All entries in the table of contents are clickable hyperlinks that will take you to the corresponding article.
To go between chapters, you may also click on any of the icons in the sidebar.

Note! Some of the features described in this user guide are optional and they may therefore not be present on your system.
A successful video conference provides a face-to-face meeting, even if the participants are miles or continents apart. Keep in mind that it still is a meeting—normal etiquette and dress code apply even here.

**General**
- Consider setting the unit to *Automatic Answer*, but mute the microphone for privacy reasons, if possible.
- Do not forget to rehearse “the noble art of operating a video system” to the extent needed.

**In the meeting room**
- Make sure that you do not experience obstacles blocking the view to the microphone at all times.
- Noise sources like computers placed on the table should always be placed away from the microphone of your unit. The noise from such sources is often perceived as surprisingly loud by the remote participants.
- Pay attention to the background your system will provide to the remote participants. If the camera captures the corridor outside your office, people passing by may distract your remote participants. This applies as well to curtains with a distinct texture pattern and, in particular, to curtains moving due to draught in the room.
- If you are going to share content you will normally make use of duo video. That implies the use of two video streams, one showing the presentation and the other showing the presenter—or the group of presenters. Smaller systems may force you to choose between showing the presentation or the presenter.
- For duo video some attention is needed. Duo video is sometimes shown side-by-side with half the screen showing the presentation and the other half showing the presenter. Provide the impression that you seem to look towards the presentation instead of the impression that you sit with your back towards it, when all is viewed on the remote monitor. If in doubt, look straight into the camera to avoid this situation.

**Brightness control**
To adjust brightness, colors or other settings of your system, use the touch pad. Adjust the monitor to suit the conditions of the conference room.
Introduction to Video Conferencing

Tour the touch screen

Tap the upper left corner to activate/deactivate the Do not disturb feature, to activate/deactivate the Standby feature, and to access the Settings.

Tap the ? to contact or access the Help desk, if available.

Tap the Camera icon to activate self-view and camera settings.

Tap the Headphones icon to select between loudspeaker and headphones.

Time of day is indicated in the upper right corner.

Tap to mute/unmute microphone.

Adjust volume here (tap and drag).

Any messages to you while you were away will be indicated here.

Tap the Camera icon to activate self-view and camera settings.

Tap the Headphones icon to select between loudspeaker and headphones.

Tap to mute/unmute microphone.

Adjust volume here (tap and drag).

Any messages to you while you were away will be indicated here.

When set to Do Not Disturb, ringtones are muted and call attempts made by others to reach you will appear as missed calls. You may, however, place calls as much as you like.

As default, there is a 60 minutes timeout on the Do not disturb (after which the system will return to normal operation), but this may have been changed to a different setting by your Video Support Team.
Video systems located in meeting rooms and quiet rooms and running under CUCM (Cisco Unified Communications Manager) may allow you to log in to the video system with your own personal credentials. CUCM will then route all incoming calls destined for you to that specific video system.

**About Hot-desking**

**Log On to a System with Your Own Credentials**

1. Tap **Sign In** as outlined.
2. Select your profile, as outlined.
3. Input your credentials and tap **Sign In**, as outlined.
4. The system will confirm a successful sign-in. You will now receive calls destined for you.
5. To sign out tap **Sign-out**, as outlined.
6. You will be prompted to confirm your intentions.
Place Call

Place Call From Contact List

1. Tap **Contacts**, as outlined.

2. To search for someone in a specific list (Favorites, Directory or Recents), tap that list (a) and then scroll down (b) to locate the entry.

3. Alternatively, tap the **Search or Dial** field, as outlined. This will invoke the virtual keyboard.

4. Key in the name, number, or IP address. Matches will appear as you type.

5. There is an extended numerical mode available, which also contains special characters. To toggle between the alphanumeric mode and the extended numerical mode tap the key in the lower left corner of the keyboard, as outlined.

6. When you are ready to place the call, tap the green **Call** button.

The following options apply:
- You may key in a name, number or an IP address and the system will look in all lists for you.
- You may tap a tab and then scroll through the list or key in a name or number. Your search will then be restricted to that specific list.
- You may add the entry to the list of Favorites; edit aspects of the entry before calling; change the call rate and remove the entry from Recents.

About the Lists of Contacts

Your lists of Contacts consist of three parts:
- **Favorites**. These contacts have put there by you. These entries will typically be someone you call frequently or otherwise need to access in a swift and convenient manner from time to time.
- **Directory** will typically be a corporate directory installed on your system by your video support team.
- **Recents** is a list of calls you have placed, received or missed earlier. You may clear the Recents list for privacy reasons, see "Recents" on page 40.
Place Call
Edit a Contact List Entry, then Place the Call

About Entry Edits

You may have to edit an entry in one of the Contact lists before you place the call. There may be a need to add a prefix, a suffix or otherwise alter the entry to ensure success.

1. Tap More (*** to gain access to the options, as outlined.

2. Tap Edit & Call, as outlined. This will invoke the virtual keyboard.

3. Apply your editing and tap the green CALL button, as outlined, to place the call.
Place Call

Place Call Using Name

1. Tap **Dial**, as outlined, to invoke the numerical dialpad.

2. Tap **Keyboard**, as outlined to invoke the virtual keyboard.

3. Key in the name. Matches will appear as you type.

4. There is an extended numerical mode available, which also contains special characters. To toggle between the alphanumerical mode and the extended numerical mode tap the key in the lower left corner of the keyboard, as outlined.

5. When you are ready to place the call, tap the green **Call** button.

About Placing Calls

You may call someone who is not listed in your list of contacts by keying in their name, address or number using the virtual keyboard of the Touch pad.

Anyone you have previously called will appear in the **Recents** list (until you clear that list) and you may then transfer any of them to your list of **Favorites**. This is described in the section **Contacts**.

**Calling extensions**. Sometimes you may be urged to enter numbers during a call, typically to reach extensions or to provide a pin code. Tap **Keypad** (this button appears as soon as the call is placed) to invoke the keypad needed for this.
Place Call

Place Call Using IP Address

1. Tap Dial, as outlined, to invoke the numerical dialpad.

2. Type the IP address. Tap and hold * to type the point sign used in IP-addresses.

3. When you are ready to place the call, tap the green Call button.

About Placing Calls

You may call someone who is not listed in your list of contacts by keying in their name, address or number using the virtual keyboard of the Touch pad.

Anyone you have previously called will appear in the Recents list (until you clear that list) and you may then transfer any of them to your list of Favorites. This is described in the section Contacts.

Calling extensions. Sometimes you may be urged to enter numbers during a call, typically to reach extensions or to provide a pin code.

Tap Keypad (this button appears as soon as the call is placed) to invoke the keypad needed for this.

Calling extensions
About Placing Calls

You may call someone who is not listed in your list of contacts by keying in their name, address or number using the virtual keyboard of the Touch pad.

Anyone you have previously called will appear in the Recents list (until you clear that list) and you may then transfer any of them to your list of Favorites. This is described in the section Contacts.

**Calling extensions.** Sometimes you may be urged to enter numbers during a call, typically to reach extensions or to provide a pin code.

Tap Keypad (this button appears as soon as the call is placed) to invoke the keypad needed for this.

---

Place Call

Place Call Using Number

1. Tap Dial, as outlined, to invoke the numerical dialpad.

2. Type the number.

3. When you are ready to place the call, tap the green Call button.
If someone calls you, you may accept, decline or ignore the call. If you decline the call, busy information will be sent to the calling party. If you ignore the call, the calling party will perceive this as if you were absent (you did not pick up the call). You may want to set your system to respond automatically to an incoming call (Auto Answer). This is described in "Administrator Settings—Call Details" on page 65. Observe that your video support team may have password protected this menu. If you choose to activate Auto Answer you may want to mute the microphone to preserve privacy. This must be set up manually every time.
Receive Call

Receive Call While in Another Call

**Add:** If your system is equipped with the MultiSite option you may merge the incoming call with the existing.

For systems without MultiSite installed, the incoming call may still be merged, but as an audio-only call (not shown).

**Decline** the incoming call and carry on as you have been doing.

**Accept** the incoming call, while holding the current call or group of calls.

If you already are in a call, you may accept another incoming call under certain circumstances.
Transfer Call

Transfer

1. In a call tap Transfer, as outlined.

2. Locate whom to call in the usual way.

3. Place the call in the usual way.

4. Tap Complete transfer—see also text in side bar.

5. The call will be transferred.

About Transfer

Basically, you have two options when transferring calls: viz. unattended and consultative transfer.

The scenario described on this page is the unattended transfer, where you transfer the call to someone else without consulting that person before the transfer is carried out.

If you consult the person first, you will transfer after having used the swap feature—see the next page for more on this.
Consult and Transfer

1. Assume that you are in a call. Tap **Hold**, as outlined.

2. Tap **Place New Call**, as outlined, or tap **Resume** to go back to the one you were in call with (to undo your action).

3. Locate whom to call in the usual way.

4. Place the call in the usual way.

5. You are now in the new call while the one you were in call with still is on hold.

6. Tap **Swap** to go between the two parties and **Transfer** to connect the two together, while you leave the call.

About Consult and Transfer

This feature allows you to be in a call with two parties, but one at a time only.

You may swap whom you are in call with, and you may connect the two together, while you leave the call.
End Call

Disconnect Yourself From Call

To disconnect yourself from a call, tap **End**, as outlined.

About Disconnecting Yourself

Tapping **End** in a call will disconnect yourself from a call. In a call with two parties only, this will then terminate the call.

In a conference call with multiple participants tapping **End** will terminate your participation only if you are a regular participant.

However, if you are the host of such a conference, i.e. the one who initiated it, tapping **End** will cause the entire conference to terminate.
Put Call on Hold and Resume a Call on Hold

1. Assume that you are in a call. Tap **Hold**, as outlined.

2. Tap **Resume** to go back to the one you were in call with (to undo your action).

About Putting on Hold

Putting someone on hold is typically something you do as an initial step when transferring someone to another person, but it may also be used when you need to consult a person or as an alternative to muting also including stopping the video transmission.
Call center

Shared lines

If there is activity on the shared line, this will be indicated as outlined.

If someone on the shared line has put herself on hold, you may pick that call up by tapping RESUME, as outlined.

If the current call has not been put on hold, you may barge in by tapping Barge.

About this feature

Video systems used in call centers may be set up to share a common line so that anyone of those sharing a line may respond to an incoming call.
Call Rate

Change Call Rate

1. This can be done before you call someone only. Tap More (*** ) to gain access to the options, as outlined.

2. Tap Call Rate, as outlined.

3. Change the call rate by moving the slider, as outlined.

Call rate is the term used to express the amount of bandwidth allocated to the call and is measured in kbps (kilobits per second).

The higher the call rate is, the better the quality will be, but on the expense of higher bandwidth consumption.

The system comes with a default call rate. This is set by your video support team as a part of the Administrator Settings (password protected).

Why would you like to temporarily change this setting? In most cases you will use it to avoid choking the video call when you try to call someone at a higher rate than their system and connection support.

Call rate cannot be changed during a call, but you may change it just before you place a call, as outlined here.
Availability
Enable Do Not Disturb

1. Tap the field in the upper left corner, as outlined.

2. Tap **Available** or **Do not Disturb**, as outlined.

3. Tap anywhere outside the menu to exit the menu, putting changes into effect.

About Do Not Disturb

Your system can be set to not respond to incoming calls. You may, however, use it to call others as much as you want.
### Availability

#### Enable Standby

1. Tap the field in the upper left corner, as outlined.

2. Tap **Standby**, as outlined.

3. The screen will turn itself off after a few seconds. Tap the screen to wake it up.

### About Standby

Your system can be set to **Standby** to save electrical energy. You will still be able to receive calls as usual.
Add Extension Numbers and Pin Codes

View Keypad While in a Call

In a call you may get prompted to submit numbers to be able to reach an extension or otherwise gain entrance to something (for example by means of a PIN-code). To be able to submit this you will need to invoke the keypad on the touch screen.

In a call, tap **Keypad**, as outlined.
Conference Calls with Multiple Participants

Add Additional Participants to Existing Call

1. Assume that you already are in a call. This call may have been initiated by you or by someone else (someone have called you).

2. Tap Add, as outlined.

3. Locate whom to call, in the usual way.

4. Place the call, in the usual way. You may alter the Call settings of that call before you place it—see side bar for more.

5. You may be prompted to tap Merge to create the conference, as outlined.

6. This new call will now be added to the existing, thus creating a conference. You may cancel this call, as outlined, without terminating the first call you were in.

This is an optional feature that may, or may not, be installed on your system.

About Video Conferences

Your video system may be equipped with the capability to initiate a video conference with several participants. The maximum number of participants supported by your video system will depend on system configuration and the video infrastructure. If in doubt, contact your video support team.

If you want to initiate a video conference, you must call each participant one by one.

If you are the one who initiated the conference, you will be able to terminate the entire conference as well. The other participants, however, may only disconnect themselves from the conference.

Call settings. Those you call may have video systems with different bandwidths. You are not constrained to set all participants to a bandwidth that all systems support. The Call rate may be set individually for all participants in order to provide everyone with the best quality available for their system. See “Change Call Rate” on page 20.
Assume that you are already in a call. If you then receive another incoming call, you will have the following options:

- You may decline the call and continue with what you were doing.
- You may put the current call on hold and accept the new call. At any time you may swap between the two.
- You may transfer the incoming call to someone else, including the one you were talking to.
- You may, after putting the incoming call on hold, later decide to merge this call with the existing (optional feature).
- You may merge the incoming call directly with the ongoing call (ACCEPT & MERGE). This applies to MultiSite equipped systems only.

**Add:** Provided that your system supports it: Accept the incoming call and merge it with the ongoing call. Some systems may accept that you merge the incoming call with the existing, but as an audio-only call.

You may be prompted to put the current call (or group of calls) on hold before merging can take place.

**Accept** the incoming call, while holding the current call or group of calls.

**Accept** the incoming call, while ending the current call or group of calls.

**Decline** the incoming call and carry on as you have been doing.

The identity of the new incoming call is stated here.
This is a convenient way to obtain information about all the participants and their current status.

In addition, you may use the list to disconnect participants from the conference or to grant them certain rights, such as to retain the position as prominent speaker even if someone else starts speaking. These features are outlined on the following pages.
Conference Calls with Multiple Participants

Manage Conference Call Layout

1. To change the existing layout on your video screen, tap **Layout**, as outlined.

2. Tap the new preferred layout, as outlined.

3. The new layout will now be put in effect.

About Layout Options

You may alter the screen layout when you are in a call. The Touch pad will show the options available. The actual options may differ from what is shown here, but the Touch device will always show you what is available.

The WYSIWYG (what you see is what you get) principle applies even here.

Including a Selfview

Selfview (what the others see from your video system) may be added to any layout in the usual way. To invoke the selfview see “Manage Selfview” on page 45.

If needed, you may also move the selfview to a different location.

See “Move the Selfview PiP” on page 47.
Conference Calls with Multiple Participants

Lock Speaker

1. Start with a layout showing one of the participants as the prominent speaker, and tap their speaker’s avatar.

2. Tap **Lock as speaker**, as outlined.

   Once activated the name of this field will change to **Unlock as speaker**.

   To unlock, repeat the process tapping **Unlock as Speaker** instead.

This is an example of a layout with one of the participants shown as the prominent speaker, i.e. shown larger than the other(s).

In a video conference with several participants the one who speaks will, as default, be shown as the large image (provided you haven’t set up the layout otherwise). This is referred to as **voice switching**.

However, you may want to keep showing one of the participants as the prominent speaker, typically shown larger than the others.

To make this happen activate the function **Lock as speaker**, as shown on this page.
Conference Calls with Multiple Participants

Disconnect Participant from Call

1. Tap the participant to be disconnected, as outlined. You may also invoke the list of participants and tap a participant in that list.

2. Tap **Drop** to disconnect the selected participant, as outlined.

About Disconnect

Any participant entitled to it may disconnect any of the other participants. Tap the participant, either in the view as shown, or in the list of participants (see “View Meeting Participant List” on page 26). Then tap **Drop**, as outlined.
Start and Stop Presentation

1. Tap **Share**, then **View PC**, if applicable.

2. To stop the Presentation, tap **Stop Sharing**.

About Content Sharing

Your video system may serve as your PC screen outside calls. In a call tap **View PC** to see the desktop. Your desktop will not be exposed to the other side. You will need to tap **Share** to expose your desktop.

In a call you may view your PC screen without sharing it with the remote site(s). If the thumbnail image showing the other participants obstructs important parts of your PC-screen you may move it in the same way as you may with a PiP (see "Move the Selfview PiP" on page 47).

More about using your video system as your PC screen can be found in "Connect the EX60" on page 50 and "Connect the EX90" on page 51.
Share Content

Share a Physical Document

The camera can be tilted, if needed, to serve as a document camera. Image will be flipped vertically (turned upside down) to show it correctly to those you speak to (the other side).

Share Physical Objects

The camera can be tilted as shown to enable you to share items on your physical desktop (we are not referring to the virtual desktop of your computer screen).

The image will be flipped vertically to show it correctly to the other side.
Change Presentation Layout

You may be able to change the layout of the screen during presentations. Typical options available will be with or without showing the presenter and showing the presenter as either a PiP (Picture in Picture) or PoP (Picture outside Picture).

The layout options available on your system may differ from those shown here, but the layouts shown are always those you may choose between.

1. Tap **Layout**, as outlined, to invoke the layout options.

2. Select your preferred layout by tapping it.
Your video system may be connected to a management system capable of scheduling video meetings for you. Any meetings scheduled will then appear in a List of Meetings on your Touch device.
Scheduled Meetings

View Meeting List

1. Tap Meetings to invoke the list of meetings.

2. The meeting list will typically look like shown here.
   Tap an entry in the list to obtain more information about the meeting.

   Tap on the little expansion symbol, as outlined, to get even more information.

   Tap again to collapse the information box.

Meeting List Basics

Your video system may be connected to a management system capable of scheduling video meetings. Any meetings scheduled will then appear in a List of Meetings.

The List of Meetings contains a list of upcoming meetings scheduled to take place during the next 14 days (this setting may have been changed by your video support team). The list is sorted using grouping headers. The main grouping category is by day (e.g.: TODAY, TOMORROW, then WEDNESDAY, JUNE 20, 2014 etc).

If you tap an item in the list then more information will become available.

When a scheduled meeting appears as Private meeting it will contain information about the organizer only. There will be no title, no expandable meeting outline as well as no dial-in information.
Scheduled Meetings

Join Scheduled Meeting

If you tap a meeting in the list you will see more about the meeting.

The start and end time of the scheduled meeting are given in the expanded meeting information.

Extending an ongoing meeting

Scheduled meetings have a fixed start and end time. You may want to extend an ongoing meeting. This will be accepted by the system if no other meeting is scheduled for any of the video systems involved, during the period of possible extension.

If an extension is sustainable, the Meeting will end notification will include an Extend and a Dismiss option.

To extend a meeting, tap the Extend button.

About Joining

On your video system the Meeting Reminder will appear once it is possible to join a meeting. Exactly when that will be depends on the Start time buffer setting. Default buffer setting is 10 minutes, but your video support team may have changed this. It is not possible to join the meeting earlier than the setting dictates.

The meeting reminder contains a time indicator stating when the meeting starts, or alternatively for how long the meeting has been going on (an ongoing meeting is referred to as a Meeting in progress).

The text Starting now will be shown during a time interval spanning from 30 seconds before to 30 seconds after the scheduled start time of the meeting.

You can join when the meeting starts.

Although the default setting lets you join in up to 10 minutes in advance, your video support team may have implemented a different setting.

A scheduled meeting may connect you automatically, or you may have to tap Join Meeting.

When the meeting starts you will be offered to join in, to postpone the offer to join in for 5 minutes, or to just dismiss the offer.

If you are in a call when the meeting starts you will also be offered to join in while at the same time put the current call on hold, just like any other situation where someone calls you while you already are in a call.
Parallel Meetings

Meetings taking place simultaneously are referred to as parallel meetings. The meeting names used in this example solely appear to illustrate that the meetings are parallel meetings.

Whenever Parallel meetings occur (two or more meetings taking place simultaneously), the reminder will be displayed in context of the meeting list, displaying all upcoming meetings. Choose which meeting to join and then join the selected meeting.
Contacts consists of three parts; a Directory, which typically is your corporate phone book; Recents which is a list of recent calls and finally Favorites, which is your personalized list of people you call frequently or otherwise need to get easy access to.
Directory

Finding an entry in the Directory by scrolling through the list:

1. Tap **Contacts**, as outlined.
2. Tap **Directory**, if needed.
3. Scroll through the list to locate the entry, as outlined.

Finding an entry in the Directory by searching for it:

1. Tap **Contacts**, as outlined.
2. Tap **Directory**, if needed.
3. Tap **Search or Dial**, as outlined, to invoke the virtual keyboard and key in a name, number or address. Possible matches will appear as you type.

The Directory serves as your corporate phone book. This directory cannot be edited by you. You may, however, copy entries to your list of **Favorites** and edit them there.

Tap a folder to show its contents, scroll, if needed, to locate a folder or an entry within a folder.

Once located, tap the entry to call, edit or add to your list of favorites in the same way as with the **Recents** list (see the previous page for more on this).

When searching within the corporate Directory, the search will apply to the current directory folder and its subfolders only. To go one level up, tap Back. To make the search apply to the entire corporate directory, do not enter (tap) any folder before the search is commenced.

It may happen that an entry copied from the directory to the list of favorites later is updated in the directory. This update will not be reflected in your list of favorites—you must then manually update the entry in the list of favorites.
Recents

Gaining access to the Recents list:

1. Tap **Contacts**, as outlined.
2. Tap **Recents** to invoke the list of recent calls.

Removing a single entry:

1. Select an entry in the Recents list by tapping it. Then tap **More** (***), as outlined.
2. Tap **Remove from Recents** to remove the entry. You will be prompted to confirm your intentions.

Clearing the entire Recents list:

1. Tap **Contacts**, if needed.
2. Scroll, as outlined, to get to the top of the list.
3. Tap **Clear Recents**, as outlined.

About Recents

The **Recents** lists the received, placed and missed calls since the last time the list was cleared.

Tap an entry and you may:
- Call the entry by tapping **CALL**.
- Add the entry to an ongoing call (optional).
- Add the entry to **Favorites**.
- Edit the entry information and then place the call.
- Change the call rate settings.
- Remove the entry from the list.
- Clear the entire list.

For privacy reasons you may want to remove an entry from the **Recents** list or clear the entire list.

The same persons may have called you (or you called them) several times. Each such call will create an entry in the **Recents** list.

Note that if you choose to remove a single entry in the list, any other instances of that entry will not be removed from the list.
Contacts

Favorites

Adding someone from Directory or Recents to the list of Favorites:

1. In the Contacts panel, tap Directory or Recents, if needed.
2. Scroll through the list to locate the entry, as outlined.
3. Tap that entry (a) and then (b) tap More (•••), as outlined.
4. Tap Add to Favorites, as outlined.
5. Tap Save to exit the menu putting your changes into effect. If you tap the name and/or URI, you may edit the entry.
6. You may also call the person you just made a favorite.

Manually adding someone to the list of Favorites:

1. Tap Search or Dial, as outlined, to invoke the virtual keyboard.
2. Key in a name, number or address. Possible matches will appear as you type.
3. Tap the match, if applicable (a) and then little arrow (b), as outlined, and continue from (3) above.

About Favorites

The Favorites is your own shortlist of contacts you frequently call or otherwise want to have easy access to. Favorites may be populated from the Recents or Directory lists as well as from manual entries.
Contacts

Add Someone to Favorites, While in a Call

1. In a call, tap the avatar. In a video conference with several participants, tap the avatar that you want to add to Favorites.

2. Tap Add To Favorites, as outlined.

3. Edit the entry, if needed.

4. Tap Close, to hide the keyboard, as outlined.

5. Tap Save to add new Favorite, as outlined.

About this feature

There are several ways to add someone to the list of Favorites and one of them allows you to do this while in a call.

You may, after a call, realize that you should have added the one you were in call with to the list of Favorites. To do this use Recents and Add To Favorites from there, see “Recents” on page 40.
Camera

View Camera Settings

Tap Camera, as outlined, to invoke the camera adjustment menu.

---

About Camera Settings

The camera settings let you control the zoom of the camera.

In a separate menu, you may further adjust whitebalance, exposure and backlight compensation for your camera. This is shown in "Camera Control" on page 56.

In addition selfview (the image that the others see from your system) can be turned on and off as well as be shown minimized or maximized.

If the position of the selfview blocks important parts of the image on your screen, it can be moved. How to do this is shown in "Move the Selfview PIP" on page 47.
Camera

Manage Selfview

Outside a call:

1. Tap Camera, as outlined.

2. Tap Selfview to turn it on. You may now resize the selfview image (see the following page for more), or control the camera’s pan, tilt and zoom (see the previous page for more).

3. Tap anywhere outside the menu to exit.

In a call:

1. Tap the selfview avatar, as outlined.

2. You may now switch the selfview off or maximize or minimize it.

3. Tap anywhere outside the menu to exit.

About Selfview

The Selfview shows what others see from your video system. You will normally use it to confirm that they see what you want them to see. The Selfview appears as a PiP (Picture-in-Picture).

The position of Selfview PiP can be changed if you wish—see "Move the Selfview PiP" on page 47 for details on this.
Camera

Resize the Selfview PiP

1. Tap Camera, as outlined.

2. Tap Selfview to turn it on.

3. You may now tap Maximize to get a full-screen Selfview. Repeat the process to minimize, or deactivate the selfview by tapping the Selfview icon again. You may also use this to gain access to controlling your own camera.

4. To exit this menu, putting changes into effect, tap anywhere outside the active menu.

Why Resize the Selfview?

The selfview shows what others see from your video system. You will normally use it to confirm that they see what you want them to see. The selfview appears as a PiP (Picture-in-Picture).

From time to time you may want to have the selfview activated during the meeting.

You may want to zoom, pan or tilt your camera to provide a better view for the other participant(s). To get a better view, you may want to maximize the selfview.
Camera

Move the Selfview PiP

1. Tap Selfview in the upper right part of the screen, as outlined to invoke the selfview, if needed.

2. Press and hold your finger within the selfview area, as outlined.

3. As soon as it turns blue drag the selfview to the new location. Possible locations are indicated, as outlined.

4. Once you reach the location you want to have it in, lift your finger from the touchscreen.

5. The selfview will now assume its new location.

Why Move the Selfview?

The Selfview shows what others see from your video system. You will normally use it to confirm that they see what you want them to see.

The Selfview appears as a PiP (Picture-in-Picture).

From time to time you may want to have the Selfview activated during the meeting. This could, for example, be to ensure that a lecturer in your room remains seen on the screen despite constantly moving around.

It may happen that the current position of the Selfview blocks important parts of the image on your screen. You may therefore want to move it.
Control the Camera of the Other Participant

1. In a call, tap the avatar representing the other participant.
   In a video conference with several participants, tap the avatar representing the participant whose camera you want to control.

2. Tap **Camera**, as outlined.

3. Adjust the camera’s pan, zoom and tilt.

4. Tap anywhere outside the menu to exit, as outlined.

About Camera Control

Within video conferencing the term **far end** is often used to refer to the one you are talking to.
Likewise, the term **near end** is often used to refer to your side of the video meeting.

The ability to control the far end camera requires that the far end system camera is remotely controllable. The feature cannot be applied to systems with a manual camera adjustment.

You will not have access to any presets that may exist on the far end video system.
The video endpoints whose use is described in this guide can be configured via the Touch screen controller or via its web interface. For full access to all configurable parameters, the web interface must be used—the Touch pad provides access to a limited set of parameters only.

The web interface is described in a guide available separately for download.
Connections

Connect the EX60

1. Connect power here.
2. Connect your PC here if you need to share a single LAN connection with the EX60.
3. Connect your EX60 to the LAN.
4. Connect the touch screen controller.
5. DVI socket to use the EX60 as a PC screen.
7. For service and maintenance.

Connect the cables as shown. Sockets are located behind the rear cover. If you have one LAN connection only—and need that for your PC—the EX60 has a built-in Gigabit ethernet switch that enables you to connect your PC to the EX60 to access the LAN through the EX60.

Screen resolution. A resolution of 1920x1080 is recommended. However, other resolutions may also be used as shown below.

**Digital input via DVI**
- 1920x1200 (not full screen)
- 1920x1080 (recommended)
- 1776x1000 (not full screen)
- 1680x1050
- 1600x1200 (not full screen)
- 1440x900
- 1400x1050 (not full screen)
- 1280x1024 (not full screen)
- 1280x960 (not full screen)
- 1280x800
- 1280x768 (not full screen)
- 1280x720 (not full screen)
- 1152x648 (not full screen)
- 1024x768 (not full screen)
- 960x600 (not full screen)
- 800x600 (not full screen)

**Analog input via DVI**
- 1920x1080 (recommended)
- 1680x1050
- 1600x1200 (not full screen)
- 1440x900
- 1280x1024 (not full screen)
- 1280x768 (not full screen)
- 1280x720 (not full screen)
- 1152x648 (not full screen)
- 1024x768 (not full screen)
- 960x600 (not full screen)
- 800x600 (not full screen)

If you choose to use your EX60 as your PC screen, connect your PC to the sockets on the rear panel as shown below left. A resolution of 1920x1080 is recommended. However, other resolutions may also be used as shown in the left table. Your EX60 will then serve as your PC screen outside calls. In a call tap **View PC** to see the desktop. Your desktop is not exposed to the other side.

In a call you may view your PC screen without sharing it with the remote site(s). If the thumbnail image showing the other participants obstructs important parts of your PC-screen you may move it in the same way as you may with a PiP (see "Moving the self-view PiP" on page <?>).

**Screen resolution** must be set via the web interface, using the Video Output HDMI [1] Resolution setting. For details on this, see the EX60 Administrator Guide, which is available separately for download.
Connections

Connect the EX90

Remove cover to get access to the connector sockets.

The cover is vented in the lower left corner (external view) due to the rear mounted loudspeaker.

When mounting the cover back on, make sure the vents are where the speaker is (as shown).

A resolution of 1920 × 1200 is recommended. However, other resolutions may also be used as shown below.

Digital input via DVI

- 1920 × 1200 (recommended)
- 1920 × 1080
- 1776 × 1000 (not full screen)
- 1680 × 1050
- 1600 × 1200 (not full screen)
- 1440 × 900
- 1400 × 1050 (not full screen)
- 1280 × 1024 (not full screen)
- 1280 × 960 (not full screen)
- 1280 × 800
- 1280 × 768 (not full screen)
- 1280 × 720 (not full screen)
- 1152 × 648 (not full screen)
- 1024 × 768 (not full screen)
- 960 × 600 (not full screen)
- 800 × 600 (not full screen)

Analog input via DVI

- 1920 × 1200 (recommended)
- 1680 × 1050
- 1600 × 1200 (not full screen)
- 1440 × 900
- 1280 × 1024 (not full screen)
- 1024 × 768 (not full screen)
- 800 × 600 (not full screen)

- HDMI out is used when connecting an extra monitor (typically for presentations).

Use EX90 as PC screen

If you choose to use your EX90 as your PC screen, connect your PC to the sockets on the rear panel as shown below left. A resolution of 1920 × 1200 is recommended. However, other resolutions may also be used as shown in the left table.

Your EX90 will then serve as your PC screen outside calls. In a call tap View PC to see the desktop. Your desktop is not exposed to the other side.

In a call you may view your PC screen without sharing it with the remote site(s). If the thumbnail image showing the other participants obstructs important parts of your PC-screen you may move it in the same way as you may with a PiP (see "Moving the self-view PiP" on page 28).

Screen resolution must be set via the web interface, using the Video DefaultPresentationSource setting. For details on this, see the EX90 Administrator Guide, which is available separately for download.

Digital input via DVI

- 1920 × 1200 (recommended)
- 1920 × 1080
- 1776 × 1000 (not full screen)
- 1680 × 1050
- 1600 × 1200 (not full screen)
- 1440 × 900
- 1400 × 1050 (not full screen)
- 1280 × 1024 (not full screen)
- 1280 × 960 (not full screen)
- 1280 × 800
- 1280 × 768 (not full screen)
- 1280 × 720 (not full screen)
- 1152 × 648 (not full screen)
- 1024 × 768 (not full screen)
- 960 × 600 (not full screen)
- 800 × 600 (not full screen)

Analog input via DVI

- 1920 × 1200 (recommended)
- 1680 × 1050
- 1600 × 1200 (not full screen)
- 1440 × 900
- 1280 × 1024 (not full screen)
- 1024 × 768 (not full screen)
- 800 × 600 (not full screen)

You may connect an external monitor to your EX90 to have it work with two monitors at the same time. The second monitor can be configured to show presentations instead of having everything on a single screen.

To enable the use of a second monitor the system must be configured for it. This is done via the web interface using the Video DefaultPresentationSource setting. Doing so is described in the EX90 Administrator Guide which is available separately for download.
Gain Access to the Settings

1. Tap the field in the upper left corner, as outlined.

2. Tap **Settings**, as outlined.

3. Scroll through the list to locate what you are looking for, as outlined.

About Settings

Care must be taken when altering the **Settings** to avoid that the system stops working. If in doubt, contact your video support team.

For security reasons, access to the Administrator Settings may have been password protected by your video support team.

To enter the **Settings**, tap the **Settings** icon in the upper left corner of the touchpad, as outlined.
Setting the Background Image

Select what shall be the background image on your Touch Pad and your screen. Tap on one of the thumbnails to use that image.

You may use your own image (for example your company logo). This image must be uploaded via the web interface, see the Administrator guide for more on this (available for download separately).

Observe that the custom image will appear on the video screen only and not on the Touch Pad.

When a custom image is available, a second choice, Custom background, will appear (not shown here) to let you choose that image instead of the default background images.
The Ringtone & Sound Settings window lets you specify:

**Keytones** On or Off. When set to on you will hear a sound every time you tap a field on the Touch controller.

**Ringtone volume.** How loud your ringtone shall sound.

**Ringtone.** Select among several ringtones. You will hear a sample every time you tap a ringtone. Note how the settings chosen are indicated. In the example shown, **Keytones** is set to **On**.

To exit this menu putting any changes into effect, tap **Exit**. Note that there is no **Cancel** function letting you exit the menu undoing any changes you have made. Take care!
You may connect bluetooth headsets to your EX video system. Consult the manual for your bluetooth headset to learn how to pair your headset with the video system.
The **Camera Control** window lets you set the whitebalance and exposure of the camera. If you do not want to tweak this yourself, just leave it up to the system by tapping **Auto**.

Backlight compensation comes in handy when there is much light behind you. Without compensation you will easily appear very dark to the far end.

Note how the settings chosen are indicated. In the example shown, **Backlight compensation** is set to **Off**.
This menu allows you to set the DVI mode to Analog, Digital or Automatic detection.
The Language page lets you specify the Touch interface menu language.
The System Information window contains information on the system’s software and hardware versions and connections, SIP and H.323 status etc.

This information is typically what you will be asked by the technical staff to provide in the unlikely event of system malfunction.
The Call Status window provides information on call rate, encryption, as well as important video and audio parameters. This information is typically what you may be asked by the technical staff to provide in the unlikely event of system malfunction.
For troubleshooting purposes you may enable additional system logging. Follow the on-screen instructions.

Note that system performance may be influenced by an ongoing system logging.

This information is typically what you may be asked by the technical staff to provide in the unlikely event of system malfunction.
Settings

Restart System

About Restart

Use this to restart your system in an orderly and controlled manner. No settings are lost.
The Administrator settings will normally have been password protected by your video support team.
Enter Username and Password followed by tapping Log in.
This window lets you specify your preferred date and time formats, as well as the time zone.

If you set the Date and Time Mode to Auto (as has been done in this example), the system will look for an NTP server and get date and time from there.

If you choose to set NTP mode to Manual (as has been done in this example), you must specify the NTP server address to make things work.
Settings
Administrator Settings—Call Details

If you enable Auto Answer the system will respond by itself to incoming calls after a delay specified by you. Note that an activated auto answer may not provide you with the privacy desired. In the example shown here Auto Answer is set to Off.

On certain occasions you may have to change the bandwidth (and hence the quality) of the call. Some configurations may have different incoming and outgoing bandwidths (typically ADSL connections), and you may specify the default call rate to ensure a stable video quality.

The default protocol may also be specified. In the example shown, the protocol has been set to SIP.

Caution! There is no Cancel function letting you exit the menu undoing any changes you have made. Take care!
To exit Administrator Settings, tap Back.

To exit Settings as such, tap Exit.

Note that there is no Cancel function letting you exit the menu undoing any changes you have made. Take care!
There are basically two modes of video conferencing; viz. MultiWay and MultiSite.

- To enable MultiWay, a MultiWay address must have been entered.
- If a MultiWay address has been specified and MultiWay is selected, MultiWay will always be used for video conferencing.
- If a MultiWay address has been specified, but MultiSite is selected, MultiSite will be used.
- If set to Auto, MultiWay will be used if a MultiWay address has been specified, otherwise MultiSite will be used.
- If set to Off, no video conferencing will be possible.
- Any use of the MultiSite feature requires the presence of the MultiSite option.

**Caution!** There is no Cancel function letting you exit the menu undoing any changes you have made. Take care!
Settings
Administrator Settings—IP & VLAN

To exit Administrator Settings, tap Back.
To exit Settings as such, tap Exit.
Note that there is no Cancel function letting you exit the menu undoing any changes you have made.
Take care!

You may specify whether to use IPv4 or IPv6 and whether to use static IP address or DHCP.
When set to Static, applicable addresses must be set accordingly.
To change these from default values, tap Advanced (not shown).
Caution! There is no Cancel function letting you exit the menu undoing any changes you have made. Take care!
About Network Status

This is designed to provide your video support team with information about the current network status of the Touch Controller in the unlikely case of system malfunction.
Use this page to set up SIP.

Caution! There is no Cancel function letting you exit the menu undoing any changes you have made. Take care!
About H323 Settings

Use this page to set up H323.

Caution! There is no Cancel function letting you exit the menu undoing any changes you have made. Take care!
To exit Administrator Settings, tap Back.

If the Touch controller is used in environments with considerable amounts of electromagnetic noise present, you may experience an appearance of false signals—as if someone tapped the Touch controller when obviously nobody did so.

To cope with this you may set the EMC Resilience Mode to On. You must then press and hold for a little while, rather than just tap, in order to make the system aware of your tapping. This will prevent the appearance of spurious signals.

Caution! There is no Cancel function letting you exit the menu undoing any changes you have made. Take care!
To exit Administrator Settings, tap Back.

To exit Settings as such, tap Exit.

Note that there is no Cancel function letting you exit the menu undoing any changes you have made. Take care!

---

**Settings**

**Administrator Settings—Web Snapshots**

To exit Administrator Settings, tap Back.

To exit Settings as such, tap Exit.

Note that there is no Cancel function letting you exit the menu undoing any changes you have made. Take care!

---

**About Snapshots**

You may gain access to your video system through its web interface, see the Administration Guide for more.

From the web interface you may generate snapshots of the video stream from your system. You may also generate snapshots from the outgoing video of the far end system.

However, you cannot take snapshots unless you have set the **Allow Web Snapshots** to **ON**, as shown here.

Snapshots cannot be taken if the call is encrypted. Encryption will disable the snapshot feature at both ends, regardless of the local settings of the **Allow Web Snapshots** parameter.

The web snapshot feature applies to Point-to-Point as well as MultiSite calls (but to unencrypted calls only).

In this context a MultiWay call should be regarded as a variant of Point-to-Point call as it is the MCU who is controlling the call and your system is connected to the MCU as in a Point-to-Point call.

**Caution!** There is no Cancel function letting you exit the menu undoing any changes you have made. Take care!
You may want to perform a Factory Reset your video system. Note that you will lose all configurations, the call history and your local list of contacts (Favorites and Recents). Release keys and options installed will be retained.

**Caution!** There is no Cancel function letting you exit the menu undoing any changes you have made. Take care!
