.

USAGE:
```
xCommand Video Matrix Assign [Layout: Layout] [Mode: Mode] Output: Output [RemoteMain: RemoteMain] [SourceId: SourceId]
```

where
- **Layout**: Equal/Prominent
  Select the layout you wish to use for the video composition.
- **Equal**: All sources are shown in same-sized images on the output.
- **Prominent**: The first source is shown as a large image, and the next sources are shown as smaller images placed below.
- **Mode**: Add/Replace
  Choose whether to replace the existing source on that output rendered full screen or to add it. Using Add, the layout engine will recompose the multiple sources automatically. Replace is the default value.
- **Output**: Integer (1..2) [ SX20 MX200G2/MX300G2 RoomKit CodecPlus ]
  Integer (1..3) [ SX80 MX700/MX800/MX800D CodecPro Room70G2 ]
  Choose the output you wish to use for this layout.
- **RemoteMain**: Integer (1..4)
  Add a remote site to the layout.
- **SourceId**: Integer (1..6) [ CodecPro Room70G2 ]
  Integer (1..3) [ SX20 ]
  Integer (1..4) [ SX80 MX200G2/MX300G2 MX700/MX800/MX800D RoomKit CodecPlus ]
  The identifier (ID) of the input source. Input Source [n] has ID n. Run the following API command to find the ID: xStatus Video Input Source. You can use up to four SourceIds in one command.
xCommand Video Matrix Reset

**Applies to:** SX20 SX80 MX200G2/MX300G2 MX700/MX800/MX800D RoomKit CodecPlus CodecPro Room70/Room55D Room70G2

**Requires user role:** ADMIN, INTEGRATOR, USER

Reset the content on the output to the default layout

xCommand Video Matrix commands are a smart overlay to the xCommand Video Layout commands to make it easy to do simple video compositions.

**USAGE:**

```
xCommand Video Matrix Reset [Output: Output]
```

where

```
Output:
```

- **Integer (1..2)** [ SX20 MX200G2/MX300G2 RoomKit CodecPlus ]
- **Integer (1..3)** [ SX80 MX700/MX800/MX800D CodecPro Room70G2 ]

Choose the output you want to reset.

---

xCommand Video Matrix Swap

**Applies to:** SX20 SX80 MX200G2/MX300G2 MX700/MX800/MX800D RoomKit CodecPlus CodecPro Room70/Room55D Room70G2

**Requires user role:** ADMIN, INTEGRATOR, USER

Swap the content defined with xCommand Video Matrix Assign between two outputs.

xCommand Video Matrix commands are a smart overlay to the xCommand Video Layout commands to make it easy to do simple video compositions.

**USAGE:**

```
xCommand Video Matrix Swap OutputA: OutputA OutputB: OutputB
```

where

```
OutputA:
```

- **Integer (1..2)** [ SX20 MX200G2/MX300G2 RoomKit CodecPlus ]
- **Integer (1..3)** [ SX80 MX700/MX800/MX800D CodecPro Room70G2 ]

The output you are swapping from.

```
OutputB:
```

- **Integer (1..2)** [ SX20 MX200G2/MX300G2 RoomKit CodecPlus ]
- **Integer (1..3)** [ SX80 MX700/MX800/MX800D CodecPro Room70G2 ]

The output you are swapping to.
xCommand Video Matrix Unassign

Applies to: SX20, SX80, MX200G2/MX300G2, MX700, MX800, MX800D, RoomKit, CodecPlus, CodecPro, Room70, Room55D, Room70G2.

Requires user role: ADMIN, INTEGRATOR, USER.

Remove a source from an output. Just as with xCommand Video Matrix Assign the layout engine will recompose the remaining sources automatically.

xCommand Video Matrix commands are a smart overlay to the xCommand Video Layout commands to make it easy to do simple video compositions.

**USAGE:**

xCommand Video Matrix Unassign Output: **Output** [RemoteMain: **RemoteMain**] [SourceId: **SourceId**]

where

- **Output**: Integer (1..2) [SX20, MX200G2/MX300G2, RoomKit, CodecPlus]
- **RemoteMain**: Integer (1..4) [SX20, MX200G2/MX300G2, RoomKit, CodecPlus]
- **SourceId**: Integer (1..2) [SX20, MX200G2/MX300G2, RoomKit, CodecPlus]

Choose the output you wish to remove the source from.

RemoteMain:

- Integer (1..4)
  - Remove a remote site from the layout.

SourceId:

- Integer (1..2) [SX20, MX200G2/MX300G2, RoomKit, CodecPlus]
- Integer (1..3) [MX700, MX800, MX800D, Room70G2]
- Integer (1..4) [MX700, MX800, MX800D, CodecPlus]
- Integer (1..6) [CodecPro, Room70G2]

The identifier (ID) of the input source. Input Source [n] has ID n. Run the following API command to find the ID: xStatus Video Input Source.

xCommand Video Output Monitor Backlight Set

Applies to: MX700, MX800, MX800D, Room70, Room55D, Room70G2.

Requires user role: ADMIN.

Adjust the monitor backlight.

**USAGE:**

xCommand Video Output Monitor Backlight Set Position: **Position** Value: **Value**

where

- **Position**: [MX700, MX800, MX800D, Room70, Room55D, Room70G2]
- **Left/Right**: Choose whether to apply the command to the left or right integrated screen. This parameter is only present for video systems with two integrated screens (dual screen systems).
- **Value**: Integer (0..100)
  - Select the level.

xCommand Video Output Monitor Brightness Set

Applies to: MX700, MX800, MX800D.

Requires user role: ADMIN.

Adjust the monitor brightness.

**USAGE:**

xCommand Video Output Monitor Brightness Set Position: **Position** Value: **Value**

where

- **Position**: [MX700, MX800, MX800D, Room70, Room55D, Room70G2]
- **Left/Right**: Choose whether to apply the command to the left or right integrated screen. This parameter is only present for video systems with two integrated screens (dual screen systems).
- **Value**: Integer (0..100)
  - Select the level.
xCommand Video Output Monitor Color Blue Set
Applies to: MX700/MX800/MX800D
Requires user role: ADMIN
Adjust the level of blue on the monitor.

USAGE:
```
xCommand Video Output Monitor Color Blue Set Position: Position Value: Value
```
where
```
Position:
Left/Right
```
Choose whether to apply the command to the left or right integrated screen. This parameter is only present for video systems with two integrated screens (dual screen systems).
```
Value:
Integer (0..100)
```
Select the level.

xCommand Video Output Monitor Color Green Set
Applies to: MX700/MX800/MX800D
Requires user role: ADMIN
Adjust the level of green on the monitor.

USAGE:
```
xCommand Video Output Monitor Color Green Set Position: Position Value: Value
```
where
```
Position:
Left/Right
```
Choose whether to apply the command to the left or right integrated screen. This parameter is only present for video systems with two integrated screens (dual screen systems).
```
Value:
Integer (0..100)
```
Select the level.

xCommand Video Output Monitor Color Red Set
Applies to: MX700/MX800/MX800D
Requires user role: ADMIN
Adjust the level of red on the monitor.

USAGE:
```
xCommand Video Output Monitor Color Red Set Position: Position Value: Value
```
where
```
Position:
Left/Right
```
Choose whether to apply the command to the left or right integrated screen. This parameter is only present for video systems with two integrated screens (dual screen systems).
```
Value:
Integer (0..100)
```
Select the level.

xCommand Video Output Monitor Color Select
Applies to: MX700/MX800/MX800D Room70/Room55D Room70G2
Requires user role: ADMIN
Adjust the monitor’s color temperature.

USAGE:
```
xCommand Video Output Monitor Color Select Position: Position Value: Value
```
where
```
Position:
Left/Right
```
Choose whether to apply the command to the left or right integrated screen. This parameter is only present for video systems with two integrated screens (dual screen systems).
```
Value:
4900K/5500K/6500K/7200K/9300K/10500K/12000K/User
```
Select the level.
xCommand Video Output Monitor Contrast Set
Applies to: MX700/MX800/MX800D
Requires user role: ADMIN
Adjust the contrast level on the monitor.

**USAGE:**
xCommand Video Output Monitor Contrast Set Position: **Position** Value: **Value**
where
- **Position:** Left/Right
  - Choose whether to apply the command to the left or right integrated screen. This parameter is only present for video systems with two integrated screens (dual screen systems).
- **Value:** Integer (0..100)
  - Select the level.

xCommand Video Output Monitor CSC Select
Applies to: MX700/MX800/MX800D
Requires user role: ADMIN
Select the monitor's color space.

**USAGE:**
xCommand Video Output Monitor CSC Select Position: **Position** Value: **Value**
where
- **Position:** Left/Right
  - Choose whether to apply the command to the left or right integrated screen. This parameter is only present for video systems with two integrated screens (dual screen systems).
- **Value:** RGB/YUV
  - Select either RGB or YUV.

xCommand Video Output Monitor Gamma Set
Applies to: MX700/MX800/MX800D
Requires user role: ADMIN
Adjust the gamma level on the monitor.

**USAGE:**
xCommand Video Output Monitor Gamma Set Position: **Position** Value: **Value**
where
- **Position:** Left/Right
  - Choose whether to apply the command to the left or right integrated screen. This parameter is only present for video systems with two integrated screens (dual screen systems).
- **Value:** 1.5/1.6/1.7/1.8/1.9/2.0/2.1/2.2/2.3/2.4/2.5/2.6/2.7
  - Select the level.

xCommand Video Output Monitor Reset
Applies to: MX700/MX800/MX800D Room70/Room55D Room70G2
Requires user role: ADMIN
Reset monitor settings (not available for Room 55 Dual).

**USAGE:**
xCommand Video Output Monitor Reset Position: **Position**
where
- **Position:** [ MX700/MX800/MX800D Room70/Room55D Room70G2 ]
  - Choose whether to apply the command to the left or right integrated screen. This parameter is only present for video systems with two integrated screens (dual screen systems).
xCommand Video Output Monitor Sharpness Set

Applies to: MX700/MX800/MX800D
Requires user role: ADMIN
Adjust the image sharpness on the monitor.

**USAGE:**
xCommand Video Output Monitor Sharpness Set Position: Position Value: Value
where

- **Position**:
  - Left/Right
  Choose whether to apply the command to the left or right integrated screen. This parameter is only present for video systems with two integrated screens (dual screen systems).

- **Value**:
  - Softest/Soft/Normal/Sharp/Sharpest
  Select the level.

xCommand Video PresentationPIP Set

Applies to: All products
Requires user role: ADMIN, USER
Sets position for the presentation PiP (picture in picture).

**USAGE:**
xCommand Video PresentationPIP Set Position: Position
where

- **Position**:
  - CenterLeft/CenterRight/LowerLeft/LowerRight/UpperCenter/UpperLeft/UpperRight
  Select one of the predefined positions.

xCommand Video PresentationView Set

Applies to: All products
Requires user role: ADMIN, USER
Set the presentation view mode

**USAGE:**
xCommand Video PresentationView Set View: View
where

- **View**:
  - Default/Maximized/Minimized
  Select Default when you want the presentation to be viewed with the default settings for the codec. Select Maximized when you want the presentation to be displayed in full screen. Select Minimized when you want the presentation to be displayed in a small picture on screen.
xCommand Video Selfview Set

Applies to: All products

Requires user role: ADMIN, USER

Sets self-view on/off and specifies its size and position. If the parameter is not specified, current value is used.

**USAGE:**

xCommand Video Selfview Set [Mode: **Mode**] [FullscreenMode: **FullscreenMode**] [PIPPosition: **PIPPosition**] [OnMonitorRole: **OnMonitorRole**]

where

**Mode:**
- **On/Off**
  - Selfview is set to on or off.

**FullscreenMode:**
- **On/Off**
  - Choose between displaying the self-view in full screen or as picture-in-picture.

**PIPPosition:**
- CenterLeft/CenterRight/LowerLeft/LowerRight/UpperCenter/UpperLeft/UpperRight
  - Select the position for the self-view image.

**OnMonitorRole:**
- First/Second/Third
  - Displays self-view on monitors with this role.
Chapter 5

xStatus commands
Description of the xStatus commands

In this chapter, you can find all of the xStatus commands and the responses. Status type commands return information about the system and system processes. You can query all information or just some of it.

We recommend you visit our web site regularly for updated versions of the manual.

Audio status

xStatus Audio Devices HandsetUSB ConnectionStatus
Applies to: DX70/DX80
Requires user role: ADMIN, USER
Shows if a USB handset is connected.
Value space of the result returned:
   Connected/NotConnected
Example:
xStatus Audio Devices HandsetUSB ConnectionStatus
  s Connected
  ** end

xStatus Audio Devices HandsetUSB Cradle
Applies to: DX70/DX80
Requires user role: ADMIN, USER
Shows if a USB handset is on hook or off hook.
Value space of the result returned:
   OnHook/OffHook
Example:
xStatus Audio Devices HandsetUSB Cradle
  s OnHook
  ** end

xStatus Audio Devices HeadsetAnalog Connection Status
Applies to: DX70/DX80
Requires user role: ADMIN, USER
Shows if an analog headset is connected. (DX70 only)
Value space of the result returned:
   Connected/NotConnected
Example:
xStatus Audio Devices HeadsetAnalog Connection Status
  s Connected
  ** end

xStatus Audio Devices HeadsetAnalog HasMicrophone
Applies to: DX70/DX80
Requires user role: ADMIN, USER
Shows if an analog headset has a built-in microphone. (DX70 only)
Value space of the result returned:
   False/True
Example:
xStatus Audio Devices HeadsetAnalog HasMicrophone
  s True
  ** end
xStatus Audio Devices HeadsetUSB ConnectionStatus

Applies to: DX70/DX80

Requires user role: ADMIN, USER

Shows if a USB headset is connected.

Value space of the result returned:

Connected/NotConnected

Example:

```plaintext
xStatus Audio Devices HeadsetUSB ConnectionStatus
's Connected
'' end
```

xStatus Audio Devices HeadsetUSB Description

Applies to: DX70/DX80

Requires user role: ADMIN, USER

Shows a description of the attached USB headset.

Value space of the result returned:

String

Example:

```plaintext
xStatus Audio Devices HeadsetUSB Description
's HeadsetUSB Description: "Description of USB headset."
'' end
```

xStatus Audio Devices HeadsetUSB Manufacturer

Applies to: DX70/DX80

Requires user role: ADMIN, USER

Lists the USB headset manufacturer.

Value space of the result returned:

String

Example:

```plaintext
xStatus Audio Devices HeadsetUSB Manufacturer
's HeadsetUSB Manufacturer: "CompanyName"
'' end
```

xStatus Audio Input Connectors ARC [n] EcReferenceDelay

Applies to: All products

Requires user role: ADMIN, USER

Returns the detected latency for each loudspeaker to microphone path for systems supporting ARC input used as microphone input. The result is in milliseconds.

Value space of the result returned:

Integer

Example:

```plaintext
xStatus Audio Input Connectors ARC 1 EcReferenceDelay
's Audio Input Connectors ARC 1 EcReferenceDelay: 0
'' end
```
xStatus Audio Input Connectors HDMI [n] EcReferenceDelay

**Applies to:** DX70/DX80, SX10, SX20, MX700/MX800/MX800D, RoomKit, RoomKitMini, CodecPlus, CodecPro, Room55, Room70/Room55D, Room70G2

**Requires user role:** ADMIN, USER

Returns the detected latency for each loudspeaker to microphone path for systems supporting HDMI input used as microphone input. The result is in milliseconds.

Value space of the result returned:
- **Integer**

Example:
```plaintext
xStatus Audio Input Connectors HDMI 1 EcReferenceDelay
's Audio Input Connectors HDMI 1 EcReferenceDelay: 0
'' end
```

xStatus Audio Input Connectors HDMI [n] Mute

**Applies to:** All products

**Requires user role:** ADMIN, USER

Shows whether the audio channel on a HDMI input connector is muted or not.

Value space of the result returned:
- **On/Off**

Example:
```plaintext
xStatus Audio Input Connectors HDMI 1 Mute
's Audio Input Connectors HDMI 1 Mute: Off
'' end
```

xStatus Audio Input Connectors Microphone [n] ConnectionStatus

**Applies to:** SX10, SX20, MX200G2/MX300G2, RoomKit, RoomKitMini, CodecPlus, CodecPro, Room55, Room55D, Room70G2

**Requires user role:** ADMIN, INTEGRATOR, USER

Indicates whether a microphone is detected on the microphone input connector.

Value space of the result returned:
- **Connected/NotConnected/Unknown**
  - **Connected:** A microphone is connected.
  - **NotConnected:** Nothing is connected.
  - **Unknown:** The video system is not able to detect if a microphone is connected.

Example:
```plaintext
xStatus Audio Input Connectors Microphone ConnectionStatus
's Audio Input Connectors Microphone 1 ConnectionStatus: NotConnected
's Audio Input Connectors Microphone 2 ConnectionStatus: Connected
'' end
```
xStatus Audio Input Connectors Microphone [n] EcReferenceDelay

**Applies to:** DX70/DX80 SX10 SX20 SX80 MX700/MX800/MX800D RoomKit RoomKitMini CodecPlus CodecPro Room70/Room55D Room70G2

Requires user role: ADMIN, USER

Returns the detected latency for each loudspeaker to microphone path. The result is in milliseconds.

Value space of the result returned:

    Integer

**Example:**

    xStatus Audio Input Connectors Microphone 1 EcReferenceDelay
    *s Audio Input Connectors Microphone 1 EcReferenceDelay: 120
    ** end

xStatus Audio Input Connectors Microphone [n] Mute

**Applies to:** All products

Requires user role: ADMIN, USER

Shows whether the audio on a Microphone input connector is muted or not.

Value space of the result returned:

    On/Off

**Example:**

    xStatus Audio Input Connectors Microphone 1 Mute
    *s Audio Input Connectors Microphone 1 Mute: Off
    ** end

xStatus Audio Input KeyClick Attenuate

**Applies to:** RoomKit RoomKitMini CodecPlus CodecPro Room55 Room70/Room55D Room70G2

Requires user role: ADMIN, USER

Shows whether the video system is automatically attenuating clicking noises, such as those detected microphone signals caused by the typing of a keyboard.

Value space of the result returned:

    Off/On
    On: The attenuation of the microphone signal is turned On.
    Off: The attenuation of the microphone signal is turned Off.

**Example:**

    xStatus Audio Input KeyClick Attenuate
    *s Audio Input KeyClick Attenuate: On
    ** end

xStatus Audio Input KeyClick Detected

**Applies to:** RoomKit RoomKitMini CodecPlus CodecPro Room55 Room70/Room55D Room70G2

Requires user role: ADMIN, USER

Shows what type of audio signals the video system is detecting for attenuation. The system will attenuate the microphone signal if clicking noises from a keyboard are detected. If voice or silence is detected, the microphone signal will not be attenuated.

Value space of the result returned:

    KeyClick/Voice/Silence
    KeyClick: Only key clicks are being detected.
    Voice: Voice is being detected.
    Silence: No audio signals are being detected.

**Example:**

    xStatus Audio Input KeyClick Detected
    *s Audio Input KeyClick Detected: KeyClick
    ** end
xStatus Audio Input KeyClick Enabled

Applies to: RoomKit RoomKitMini CodecPlus CodecPro Room55 Room70/Room55D Room70G2
Requires user role: ADMIN, USER
Shows whether detection for attenuation on the microphone signal is enabled.
Value space of the result returned:

On/Off
  On: Detection on the microphone signal is turned On.
  Off: Detection on the microphone signal is turned Off.

Example:
xStatus Audio Input KeyClick Enabled
  *s Audio Input KeyClick Enabled: On
  ** end

xStatus Audio Input LocalInput [n] AGC

Applies to: SX80 MX700/MX800/MX800D CodecPro Room70G2
Requires user role: ADMIN, USER
Shows the AGC (Automatic Gain Control) mode on the local input.
You can run the command xStatus Audio Input LocalInput to find the identity [n] of the input.
Value space of the result returned:

On/Off

Example:
xStatus Audio Input LocalInput 1 AGC
  *s Audio Input LocalInput 1 AGC: "On"
  ** end

xStatus Audio Input LocalInput [n] Channels

Applies to: SX80 MX700/MX800/MX800D CodecPro Room70G2
Requires user role: ADMIN, USER
States if the local input channels are mixed into a mono signal (1) or stereo signal (2).
You can run the command xStatus Audio Input LocalInput to find the identity [n] of the input.
Value space of the result returned:

1..2

Example:
xStatus Audio Input LocalInput 1 Channels
  *s Audio Input LocalInput 1 Channels: 1
  ** end

xStatus Audio Input LocalInput [n] Connector

Applies to: SX80 MX700/MX800/MX800D CodecPro Room70G2
Requires user role: ADMIN, USER
Lists the connectors that are attached to the local input.
You can run the command xStatus Audio Input LocalInput to find the identity [n] of the input.
Value space of the result returned:

Microphone.1../Microphone.4/Line.1/Line.2/HDMI.2

Example:
xStatus Audio Input LocalInput 1 Connector
  *s Audio Input LocalInput 1 Connector: "Microphone.1"
  ** end
xStatus Audio Input LocalInput [n] Direct

Applies to: SX80 MX700/MX800/MX800D CodecPro Room70G2
Requires user role: ADMIN, USER

Shows whether or not input processing such as acoustic echo cancellation and noise reduction is bypassed on this local input. Bypassing the input processing reduces the audio input delay, which is useful when doing local sound reinforcement. You can run the command xStatus Audio Input LocalInput to find the identity [n] of the input.

Value space of the result returned:

- **Off**
  - Off: All regular input processing is performed, according to the configuration of each connector.
  - On: Bypass input processing such as acoustic echo cancellation and noise reduction, regardless of the configuration for each connected input connector.

Example:

```
xStatus Audio Input LocalInput 1 Direct
's Audio Input LocalInput 1 Direct: "Off"
** end
```

xStatus Audio Input LocalInput [n] MixerMode

Applies to: SX80 MX700/MX800/MX800D CodecPro Room70G2
Requires user role: ADMIN, USER

Shows how the local input connectors have been mixed together. You can run the command xStatus Audio Input LocalInput to find the identity [n] of the input.

Value space of the result returned:

- **Auto/Fixed/GainShared**
  - Auto: The microphone with the strongest speaker is active and the others are strongly attenuated.
  - Fixed: The input connector signals are mixed together with equal gains.
  - GainShared: The microphones are given a normalized gain factor relative to the strongest speaker before being mixed together.

Example:

```
xStatus Audio Input LocalInput 1 MixerMode
's Audio Input LocalInput 1 MixerMode: "Auto"
** end
```

xStatus Audio Input LocalInput [n] Mute

Applies to: SX80 MX700/MX800/MX800D CodecPro Room70G2
Requires user role: ADMIN, USER

Shows the mute mode for the local inputs. A local input is a mix of input connectors. You can run the command xStatus Audio Input LocalInput to find the identity [n] of the input.

Value space of the result returned:

- **On/Off**

Example:

```
xStatus Audio Input LocalInput 1 Mute
's Audio Input LocalInput 1 Mute: "Off"
** end
```

xStatus Audio Input LocalInput [n] Name

Applies to: SX80 MX700/MX800/MX800D CodecPro Room70G2
Requires user role: ADMIN, USER

Shows the name of the local input. A local input is a mix of input connectors. You can run the command xStatus Audio Input LocalInput to find the identity [n] of the input.

Value space of the result returned:

- **String**

Example:

```
xStatus Audio Input LocalInput 1 Name
's Audio Input LocalInput 1 Name: "Microphone"
** end
```
xStatus Audio Input RemoteInput [n] CallId

Applies to: DX70/DX80 SX10 SX20 SX80 MX700/MX800/MX800D RoomKit RoomKitMini CodecPlus CodecPro Room55 Room70/Room55D Room70G2
Requires user role: ADMIN, USER
Shows the CallId for the remote audio input.
You can run the command xStatus Audio Input RemoteInput to find the identity [n] of the input.
Value space of the result returned:

0..65534

Example:
```
xStatus Audio Input RemoteInput 8 CallId
's Audio Input RemoteInput 8 CallId: 28
** end
```

xStatus Audio Microphones Mute

Applies to: All products
Requires user role: ADMIN, INTEGRATOR, USER
Shows whether the microphones are muted.
Value space of the result returned:

On/Off

Example:
```
xStatus Audio Microphones Mute
's Audio Microphones Mute: Off
** end
```

xStatus Audio Output Connectors ARC [n] DelayMs

Applies to: CodecPlus CodecPro Room70G2
Requires user role: ADMIN, INTEGRATOR, USER
Shows the delay of the ARC output.
Value space of the result returned:

Integer
The delay in milliseconds.

Example:
```
xStatus Audio Output Connectors ARC 1 DelayMs
's Audio Output Connectors ARC 1 DelayMs: 60
** end
```

xStatus Audio Output Connectors ARC [n] Mode

Applies to: CodecPlus CodecPro Room70G2
Requires user role: ADMIN, INTEGRATOR, USER
Shows whether the audio channel on the ARC output connector is enabled or disabled.
Value space of the result returned:

On/Off

Example:
```
xStatus Audio Output Connectors ARC 1 Mode
's Audio Output Connectors ARC 1 Mode: Off
** end
```
xStatus Audio Output Connectors HDMI \([n]\) DelayMs

**Applies to:** RoomKit  RoomKitMini  CodecPlus  CodecPro  Room70/Room55D  Room70G2  
**Requires user role:** ADMIN, INTEGRATOR, USER  
**Shows the delay of the HDMI output.**  
**Value space of the result returned:**  
\[\text{Integer} \]  
The delay in milliseconds.  
**Example:**  
```
xStatus Audio Output Connectors HDMI 1 DelayMs  
's Audio Output Connectors HDMI 1 DelayMs: 60  
** end
```

xStatus Audio Output Connectors HDMI \([n]\) Mode

**Applies to:** RoomKit  RoomKitMini  CodecPlus  CodecPro  Room70/Room55D  Room70G2  
**Requires user role:** ADMIN, INTEGRATOR, USER  
**Shows whether the audio channel on the HDMI output connector is enabled or disabled, or if the connector is being used to measure the audio delay through the connected video display.**  
**Value space of the result returned:**  
\[\text{On/Off/DelayMeasurement} \]  
\[\text{On:}\] The audio channel on the HDMI output connector is enabled.  
\[\text{Off:}\] The audio channel on the HDMI output connector is disabled  
\[\text{DelayMeasurement:}\] The connector is being used to measure the audio delay through the connected video display.  
**Example:**  
```
xStatus Audio Output Connectors HDMI 1 Mode  
's Audio Output Connectors HDMI 1 Mode: On  
** end
```

xStatus Audio Output Connectors InternalSpeaker \([n]\) DelayMs

**Applies to:** RoomKit  RoomKitMini  CodecPlus  CodecPro  Room70/Room55D  Room70G2  
**Requires user role:** ADMIN, INTEGRATOR, USER  
**Shows the delay of the internal loudspeaker.**  
**Value space of the result returned:**  
\[\text{Integer} \]  
The delay in milliseconds.  
**Example:**  
```
xStatus Audio Output Connectors InternalSpeaker 1 DelayMs  
's Audio Output Connectors InternalSpeaker 1 DelayMs: 0  
** end
```

xStatus Audio Output Connectors InternalSpeaker \([n]\) Mode

**Applies to:** RoomKitMini  CodecPlus  CodecPro  
**Requires user role:** ADMIN, INTEGRATOR, USER  
**Shows whether the video system's integrated speakers are enabled or disabled.**  
**Value space of the result returned:**  
\[\text{On/Off} \]  
**Example:**  
```
xStatus Audio Output Connectors InternalSpeaker 1 Mode  
's Audio Output Connectors InternalSpeaker 1 Mode: On  
** end
```
xStatus Audio Output Connectors Line [n] ConnectionStatus
Applies to: RoomKit, RoomKitMini, CodecPlus, CodecPro, Room55, Room70/Room55D, Room70G
Requires user role: ADMIN, INTEGRATOR, USER
Shows whether the audio output line is connected.
Value space of the result returned:

Connected/NotConnected/Unknown

Connected: A device is connected.
NotConnected: Nothing is connected.
Unknown: The video system is not able to detect if anything is connected.

Example:
xStatus Audio Output Connectors Line 1 ConnectionStatus
*s Audio Output Connectors Line 1 ConnectionStatus: Connected
** end

xStatus Audio Output Connectors Line [n] DelayMs
Applies to: All products
Requires user role: ADMIN, INTEGRATOR, USER
Shows the delay in milliseconds.
Value space of the result returned:

Integer (0..290)

Example:
xStatus Audio Output Connectors Line 1 DelayMs
*s Audio Output Connectors Line 1 DelayMs: 60
** end

xStatus Audio Output LocalOutput [n] AutoconnectRemote
Applies to: SX80, MX700/MX800/MX800D, CodecPro, Room70G
Requires user role: ADMIN, USER
Shows whether or not the remote input signal (from far-end) is automatically added to this local output. It can always be added manually using the Audio LocalOutput ConnectInput command.
Value space of the result returned:

On/Off

On: The remote input signal is automatically added to all local outputs when in a call.
Off: The remote input signal is not automatically added to the local output.

Example:
xStatus Audio Output LocalOutput 4 AutoconnectRemote
*s Audio Output LocalOutput 4 AutoconnectRemote: "On"
** end

xStatus Audio Output LocalOutput [n] Channels
Applies to: SX80, MX700/MX800/MX800D, CodecPro, Room70G
Requires user role: ADMIN, USER
States if the local output channels are mixed into a mono signal (1) or stereo signal (2).
You can run the command xStatus Audio Output LocalOutput to find the identity [n] of the output.
Value space of the result returned:

1..2

Example:
xStatus Audio Output LocalOutput 4 Channels
*s Audio Output LocalOutput 4 Channels: "1"
** end
xStatus Audio Output LocalOutput [n] Connector [n]
Applies to: SX80  MX700/MX800/MX800D  CodecPro  Room70G2
Requires user role: ADMIN, USER
Lists the connectors that are attached to the local output.
You can run the command xStatus Audio Output LocalOutput to find the identity [n] of the output.
Value space of the result returned:
  String
Example:
  *s Audio Output LocalOutput 4 Connector: "Line.1"
  ** end

xStatus Audio Output LocalOutput [n] Input [n] Gain
Applies to: SX80  MX700/MX800/MX800D  CodecPro  Room70G2
Requires user role: ADMIN, USER
Shows the gain (dB) on the input, when it is connected to the local output.
You can run the command xStatus Audio Output LocalOutput to find the identity [n] of the output and input.
Value space of the result returned:
  -54..15
  Range from -54 dB to 15 dB, where -54 dB equals Off.
Example:
  xStatus Audio Output LocalOutput 4 Input 2 Gain
  *s Audio Output LocalOutput 4 Input 2 Gain: 0
  ** end

xStatus Audio Output LocalOutput [n] Loudspeaker
Applies to: SX80  MX700/MX800/MX800D  CodecPro  Room70G2
Requires user role: ADMIN, USER
Shows the Loudspeaker mode on the local output. If one or more of the output connectors that are attached to the local output are connected to a loudspeaker, then this signal should be a reference signal to the echo canceler and Loudspeaker should be set to On.
You can run the command xStatus Audio Output LocalOutput to find the identity [n] of the output.
Value space of the result returned:
  On/Off
Example:
  xStatus Audio Output LocalOutput 4 Loudspeaker
  *s Audio Output LocalOutput 4 Loudspeaker: "Off"
  ** end

xStatus Audio Output LocalOutput [n] Name
Applies to: SX80  MX700/MX800/MX800D  CodecPro  Room70G2
Requires user role: ADMIN, USER
Shows the name of the local output.
You can run the command xStatus Audio Output LocalOutput to find the identity [n] of the output.
Value space of the result returned:
  String
Example:
  xStatus Audio Output LocalOutput 4 Name
  *s Audio Output LocalOutput 4 Name: "MyLocalOutput1"
  ** end
xStatus Audio Output LocalOutput [n] VolumeControlled

Applies to: SX80, MX700/MX800/MX800D, CodecPro, Room70G2
Requires user role: ADMIN, USER
Shows where this output’s volume is controlled from.
Value space of the result returned:

- **String**
  - **Off:** This output’s volume is controlled by global audio control.
  - **On:** This output’s volume is at the level defined with xCommand Audio Volume Set.

Example:
```
xStatus Audio Output LocalOutput 5 VolumeControlled
's Audio Output LocalOutput 5 VolumeControlled: "On"
** end
```

xStatus Audio Output MeasuredHdmiArcDelay

Applies to: All products
Requires user role: ADMIN, INTEGRATOR, USER
Shows the measured audio delay of the device connected to the HDMI connector. This delay is measured through the HDMI audio return channel, and will secure good lip-synchronization between audio and video.
Value space of the result returned:

- **Integer**
  - The measured audio delay in milliseconds.

Example:
```
xStatus Audio Output MeasuredHdmiArcDelay
's Audio Output MeasuredHdmiArcDelay: 85
** end
```

xStatus Audio Output MeasuredHdmiDelay

Applies to: All products
Requires user role: ADMIN, INTEGRATOR, USER
Shows the measured audio delay of the device connected to the HDMI connector. This delay is measured from the HDMI output to one of the microphones.
Value space of the result returned:

- **Integer**
  - The measured audio delay in milliseconds.

Example:
```
xStatus Audio Output MeasuredHdmiDelay
's Audio Output MeasuredHdmiDelay: 134
** end
```

xStatus Audio Output MeasuredHdmiCecDelay

Applies to: All products
Requires user role: ADMIN, INTEGRATOR, USER
Shows the reported video delay of the device connected to the HDMI connector. This delay is reported through the consumer electronics control (CEC) protocol, and will secure good lip-synchronization between audio and video.
Value space of the result returned:

- **Integer**
  - The measured audio delay in milliseconds.

Example:
```
xStatus Audio Output MeasuredHdmiCecDelay
's Audio Output MeasuredHdmiCecDelay: 39
** end
```
xStatus Audio Output RemoteOutput [n] CallId
Applies to: SX80, MX700/MX800/MX800D, CodecPro, Room70G2
Requires user role: ADMIN, USER
Shows the CallId for the remote audio output.
You can run the command xStatus Audio Output RemoteOutput to find the identity [n] of the output.
Value space of the result returned:
1..65534
Example:
xStatus Audio Output RemoteOutput 9 CallId
*s Audio Output RemoteOutput 9 CallId: 28
** end

xStatus Audio Output RemoteOutput [n] Input [n] Gain
Applies to: SX80, MX700/MX800/MX800D, CodecPro, Room70G2
Requires user role: ADMIN, USER
Shows the gain (dB) on the input, when input is connected to the remote output. Range from -54 dB to 15 dB, where -54 dB equals Off.
You can run the command xStatus Audio Output RemoteOutput to find the identity [n] of the output and input.
Value space of the result returned:
-54..15
Example:
xStatus Audio Output RemoteOutput 9 Input 1 Gain
*s Audio Output RemoteOutput 9 Input 1 Gain: 0
** end

xStatus Audio SelectedDevice
Applies to: DX70/DX80
Requires user role: ADMIN, USER
Shows the audio device that is selected. Only the DX70 supports analog headsets.
Value space of the result returned:
Internal/HeadsetUSB/HeadsetAnalog/HeadsetBluetooth/HandsetUSB
Example:
xStatus Audio SelectedDevice
*s Audio SelectedDevice: Internal
** end

xStatus Audio Volume
Applies to: All products
Requires user role: ADMIN, INTEGRATOR, USER
Shows the volume level (dB) of the loudspeaker output.
Value space of the result returned:
0..100
Example:
xStatus Audio Volume
*s Audio Volume: 70
** end
**xStatus Audio VolumeHandsetUsb**

* Applies to: DX70/DX80
* Requires user role: ADMIN, USER
* Shows the volume level of the USB handset.
* Value space of the result returned: Integer

**Example:**
```plaintext
xStatus Audio VolumeHandsetUsb
*s 6
** end
```

**xStatus Audio VolumeHeadsetUsb**

* Applies to: DX70/DX80
* Requires user role: ADMIN, USER
* Shows the volume level of the USB headset.
* Value space of the result returned: Integer

**Example:**
```plaintext
xStatus Audio VolumeHeadsetUsb
*s 6
** end
```

**xStatus Audio VolumeHeadsetAnalog**

* Applies to: DX70/DX80
* Requires user role: ADMIN, USER
* Shows the volume level of the analog headset (DX70 only).
* Value space of the result returned: Integer

**Example:**
```plaintext
xStatus Audio VolumeHeadsetAnalog
*s 6
** end
```

**xStatus Audio VolumeInternal**

* Applies to: DX70/DX80
* Requires user role: ADMIN, USER
* Shows the internal volume level.
* Value space of the result returned: Integer

**Example:**
```plaintext
xStatus Audio VolumeInternal
*s 6
** end
```
xStatus Audio VolumeMute

Applies to: All products
Requires user role: ADMIN, USER

Shows whether the endpoint volume is set to mute.

Value space of the result returned:

- Off/On

Example:
```
xStatus Audio VolumeMute
  *s Audio VolumeMute: Off
  ** end
```

Bookings status

xStatus Bookings Current Id

Applies to: All products
Requires user role: ADMIN, USER

The ID of the on going booking event, if any.

Value space of the result returned:

- String

Example:
```
xStatus Bookings Current Id
  *s Bookings Current Id: "123"
  ** end
```
Call status

xStatus Call [n] AnswerState

 Applies to: All products
 Requires user role: ADMIN, USER
 Indicates if a call is answered, ignored or has been automatically answered by a system.
 Value space of the result returned:
   Unanswered/Ignored/Autoanswered/Answered

 Example:
 xStatus Call AnswerState
 *s Call 5 AnswerState: Answered
 ** end

xStatus Call [n] AttendedTransferFrom

 Applies to: All products
 Requires user role: ADMIN, USER
 Shows the CallId for the call the current call was transferred from.
 Value space of the result returned:
   Integer

 Example:
 xStatus Call 1 AttendedTransferFrom
 *s Call 1 AttendedTransferFrom: 1234
 ** end

xStatus Call [n] CallbackNumber

 Applies to: All products
 Requires user role: ADMIN, USER
 Shows the remote (far end) number or URI of an incoming or outgoing call, including the call protocol, for call back. You can run the command xStatus Call to find the call identity.
 Value space of the result returned:
   String

 Example:
 xStatus Call 27 CallbackNumber
 *s Call 27 CallbackNumber: "h323:firstname.lastname@company.com"
 ** end

xStatus Call [n] CallType

 Applies to: All products
 Requires user role: ADMIN, USER
 Shows the call type of the incoming or outgoing call. You can run the command xStatus Call to find the call identity.
 Value space of the result returned:
   Video/Audio/AudioCanEscalate/ForwardAllCall/Unknown

 Example:
 xStatus Call 27 CallType
 *s Call 27 CallType: Video
 ** end
xStatus Call [n] DeviceType
Applies to: All products
Requires user role: ADMIN, USER
Shows where the call is connected to.
Value space of the result returned:

Endpoint/MCU
  Endpoint: It is a point-to-point call to another endpoint.
  MCU: The call is to a multipoint conferencing unit (MCU) in the network, or a MultiSite call
  hosted on an endpoint.

Example:
xStatus Call DeviceType
  *s Call 4 DeviceType: Endpoint
  ** end

xStatus Call [n] Direction
Applies to: All products
Requires user role: ADMIN, USER
States the direction of the call initiation. You can run the command xStatus Call to find the call
identity.
Value space of the result returned:

Incoming/Outgoing

Example:
xStatus Call 27 Direction
  *s Call 27 Direction: Outgoing
  ** end

xStatus Call [n] DisplayName
Applies to: All products
Requires user role: ADMIN, USER
Shows the name of the remote (far end) participant in an incoming or outgoing call. You can run
the command xStatus Call to find the call identity.
Value space of the result returned:

String

Example:
xStatus Call 27 DisplayName
  *s Call 27 DisplayName: "firstname.lastname@company.com"
  ** end

xStatus Call [n] Duration
Applies to: All products
Requires user role: ADMIN, USER
Shows the duration of a call (in seconds). You can run the command xStatus Call to find the call
identity.
Value space of the result returned:

Integer

Example:
xStatus Call 27 Duration
  *s Call 27 Duration: 2354
  ** end
xStatus Call \[n\] Encryption Type

Applies to: All products
Requires user role: ADMIN, USER

Shows the encryption type of the call. You can run the command xStatus Call to find the call identity.

Value space of the result returned:

None/Aes-128

Example:

  xStatus Call 27 Encryption Type
  *s Call 27 Encryption Type: "None"
  ** end

xStatus Call \[n\] FacilityServiceId

Applies to: All products
Requires user role: ADMIN, INTEGRATOR, USER

When calling a facility service, the facility service id is shown. Otherwise the value 0 is returned.

Value space of the result returned:

0..5

Example:

  xStatus Call FacilityServiceId
  *s Call 3 FacilityServiceId: 1
  ** end

xStatus Call \[n\] HoldReason

Applies to: All products
Requires user role: ADMIN, USER

Shows the reason the current outgoing call was put on hold.

Value space of the result returned:

Conference/Transfer/None

Conference: On hold while the call is being merged into a conference.
Transfer: On hold while the call is being transferred.
None: All other instances.

Example:

  xStatus Call HoldReason
  *s Call 2 HoldReason: None
  ** end

xStatus Call \[n\] Ice

Applies to: All products
Requires user role: ADMIN, USER

ICE is a feature that enables two sides of a call to send media (video and audio) directly between each other, if a direct network path has been found through ICE negotiation. This status reflects the result of that negotiation.

Value space of the result returned:

Disabled/Passed/Failed

Disabled: ICE is disabled.
Passed: A direct network path was found and is being used.
Failed: A direct network path was not found, and media will most likely flow through an intermediary component.

Example:

  xStatus Call Ice
  *s Call 2 Ice: Passed
  ** end
xStatus Call [n] PlacedOnHold

Applies to: All products
Requires user role: ADMIN, USER

Shows the placed on hold status of the call. You can run the command xStatus Call to find the call identity.

Value space of the result returned:
  True/False

Example:
  xStatus Call 27 PlacedOnHold
  's Call 27 PlacedOnHold: False
  ** end

xStatus Call [n] Protocol

Applies to: All products
Requires user role: ADMIN, USER

Shows the call protocol of the incoming or outgoing call. You can run the command xStatus Call to find the call identity.

Value space of the result returned:
  H320/H323/SIP/Spark/Unknown

Example:
  xStatus Call 27 Protocol
  's Call 27 Protocol: "h323"
  ** end

xStatus Call [n] ReceiveCallRate

Applies to: All products
Requires user role: ADMIN, INTEGRATOR, USER

Shows the receive bandwidth in the call in kilobits per second (kbps). You can run the command xStatus Call to find the call identity.

Value space of the result returned:
  Integer

Example:
  xStatus Call 27 ReceiveCallRate
  's Call 27 ReceiveCallRate: 4000
  ** end

xStatus Call [n] RemoteNumber

Applies to: All products
Requires user role: ADMIN, USER

Shows the remote (far end) number or URI of an incoming or outgoing call. You can run the command xStatus Call to find the call identity.

Value space of the result returned:
  String

Example:
  xStatus Call 27 RemoteNumber
  's Call 27 RemoteNumber: "5585232"
  ** end
xStatus Call [n] Status
Applies to: All products
Requires user role: ADMIN, USER
Shows the status of a call. You can run the command xStatus Call to find the call identity.
Value space of the result returned:
  Idle/Dialling/Ringing/Connected/Connecting/Disconnecting/OnHold/EarlyMedia/Preserved/RemotePreserved

Example:
xStatus Call 27 Status
  *s Call 27 Status: Connected
  ** end

xStatus Camera Camera [n] TransmitCallRate
Applies to: All products
Requires user role: ADMIN, INTEGRATOR, USER
Shows the transmit bandwidth in the call in kilobits per second (kbps). You can run the command xStatus Call to find the call identity.
Value space of the result returned:
  Integer

Example:
xStatus Call 27 TransmitCallRate
  *s Call 27 TransmitCallRate: 768
  ** end

Cameras status

xStatus Cameras Camera Camera [n] Capabilities Options
Applies to: All products
Requires user role: ADMIN, INTEGRATOR, USER, ROOMCONTROL
Shows the camera capabilities (ptzf = pan, tilt, zoom, focus).
Value space of the result returned:
  String

Example:
xStatus Cameras Camera 1 Capabilities Options
  *s Camera 1 Capabilities Options: "ptzf"
  ** end

xStatus Cameras Camera Camera [n] Connected
Applies to: All products
Requires user role: ADMIN, INTEGRATOR, USER, ROOMCONTROL
Shows if the camera is connected or not.
Value space of the result returned:
  True/False

Example:
xStatus Cameras Camera 1 Connected
  *s Camera 1 Connected: True
  ** end
xStatus Cameras Camera [n] DetectedConnector
Applies to: SX10  SX20  SX80  MX700/MX800/MX800D  CodecPlus  CodecPro  Room70/Room55D  Room70G2
Requires user role: ADMIN, INTEGRATOR, USER, ROOMCONTROL
Shows the connector number the camera has detected it is connected to, or shows 0 if no connection is detected.
Value space of the result returned:
   Integer
Example:
xStatus Cameras Camera 1 DetectedConnector
's Cameras Camera 1 DetectedConnector: 1
** end

xStatus Cameras Camera [n] Flip
Applies to: SX10  SX20  SX80  MX700/MX800/MX800D  CodecPlus  CodecPro  Room70/Room55D  Room70G2
Requires user role: ADMIN, INTEGRATOR, USER, ROOMCONTROL
In Flip mode (vertical flip) the image can be flipped upside down.
Value space of the result returned:
   Off/On
Example:
xStatus Cameras Camera 1 Flip
's Camera 1 Flip: "Off"
** end

xStatus Cameras Camera [n] Framerate
Applies to: RoomKit  RoomKitMini  CodecPlus  CodecPro  Room55  Room70/Room55D  Room70G2
Requires user role: ADMIN, INTEGRATOR, USER, ROOMCONTROL
Value space of the result returned:
   Integer

xStatus Cameras Camera [n] HardwareID
Applies to: DX70/DX80  SX10  SX20  SX80  MX200G2/MX300G2  MX700/MX800/MX800D  CodecPlus  CodecPro  Room70/Room55D  Room70G2
Requires user role: ADMIN, INTEGRATOR, USER, ROOMCONTROL
Shows the hardware identity of the camera.
Value space of the result returned:
   String
Example:
xStatus Cameras Camera 1 HardwareID
's Camera 1 HardwareID: "50000000"
** end

xStatus Cameras Camera [n] LightingConditions
Applies to: RoomKit  RoomKitMini  CodecPlus  CodecPro  Room55  Room70/Room55D  Room70G2
Requires user role: ADMIN, INTEGRATOR, ROOMCONTROL, USER
Shows how the camera perceives the lighting conditions in the room.
Value space of the result returned:
   Unknown/Good/Dark/Backlight
   Unknown: The camera is turned off or does not support this functionality.
   Good: The lighting is at a good level.
   Dark: The lighting is too low.
   Backlight: There is a high level of backlight in the image.
Example:
xStatus Cameras Camera 1 LightingConditions
's Camera 1 LightingConditions: Good
** end
xStatus Cameras Camera [n] MacAddress

Applies to: SX10  SX20  SX80  MX700/MX800/MX800D  CodecPlus  CodecPro  Room70/Room55D  Room70G2
Requires user role: ADMIN, INTEGRATOR, USER, ROOMCONTROL

Shows the MAC (Media Access Control) address for the camera.

Value space of the result returned:

String

Example:

xStatus Cameras Camera 1 MacAddress
's Camera 1 MacAddress: ""
** end

xStatus Cameras Camera [n] Manufacturer

Applies to: All products
Requires user role: ADMIN, INTEGRATOR, USER, ROOMCONTROL

Shows the manufacturer of the camera.

Value space of the result returned:

String

Example:

xStatus Cameras Camera 1 Manufacturer
's Camera 1 Manufacturer: "Cisco"
** end

xStatus Cameras Camera [n] Model

Applies to: All products
Requires user role: ADMIN, INTEGRATOR, USER, ROOMCONTROL

Shows the camera model.

Value space of the result returned:

String

Example:

xStatus Cameras Camera 1 Model
's Camera 1 Model: "Precision 40"
** end

xStatus Cameras Camera [n] Position Focus

Applies to: SX10  SX20  SX80  MX200G2/MX300G2  MX700/MX800/MX800D  CodecPlus  CodecPro  Room70/Room55D  Room70G2
Requires user role: ADMIN, INTEGRATOR, USER, ROOMCONTROL

Shows the current focus position of the camera. The value range depends on camera type.

Value space of the result returned:

0..65535

Example:

xStatus Cameras Camera 1 Position Focus
's Camera 1 Position Focus: 4597
** end
xStatus Cameras Camera [n] Position Lens

Applies to: SX80 MX700/MX800/MX800D CodecPlus CodecPro Room70/Room55D Room70G2

Requires user role: ADMIN, INTEGRATOR, USER, ROOMCONTROL

Shows the camera's current lens position.

Value space of the result returned:
Default/Wide/Center/Left/Right

Example:
xStatus Cameras Camera 1 Position Lens
's Cameras Camera 1 Position Lens: Center
** end

---

xStatus Cameras Camera [n] Position Pan

Applies to: SX10 SX20 SX80 MX200G2/MX300G2 MX700/MX800/MX800D RoomKit RoomKitMini CodecPlus CodecPro Room55 Room70/Room55D Room70G2

Requires user role: ADMIN, INTEGRATOR, USER, ROOMCONTROL

Shows the current pan (move left and right) position of the camera. The value range depends on camera type.

Value space of the result returned:
-65535..65535

Example:
xStatus Cameras Camera 1 Position Pan
's Camera 1 Position Pan: 412
** end

---

xStatus Cameras Camera [n] Position Tilt

Applies to: SX10 SX20 SX80 MX200G2/MX300G2 MX700/MX800/MX800D RoomKit RoomKitMini CodecPlus CodecPro Room55 Room70/Room55D Room70G2

Requires user role: ADMIN, INTEGRATOR, USER, ROOMCONTROL

Shows the current tilt (move up and down) position of the camera. The value range depends on camera type.

Value space of the result returned:
-65535..65535

Example:
xStatus Cameras Camera 1 Position Tilt
's Camera 1 Position Tilt: 106
** end

---

xStatus Cameras Camera [n] Position Zoom

Applies to: SX10 SX20 SX80 MX200G2/MX300G2 MX700/MX800/MX800D RoomKit RoomKitMini CodecPlus CodecPro Room55 Room70/Room55D Room70G2

Requires user role: ADMIN, INTEGRATOR, USER, ROOMCONTROL

Shows the current zoom (zoom in and out) position of the camera. The value range depends on camera type.

Value space of the result returned:
0..65535

Example:
xStatus Cameras Camera 1 Position Zoom
's Camera 1 Position Zoom: 828
** end
xStatus Cameras Camera \[n\] SerialNumber

**Applies to:** DX70/DX80 SX10 SX20 SX80 MX700/MX800/MX800D CodecPlus CodecPro Room70/Room55D Room70G2

**Requires user role:** ADMIN, INTEGRATOR, USER, ROOMCONTROL

Shows the camera serial number.

**Value space of the result returned:** String

**Example:**
```
xStatus Cameras Camera 1 SerialNumber
's Camera 1 SerialNumber: "B1AB26B00010"
** end
```

xStatus Cameras Camera \[n\] SoftwareID

**Applies to:** DX70/DX80 SX10 SX20 SX80 MX200G2/MX300G2 MX700/MX800/MX800D CodecPlus CodecPro Room55 Room70/Room55D Room70G2

**Requires user role:** ADMIN, INTEGRATOR, USER, ROOMCONTROL

Shows the software identity of the camera.

**Value space of the result returned:** String

**Example:**
```
xStatus Cameras Camera 1 SoftwareID
's Camera 1 SoftwareID: "S01718-4.0FINAL [ID:40063] 2014-10-20"
** end
```

xStatus Cameras PresenterTrack Availability

**Applies to:** SX80 MX700/MX800/MX800D CodecPlus CodecPro Room70/Room55D Room70G2

**Requires user role:** ADMIN, INTEGRATOR, ROOMCONTROL, USER

Shows whether presenter tracking is available.

**Value space of the result returned:**
- **Off**: Presenter tracking is disabled.
- **Unavailable**: Presenter tracking is not configured correctly, camera is disconnected, or a Multisite or Multistream call is in progress.
- **Available**: Presenter tracking is available.

**Example:**
```
xStatus Cameras PresenterTrack Availability
's Cameras PresenterTrack Availability: Available
** end
```

xStatus Cameras PresenterTrack PresenterDetected

**Applies to:** SX80 MX700/MX800/MX800D CodecPlus CodecPro Room70/Room55D Room70G2

**Requires user role:** ADMIN, INTEGRATOR, ROOMCONTROL, USER

Shows whether presenter tracking is currently in use.

**Value space of the result returned:** False/True

**Example:**
```
xStatus Cameras PresenterTrack PresenterDetected
's Cameras PresenterTrack PresenterDetected: False
** end
```
xStatus Cameras PresenterTrack Status

 Applies to: SX80 MX700/MX800/MX800D CodecPlus CodecPro Room70/Room55D Room70G2
 Requires user role: ADMIN, INTEGRATOR, ROOMCONTROL, USER

 Returns the current status for presenter tracking.

 Value space of the result returned:

 Off/Follow/Diagnostic/Background/Setup/Persistent

 Off: Not running.

 Follow: Tracking is in progress and working normally.

 Diagnostic: In diagnostics mode. This mode is used for troubleshooting.

 Background: The algorithm is running when the PresenterTrack camera is not selected as the main camera. This is used in the Briefing room setup to enable automatic switching between the different cameras.

 Setup: Web wizard for setting up SpeakerTrack camera is active.

 Persistent: The camera is active and selected as main camera.

 Example:

 xStatus Cameras PresenterTrack Status
 's Cameras PresenterTrack Status: Off
 ** end

 xStatus Cameras SpeakerTrack Availability

 Applies to: SX80 MX700/MX800/MX800D RoomKit RoomKitMini CodecPlus CodecPro Room55 Room70/Room55D Room70G2
 Requires user role: ADMIN, INTEGRATOR, USER, ROOMCONTROL

 The product may support speaker tracking (which also includes best overview), or only the best overview feature. This status shows whether or not that feature is available.

 Value space of the result returned:

 Off/Unavailable/Available

 Off: Speaker tracking / best overview is turned off with the command xConfiguration Cameras SpeakerTrack Mode: Off

 Unavailable: Hardware for speaker tracking / best overview is not found.

 Available: Hardware for speaker tracking / best overview is found, and it is possible to turn the feature on or off from the user interface.

 Example:

 xStatus Cameras SpeakerTrack Availability
 's Cameras SpeakerTrack Availability: Available
 ** end

 xStatus Cameras SpeakerTrack Status

 Applies to: SX80 MX700/MX800/MX800D RoomKit RoomKitMini CodecPlus CodecPro Room55 Room70/Room55D Room70G2
 Requires user role: ADMIN, INTEGRATOR, USER, ROOMCONTROL

 The product may support speaker tracking (which also includes best overview), or only the best overview feature. This status shows whether or not that feature is active.

 Value space of the result returned:

 Active/Inactive

 Active: Speaker tracking / best overview is active.

 Inactive: Speaker tracking / best overview is inactive.

 Example:

 xStatus Cameras SpeakerTrack Status
 's Cameras SpeakerTrack Status: Active
 ** end
Capabilities status

**xStatus Capabilities Conference MaxActiveCalls**

*Applies to: All products*

Requires user role: ADMIN, USER

Shows the maximum number of simultaneous active calls. Calls that are set on hold/transfer are not counted as active.

Value space of the result returned:

0..5

Example:

```
xStatus Capabilities Conference MaxActiveCalls
*s Capabilities Conference MaxActiveCalls: 3
** end
```

**xStatus Capabilities Conference MaxAudioCalls**

*Applies to: All products*

Requires user role: ADMIN, USER

Shows the maximum number of simultaneous audio calls that is supported.

Value space of the result returned:

*Integer*

Example:

```
xStatus Capabilities Conference MaxAudioCalls
*s Capabilities Conference MaxAudioCalls: 3
** end
```

**xStatus Capabilities Conference MaxCalls**

*Applies to: All products*

Requires user role: ADMIN, USER

Shows the maximum number of simultaneous calls.

Value space of the result returned:

0..5

Example:

```
xStatus Capabilities Conference MaxCalls
*s Capabilities Conference MaxCalls: 3
** end
```

**xStatus Capabilities Conference MaxVideoCalls**

*Applies to: All products*

Requires user role: ADMIN, USER

Shows the maximum number of simultaneous video calls that is supported.

Value space of the result returned:

*Integer*

Example:

```
xStatus Capabilities Conference MaxVideoCalls
*s Capabilities Conference MaxVideoCalls: 3
** end
```
Conference status

xStatus Conference ActiveSpeaker CallId
Applies to: All products
Requires user role: ADMIN, USER
Shows the CalId of the current active speaker.
Value space of the result returned:
  Integer
Example:
xStatus Conference ActiveSpeaker CallId
  *s Conference ActiveSpeaker CallId: 3
  ** end

xStatus Conference Call [n] AuthenticationRequest
Applies to: All products
Requires user role: ADMIN, INTEGRATOR, USER
This status is only relevant for Cisco Webex registered devices. When this status has another value than "None" the device is waiting for an authentication response. Use the Conference Call AuthenticationResponse command to give the response.
Value space of the result returned:
  String
Example:
xStatus Conference Call 2 AuthenticationRequest
  *s Conference Call 2 AuthenticationRequest: None
  ** end

xStatus Conference Call [n] BookingId
Applies to: All products
Requires user role: ADMIN, USER
Shows the booking ID of a conference (if assigned). The booking ID can be used for easy identification of a call or conference.
Value space of the result returned:
  String
Example:
xStatus Conference Call 2 BookingId
  *s Conference Call 2 BookingId: "MyConference"
  ** end

xStatus Conference Call [n] Capabilities FarendMessage Mode
Applies to: All products
Requires user role: ADMIN, USER
Not applicable in this release.
Value space of the result returned:
  On/Off
Example:
xStatus Conference Call 4 Capabilities FarendMessage Mode
  *s Conference Call 4 Capabilities FarendMessage Mode: Off
  ** end
xStatus Conference Call [n] Capabilities FECC Mode
Applies to: All products
Requires user role: ADMIN, USER
Shows whether or not you have permission to control the input sources at a far end site.
Value space of the result returned:
  - On/Off
    - On: Far end input source control is permitted.
    - Off: Far end input source control is not permitted.
Example:
  xStatus Conference Call 2 Capabilities FECC Mode
  "s Conference Call 2 Capabilities FECC Mode: On
  ** end

xStatus Conference Call [n] Capabilities FECC NumberOfPresets
Applies to: All products
Requires user role: ADMIN, USER
Shows the number of presets available for the input sources at a far end site.
Value space of the result returned:
  1..15
Example:
  xStatus Conference Call 2 Capabilities FECC NumberOfPresets
  "s Conference Call 2 Capabilities FECC NumberOfPresets: 15
  ** end

xStatus Conference Call [n] Capabilities FECC Source [n] Name
Applies to: All products
Requires user role: ADMIN, USER
Shows the name of an input source that can be connected at a far end site.
Value space of the result returned:
  String
Example:
  xStatus Conference Call 2 Capabilities FECC Source 1 Name
  "s Conference Call 2 Capabilities FECC Source 1 Name: "Main camera"
  ** end
xStatus Conference Call \([n]\) Capabilities FECC Source \([n]\) Options

Applies to: All products
Requires user role: ADMIN, USER

Shows available options for an input source that can be connected at a far end site (for a camera: p=pan; t=tilt; z=zoom; f=focus).

Value space of the result returned:
- String

Example:
```plaintext
xStatus Conference Call 2 Capabilities FECC Source 1 Options
's Conference Call 2 Capabilities FECC Source 1 Options: "ptzf"
** end
```

xStatus Conference Call \([n]\) Capabilities FECC Source \([n]\) SourceId

Applies to: All products
Requires user role: ADMIN, USER

Shows the ID of an input source that can be connected at a far end site.

Value space of the result returned:
- Integer

Example:
```plaintext
xStatus Conference Call 2 Capabilities FECC Source 1 SourceId
's Conference Call 2 Capabilities FECC Source 1 SourceId: 6
** end
```

xStatus Conference Call \([n]\) Capabilities Hold

Applies to: All products
Requires user role: ADMIN, USER

Indicates whether the far-end site can be placed on hold or not.

Value space of the result returned:
- True/False

Example:
```plaintext
xStatus Conference Call Capabilities Hold
's Conference Call 2 Capabilities Hold: True
** end
```

xStatus Conference Call \([n]\) Capabilities IxChannel Status

Applies to: All products
Requires user role: ADMIN, USER

Not applicable in this release.

Value space of the result returned:
- Active/Failed/Off

Example:
```plaintext
xStatus Conference Call 4 Capabilities IxChannel Status
's Conference Call 4 Capabilities IxChannel Status: Active
** end
```
xStatus Conference Call [n] Capabilities Presentation
Applies to: All products
Requires user role: ADMIN, USER
Lists the presentation capabilities for other participants in the conference.
Value space of the result returned:
   True/False
Example:
   xStatus Conference Call 2 Capabilities Presentation
   *s Conference Call 2 Capabilities Presentation: True
   ** end

xStatus Conference Call [n] MicrophonesMuted
Applies to: All products
Requires user role: ADMIN, USER
Lists the audio mute status for other participants in the conference.
Value space of the result returned:
   True/False
Example:
   xStatus Conference Call 2 MicrophonesMuted
   *s Conference Call 2 MicrophonesMuted: True
   ** end

xStatus Conference Call [n] Manufacturer
Applies to: All products
Requires user role: ADMIN, USER
Shows the manufacturer of the video system at a far end site.
Value space of the result returned:
   String
Example:
   xStatus Conference Call 2 Manufacturer
   *s Conference Call 2 Manufacturer: "Cisco"
   ** end

xStatus Conference Call [n] SoftwareID
Applies to: All products
Requires user role: ADMIN, USER
Shows the ID of the software running of the video system at a far end site.
Value space of the result returned:
   String
Example:
   xStatus Conference Call 2 SoftwareID
   *s Conference Call 2 SoftwareID: "CE8"
   ** end
xStatus Conference DoNotDisturb
Applies to: All products
Requires user role: ADMIN, INTEGRATOR, USER
Shows whether DoNotDisturb mode is switched on or not.
Value space of the result returned:
   Active/Inactive
Example:
   xStatus Conference DoNotDisturb
   *s Conference DoNotDisturb: Inactive
   ** end

xStatus Conference Line [n] Mode
Applies to: All products
Requires user role: ADMIN, USER
Indicates whether the system is configured as private or shared line on CUCM.
Value space of the result returned:
   Shared/Private
Example:
   xStatus Conference Line Mode
   *s Conference Line 1 Mode: Private
   ** end

xStatus Conference Multipoint Mode
Applies to: All products
Requires user role: ADMIN, USER
Shows how the Multipoint video conferences are handled.
Value space of the result returned:
   Auto/CUCMMediaResourceGroupList/MultiSite/Off
   Auto: The multipoint method available will be chosen automatically; if none are available
       the Multipoint Mode will automatically be set to Off. If both MultiWay and MultiSite are avail-
       able, the MultiWay service takes priority over the built-in MultiSite.
   Off: Multiparty conferences are not allowed.
   MultiSite: Multiparty conferences are set up using the built-in MultiSite feature. If MultiSite
       is chosen when the MultiSite feature is not available, the Multipoint Mode will automatically
       be set to Off.
   CUCMMediaResourceGroupList: Multiparty conferences (ad hoc conferences) are
       hosted by the CUCM configured conference bridge. This setting is provisioned by CUCM
       in a CUCM environment and should never be set manually by the user.
Example:
   xStatus Conference Multipoint Mode
   *s Conference Multipoint Mode: "Auto"
   ** end

xStatus Conference Presentation CallId
Applies to: All products
Requires user role: ADMIN, INTEGRATOR, USER, ROOMCONTROL
Shows the identity of the system that sends the presentation.
Value space of the result returned:
   Integer
Example:
   xStatus Conference Presentation CallId
   *s Conference Presentation CallId: 0
   ** end
xStatus Conference Presentation LocalInstance \([n]\) SendingMode

**Applies to:** All products

**Requires user role:** ADMIN, INTEGRATOR, USER, ROOMCONTROL

Shows whether a presentation source is shared locally or with a remote participant. There can be multiple local presentations which all have their own instance.

Value space of the result returned:

* `LocalOnly`/`LocalRemote`/`Off`

**Example:**
```
xStatus Conference Presentation LocalInstance 1 SendingMode
's Conference Presentation LocalInstance 1 SendingMode: LocalOnly
** end
```

xStatus Conference Presentation LocalInstance \([n]\) Source

**Applies to:** All products

**Requires user role:** ADMIN, INTEGRATOR, USER, ROOMCONTROL

Shows the SourceId for a current presentation. There can be multiple local presentations which all have their own instance.

Value space of the result returned:

* Integer

**Example:**
```
xStatus Conference Presentation LocalInstance 1 Source
's Conference Presentation LocalInstance 1 Source: 1
** end
```

xStatus Conference Presentation Mode

**Applies to:** All products

**Requires user role:** ADMIN, INTEGRATOR, USER, ROOMCONTROL

Shows the status of the secondary video stream.

Value space of the result returned:

* `Off`/`Sending`/`Receiving`

**Example:**
```
xStatus Conference Presentation Mode
's Conference Presentation Mode: Off
** end
```

xStatus Conference SpeakerLock CallId

**Applies to:** All products

**Requires user role:** ADMIN, USER

Shows the CallId for the participant locked as the prominent speaker in the conference.

Value space of the result returned:

* Integer

**Example:**
```
xStatus Conference SpeakerLock CallId
's Conference SpeakerLock CallId: 0
** end
```
xStatus Conference SpeakerLock Mode

Applies to: All products
Requires user role: ADMIN, USER

Shows whether the speaker lock is enabled or not.

Value space of the result returned:
   On/Off

Example:
   xStatus Conference SpeakerLock Mode
   *s Conference SpeakerLock Mode: Off
   ** end

Diagnostics status

xStatus Diagnostics Message [n] Description

Applies to: All products
Requires user role: ADMIN, USER

Shows a description of the current diagnostics alerts.

Value space of the result returned:
   String

Example:
   xStatus Diagnostics Message Description
   *s DiagnosticsResult Message 1 Description: "IP configuration incomplete"
   ** end

xStatus Diagnostics Message [n] Level

Applies to: All products
Requires user role: ADMIN, USER

Shows the level of importance of the diagnostics message.

Value space of the result returned:
   Error/Warning/Critical
      Error: There is an error in the system. The system can still be used, but there can be some restrictions.
      Warning: A problem is detected and a more specific report follows indicating the exact problem.
      Critical: The warning level is critical. The system cannot be used.

Example:
   xStatus Diagnostics Message 4 Level
   *s Diagnostics Message 4 Level: Warning
   ** end
xStatus Diagnostics Message [n] References

Applies to: All products
Requires user role: ADMIN, USER

Additional information on the diagnostics alert, if available.

Value space of the result returned:

  String

Example:

```
xStatus Diagnostics Message 10 References
*s Diagnostics Message 10 References: "delay=190"
** end
```
**GPIO status**

**xStatus GPIO Pin [n] State**

*Applies to:* SX80, MX700/MX800, CodecPro, Room70G2  
*Requires user role:* ADMIN, INTEGRATOR, USER  
*Shows the current state of each of the four GPIO pins.*  
*Value space of the result returned:*

- **High**: +12V, the default state.  
- **Low**: 0V, when activated.  

*Example:*  
```plaintext  
xStatus GPIO Pin 1 State  
*s GPIO Pin 1 State: High  
** end  
```

**H320 status**

**xStatus H320 Gateway Address**

*Applies to:* All products  
*Requires user role:* ADMIN, USER  
*Returns the IPv4 address of the ISDN Gateway, if the endpoint is paired to one.*  
*Value space of the result returned:*

- **String**  

*Example:*  
```plaintext  
xStatus H320 Gateway Address  
*s H320 Gateway Address: ""  
** end  
```

**xStatus H320 Gateway Id**

*Applies to:* All products  
*Requires user role:* ADMIN, USER  
*Returns the unique identification of the H320 Gateway, if the codec is paired with an ISDN Link.*  
*Value space of the result returned:*

- **String**  

*Example:*  
```plaintext  
xStatus H320 Gateway Id  
*s H320 Gateway Id: "00:50:60:0B:EF:11"  
** end  
```
xStatus H320 Gateway Mode
Applies to: All products
Requires user role: ADMIN, USER

Returns information on the type of calls the ISDN Gateway is configured for, if the codec is paired with an ISDN Link.

Value space of the result returned:
- BRI/External/G703/PRI/Unknown

Example:
```
*xStatus H320 Gateway Mode
's H320 Gateway Mode: Unknown
** end
```

xStatus H320 Gateway Number
Applies to: All products
Requires user role: ADMIN, USER

Returns the IPv6 address of the ISDN Gateway if the endpoint is paired to one.

Value space of the result returned:
- String

Example:
```
*xStatus H320 Gateway Number
's H320 Gateway Number: ""
** end
```

xStatus H320 Gateway Reason
Applies to: All products
Requires user role: ADMIN, USER

Shows the reason for rejected Gateway registration. Only available if the codec is connected to an ISDN Link.

Value space of the result returned:
- String

Example:
```
*xStatus H320 Gateway Reason
's H320 Gateway Reason: ""
** end
```

xStatus H320 Gateway Status
Applies to: All products
Requires user role: ADMIN, USER

Returns the state of the H320 Gateway, if the codec is paired with an ISDN Link.

Value space of the result returned:
- Error/Inactive/OK/OKWithWarning/Warning/NoConnection

Example:
```
*xStatus H320 Gateway status
's H320 Gateway Status: Error
** end
```
H323 status

xStatus H323 Gatekeeper Address
Applies to: All products
Requires user role: ADMIN, USER
Displays the IP address of the gatekeeper where the system is registered.
Value space of the result returned:
   String
Example:
xStatus H323 Gatekeeper Address
   *s H323 Gatekeeper Address: "192.0.1.20"
   ** end

xStatus H323 Gatekeeper Port
Applies to: All products
Requires user role: ADMIN, USER
Shows the port which is used when connecting to on the gatekeeper.
Value space of the result returned:
   Integer
Example:
xStatus H323 Gatekeeper Port
   *s H323 Gatekeeper Port: 1719
   ** end

xStatus H323 Gatekeeper Reason
Applies to: All products
Requires user role: ADMIN, USER
Shows the reason for rejected registration.
Value space of the result returned:
   String
Example:
xStatus H323 Gatekeeper Reason
   *s H323 Gatekeeper Reason: ""
   ** end

xStatus H323 Gatekeeper Status
Applies to: All products
Requires user role: ADMIN, USER
Shows the gatekeeper registration status.
Value space of the result returned:
   Required/Discovering/Discovered/Authenticating/Authenticated/Registering/Registered/
   Inactive/Rejected
Example:
xStatus H323 Gatekeeper Status
   *s H323 Gatekeeper Status: Registered
   ** end
xStatus H323 Mode Reason

Applies to: All products
Requires user role: ADMIN, USER
Shows whether there is a conflict between H.323 settings and xStatus H323 Mode Status.
Value space of the result returned:

* String
  "": When H.323 is set to On and there is no conflict between H.323 Mode configuration and the rest of the system settings.
  "SIP is enabled": When H.323 Mode is set to On and SIP is enabled on a system that does not support the two simultaneously.
  "Not available": When a system does not support H.323.

Example:
```plaintext
xStatus H323 Mode Reason
's H323 Mode Reason: ""
** end
```

xStatus H323 Mode Status

Applies to: All products
Requires user role: ADMIN, USER
Shows the status for H.323 registration.
Value space of the result returned:

* Enabled/Disabled
  * Enabled: Registration is enabled.
  * Disabled: Registration is disable, because SIP is enabled.

Example:
```plaintext
xStatus H323 Mode Status
's H323 Mode Status: "Disabled"
** end
```

HttpFeedback status

xStatus HttpFeedback [n] Expression [n]

Applies to: All products
Requires user role: ADMIN, USER
Shows the feedback from the HTTP server. There can be up to 4 slots of servers requesting HTTP feedback and up to 15 expressions for each URL. See the xCommand HttpFeedback commands for more information.
Value space of the result returned:

* String

Example:
```plaintext
xStatus HttpFeedback 1 Format
's HttpFeedback 1 Format: XML
** end
```

xStatus HttpFeedback [n] Format

Applies to: All products
Requires user role: ADMIN, USER
Shows the format of the HTTP Feedback feedback from the HTTP server.
Value space of the result returned:

* XML/JSON

Example:
```plaintext
xStatus HttpFeedback 1 Format
's HttpFeedback 1 Format: XML
** end
```
xStatus HttpFeedback [n] Status

Applies to: All products
Requires user role: ADMIN, USER

Shows the status of the feedback sent to the HTTP server.

Value space of the result returned:
- **OK**: Shows that the feedback has been successfully sent.
- **Failed**: Shows that the feedback has not been successfully sent.

Example:
```
xStatus HttpFeedback 1 Status
's HttpFeedback 1 Status: OK
** end
```

xStatus HttpFeedback [n] URL

Applies to: All products
Requires user role: ADMIN, USER

Shows the URL (Uniform Resource Locator) of the HTTP server. There can be up to three HTTP servers, specified by the URL.

Value space of the result returned:
- **String**

Example:
```
xStatus HttpFeedback 1 URL
** end
```

MediaChannels status

xStatus MediaChannels Call [n] Channel [n] Audio Channels

Applies to: All products
Requires user role: ADMIN, USER

Shows the number of incoming or outgoing audio channels.

Value space of the result returned:
- **Integer**

Example:
```
xStatus MediaChannels Call 27 Channel 327 Audio Channels
's MediaChannels Call 27 Channel 327 Audio Channels: 1
** end
```

xStatus MediaChannels Call [n] Channel [n] Audio ChannelRole

Applies to: All products
Requires user role: ADMIN, USER

Shows the role of the incoming or outgoing audio channel.

Value space of the result returned:
- **Main/Presentation**
  - **Main**: The audio from the main video is on the incoming or outgoing audio channel.
  - **Presentation**: The audio from the presentation is on the incoming or outgoing audio channel.

Example:
```
xStatus MediaChannels Call 27 Channel 327 Audio ChannelRole
's MediaChannels Call 27 Channel 327 Audio ChannelRole: Main
** end
```
xStatus MediaChannels Call [n] Channel [n] Audio Mute

Applies to: All products
Requires user role: ADMIN, USER
Audio mute status of the incoming audio.
Value space of the result returned:

  True/False

Example:
xStatus MediaChannels Call 27 Channel 327 Audio Mute
*s MediaChannels Call 27 Channel 327 Audio Mute: False
** end

xStatus MediaChannels Call [n] Channel [n] Audio Protocol

Applies to: All products
Requires user role: ADMIN, USER
Shows the audio algorithm of the incoming or outgoing audio.
Value space of the result returned:

  AACLD/G711A/G711Mu/G722/G7221C/G723_1/G728/G729/G729A/G729AB/Off/Opus

AACLD: The AAC-LD is an MPEG-4 Low Delay Audio Coder audio compression format.
G711A: The G.711 A-law algorithm is an ITU-T standard for audio compression.
G711Mu: The G.711 Mu-law algorithm is an ITU-T standard for audio compression.
G722: The G.722 algorithm is an ITU-T standard for audio compression.
G7221: The G.722.1 algorithm is an ITU-T standard for audio compression.
G7221C: The G.722.1 annex C algorithm is an ITU-T standard for audio compression.
G723_1: The G.723.1 algorithm is an ITU-T standard for audio compression.
G728: The G.728 algorithm is an ITU-T standard for audio compression.
G729: The G.729 algorithm is an ITU-T standard for audio compression.
G729AB: The G.729 annex A and B algorithm is an ITU-T standard for audio compression.
Off: No audio.
Opus: Opus is a royalty-free IETF standard for audio compression.

Example:
xStatus MediaChannels Call 27 Channel 327 Audio Protocol
*s MediaChannels Call 27 Channel 327 Audio Protocol: AACLD
** end
xStatus MediaChannels Call [n] Channel [n] Direction

Applies to: All products
Requires user role: ADMIN, USER

Shows the direction of the call.

Value space of the result returned:

  *Incoming/Outgoing*

Example:
```
xStatus MediaChannels Call 27 Channel 327 Direction
*s MediaChannels Call 27 Channel 327 Direction: Incoming
** end
```

xStatus MediaChannels Call [n] Channel [n] Encryption

Applies to: All products
Requires user role: ADMIN, USER

Shows the encryption status for audio or video on the incoming or outgoing call.

Value space of the result returned:

  *On/Off*

Example:
```
xStatus MediaChannels Call 27 Channel 327 Encryption
*s MediaChannels Call 27 Channel 327 Encryption: On
** end
```

xStatus MediaChannels Call [n] Channel [n] NetStat Bytes

Applies to: All products
Requires user role: ADMIN, USER

Shows the number of bytes for audio, video or data on the incoming or outgoing channel.

Value space of the result returned:

  *Integer*

Example:
```
xStatus MediaChannels Call 27 Channel 327 NetStat Bytes
*s MediaChannels Call 27 Channel 327 NetStat Bytes: 496640
** end
```

xStatus MediaChannels Call [n] Channel [n] NetStat ChannelRate

Applies to: All products
Requires user role: ADMIN, USER

Shows the bandwidth for audio, video or data on the incoming or outgoing channel.

Value space of the result returned:

  *Integer*

Example:
```
xStatus MediaChannels Call 27 Channel 327 NetStat ChannelRate
*s MediaChannels Call 27 Channel 327 NetStat ChannelRate: 128000
** end
```
**xStatus MediaChannels Call [n] Channel [n] NetStat Jitter**

**Applies to:** All products

**Requires user role:** ADMIN, USER

Shows the jitter for audio, video or data at the present moment on the incoming or outgoing channel, as specified by RFC 3550.

Value space of the result returned:

*Integer*

Example:

```
xStatus MediaChannels Call 27 Channel 327 NetStat Jitter
`s MediaChannels Call 27 Channel 327 NetStat Jitter: 2
** end
```

**xStatus MediaChannels Call [n] Channel [n] NetStat LastIntervalLost**

**Applies to:** All products

**Requires user role:** ADMIN, USER

Shows the number of packets lost for audio, video or data during the last interval on the incoming or outgoing channels.

Value space of the result returned:

*Integer*

Example:

```
xStatus MediaChannels Call 27 Channel 327 NetStat LastIntervalLost
`s MediaChannels Call 27 Channel 327 NetStat LastIntervalLost: 0
** end
```

**xStatus MediaChannels Call [n] Channel [n] NetStat LastIntervalReceived**

**Applies to:** All products

**Requires user role:** ADMIN, USER

Shows the number of packets received for audio, video or data during the last interval on the incoming or outgoing channels.

Value space of the result returned:

*Integer*

Example:

```
xStatus MediaChannels Call 27 Channel 327 NetStat LastIntervalReceived
`s MediaChannels Call 27 Channel 327 NetStat LastIntervalReceived: 289
** end
```

**xStatus MediaChannels Call [n] Channel [n] NetStat Loss**

**Applies to:** All products

**Requires user role:** ADMIN, USER

Shows the number of packets lost for audio, video or data on the incoming or outgoing channels.

Value space of the result returned:

*Integer*

Example:

```
xStatus MediaChannels Call 27 Channel 327 NetStat Loss
`s MediaChannels Call 27 Channel 327 NetStat Loss: 0
** end
```
xStatus MediaChannels Call [n] Channel [n] NetStat MaxJitter

Applies to: All products
Requires user role: ADMIN, USER
Shows the maximum jitter for audio, video or data that has been measured during last interval (about 5 seconds).
Value space of the result returned:

  Integer

Example:
```
xStatus MediaChannels Call 27 Channel 327 NetStat MaxJitter
  *s MediaChannels Call 27 Channel 327 NetStat MaxJitter: 2
** end
```

xStatus MediaChannels Call [n] Channel [n] NetStat Packets

Applies to: All products
Requires user role: ADMIN, USER
Shows the number of packets that was received or sent for audio, video or data on the incoming or outgoing channels.
Value space of the result returned:

  Integer

Example:
```
xStatus MediaChannels Call 27 Channel 327 NetStat Packets
  *s MediaChannels Call 27 Channel 327 NetStat Packets: 1551
** end
```

xStatus MediaChannels Call [n] Channel [n] ParticipantId

Applies to: All products
Requires user role: ADMIN, USER
Shows the ID of the Active Control participant on the incoming audio or video channel.
Value space of the result returned:

  String

Example:
```
xStatus MediaChannels Call 27 Channel 327 ParticipantId
  *s MediaChannels Call 27 Channel 327 ParticipantId: ""
** end
```

xStatus MediaChannels Call [n] Channel [n] Type

Applies to: All products
Requires user role: ADMIN, USER
Shows the media type on the incoming or outgoing channel.
Value space of the result returned:

  Audio/Video/Data
    Audio: The media type on the incoming or outgoing channel is audio.
    Video: The media type on the incoming or outgoing channel is video.
    Data: The media type on the incoming or outgoing channel is data.

Example:
```
xStatus MediaChannels Call 27 Channel 327 Type
  *s MediaChannels Call 27 Channel 327 Type: Audio
** end
```
xStatus MediaChannels Call [n] Channel [n] Video ChannelRole
Applies to: All products
Requires user role: ADMIN, USER
Shows the role of the incoming or outgoing video channel.
Value space of the result returned:

Main/Presentation
  Main: The main video is on the incoming or outgoing video channel.
  Presentation: The presentation is on the incoming or outgoing video channel.

Example:
```
xStatus MediaChannels Call 27 Channel 327 Video ChannelRole
's MediaChannels Call 27 Channel 327 Video ChannelRole: Main
** end
```

xStatus MediaChannels Call [n] Channel [n] Video FrameRate
Applies to: All products
Requires user role: ADMIN, USER
Shows the frame rate of the incoming or outgoing video channel.
Value space of the result returned:

Integer

Example:
```
xStatus MediaChannels Call 27 Channel 327 Video FrameRate
's MediaChannels Call 27 Channel 327 Video FrameRate: 30
** end
```

xStatus MediaChannels Call [n] Channel [n] Video Protocol
Applies to: All products
Requires user role: ADMIN, USER
Shows the video algorithm of the incoming or outgoing video channel.
Value space of the result returned:

H261/H263/H263p/H263pp/H264/HEVC/JPEG/MP4V/Off
  H261: The H.261 algorithm is an ITU-T standard for video compression.
  H263: The H.263 algorithm is an ITU-T standard for video compression.
  H263p: The H.263p (H.263+) algorithm is an ITU-T standard for video compression.
  H264: The H.264 algorithm (MPEG-4 AVC) is an ITU-T and ISE/IEC standard for video compression.
  HEVC: The HEVC (H.265) algorithm (MPEG-H part 2) is an ITU-T and ISE/IEC standard for video compression.
  JPEG: The JPEG algorithm is an ISO/IEC standard for video compression.
  MP4V: The MP4V format is an ISO/IEC file format for video compression.
  Off: No video.

Example:
```
xStatus MediaChannels Call 27 Channel 327 Video Protocol
's MediaChannels Call 27 Channel 327 Video Protocol: H264
** end
```

xStatus MediaChannels Call [n] Channel [n] Video ResolutionX
Applies to: All products
Requires user role: ADMIN, USER
Shows the width (resolution in direction X) of the incoming or outgoing video.
Value space of the result returned:

Integer

Example:
```
xStatus MediaChannels Call 27 Channel 327 Video ResolutionX
's MediaChannels Call 27 Channel 327 Video ResolutionX: 1920
** end
```
xStatus MediaChannels Call [n] Channel [n] Video ResolutionY

Applies to: All products
Requires user role: ADMIN, USER

Shows the width (resolution in direction Y) of the incoming or outgoing video.

Value space of the result returned:

  Integer

Example:
xStatus MediaChannels Call 27 Channel 327 Video ResolutionY
*MediaChannels Call 27 Channel 327 Video ResolutionY: 1080
** end

xStatus Network [n] CDP Address

Applies to: All products
Requires user role: ADMIN, USER

Returns the first network address of both receiving and sending devices.

Value space of the result returned:

  String

Example:
xStatus Network CDP Address
*Network 1 CDP Address: "192.0.1.20"
** end

xStatus Network [n] CDP Capabilities

Applies to: All products
Requires user role: ADMIN, USER

Describes the functional capability for the switch in form of a device type. See documentation for CDP protocol for more information.

Value space of the result returned:

  String

Example:
xStatus Network CDP Capabilities
*Network 1 CDP Capabilities: "0x0029"
** end
xStatus Network [n] CDP DeviceId
Applies to: All products
Requires user role: ADMIN, USER
Identifies the name of the switch in form of a character string.
Value space of the result returned:
  String
Example:
  xStatus Network CDP DeviceId
  *s Network 1 CDP DeviceId: "123456.company.com"
  ** end

xStatus Network [n] CDP Duplex
Applies to: All products
Requires user role: ADMIN, USER
Indicates the status (duplex configuration) of the CDP broadcast interface. Used by network operators to diagnose connectivity problems between adjacent network elements.
Value space of the result returned:
  String
Example:
  xStatus Network CDP Duplex
  *s Network 1 CDP Duplex: "Full"
  ** end

xStatus Network [n] CDP Platform
Applies to: All products
Requires user role: ADMIN, USER
Returns the hardware platform name of the switch connected to the endpoint.
Value space of the result returned:
  String
Example:
  xStatus Network CDP Platform
  *s Network 1 CDP Platform: "cisco WS-C3750X-48P"
  ** end

xStatus Network [n] CDP PortID
Applies to: All products
Requires user role: ADMIN, USER
Returns the identification the switch uses of the port the endpoint is connected to.
Value space of the result returned:
  String
Example:
  xStatus Network CDP PortID
  *s Network 1 CDP PortID: "GigabitEthernet1/0/23"
  ** end
xStatus Network [n] CDP PrimaryMgmtAddress

Applies to: All products
Requires user role: ADMIN, USER

Returns the management address used to configure and monitor the switch the endpoint is connected to.

Value space of the result returned:

  String

Example:
  xStatus Network CDP PrimaryMgmtAddress
  *s Network 1 CDP PrimaryMgmtAddress: "10.1.1.2"
  ** end

xStatus Network [n] CDP SysName

Applies to: All products
Requires user role: ADMIN, USER

Returns the SysName as configured in the switch the endpoint is connected to.

Value space of the result returned:

  String

Example:
  xStatus Network CDP SysName
  *s Network 1 CDP SysName: ""
  ** end

xStatus Network [n] CDP SysObjectID

Applies to: All products
Requires user role: ADMIN, USER

Returns the SysObjectID as configured in the switch the endpoint is connected to.

Value space of the result returned:

  String

Example:
  xStatus Network CDP SysObjectID
  *s Network 1 CDP SysObjectID: ""
  ** end

xStatus Network [n] CDP Version

Applies to: All products
Requires user role: ADMIN, USER

Returns information about the software release version the switch is running.

Value space of the result returned:

  String

Example:
  xStatus Network 1 CDP Version
  ** end
xStatus Network [n] CDP VoIPApplianceVlanID
Applies to: All products
Requires user role: ADMIN, USER
Identifies the VLAN used for VoIP traffic from the endpoint to the switch. For more information see documentation of the IEEE 802.1Q protocol.
Value space of the result returned:
   String
Example:
xStatus Network CDP VoIPApplianceVlanID
   "s Network 1 CDP VoIPApplianceVlanID: "300"
   ** end

xStatus Network [n] CDP VTPMgmtDomain
Applies to: All products
Requires user role: ADMIN, USER
Returns the switch’s configured VTP management domain name-string.
Value space of the result returned:
   String
Example:
xStatus Network CDP VTPMgmtDomain
   "s Network 1 CDP VTPMgmtDomain: "anyplace"
   ** end

xStatus Network [n] DNS Domain Name
Applies to: All products
Requires user role: ADMIN, USER
Shows the domain name.
Value space of the result returned:
   String
Example:
xStatus Network [n] DNS Domain Name
   "s Network 1 DNS Domain Name: "www.example.com www.example.int"
   ** end

xStatus Network [n] DNS Server [n] Address
Applies to: All products
Requires user role: ADMIN, USER
Shows the IP address of the DNS server.
Value space of the result returned:
   String
Example:
xStatus Network [n] DNS Server [n] Address
   "s Network 1 DNS Server 1 Address: "192.0.2.60"
   ** end
xStatus Network \([n] \) Ethernet MacAddress

Applies to: All products
Requires user role: ADMIN, USER

Shows the MAC (Media Access Control) address for the Ethernet interface.

Value space of the result returned:

String

Example:

```c
xStatus Network 1 Ethernet MacAddress
's Network 1 Ethernet MacAddress: "00:50:60:02:FD:C7"
** end
```

xStatus Network \([n] \) Ethernet Speed

Applies to: All products
Requires user role: ADMIN, USER

Shows the Ethernet speed in Mbps. The speed can be in full-duplex or half-duplex.

Value space of the result returned:

10half/10full/100half/100full/1000full

Example:

```c
xStatus Network 1 Ethernet Speed
's Network 1 Ethernet Speed: "100full"
** end
```

xStatus Network \([n] \) IPv4 Address

Applies to: All products
Requires user role: ADMIN, USER

Shows the IPv4 address that uniquely identifies this system.

Value space of the result returned:

String

Example:

```c
xStatus Network 1 IPv4 Address
's Network 1 IPv4 Address: "192.0.2.149"
** end
```

xStatus Network \([n] \) IPv4 Gateway

Applies to: All products
Requires user role: ADMIN, USER

Shows the address of the IPv4 gateway.

Value space of the result returned:

String

Example:

```c
xStatus Network 1 IPv4 Gateway
's Network 1 IPv4 Gateway: "192.0.2.10"
** end
```
xStatus Network [n] IPv4 SubnetMask

Applies to: All products
Requires user role: ADMIN, USER
Shows the subnet mask which determines which subnet an IPv4 address belongs to.
Value space of the result returned:
  String
Example:
  xStatus Network 1 IPv4 SubnetMask
  *s Network 1 IPv4 SubnetMask: "255.255.255.0"
** end

xStatus Network [n] IPv4 Address

Applies to: All products
Requires user role: ADMIN, USER
Shows the IPv4 address that uniquely identifies this system.
Value space of the result returned:
  String
Example:
  xStatus Network 1 IPv4 Address
  *s Network 1 IPv4 Address: ""
** end

xStatus Network [n] IPv6 Gateway

Applies to: All products
Requires user role: ADMIN, USER
Shows the address of the IPv6 gateway.
Value space of the result returned:
  String
Example:
  xStatus Network 1 IPv6 Gateway
  *s Network 1 IPv6 Gateway: ""
** end

xStatus Network [n] IPv6 LinkLocalAddress

Applies to: All products
Requires user role: ADMIN, USER
Shows the IPv6 link local address that is displayed on the primary user interface.
Value space of the result returned:
  String
Example:
  xStatus Network 1 IPv6 LinkLocalAddress
  *s Network 1 IPv6 LinkLocalAddress: "2001:DB8:0000:0000:0000:0000:0000:0001"
** end
xStatus Network [n] VLAN Voice VlanId
Applies to: All products
Requires user role: ADMIN, USER
The feedback shows the VLAN Voice ID.
Value space of the result returned:
   Off/1..4094
   Off: The VLAN Voice Mode is not enabled.
   1..4094: VLAN Voice ID
Example:
   xStatus Network 1 VLAN Voice VlanId
   "s Network 1 VLAN Voice VlanId: "Off"
   ** end

NetworkServices status

xStatus NetworkServices NTP CurrentAddress
Applies to: All products
Requires user role: ADMIN, USER
Returns the address of the NTP server that is currently in use.
Value space of the result returned:
   String
Example:
   xStatus NetworkServices NTP CurrentAddress
   "s NetworkServices NTP CurrentAddress: "123.254.15.121"
   ** end

xStatus NetworkServices NTP Server [n] Address
Applies to: All products
Requires user role: ADMIN, USER
Returns the address of the NTP server(s) the codec is using.
Value space of the result returned:
   String
Example:
   xStatus NetworkServices NTP Address
   "s NetworkServices NTP Address: "12.104.193.12 64.104.222.16 144.254.15.121"
   ** end
xStatus NetworkServices NTP Status
Applies to: All products
Requires user role: ADMIN, USER
Returns the status of the endpoints synchronizing with the NTP server.
Value space of the result returned:

- Discarded: The NTP result has been discarded.
- Synced: The system is in sync with the NTP server.
- NotSynced: The system is not in sync with the NTP server.
- Unknown: The state of the synchronization is unknown.
- Off: No synchronization with the NTP server.

Example:
```
xStatus NetworkServices NTP Status
* NetworkServices NTP Status: Synced
** end
```

xStatus NetworkServices UPnP Status
Applies to: All products
Requires user role: ADMIN, USER
Reports whether or not the UPnP service advertises the video system's presence on the network. The advertisement permits a Touch controller to discover the video system automatically, and you do not need to manually enter the video system's IP address in order to pair the Touch controller.
Value space of the result returned:

- Running/Stopped
  - Running: The video system's presence is advertised on the network.
  - Stopped: The video system's presence is not advertised on the network.

Example:
```
xStatus NetworkServices UPnP Status
* NetworkServices UPnP Status: Running
** end
```

Peripherals status

xStatus Peripherals ConnectedDevice [n] HardwareInfo
Applies to: All products
Requires user role: ADMIN, INTEGRATOR, USER, ROOMCONTROL
Shows hardware information about connected device.
Value space of the result returned: String

Example:
```
xStatus Peripherals ConnectedDevice 1007 HardwareInfo
* Peripherals ConnectedDevice 1007 HardwareInfo: "1122330-0"
** end
```

xStatus Peripherals ConnectedDevice [n] ID
Applies to: All products
Requires user role: ADMIN, INTEGRATOR, USER, ROOMCONTROL
Shows the MAC-address of the connected device.
Value space of the result returned: String

Example:
```
xStatus Peripherals ConnectedDevice 1007 ID
* Peripherals ConnectedDevice 1007 ID: "00:10:20:20:be:21"
** end
```
xStatus Peripherals ConnectedDevice [n] Name
Applies to: All products
Requires user role: ADMIN, INTEGRATOR, USER, ROOMCONTROL
Shows the product name of connected device.
Value space of the result returned:
   String
Example:
   xStatus Peripherals ConnectedDevice 1007 Name
   *s Peripherals ConnectedDevice 1007 Name: "Cisco TelePresence Touch"
   ** end

xStatus Peripherals ConnectedDevice [n] SerialNumber
Applies to: All products
Requires user role: ADMIN, INTEGRATOR, USER, ROOMCONTROL
Shows the serial number of a connected peripheral device, for example the Touch 10.
Value space of the result returned:
   String
Example:
   xStatus Peripherals ConnectedDevice 1001 SerialNumber
   *s Peripherals ConnectedDevice 1001 SerialNumber: "ABC123..."
   ** end

xStatus Peripherals ConnectedDevice [n] SoftwareInfo
Applies to: All products
Requires user role: ADMIN, INTEGRATOR, USER, ROOMCONTROL
Shows information of the software version running on the connected device.
Value space of the result returned:
   String
Example:
   xStatus Peripherals ConnectedDevice 1007 SoftwareInfo
   *s Peripherals ConnectedDevice 1007 SoftwareInfo: "T17.2.0"
   ** end

xStatus Peripherals ConnectedDevice [n] Status
Applies to: All products
Requires user role: ADMIN, INTEGRATOR, USER, ROOMCONTROL
Shows peripheral devices that are currently connected to the endpoint.
Value space of the result returned:
   Connected/ResponseTimedOut
Example:
   xStatus Peripherals ConnectedDevice 1001 Status
   *s Peripherals ConnectedDevice 1001 Status: Connected
   ** end
xStatus Peripherals ConnectedDevice [n] Type

Applies to: All products

Requires user role: ADMIN, INTEGRATOR, USER, ROOMCONTROL

Shows the peripheral types that are connected to the endpoint.

Value space of the result returned:

- Byod/Camera/ControlSystem/InputDevice/ISDNLink/Other/SpeakerTrack/TouchPanel

Example:
```
xStatus Peripherals ConnectedDevice 1001 Type
  *s Peripherals ConnectedDevice 1001 Type: TouchPanel
  ** end
```

xStatus Peripherals ConnectedDevice [n] UpgradeFailureReason

Applies to: All products

Requires user role: ADMIN, INTEGRATOR, USER, ROOMCONTROL

Shows that a connected device has failed during an upgrade and provides a reason.

Value space of the result returned:

- String
  
  Describes the reason for the upgrade failure.

Example:
```
xStatus Peripherals ConnectedDevice 1001 UpgradeFailureReason
  *s Peripherals ConnectedDevice 1001 UpgradeFailureReason: **
  ** end
```

xStatus Peripherals ConnectedDevice [n] UpgradeStatus

Applies to: All products

Requires user role: ADMIN, INTEGRATOR, USER, ROOMCONTROL

Shows the status of the previous software upgrade on the currently connected peripherals.

Value space of the result returned:

- Downloading/Failed/Installing/InstallationReady/None/Succeeded/Rebooting/Retrying/Aborted/Paused

Example:
```
xStatus Peripherals ConnectedDevice 1001 UpgradeStatus
  *s Peripherals ConnectedDevice 1001 UpgradeStatus: None
  ** end
```

xStatus Peripherals ConnectedDevice [n] UpgradeURL

Applies to: All products

Requires user role: ADMIN, INTEGRATOR, USER, ROOMCONTROL

Shows the upgrade URL for the connected device.

Value space of the result returned:

- String
  
  Specifies the full URL.

Example:
```
xStatus Peripherals ConnectedDevice 1001 UpgradeURL
  *s Peripherals ConnectedDevice 1001 UpgradeURL: **
  ** end
```
Provisioning status

xStatus Provisioning CUCM Customization Checksum
Applies to: All products
Requires user role: ADMIN, USER

You can provision custom elements to multiple video systems by using a customization template (a backup file). This status reports the checksum of the last customization template that has been uploaded to the video system. Also see the xCommand Provisioning Service Fetch command.

Value space of the result returned:

String
The checksum of the customization template.

Example:
xStatus Provisioning CUCM Customization Checksum
*s Provisioning CUCM Customization Checksum: "633e163e2694b89ce37103b2448c36a..."
** end

xStatus Provisioning CUCM ExtensionMobility Enabled
Applies to: All products
Requires user role: ADMIN, USER

Shows if Extension Mobility is enabled for a CUCM registered device.

Value space of the result returned:

True/False

Example:
xStatus Provisioning CUCM ExtensionMobility Enabled
*s Provisioning CUCM ExtensionMobility Enabled: False
** end

xStatus Provisioning CUCM ExtensionMobility LastLoggedInUserId
Applies to: All products
Requires user role: ADMIN, USER

Returns the user id that was last logged in to the system. Only in use if CUCM Extension Mobility is enabled, and CUCM is configured to remember the last logged in user on an endpoint.

Value space of the result returned:

String

Example:
xStatus Provisioning CUCM ExtensionMobility LastLoggedInUserId
*s Provisioning CUCM ExtensionMobility LastLoggedInUserId: "User 1"
** end

xStatus Provisioning CUCM ExtensionMobility LoggedIn
Applies to: All products
Requires user role: ADMIN, USER

Shows if someone is logged in to Extension Mobility or not.

Value space of the result returned:

True/False

Example:
xStatus Provisioning CUCM ExtensionMobility LoggedIn
*s Provisioning CUCM ExtensionMobility LoggedIn: False
** end
**xStatus Provisioning RoomType**

**Applies to:** SX80 MX700/MX800/MX800D CodecPlus CodecPro Room70G2

**Requires user role:** ADMIN, USER

Specifies the room type setup configured for this device.

**Value space of the result returned:**

- **Briefing:** This system is using the briefing room setup.
- **Classroom:** This system is using the classroom setup.
- **Standard:** This system is using the default room setup.

**Example:**

```
xStatus Provisioning RoomType
*{ Provisioning RoomType: Briefing
** end
```

**xStatus Provisioning Software Current CompletedAt**

**Applies to:** All products

** Requires user role:** ADMIN, USER

Shows date and time for when the current software upgrade was completed.

**Value space of the result returned:**

- **String**

**Example:**

```
xStatus Provisioning Software Current CompletedAt
*{ Provisioning Software Current CompletedAt: "2011-06-07T07:20:03Z"
** end
```

**xStatus Provisioning Software Current VersionId**

**Applies to:** All products

** Requires user role:** ADMIN, USER

Shows the version ID of the current software.

**Value space of the result returned:**

- **String**

**Example:**

```
xStatus Provisioning Software Current VersionId
*{ Provisioning Software Current VersionId: "s52020ce8_0_0.pkg"
** end
```
xStatus Provisioning Software UpgradeStatus LastChange

Applies to: All products
Requires user role: ADMIN, USER
Shows the date and time for the latest software upgrade.
Value space of the result returned:
    String
Example:
xStatus Provisioning Software UpgradeStatus LastChange
's Provisioning Software UpgradeStatus LastChange: "2011-06-07T07:20:03Z"
** end

xStatus Provisioning Software UpgradeStatus Message

Applies to: All products
Requires user role: ADMIN, USER
Shows the system message for the software upgrade.
Value space of the result returned:
    String
Example:
xStatus Provisioning Software UpgradeStatus Message
's Provisioning Software UpgradeStatus Message: ""
** end

xStatus Provisioning Software UpgradeStatus Phase

Applies to: All products
Requires user role: ADMIN, USER
Shows the phase of the software upgrade.
Value space of the result returned:
    None/DownloadPending/FormingHierarchy/Downloading/DownloadPaused/DownloadDone/
    Seeding/AboutToInstallUpgrade/Postponed/PeripheralsReady/UpgradingPeripherals/
    Installing/InstallingPeripherals
Example:
xStatus Provisioning Software UpgradeStatus Phase
's Provisioning Software UpgradeStatus Phase: None
** end

xStatus Provisioning Software UpgradeStatus SessionId

Applies to: All products
Requires user role: ADMIN, USER
Shows the ID of the session for the software upgrade.
Value space of the result returned:
    String
Example:
xStatus Provisioning Software UpgradeStatus SessionId
's Provisioning Software UpgradeStatus SessionId: ""
** end
**xStatus Provisioning Software UpgradeStatus Status**

**Applies to:** All products

**Requires user role:** ADMIN, USER

Shows the status of the software upgrade.

Value space of the result returned:

- None
- InProgress
- Failed
- InstallationFailed
- Succeeded

**Example:**
```
xStatus Provisioning Software UpgradeStatus Status
*s Provisioning Software UpgradeStatus Status: None
** end
```

**xStatus Provisioning Software UpgradeStatus Urgency**

**Applies to:** All products

**Requires user role:** ADMIN, USER

Shows how urgently the software needs to be upgraded.

Value space of the result returned:

- Low
- Medium
- Critical

Specifies the urgency of the software upgrade.

**Example:**
```
xStatus Provisioning Software UpgradeStatus Urgency
*s Provisioning Software UpgradeStatus Urgency: Low
** end
```

**xStatus Provisioning Software UpgradeStatus URL**

**Applies to:** All products

**Requires user role:** ADMIN, USER

Shows the URL that the new software currently is being uploaded and installed from.

Value space of the result returned:

- String

**Example:**
```
xStatus Provisioning Software UpgradeStatus URL
*s Provisioning Software UpgradeStatus URL: "http://.../s52020ce8_0_0.pkg"
** end
```

**xStatus Provisioning Software UpgradeStatus VersionId**

**Applies to:** All products

**Requires user role:** ADMIN, USER

Shows the version ID of the software currently being uploaded and installed.

Value space of the result returned:

- String

**Example:**
```
xStatus Provisioning Software UpgradeStatus VersionId
*s Provisioning Software UpgradeStatus VersionId: "s52010ce8_0_0.pkg"
** end
```
**xStatus Provisioning Status**

*Applies to:* All products  
*Requires user role:* ADMIN, USER  

Shows the status of the provisioning.  

Value space of the result returned:

- **Failed**:
  The provisioning failed.
- **AuthenticationFailed**:
  The authentication failed.
- **Provisioned**:
  The endpoint is provisioned.
- **Idle**:
  The provisioning is not active.
- **NeedConfig**:
  The endpoint needs to be configured.
- **ConfigError**:
  An error occurred during configuration.

Example:

```bash
xStatus Provisioning Status  
*s Provisioning Status: Provisioned  
** end
```

**Proximity status**

**xStatus Proximity Services Availability**

*Applies to:* All products  
*Requires user role:* ADMIN, USER  

Shows whether proximity services are available on the endpoint.  

Value space of the result returned:

- **Available**, **Deactivated**, **Disabled**

  - **Available**:
    Proximity mode has been enabled with the command `xConfiguration Proximity Mode` and one or more of the proximity services have been enabled with `xConfiguration Proximity Services` commands.
  - **Deactivated**:
    Proximity services have been deactivated with the command `xCommand Proximity Services Deactivate`.
  - **Disabled**:
    Proximity mode has been disabled with `xConfiguration Proximity Mode`, or none of the services have been enabled with the `xConfiguration Proximity Services` commands.

Example:

```bash
xStatus Proximity Services Availability  
*s Proximity Services Availability: Disabled  
** end
```
RoomAnalytics status

xStatus RoomAnalytics AmbientNoise Level dBA

**Applies to:** RoomKit  RoomKitMini  CodecPlus  CodecPro  Room55  Room70/Room55D  Room70G2

Requires user role: ADMIN, INTEGRATOR, USER

The video system can be set up to estimate the stationary ambient noise level in the room (refer to the RoomAnalytics AmbientNoiseEstimation Mode setting). The result is reported in this status.

The value is an A-weighted decibel value (dBA). The value is only a relative value and should not be treated as an absolute SPL (Sound Pressure Level) value. Especially not for third-party microphones that the video system doesn't know the sensitivity of.

Value space of the result returned:

```
Integer
```

Example:
```
xStatus RoomAnalytics AmbientNoise Level dBA
*s RoomAnalytics AmbientNoise Level dBA: 30
** end
```

xStatus RoomAnalytics PeopleCount Current

**Applies to:** SX80  RoomKit  RoomKitMini  CodecPlus  CodecPro  Room55  Room70/Room55D  Room70G2

Requires user role: ADMIN, INTEGRATOR, USER

Shows the amount of people who are in the room by use of face detection. The call must have a duration of minimum two minutes in order to get a reliable average. Persons that have not faced the camera will not be counted. If there are objects or pictures in the room that can be detected as faces, these might be counted. The video system will not keep record of who was in the room, only the average number of faces that were detected. When the system is in standby, or if the feature is turned off, the number returned is -1.

For SX80 and Codec Plus, this status only applies if you have a Cisco Quad Camera.

Value space of the result returned:

```
Integer
```

Example:
```
xStatus RoomAnalytics PeopleCount Current
*s RoomAnalytics PeopleCount Current: 2
** end
```

xStatus RoomAnalytics PeoplePresence

**Applies to:** SX20  SX80  MX200G2/MX300G2  MX700/MX800/MX800D  RoomKit  RoomKitMini  CodecPlus  CodecPro  Room55  Room70/Room55D  Room70G2

Requires user role: ADMIN, INTEGRATOR, USER

Shows if there are people present in the room or not. It takes a minimum of two minutes to detect whether people are present or not in the room. After the room gets vacant, it may take up to two minutes for the status to change. This feature is based on ultrasound. The video system will not keep record of who was in the room, only whether or not there are people present in the room.

Value space of the result returned:

```
Yes/No/Unknown
```

Example:
```
xStatus RoomAnalytics PeoplePresence
*s RoomAnalytics PeoplePresence: No
** end
```
RoomPreset status

xStatus RoomPreset

Applies to: SX10  SX20  SX80  MX200G2/MX300G2  MX700/MX800/MX800D  RoomKit  RoomKitMini  CodecPlus
CodecPro  Room55  Room70/Room55D  Room70G2

Requires user role: ADMIN, USER

Shows the top level overview of the camera presets status.

xStatus RoomPreset [n] Defined

Applies to: SX10  SX20  SX80  MX200G2/MX300G2  MX700/MX800/MX800D  RoomKit  RoomKitMini  CodecPlus
CodecPro  Room55  Room70/Room55D  Room70G2

Requires user role: ADMIN, USER

Shows if a camera preset is stored at this position.

Value space of the result returned:
True/False

Example:
*xStatus RoomPreset 1 Defined
's RoomPreset 1 Defined: True
** end

xStatus RoomPreset [n] Description

Applies to: SX10  SX20  SX80  MX200G2/MX300G2  MX700/MX800/MX800D  RoomKit  RoomKitMini  CodecPlus
CodecPro  Room55  Room70/Room55D  Room70G2

Requires user role: ADMIN, USER

Lists the configured name for the specific preset.

Value space of the result returned:
String

Example:
*xStatus RoomPreset 1 Description
's RoomPreset 1 Description: "Zoom in"
** end

xStatus RoomPreset [n] Type

Applies to: SX10  SX20  SX80  MX200G2/MX300G2  MX700/MX800/MX800D  RoomKit  RoomKitMini  CodecPlus
CodecPro  Room55  Room70/Room55D  Room70G2

Requires user role: ADMIN, USER

Shows the camera preset type.

Value space of the result returned:
All/Camera

Example:
*xStatus RoomPreset 1 Type
's RoomPreset 1 Type: All
** end
Security status

xStatus Security FIPS Mode
Applies to: All products
Requires user role: ADMIN, USER
Shows the FIPS mode status.
Value space of the result returned:
  On/Off
Example:
xStatus Security FIPS Mode
  *s Security FIPS Mode: Off
  ** end

xStatus Security Persistency CallHistory
Applies to: All products
Requires user role: ADMIN, USER
Shows whether call history logging is set to persistent or non-persistent mode. Persistent is the default mode.
Value space of the result returned:
  NonPersistent/Persistent
Example:
xStatus Security Persistency CallHistory
  *s Security Persistency CallHistory: Persistent
  ** end

xStatus Security Persistency Configurations
Applies to: All products
Requires user role: ADMIN, USER
Shows whether the systems all configurations are set to persistent or non-persistent mode. Persistent is the default mode.
Value space of the result returned:
  NonPersistent/Persistent
Example:
xStatus Security Persistency Configurations
  *s Security Persistency Configurations: Persistent
  ** end

xStatus Security Persistency DHCP
Applies to: All products
Requires user role: ADMIN, USER
Shows whether DHCP logging is set to persistent or non-persistent mode. Persistent is the default mode.
Value space of the result returned:
  NonPersistent/Persistent
Example:
xStatus Security Persistency DHCP
  *s Security Persistency DHCP: Persistent
  ** end
xStatus Security Persistency InternalLogging

Applies to: All products
Requires user role: ADMIN, USER

Shows whether internal logging is set to persistent or non-persistent mode. Persistent is the default mode.

Value space of the result returned:

   NonPersistent/Persistent

Example:

   xStatus Security Persistency InternalLogging
   *s Security Persistency InternalLogging: Persistent
   ** end

xStatus Security Persistency LocalPhonebook

Applies to: All products
Requires user role: ADMIN, USER

Shows whether local phone book is set to persistent or non-persistent mode. Persistent is the default mode.

Value space of the result returned:

   NonPersistent/Persistent

Example:

   xStatus Security Persistency LocalPhonebook
   *s Security Persistency LocalPhonebook: Persistent
   ** end

SIP status

xStatus SIP AlternateURI Alias [n] URI

Applies to: All products
Requires user role: ADMIN, USER

Value space of the result returned:

   String

Example:

   xStatus SIP AlternateURI Alias
   *s SIP AlternateURI Alias URI: ""
   ** end

xStatus SIP AlternateURI Primary [n] URI

Applies to: All products
Requires user role: ADMIN, USER

Value space of the result returned:

   String

Example:

   xStatus SIP AlternateURI Primary
   *s SIP AlternateURI Primary URI: ""
   ** end
xStatus SIP Authentication

Applies to: All products
Requires user role: ADMIN, USER

Shows which authentication mechanism is used when registering to the SIP Proxy Server.

Value space of the result returned:

- **Digest/Off**
  - **Digest**: Uses the Digest access authentication method, as specified by RFC 2069.
  - **Off**: No authentication mechanism is used.

Example:
```
xStatus SIP Authentication
's SIP Authentication: Off
** end
```

xStatus SIP CallForward DisplayName

Applies to: All products
Requires user role: ADMIN, USER

Returns the URI that is displayed on the user interface for the forwarded call.

Value space of the result returned:

- **String**

Example:
```
xStatus SIP CallForward DisplayName
's SIP CallForward DisplayName: ""
** end
```

xStatus SIP CallForward Mode

Applies to: All products
Requires user role: ADMIN, USER

Indicates whether the call forward mode for SIP is set to on or off.

Value space of the result returned:

- **On/Off**

Example:
```
xStatus SIP CallForward Mode
's SIP CallForward Mode: Off
** end
```

xStatus SIP CallForward URI

Applies to: All products
Requires user role: ADMIN, USER

Indicates the address the incoming calls are directed to when call forward mode is set on.

Value space of the result returned:

- **String**

Example:
```
xStatus SIP CallForward URI
's SIP CallForward URI: ""
** end
```
xStatus SIP Mailbox MessagesWaiting
Applies to: All products
Requires user role: ADMIN, USER
Indicates how many new messages are in the mailbox.
Value space of the result returned:
  \textit{Integer}
Example:
xStatus SIP Mailbox MessagesWaiting
  *s SIP Mailbox MessagesWaiting: 0
  ** end

xStatus SIP Mailbox URI
Applies to: All products
Requires user role: ADMIN, USER
Returns the URI for your SIP mailbox.
Value space of the result returned:
  \textit{String}
Example:
xStatus SIP Mailbox URI
  *s SIP Mailbox URI: "12345678"
  ** end

xStatus SIP Proxy \([n]\) Address
Applies to: All products
Requires user role: ADMIN, USER
Shows the address of the SIP Proxy that the system communicates with.
Value space of the result returned:
  \textit{String}
Example:
xStatus SIP Proxy 1 Address
  *s SIP Proxy 1 Address: "192.0.2.50"
  ** end

xStatus SIP Proxy \([n]\) Status
Applies to: All products
Requires user role: ADMIN, USER
Shows the status of the communication between the endpoint and the SIP Proxy server.
Value space of the result returned:
  \textit{Active/DNSFailed/Off/Timeout/UnableTCP/UnableTLS/Unknown/AuthenticationFailed}
  
  \textbf{Active:} The communication between the endpoint and the SIP Proxy is active.
  
  \textbf{DNSFailed:} The attempt to establish communication to the DNS server failed.
  
  \textbf{Off:} There is no communication between the endpoint and the SIP Proxy.
  
  \textbf{Timeout:} The attempt to establish communication to the SIP Proxy timed out.
  
  \textbf{UnableTCP:} The system is unable to use TCP as the transport method.
  
  \textbf{UnableTLS:} The system is unable to use TLS as the transport method.
  
  \textbf{Unknown:} The status of the communication is not known.
  
  \textbf{AuthenticationFailed:} Wrong user name or password.
Example:
xStatus SIP Proxy 1 Status
  *s SIP Proxy 1 Status: Active
  ** end
xStatus SIP Registration [n] Authentication

Applies to: All products
Requires user role: ADMIN, USER

Shows which authentication mechanism is used when registering to the SIP Proxy Server.

Value space of the result returned:

- **Digest/Off**
  - **Digest**: Uses the Digest access authentication method, as specified by RFC 2069.
  - **Off**: No authentication mechanism is used.

Example:
```
xStatus SIP Registration 1 Authentication
's SIP Registration 1 Authentication: Off
** end
```

xStatus SIP Registration [n] Reason

Applies to: All products
Requires user role: ADMIN, USER

Shows a message to explain the reason why the SIP registration failed.

Value space of the result returned:

- **String**

Example:
```
xStatus SIP Registration 1 Reason
's SIP Registration 1 Reason: "404 Not Found"
** end
```

xStatus SIP Registration [n] Status

Applies to: All products
Requires user role: ADMIN, USER

Shows the status of the registration to the SIP Proxy Server.

Value space of the result returned:

- **Deregister/Failed/Inactive/Registered/Registering**
  - **Deregister**: The system is in the process of de-registering to the SIP Proxy.
  - **Failed**: The system failed to register to the SIP Proxy.
  - **Inactive**: The system is not registered to any SIP Proxy.
  - **Registered**: The system is registered to the SIP Proxy.
  - **Registering**: The system is in the process of registering to the SIP Proxy.

Example:
```
xStatus SIP Registration 1 Status
's SIP Registration 1 Status: Registered
** end
```

xStatus SIP Registration [n] URI

Applies to: All products
Requires user role: ADMIN, USER

Shows the URI used for registration to the SIP Proxy server.

Value space of the result returned:

- **String**

Example:
```
xStatus SIP Registration 1 URI
's SIP Registration 1 URI: "firstname.lastname@company.com"
** end
```
xStatus SIP Secure
Applies to: All products
Requires user role: ADMIN, USER
Shows the encryption status of the signaling with the SIP Proxy server.
Value space of the result returned:
  True/False
Example:
xStatus SIP Secure
  *s SIP Secure: True
  ** end

xStatus SIP Verified
Applies to: All products
Requires user role: ADMIN, USER
Shows whether or not the SSL certificate of the server that the video system / codec tries to register to is included in the codec's trusted CA-list. The server is typically a Cisco VCS or CUCM.
Value space of the result returned:
  True/False
  True: The server's SIP certificate is checked against the trusted CA-list on the codec and found valid. Additionally, the fully qualified domain name of the server matches the valid certificate.
  False: A TLS connection is not set up because the SIP certificate verification failed or the domain name did not match. Note that the status also returns False when TLS is not used (xConfiguration SIP DefaultTransport not set to TLS) or certificate verification is switched off (SIP TlsVerify: Off. This setting is accessible through your products web interface).
Example:
xStatus SIP Verified
  *s SIP Verified: False
  ** end

Standby status

xStatus Standby PowerSave State
Applies to: MX700/MX800/MX800D
Requires user role: ADMIN, USER
Shows whether the system is in power save mode or not.
Value space of the result returned:
  Active/Deactivating/Unavailable/Inactive/Disabled
  Active: It is out-of-office hours, so the video system is in power save mode.
  Deactivating: The video system is in the process of waking up from power save mode.
  Inactive: It is regular working hours, so the video system is not in power save mode.
  Disabled: The video system is configured not to use power save mode.
Example:
xStatus Standby PowerSave State
  *s Standby PowerSave State: Inactive
  ** end
xStatus Standby State
Applies to: All products
Requires user role: ADMIN, INTEGRATOR, USER, ROOMCONTROL

Shows whether the system is in standby mode or not.
Value space of the result returned:
- **Standby/EnteringStandby/Halfwake/Off**
  - **Standby**: The system is in standby state.
  - **EnteringStandby**: The system is entering the standby state.
  - **Halfwake**: The system is in standby, but greets the user when presence is detected by motion or the Proximity pairing app. Not applicable for DX70.
  - **Off**: The system is not in standby.

Example:
```
xStatus Standby State
*s Standby State: Off
** end
```

---

SystemUnit status

xStatus SystemUnit Hardware Module CompatibilityLevel
Applies to: All products
Requires user role: ADMIN, USER

The Cisco TelePresence endpoints are using a NAND flash memory for general storage. The endpoints running TC software are manufactured with a new version of the flash memory. Endpoints having the new version of the flash memory must run software TC4.2.1 or later. Some previous TC software versions are updated to support the new flash memory. Please check the release note to find if the new version of the flash memory is supported. If your endpoint does not have the CompatibilityLevel command it does not have the new flash memory installed.

Value space of the result returned:
- 1/0
  - 0 = The system does not have the new flash memory installed.
  - 1 = The system has the new flash memory installed. If downgraded, it can only be downgraded to previous TC software versions having support for the new version of the flash memory.

Example:
```
xStatus SystemUnit Hardware Module CompatibilityLevel
*s SystemUnit Hardware Module CompatibilityLevel: 1
** end
```

xStatus SystemUnit Hardware Module SerialNumber
Applies to: All products
Requires user role: ADMIN, USER

Shows the serial number of the hardware module in the codec.
Value space of the result returned:
- **String**

Example:
```
xStatus SystemUnit Hardware Module SerialNumber
*s SystemUnit Hardware MainBoard SerialNumber: "FOC99999999"
** end
```
xStatus SystemUnit Hardware Monitoring Fan [n] Status
Applies to: All products
Requires user role: ADMIN, USER
The feedback shows the speed (rpm) for the specified fan.
Value space of the result returned:
   String
Example:
   xStatus SystemUnit Hardware Monitoring Fan 1 Status
   *s SystemUnit Hardware Monitoring Fan 1 Status: "locked on 1096 rpm"
   ** end

xStatus SystemUnit Hardware Temperature
Applies to: DX70/DX80 SX10 SX20 SX80 MX200G2/MX300G2 MX700/MX800/MX800D
Requires user role: ADMIN, USER
Shows the current maximum temperature (degree Celsius) measured in the codec/system.
Value space of the result returned:
   String
Example:
   xStatus SystemUnit Hardware Temperature
   *s SystemUnit Hardware Temperature: "64.0"
   ** end

xStatus SystemUnit Hardware TemperatureThreshold
Applies to: DX70/DX80 SX10 SX20 SX80 MX200G2/MX300G2 MX700/MX800/MX800D
Requires user role: ADMIN, USER
Returns information on the maximum temperature for the codec. If this temperature is exceeded the system automatically shuts down.
Value space of the result returned:
   String
Example:
   xStatus SystemUnit Hardware TemperatureThreshold
   *s SystemUnit Hardware TemperatureThreshold: "85"
   ** end

xStatus SystemUnit Notifications Notification [n] Text
Applies to: All products
Requires user role: ADMIN, USER
Lists text related to important system notifications. Notifications are issued e.g. when a system was rebooted because of a software upgrade, or when a factory reset has been performed.
All the notifications can be removed from the list by issuing the xCommand SystemUnit Notifications RemoveAll command.
Value space of the result returned:
   String
Example:
   xStatus SystemUnit Notifications Notification 1 Text
   *s SystemUnit Notifications Notification 1 Text: "OK"
   ** end
**xStatus SystemUnit Notifications Notification [n] Type**

*Applies to: All products*

*Requires user role: ADMIN, USER*

Lists the system notification types. Notifications are issued e.g. when a system is rebooted because of a software upgrade, or when a factory reset is performed. All the notifications can be removed from the list by issuing the `xCommand SystemUnit Notifications RemoveAll` command.

Value space of the result returned:

- **FactoryResetOK**/FactoryResetFailed/SoftwareUpgradeOK/SoftwareUpgradeFailed/RebootRequired/Other
  - **FactoryResetOK**: This value is returned after a successful factory reset.
  - **FactoryResetFailed**: This value is returned after a failed factory reset attempt.
  - **SoftwareUpgradeOK**: This value is returned after a successful software upgrade.
  - **SoftwareUpgradeFailed**: This value is returned after a failed software upgrade attempt.
  - **RebootRequired**: This value is returned when a reboot is required.
  - **Other**: This value is returned for any other notifications.

Example:
```
xStatus SystemUnit Notifications Notification 1 Type
  >s SystemUnit Notifications Notification 1 Type: SoftwareUpgradeOK
** end
```

**xStatus SystemUnit ProductId**

*Applies to: All products*

*Requires user role: ADMIN, USER*

Shows the product identity.

Value space of the result returned:

- **String**

Example:
```
xStatus SystemUnit ProductId
  >s SystemUnit ProductId: "Cisco TelePresence Codec SX80"
** end
```

**xStatus SystemUnit ProductPlatform**

*Applies to: All products*

*Requires user role: ADMIN, USER*

Shows the product platform.

Value space of the result returned:

- **String**

Example:
```
xStatus SystemUnit ProductPlatform
  >s SystemUnit ProductPlatform: "SX80"
** end
```

**xStatus SystemUnit ProductType**

*Applies to: All products*

*Requires user role: ADMIN, USER*

Shows the product type.

Value space of the result returned:

- **String**

Example:
```
xStatus SystemUnit ProductType
  >s SystemUnit ProductType: "Cisco Codec"
** end
```
xStatus SystemUnit Software DisplayName

Applies to: All products
Requires user role: ADMIN, USER

Shows the name of the software that is installed on the codec, as it is displayed in the UI.

Value space of the result returned:

String

Example:
```
xStatus SystemUnit Software DisplayName
's SystemUnit Software DisplayName: "Display Name"
** end
```

xStatus SystemUnit Software Name

Applies to: All products
Requires user role: ADMIN, USER

Shows the name of the software that is installed on the codec.

Value space of the result returned:

String

Example:
```
xStatus SystemUnit Software Name
's SystemUnit Software Name: "s53200"
** end
```

xStatus SystemUnit Software OptionKeys Encryption

Applies to: All products
Requires user role: ADMIN, USER

Shows if the system has the option key or the software installed that supports the encryption functionality. The option key is available for SX10, SX80, and the MX series.

Value space of the result returned:

False/True

Example:
```
xStatus SystemUnit Software OptionKeys Encryption
's SystemUnit Software OptionKeys Encryption: "true"
** end
```

xStatus SystemUnit Software OptionKeys MultiSite

Applies to: All products
Requires user role: ADMIN, USER

Shows if the system has the option key installed that supports the MultiSite functionality.

Value space of the result returned:

False/True/NotApplicable

Example:
```
xStatus SystemUnit Software OptionKeys MultiSite
's SystemUnit Software OptionKeys MultiSite: "true"
** end
```
xStatus SystemUnit Software OptionKeys RemoteMonitoring

Applies to: All products
Requires user role: ADMIN, USER

Shows whether the system has the remote monitoring option key installed. Remote monitoring option key enables snapshots from the web interface, and from a remote paired Touch 10.

Value space of the result returned:

False/True

Example:
```
xStatus SystemUnit Software OptionKeys RemoteMonitoring
*s SystemUnit Software OptionKeys RemoteMonitoring: "true"
** end
```

xStatus SystemUnit Software ReleaseDate

Applies to: All products
Requires user role: ADMIN, USER

Shows the release date of the software installed on the codec.

Value space of the result returned:

String

Example:
```
xStatus SystemUnit Software ReleaseDate
*s SystemUnit Software ReleaseDate: "2015-05-05"
** end
```

xStatus SystemUnit State NumberOfActiveCalls

Applies to: All products
Requires user role: ADMIN, INTEGRATOR, USER, ROOMCONTROL

Shows the number of active calls.

Value space of the result returned:

0..5

Example:
```
xStatus SystemUnit State NumberOfActiveCalls
*s SystemUnit State NumberOfActiveCalls: 0
** end
```
**xStatus SystemUnit State NumberOfInProgressCalls**

*Applies to: All products*
*Requires user role: ADMIN, INTEGRATOR, USER, ROOMCONTROL*

Shows the number of calls in progress.

Value space of the result returned:

```
0..5
```

Example:
```
xStatus SystemUnit State NumberOfInProgressCalls
`s SystemUnit State NumberOfInProgressCalls: 0
** end
```

**xStatus SystemUnit State NumberOfSuspendedCalls**

*Applies to: All products*
*Requires user role: ADMIN, USER*

Shows the number of suspended calls.

Value space of the result returned:

```
0..5
```

Example:
```
xStatus SystemUnit State NumberOfSuspendedCalls
`s SystemUnit State NumberOfSuspendedCalls: 0
** end
```

**xStatus SystemUnit Uptime**

*Applies to: All products*
*Requires user role: ADMIN, USER*

Shows the number of seconds since the last restart of the codec.

Value space of the result returned:

```
Integer
```

Example:
```
xStatus SystemUnit Uptime
`s SystemUnit Uptime: 597095
** end
```
Time status

**xStatus Time SystemTime**

*Applies to: All products*

Requires user role: ADMIN, INTEGRATOR, USER

Returns the date and time set on the system.

Value space of the result returned:

*String*

Example:

```
xStatus Time SystemTime
*s Time SystemTime: "2014-04-25T10:04:03Z"
** end
```

UserInterface status

**xStatus UserInterface ContactInfo ContactMethod [n] Number**

*Applies to: All products*

Requires user role: ADMIN, USER

Returns the system's active contact information. This address is used to reach this endpoint.

Value space of the result returned:

*String*

Example:

```
xStatus UserInterface ContactInfo ContactMethod Number
*s UserInterface ContactInfo ContactMethod 1 Number: "12345678"
** end
```

**xStatus UserInterface ContactInfo Name**

*Applies to: All products*

Requires user role: ADMIN, USER

Returns the system's active contact name. The result depends on which protocol, if any, the system is registered on. The automatically set contact name may have been overridden with the command xConfiguration UserInterface ContactInfo Type. This results in a diagnostics warning about contact mismatch.

Value space of the result returned:

*String*

Example:

```
xStatus UserInterface ContactInfo Name
*s UserInterface ContactInfo Name: "MySystem"
** end
```
**xStatus UserInterface Extensions Widget [n] Value**

**Applies to:** All products  
**Requires user role:** ADMIN, INTEGRATOR, USER, ROOMCONTROL  

Returns the value for a widget. Widgets are used in custom panels, for example in-room controls, that are added to the user interface. The value space depends on the widget type. The value is an empty string until a value is set with the UserInterface Extensions Widget SetValue command.  

Value space of the result returned:  
---  
**String**  

Example:  
```  
UserInterface Extensions Value  
's UserInterface Extensions Widget 1 Value: "on"  
's UserInterface Extensions Widget 2 Value: "255"  
's UserInterface Extensions Widget 3 Value: "Blinds"  
's UserInterface Extensions Widget 4 Value: "inactive"  
's UserInterface Extensions Widget 5 Value: "2"  
's UserInterface Extensions Widget 6 Value: "Projector is ready"  
** end */
```

---

**xStatus UserInterface Extensions Widget [n] WidgetId**

**Applies to:** All products  
**Requires user role:** ADMIN, INTEGRATOR, USER, ROOMCONTROL  

Returns the unique identifier for a widget. Widgets are used in custom panels, for example in-room controls, that are added to the user interface.  

Value space of the result returned:  
---  
**String**  

Example:  
```  
UserInterface Extensions WidgetId  
's UserInterface Extensions Widget 1 WidgetId: "togglebutton"  
's UserInterface Extensions Widget 2 WidgetId: "slider"  
's UserInterface Extensions Widget 3 WidgetId: "spinner"  
's UserInterface Extensions Widget 4 WidgetId: "button"  
's UserInterface Extensions Widget 5 WidgetId: "groupbutton"  
's UserInterface Extensions Widget 6 WidgetId: "textfield"  
** end */
```

---

**xStatus UserInterface Features Call End**

**Applies to:** All products  
**Requires user role:** ADMIN, INTEGRATOR  

This status reports whether or not the default End call button is removed from the user interface.  

Value space of the result returned:  
---  
**Visible/Hidden**  
**Visible:** The default button is in the user interface.  
**Hidden:** The default button is removed from the user interface.  

Example:  
```  
xStatus UserInterface Features Call End  
's UserInterface Features Call End: Visible  
** end */
```
xStatus UserInterface Features MidCallControls

**Applies to:** All products
**Requires user role:** ADMIN, INTEGRATOR

This status reports whether or not the default Hold, Transfer, and Resume in-call buttons are removed from the user interface.

**Value space of the result returned:**

Visible/Hidden

Visible: The default button is in the user interface.

Hidden: The default button is removed from the user interface.

**Example:**

```text
xStatus UserInterface Features MidCallControls
's UserInterface Features MidCallControls: Visible
** end
```

---

xStatus UserInterface Features Share Start

**Applies to:** All products
**Requires user role:** ADMIN, INTEGRATOR

This status reports whether or not the default buttons and other UI elements for sharing and previewing content, both in call and out of call, are removed from the user interface.

**Value space of the result returned:**

Visible/Hidden

Visible: The default button is in the user interface.

Hidden: The default button is removed from the user interface.

**Example:**

```text
xStatus UserInterface Features Share Start
's UserInterface Features Share Start: Visible
** end
```

---

xStatus UserInterface Features Whiteboard Start

**Applies to:** DX70/DX80
**Requires user role:** ADMIN, INTEGRATOR

This status reports whether or not the default Whiteboard button is removed from the user interface.

**Value space of the result returned:**

Visible/Hidden

Visible: The default button is in the user interface.

Hidden: The default button is removed from the user interface.

**Example:**

```text
xStatus UserInterface Features Whiteboard Start
's UserInterface Features Whiteboard Start: Visible
** end
```
**xStatus UserInterface SettingsMenu Visibility**

**Applies to:** *All products*

**Requires user role:** ADMIN, INTEGRATOR

This status reports whether or not the system name (or contact information) in the upper left corner of the user interface, and the associated drop down menu and Settings panel, are shown in the user interface.

**Value space of the result returned:**

- **Visible/Hidden**
  - **Visible:** The system name with drop down menu and Settings panel is shown in the upper left corner of the user interface.
  - **Hidden:** The system name with drop down menu and Settings panel is not shown.

**Example:**

```
xStatus UserInterface SettingsMenu Visibility
's UserInterface SettingsMenu Visibility: Visible
** end
```

**Video status**

**xStatus Video ActiveSpeaker PIPPosition**

**Applies to:** *All products*

**Requires user role:** ADMIN, INTEGRATOR, USER

Shows the position of the active speaker’s image on the screen.

**Value space of the result returned:**

- UpperLeft/UpperCenter/UpperRight/CenterLeft/CenterRight/LowerLeft/LowerRight

**Example:**

```
xStatus Video ActiveSpeaker PIPPosition
's Video PIP ActiveSpeaker Position: UpperCenter
** end
```

**xStatus Video Input Connector [n] Connected**

**Applies to:** *All products*

**Requires user role:** ADMIN, INTEGRATOR, USER

Shows whether is something is connected to the specified connector. Not all connections can be detected.

**Value space of the result returned:**

- False/True/Unknown

**Example:**

```
xStatus Video Input Connector 1 Connected
's Video Input Connector 1 Connected: True
** end
```
xStatus Video Input Connector \([n]\) ConnectedDevice CEC \([n]\) DeviceType

**Applies to:** RoomKit, RoomKitMini, CodecPlus, CodecPro, Room55, Room70/Room55D, Room70G2

**Requires user role:** ADMIN, INTEGRATOR, USER

Shows what type of input device is connected.

Value space of the result returned:

* String

**Example:**
xStatus Video Input Connector 2 ConnectedDevice CEC 5 DeviceType
's Video Input Connector 2 ConnectedDevice CEC 5 DeviceType: "Playback"
** end

xStatus Video Input Connector \([n]\) ConnectedDevice CEC \([n]\) LogicalAddress

**Applies to:** RoomKit, RoomKitMini, CodecPlus, CodecPro, Room55, Room70/Room55D, Room70G2

**Requires user role:** ADMIN, INTEGRATOR, USER

Shows the CEC logical address of the connected input device. The address is fixed at 0.

Value space of the result returned:

* Integer

**Example:**
xStatus Video Input Connector 1 ConnectedDevice CEC 1 LogicalAddress
's Video Input Connector 1 ConnectedDevice CEC 1 LogicalAddress: 0
** end

xStatus Video Input Connector \([n]\) ConnectedDevice CEC \([n]\) Name

**Applies to:** RoomKit, RoomKitMini, CodecPlus, CodecPro, Room55, Room70/Room55D, Room70G2

**Requires user role:** ADMIN, INTEGRATOR, USER

Shows the name of the connected input device.

Value space of the result returned:

* String

**Example:**
xStatus Video Input Connector 2 ConnectedDevice CEC 5 Name
's Video Input Connector 2 ConnectedDevice CEC 5 Name: "Device-2"
** end

xStatus Video Input Connector \([n]\) ConnectedDevice CEC \([n]\) PowerStatus

**Applies to:** RoomKit, RoomKitMini, CodecPlus, CodecPro, Room55, Room70/Room55D, Room70G2

**Requires user role:** ADMIN, INTEGRATOR, USER

Shows the state of the CEC enabled device connected to the HDMI input.

Value space of the result returned:

* String

**Example:**
xStatus Video Input Connector 2 ConnectedDevice CEC 5 PowerStatus
's Video Input Connector 2 ConnectedDevice CEC 5 PowerStatus: "Standby"
** end
**xStatus Video Input Connector [n] ConnectedDevice CEC [n] VendorId**

Applies to: RoomKit, RoomKitMini, CodecPlus, CodecPro, Room55, Room70/Room55D, Room70G2

Requires user role: ADMIN, INTEGRATOR, USER

Shows the vendor ID for the connected input device.

Value space of the result returned:

*String*

Example:

```
xStatus Video Input Connector 2 ConnectedDevice CEC 5 VendorId
*s Video Input Connector 2 ConnectedDevice CEC 5 VendorId: "20576"
** end
```

---

**xStatus Video Input Connector [n] SignalState**

Applies to: All products

Requires user role: ADMIN, INTEGRATOR, USER

Shows the signal state for the specified input.

Value space of the result returned:

*OK/Unknown/Unsupported*

  *Unknown*: The signal format is unknown.
  *OK*: A signal is detected and the signal format is supported.
  *Unsupported*: A signal is detected, but the signal format is not supported.

Example:

```
xStatus Video Input Connector 1 SignalState
*s Video Input Connector 1 SignalState: OK
** end
```

---

**xStatus Video Input Connector [n] SourceId**

Applies to: All products

Requires user role: ADMIN, INTEGRATOR, USER

Shows the identifier of the input source that the connector is associated with.

Value space of the result returned:

*Integer*

Example:

```
xStatus Video Input Connector 1 SourceId
*s Video Input Connector 1 SourceId: 1
** end
```

---

**xStatus Video Input Connector [n] Type**

Applies to: All products

Requires user role: ADMIN, INTEGRATOR, USER

Shows which connector type it is.

Value space of the result returned:

*Camera/Composite/DVI/3G-SDI/HD-SDI/HDMI/USB/Unknown/VGA/YCpbPr/USBC-DP*

Example:

```
xStatus Video Input Connector 1 Type
*s Video Input Connector 1 Type: HDMI
** end
```
xStatus Video Input MainVideoMute
Applies to: All products
Requires user role: ADMIN, INTEGRATOR, USER
Indicates whether sending of main video has been stopped by using the Video Input MainVideo Mute command (or, if available, the "Turn video off" button on the user interface).
Value space of the result returned:
- **On/Off**
  - **On**: Video has been stopped.
  - **Off**: Video has not been stopped.
Example:
```
xStatus Video Input MainVideoMute
*s Video Input MainVideoMute: Off
** end
```

xStatus Video Input MainVideoSource
Applies to: All products
Requires user role: ADMIN, USER
Returns the local video input currently used as the main source. The value Composed is returned if the main source is composed of more than one local input. The default main video source is set with the xConfiguration Video DefaultMainSource command. It can be changed using xCommand Video Input SetMainVideoSource (this command is not applicable to SX10, DX70, and DX80).
Value space of the result returned:
- **1/2/3/4/5/6/Composed**
Example:
```
xStatus Video Input MainVideoSource
*s Video Input MainVideoSource: 1
** end
```

xStatus Video Input Source [n] ConnectorId
Applies to: All products
Requires user role: ADMIN, INTEGRATOR, USER
Shows the identifier of the connector that is associated with the input source.
Value space of the result returned:
- **Integer**
Example:
```
xStatus Video Input Source 1 ConnectorId
*s Video Input Source 1 ConnectorId: 1
** end
```

xStatus Video Input Source [n] FormatStatus
Applies to: All products
Requires user role: ADMIN, INTEGRATOR, USER
Shows the resolution format status for the video input source.
Value space of the result returned:
- **Ok/OutOfRange/NotFound/Interlaced/Error/Unknown**
Example:
```
xStatus Video Input Source 1 FormatStatus
*s Video Input Source 1 Resolution FormatStatus: Ok
** end
```
xStatus Video Input Source [n] FormatType
Applies to: All products
Requires user role: ADMIN, INTEGRATOR, USER
Shows the resolution format type for the video input source.
Value space of the result returned:
Unknown/AnalogCVTBlanking/AnalogCVTReducedBlanking/AnalogGTFDefault/
AnalogGTFSecondary/AnalogDiscreteTiming/AnalogDMTBlanking/AnalogCEABlanking/Digital

Example:
xStatus Video Input Source 1 FormatType
*s Video Input Source 1 Resolution FormatType: Digital
** end

xStatus Video Input Source [n] MediaChannelId
Applies to: All products
Requires user role: ADMIN, USER
For internal use only.
Value space of the result returned:
Integer

Example:
xStatus Video Input Source MediaChannelId
*s Video Input Source 1 MediaChannelId: 2
*s Video Input Source 2 MediaChannelId: 3
** end

xStatus Video Input Source [n] Resolution Height
Applies to: All products
Requires user role: ADMIN, INTEGRATOR, USER
Shows the resolution height (in pixels) for the video input source.
Value space of the result returned:
0..3000

Example:
xStatus Video Input Source 1 Resolution Height
*s Video Input Source 1 Resolution Height: 1080
** end

xStatus Video Input Source [n] Resolution RefreshRate
Applies to: All products
Requires user role: ADMIN, INTEGRATOR, USER
Shows the resolution refresh rate (Hz) for the video input source.
Value space of the result returned:
0..300

Example:
xStatus Video Input Source 1 Resolution RefreshRate
*s Video Input Source 1 Resolution RefreshRate: 50
** end
xStatus Video Input Source \([n]\) Resolution Width

**Applies to:** All products

**Requires user role:** ADMIN, INTEGRATOR, USER

Shows the resolution width (in pixels) for the video input source.

**Value space of the result returned:**

0..4000

**Example:**

```plaintext
xStatus Video Input Source 1 Resolution Width
's Video Input Source 1 Resolution Width: 1920
** end
```

xStatus Video Layout LayoutFamily Local

**Applies to:** All products

**Requires user role:** ADMIN, USER

Shows the local screen layout family.

**Value space of the result returned:**

String

**Example:**

```plaintext
xStatus Video Layout LayoutFamily Local
's Video Layout LayoutFamily Local: "equal"
** end
```

xStatus Video Monitors

**Applies to:** All products

**Requires user role:** ADMIN, USER

Returns the monitor layout mode.

**Value space of the result returned:**

Single/Dual/DualPresentationOnly/Triple/TriplePresentationOnly

- **Single:** The same layout is shown on all monitors.
- **Dual:** The layout is distributed on two monitors.
- **DualPresentationOnly:** All participants in the call will be shown on the first monitor, while the presentation (if any) will be shown on the second monitor.
- **Triple:** The layout is distributed on three monitors.
- **TriplePresentationOnly:** All participants in the call will be shown on the first and second monitors, while the presentation (if any) will be shown on the third monitor.

**Example:**

```plaintext
xStatus Video Monitors
's Video Monitors: Single
** end
```
### xStatus Video Output Connector [n] Connected

**Applies to:** All products

**Requires user role:** ADMIN, INTEGRATOR, USER

Describes whether a device (for example a display) is connected to the output connector or not. When a display enters standby mode, the endpoint may not be able to detect it. The connector status will then return False/Unknown even if the display is physically connected.

**Value space of the result returned:**

- **True/False**
  - **True:** A device is connected to the video output connector.
  - **False:** Nothing is connected to the video output connector.

**Example:**
```
xStatus Video Output Connector 1 Connected
*s Video Output Connector 1 Connected: True  
** end
```

### xStatus Video Output Connector [n] ConnectedDevice CEC [n] DeviceType

**Applies to:** All products

**Requires user role:** ADMIN, INTEGRATOR, USER

Shows the type of CEC enabled device connected to the HDMI output the codec has detected. This information is only available when the device connected to the HDMI output has the CEC feature configured on and the codec has the configuration xConfiguration Video Output Connector [n] CEC Mode set to on.

**Value space of the result returned:**

- **Unknown/TV/Reserved/Recorder/Playback/Audio**

**Example:**
```
xStatus Video Output Connector 1 ConnectedDevice CEC 1 DeviceType  
*s Video Output Connector 1 ConnectedDevice CEC 1 DeviceType: TV  
** end
```

### xStatus Video Output Connector [n] ConnectedDevice CEC [n] LogicalAddress

**Applies to:** All products

**Requires user role:** ADMIN, INTEGRATOR, USER

Shows the CEC logical address of the device.

**Value space of the result returned:**

- **Integer**

**Example:**
```
xStatus Video Output Connector 1 ConnectedDevice CEC 1 LogicalAddress
*s Video Output Connector 1 ConnectedDevice CEC 1 LogicalAddress: 4
** end
```

### xStatus Video Output Connector [n] ConnectedDevice CEC [n] Name

**Applies to:** All products

**Requires user role:** ADMIN, INTEGRATOR, USER

Returns the name of the connected device.

**Value space of the result returned:**

- **String**

**Example:**
```
xStatus Video Output Connector 1 ConnectedDevice CEC Name
*s Video Output Connector 1 ConnectedDevice CEC 1 Name: "LG SIGNAGE TV"
** end
```
xStatus Video Output Connector [n] ConnectedDevice CEC [n] PowerStatus

Applies to: All products
Requires user role: ADMIN, INTEGRATOR, USER

Shows the state of the CEC enabled device connected to the HDMI output.
This information is only available when the device connected to the HDMI output has the CEC feature configured on and the codec has the configuration xConfiguration Video Output Connector CEC Mode set to on.

Value space of the result returned:
   Unknown/Ok/In progress/Failed to power on/Failed to standby

Example:
```plaintext
xStatus Video Output Connector 1 ConnectedDevice CEC PowerStatus
*s Video Output Connector 1 ConnectedDevice CEC PowerStatus: Ok
** end
```

xStatus Video Output Connector [n] ConnectedDevice CEC [n] VendorId

Applies to: All products
Requires user role: ADMIN, INTEGRATOR, USER

Returns the vendor ID for the connected device.

Value space of the result returned:
   String

Example:
```plaintext
xStatus Video Output Connector 1 ConnectedDevice CEC VendorId
*s Video Output Connector 1 ConnectedDevice CEC 1 VendorId: "57489"
** end
```

xStatus Video Output Connector [n] ConnectedDevice Name

Applies to: All products
Requires user role: ADMIN, INTEGRATOR, USER

Shows the name of the monitor connected to the HDMI port as defined in the monitors EDID.

Value space of the result returned:
   String

Example:
```plaintext
xStatus Video Output Connector 1 ConnectedDevice Name
*s Video Output Connector 1 ConnectedDevice Name: "G2420HDBI"
** end
```

xStatus Video Output Connector [n] ConnectedDevice PreferredFormat

Applies to: All products
Requires user role: ADMIN, INTEGRATOR, USER

Shows the preferred input format of the monitor connected to the HDMI port as defined in the monitors EDID. This is not necessarily the format the codec is sending out.

Value space of the result returned:
   String

Example:
```plaintext
xStatus Video Output Connector 1 ConnectedDevice PreferredFormat
*s Video Output Connector 1 ConnectedDevice PreferredFormat: "1920x1080@60Hz"
** end
```
xStatus Video Output Connector [n] ConnectedDevice ScreenSize

Applies to: All products
Requires user role: ADMIN, USER

Shows the screen size of the connected device in inches. If this information is not available, the default value is set to 0.

Value space of the result returned:
Integer

Example:
xStatus Video Output Connector 1 ConnectedDevice ScreenSize
's Video Output Connector 1 ConnectedDevice ScreenSize: 55
** end

xStatus Video Output Connector [n] MonitorRole

Applies to: All products
Requires user role: ADMIN, USER

Describes which video stream is shown on the device that is connected to the video output connector.

Value space of the result returned:
First/Second/Third/PresentationOnly/Recorder
First/Second/Third: The role of the monitor in a multimonitor setup. In a singlemonitor setup, there is no difference between First, Second and Third.
PresentationOnly: Shows presentation video stream if active.
Recorder: Shows all participants, including the local main video. If active, shows also the presentation.

Example:
xStatus Video Output Connector 1 MonitorRole
's Video Output Connector 1 MonitorRole: First
** end

xStatus Video Output Connector [n] Resolution Height

Applies to: All products
Requires user role: ADMIN, USER

Shows the resolution height (in pixels) for the video output connector.

Value space of the result returned:
120..3000

Example:
xStatus Video Output Connector 1 Resolution Height
's Video Output Connector 1 Resolution Height: 1080
** end

xStatus Video Output Connector [n] Resolution RefreshRate

Applies to: All products
Requires user role: ADMIN, USER

Shows the resolution refresh rate (Hz) for the video output connector.

Value space of the result returned:
1..300

Example:
xStatus Video Output Connector 1 Resolution RefreshRate
's Video Output Connector 1 Resolution RefreshRate: 60
** end
xStatus Video Output Connector [n] Resolution Width

Applies to: All products
Requires user role: ADMIN, USER
Shows the resolution width (in pixels) for the video output connector.
Value space of the result returned:
176..4000

Example:
```
xStatus Video Output Connector 1 Resolution Width
*s Video Output Connector 1 Resolution Width: 1920
** end
```

xStatus Video Output Connector [n] Type

Applies to: All products
Requires user role: ADMIN, USER
Shows the type of connector.
Value space of the result returned:
HDMI/DVI

Example:
```
xStatus Video Output Connector 1 Type
*s Video Output Connector 1 Type: HDMI
** end
```

xStatus Video Output Monitor [n] Backlight

Applies to: MX700/MX800/MX800D  Room70/Room55D  Room70G2
Requires user role: ADMIN, USER
Returns the monitors backlight level, that has been set with xCommand Video Output Monitor Backlight Set.
Value space of the result returned:
Integer

Example:
```
xStatus Video Output Monitor 1 Backlight
*s Video Output Monitor 1 Backlight: 80
** end
```

xStatus Video Output Monitor [n] Brightness

Applies to: MX700/MX800/MX800D
Requires user role: ADMIN, USER
Returns the monitors brightness level, that has been set with xCommand Video Output Monitor Brightness Set.
Value space of the result returned:
Integer

Example:
```
xStatus Video Output Monitor 1 Brightness
*s Video Output Monitor 1 Brightness: 50
** end
```

xStatus Video Output Monitor [n] ColorTemperature Blue

 Applies to: MX700/MX800/MX800D
 Requires user role: ADMIN, USER

 Returns the monitors level for blue, that has been set with xCommand Video Output Monitor Color Blue Set.

 Value space of the result returned:

 Integer

 Example:
 xStatus Video Output Monitor 1 ColorTemperature Blue
 *s Video Output Monitor 1 ColorTemperature Blue: 50
 ** end

xStatus Video Output Monitor [n] ColorTemperature Red

 Applies to: MX700/MX800/MX800D
 Requires user role: ADMIN, USER

 Returns the monitors level for red, that has been set with xCommand Video Output Monitor Color Red Set.

 Value space of the result returned:

 Integer

 Example:
 xStatus Video Output Monitor 1 ColorTemperature Red
 *s Video Output Monitor 1 ColorTemperature Red: 50
 ** end

xStatus Video Output Monitor [n] ColorTemperature Green

 Applies to: MX700/MX800/MX800D
 Requires user role: ADMIN, USER

 Returns the monitors level for green, that has been set with xCommand Video Output Monitor Color Green Set.

 Value space of the result returned:

 Integer

 Example:
 xStatus Video Output Monitor 1 ColorTemperature Green
 *s Video Output Monitor 1 ColorTemperature Green: 50
 ** end

xStatus Video Output Monitor [n] ColorTemperature Selected

 Applies to: MX700/MX800/MX800D Room70/Room55D Room70G2
 Requires user role: ADMIN, USER

 Returns the monitors color temperature, that has been set with xCommand Video Output Monitor Color Select.

 Value space of the result returned:

 4900/5500/6500/7200/9300/10500/12000/User

 Example:
 xStatus Video Output Monitor 1 ColorTemperature Selected
 *s Video Output Monitor 1 ColorTemperature Selected: 6500
 ** end
xStatus Video Output Monitor \[n\] Contrast

Appplies to: MX700/MX800/MX800D
Requires user role: ADMIN, USER

Returns the monitors contrast level, that has been set with xCommand Video Output Monitor\[n\] Contrast.

Value space of the result returned:

\texttt{Integer}

Example:
xStatus Video Output Monitor 1 Contrast
* `Video Output Monitor 1 Contrast: 50`
** end

xStatus Video Output Monitor \[n\] CSCYUV

Appplies to: MX700/MX800/MX800D
Requires user role: ADMIN, USER

Returns the monitors selected color space, that has been set with xCommand Video Output Monitor\[n\] CSC Select.

Value space of the result returned:

\texttt{RGB/YUV}

Example:
xStatus Video Output Monitor 1 CSCYUV
* `Video Output Monitor 1 CSCYUV: \texttt{RGB}`
** end

xStatus Video Output Monitor \[n\] FirmwareVersion

Appplies to: SX10  SX20  SX80  MX200G2/MX300G2  MX700/MX800/MX800D  RoomKit  RoomKitMini  CodecPlus CodecPro  Room55  Room70/Room55D  Room70G2
Requires user role: ADMIN, USER

Shows the firmware version of the monitor. This status field is only populated when connecting with a supported LG monitor.

Value space of the result returned:

\texttt{String}

Example:
xStatus Video Output Monitor 1 FirmwareVersion
* `Video Output Monitor 1 FirmwareVersion: \"\`
** end

xStatus Video Output Monitor \[n\] Gamma

Appplies to: MX700/MX800/MX800D
Requires user role: ADMIN, USER

Returns the monitors gamma level, that has been set with xCommand Video Output Monitor\[n\] Gamma.

Value space of the result returned:

\texttt{String}

Example:
xStatus Video Output Monitor 1 Gamma
* `Video Output Monitor 1 Gamma: \"2.2\"`
** end
xStatus Video Output Monitor [n] ModelName

**Applies to:** SX10 SX20 SX80 MX200G2/MX300G2 MX700/MX800/MX800D RoomKit RoomKitMini CodecPlus CodecPro Room55 Room70/Room55D Room70G2

**Requires user role:** ADMIN, USER

Shows the model name of the monitor. This status field is only populated when connecting with a supported LG monitor.

**Value space of the result returned:**
- **String**
  - The model name of the monitor.

**Example:**
```
xStatus Video Output Monitor 1 ModelName
's Video Output Monitor 1 ModelName: ""
** end
```

xStatus Video Output Monitor [n] Position

**Applies to:** SX20 SX80 MX200G2/MX300G2 MX700/MX800/MX800D RoomKit RoomKitMini CodecPlus CodecPro Room55 Room70/Room55D Room70G2

**Requires user role:** ADMIN, USER

Shows whether the monitor is positioned on the left or the right. Applicable for dual screen systems only.

**Value space of the result returned:**
- **Left/Right**

**Example:**
```
xStatus Video Output Monitor 1 Position
's Video Output Monitor 1 Position: Left
** end
```

xStatus Video Output Monitor [n] SerialNumber

**Applies to:** SX10 SX20 SX80 MX200G2/MX300G2 MX700/MX800/MX800D RoomKit RoomKitMini CodecPlus CodecPro Room55 Room70/Room55D Room70G2

**Requires user role:** ADMIN, USER

Shows the serial number of the monitor. This status field is only populated when connecting with a supported LG monitor.

**Value space of the result returned:**
- **String**
  - The serial number of the monitor.

**Example:**
```
xStatus Video Output Monitor 1 SerialNumber
's Video Output Monitor 1 SerialNumber: ""
** end
```

xStatus Video Output Monitor [n] Sharpness

**Applies to:** MX700/MX800/MX800D

**Requires user role:** ADMIN, USER

Returns the monitors selected sharpness, that has been set with xCommand Video Output Monitor[n] Sharpness.

**Value space of the result returned:**
- **Softest/Soft/Normal/Sharp/Sharpest**

**Example:**
```
xStatus Video Output Monitor 1 Sharpness
's Video Output Monitor 1 Sharpness: Normal
** end
```
xStatus Video Output Monitor [n] Temperature

Applies to: SX10  SX20  SX80  MX200G2/MX300G2  MX700/MX800/MX800D  RoomKit  RoomKitMini  CodecPlus
CodecPro  Room55  Room70/Room55D  Room70G2

Requires user role: ADMIN, USER

Shows the temperature of the monitor. This status field is only populated when connecting with a supported LG monitor.

Value space of the result returned:

 Normal/High

 Normal: The temperature of the monitor is normal.
 High: The temperature of the monitor is too high.

Example:
xStatus Video Output Monitor 1 Temperature
*s Video Output Monitor 1 Temperature: Normal  
** end

xStatus Video Output Webcam Mode

Applies to: RoomKitMini

Requires user role: ADMIN, USER

Shows the status of the USB-C connector (web camera output).

Value space of the result returned:

 Connected/Connected/Streaming

 Connected: The USB-C connector is connected to a computer, and the connection is active (the computer is not in sleep mode).
 Streaming: Audio and video from the camera and microphone of the video system is sent to the computer that is connected to USB-C connector.

Example:
xStatus Video Output Webcam Mode
*s Video Output Webcam Mode: Connected  
** end

xStatus Video Presentation PIPPosition

Applies to: All products

Requires user role: ADMIN, USER

Shows the position of the presentation image on the screen.

Value space of the result returned:

 UpperLeft/UpperCenter/UpperRight/CenterLeft/CenterRight/LowerLeft/LowerRight

Example:
xStatus Video Presentation PIPPosition
*s Video PIP Presentation Position: CenterLeft  
** end

xStatus Video Selfview FullscreenMode

Applies to: All products

Requires user role: ADMIN, INTEGRATOR, USER

Shows whether selfview is set on full screen mode or not.

Value space of the result returned:

 On/Off

Example:
xStatus Video Selfview FullscreenMode
*s Video Selfview FullscreenMode: Off  
** end
xStatus Video Selfview Mode
Applies to: All products
Requires user role: ADMIN, INTEGRATOR, USER
Shows whether selfview mode is set on or not.
Value space of the result returned:
  On/Off
Example:
xStatus Video Selfview Mode
*s Video Selfview Mode: Off
  ** end

xStatus Video Selfview OnMonitorRole
Applies to: All products
Requires user role: ADMIN, INTEGRATOR, USER
Identifies which monitor(s) contains the selfview, if present.
Value space of the result returned:
  First/Second/Third
Example:
xStatus Video Selfview OnMonitorRole
*s Video Selfview OnMonitorRole: First
  ** end

xStatus Video Selfview PIPPosition
Applies to: All products
Requires user role: ADMIN, INTEGRATOR, USER
Shows the position of the selfview image on the screen.
Value space of the result returned:
  UpperLeft/UpperCenter/UpperRight/CenterLeft/CenterRight/LowerLeft/LowerRight
Example:
xStatus Video Selfview PIPPosition
*s Video Selfview PIPPosition: LowerRight
  ** end
Chapter 6

Appendices
Supported commands matrix

Here you can find tables that show the complete list of configurations, commands, and statuses that are supported for video systems running CE9.7.

Information about the tables

1. **Which video systems support a configuration, status, or command**
   
   Some entries are supported by all types of video systems, while others only exist for a smaller subset.

   The following video systems are covered:
   - DX series: DX80, DX70
   - MX series: MX800, MX700, MX300 G2, MX200 G2
   - Room series: Codec Pro, Codec Plus, Room Kit, Room Kit Mini, Room 55, Room 55 Dual, Room 70, Room 70 G2
   - SX series: SX80, SX20, SX10

2. **Which call services support a configuration, status, or command**
   
   Some of the configurations, commands, and statuses that are available in the API of the video system only apply to on-premise registered devices. They don't apply to Webex registered devices. These items are marked with “On-prem only”.

   Among the non-applicable configurations, commands and statuses, are everything that is related to H.323, H.320, SIP, NTP, CUCM, LDAP, Proximity, and Far End Camera Control.

3. **How to access each configuration, status, or command**
   
   You can access all configurations and statuses from the video system’s web interface. A subset is also part of the video system’s API. You can only issue commands from the video system’s API.

4. **Which user role is required to use a configuration, status, or command**
   
   A user account may hold one, or a combination, of the following user roles:
   - ADMIN (A)
   - AUDIT (Au)
   - INTEGRATOR (I)
   - ROOMCONTROL (R)
   - USER (U)

X: Supported  - : Not supported  
Startup scripts

You can add one or more startup scripts to the codec. A startup script contains commands (xCommand) and configurations (xConfiguration) that will be executed as part of the start up procedure every time the codec boots. A few commands and configurations cannot be placed in a startup script, e.g. xCommand SystemUnit Boot.

Use the codec’s web interface to create and manage startup scripts.

Read more about the web interface and startup scripts in the Administrator guide for your product.
The SystemTools commands

**NOTE:** The systemtools commands are used for administrative control of the codec and are only available from a command line interface. Systemtools should not be used to program the codec.

Required parameters in angle brackets: <text>

Optional parameters in square brackets: [text]

To get an overview of the supported commands type “systemtools ?”.

**Example:**
```
  systemtools ?
  rootsettings
  selectsw
  whoami
  license
  network
  ntp
  passwd
  pki
  ps
  securitysettings
  securitystatus
  sudo
  idefixversion
  pairing
```

To see the usage of the commands add a question mark after the command.

**Example:**
```
  systemtools network ?
  usage: network ping <hostname> | traceroute <hostname> | netstat | addr | ifconfig
```

- **systemtools idefixversion (Not for DX70 and DX80)**
  Returns the software version the connected Touch controller should have. Used when downgrading to TC7.3 or earlier.

- **systemtools license list**
  Lists all the licenses for the codec.

- **systemtools license show <name>**
  Shows the content of a license file, defined by the name.
  
  `<name>`: The name of the license file.

- **systemtools network ping <hostname>**
  Network debug command.

  `<hostname>`: The IP address or URL of the host.

- **systemtools network traceroute <hostname>**
  Network debug command.

  `<hostname>`: The IP address or URL of the host.

- **systemtools network netstat**
  Network debug command.

- **systemtools network addr**
  Shows the systems IP addresses.

- **systemtools network ifconfig**
  Network debug command.

- **systemtools ntp**
  Shows the NTP status.

- **systemtools pairing unpair**
  Remove association with Cisco TelePresence Touch controller.

- **systemtools passwd**
  Change the password for the logged in user.

- **systemtools pki list**
  Lists the codec certificate and CA list if they exist.

- **systemtools pki delete <cert-name>**
  Delete the codec certificate and CA list if they exist.

  `<cert-name>`: The name of the certificate.

- **systemtools securitysettings jitc**
  Set up security requirements so they meet JTC.

  Set password and PIN polices enforced on the codec.

- **systemtools securitysettings isjitc**
  Check if the current settings are JTIC compliant.

- **systemtools securitysettings default**
  Revert to default security settings.

- **systemtools securitysettings ask**
  Query for the separate configurations. When issuing this command you can see each policy separately.

  - Press enter to keep the current value.
  - Enter a number and press enter to change the given policy.
  - The default value “0” indicates no restrictions.

  Max failed login attempts [0]?
- Number of failed logins until a user is set inactive.
  Suspend-time after max failed login attempts (minutes) [0]?
- Number of minutes the user is set inactive after maximum failed login attempts have been exceeded.
Max simultaneous sessions total [0]?
- Maximum number of users that can be logged in simultaneously to web and maximum number of users that can be logged in simultaneously to ssh/Telnet.
Max simultaneous sessions per user [0]?
- Maximum number of simultaneous sessions per user.
Number of passwords to remember [0]?
- Number of previous passwords that the new password must differ from.
Number of PINs to remember [0]?
- Number of previous PINs that the new PIN must differ from.
Maximum time between password renewals (days) [0]?
- If the user has not changed the password within the renewal time the user will be set inactive.
Minimum time between password renewals (hours) [0]?
- The user can only change password once within this limit.
Maximum time between PIN renewals (days) [0]?
- If the user has not changed the PIN within the renewal time the user will be set inactive.
Minimum time between PIN renewals (hours) [0]?
- The user can only change PIN once within this limit.
Maximum time between logins (days) [0]?
- If the user has not logged in within this limit the user will be set inactive.
Max consecutive identical characters in PINs [0]?
- Maximum consecutive identical characters in PINs.
Minimum number of digits in PINs [0]?
- Minimum number of digits in PINs.
Maximum number of digits in PINs [0]?
- Maximum number of digits in PINs.

Max consecutive identical characters in passwords [0]?
- Maximum consecutive identical characters in passwords.
Minimum number of characters in passwords [0]?
- Minimum number of characters in passwords.
Maximum number of characters in passwords [0]?
- Maximum number of characters in passwords.
Minimum number of lower-case letters in passwords [0]?
- Minimum number of lower-case letters in passwords.
Minimum number of upper-case letters in passwords [0]?
- Minimum number of upper-case letters in passwords.
Minimum number of numerical characters in passwords [0]?
- Minimum number of numerical characters in passwords.
Minimum number of special characters in passwords [0]?
- Minimum number of special characters in passwords.
Minimum number of character groups in passwords [0]?
- Minimum number of character groups in passwords.
Minimum number of character changed from previous password [0]?
- Minimum number of character changed from previous password.

**systemtools selectsw**
Select which of the available software images to use. Changing the software image will restart the codec.

No argument given: Lists the version of the available software images, and shows which one is active.

*image name*: Swap to the software with this name.

**systemtools sudo on**
Changes the user role of the current session to the role of the specified user

*<username>*: The name of the sudo user.
*<password>*: The password for the sudo user.

**systemtools sudo off**
Reverts back to the user role of the signed in user.

**systemtools whoami**
Lists the name and id of the signed in user, and the user roles held by this user.
Disconnect cause types

The following parameters are logged when a call is disconnected. The disconnect cause types are used in disconnect events (xEvent).

<table>
<thead>
<tr>
<th>Parameter</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>CauseValue</td>
<td>Proprietary. We recommend the use of CauseType and CauseCode.</td>
</tr>
<tr>
<td>CauseType</td>
<td>Describes why the call was disconnected. The value space is { OtherLocal, LocalDisconnect, UnknownRemoteSite, LocalBusy, LocalReject, InsufficientSecurity, OtherRemote, RemoteDisconnect, RemoteBusy, RemoteRejected, RemoteNoAnswer, CallForwarded, NetworkRejected }</td>
</tr>
<tr>
<td>CauseString</td>
<td>Describes the Cause Code.</td>
</tr>
<tr>
<td>CauseCode</td>
<td>The disconnect Cause Codes are defined in SIP and Q.850.</td>
</tr>
<tr>
<td>CauseOrigin</td>
<td>SIP, Q.850, internal.</td>
</tr>
</tbody>
</table>

Example:
```
xEvent DisconnectEvent

*e CallDisconnect CauseValue: 1
  CauseType: "LocalDisconnect"
  CauseString: ""
  OrigCallDirection: "outgoing"
  RemoteURI: "firstname.lastname@company.com"
  CallId: 89
  CauseCode: 0
  CauseOrigin: SIP
** end
```
User documentation on the Cisco web site

User documentation for the Cisco TelePresence products is available at:

https://www.cisco.com/go/telepresence/docs

Select the Collaboration Endpoints product category from the list. Then select the product series:

- TelePresence MX Series
- TelePresence SX Series
- Webex DX Series
- Webex Room Series

Alternatively, use the following short-links:

- https://www.cisco.com/go/dx-docs
- https://www.cisco.com/go/mx-docs
- https://www.cisco.com/go/room-docs
- https://www.cisco.com/go/sx-docs

Install and Upgrade

**Installation and Upgrade Guides**

- **Installation guides:** How to install the product
- **Getting started guides:** Initial configurations required to get the system up and running
- **RCSI guide:** Regulatory compliance and safety information

Maintain and Operate

**Maintain and Operate Guides**

- **Getting started guide:** Initial configurations required to get the system up and running
- **Administrator guide:** Information required to administer your product
- **Deployment guide for TelePresence endpoints on CUCM:** Tasks to perform to start using the product with the Cisco Unified Communications Manager (CUCM)

End-User Guides

- **User guides:** How to use the product
- **Quick reference guides:** How to use the product
- **Physical interface guide:** Details about the product’s physical interface, including the connector panel and LEDs (SX80 only)

Reference Guides

**Command references**

- **API reference guides:** Reference guide for the Application Programming Interface (API)

**Technical References**

- **CAD drawings:** 2D CAD drawings with dimensions

Configure

**Configuration Guides**

- **Customization Guide:** How to customize the user interface, how to use the video system’s API to program in-room controls, making macros, configure advanced audio set-ups using the Audio Console, and other customizations.
- **In–Room Control Editor:** Download the in-room control editor

Design

**Design Guides**

- **Video conferencing room guidelines:** General guidelines for room design and best practice
- **Video conferencing room guidelines:** Things to do to improve the perceived audio quality

Software Downloads, Release and General Information

**Release notes**

- **Release notes and deferral notices**

Licensing Information

- **Open source licences:** Licenses and notices for open source software used in this product
