This installation guide covers MX300 G2 with a wheel base.

**Dimensions**

Height: 1606 mm / 63.3 in.
Width: 1278 mm / 50.4 in.
Depth: 755 mm / 29.8 in.
Weight total: 47 kg / 104 lb
Weight monitor: 35 kg / 78 lb

**Manpower**

Two people working together are required to mount the monitor to the base module.

**Room setup**

Explore the Cisco Project Workplace website to find inspiration and guidelines when preparing your office or meeting room for video conferencing, [http://www.cisco.com/go/projectworkplace](http://www.cisco.com/go/projectworkplace)

**Documentation**

Cisco Spark: Visit the Cisco Spark help site to find more information about Spark registered room systems, [http://help.ciscospark.com](http://help.ciscospark.com)

Other services: Visit the Cisco web site to find user guides and compliance and safety information for the video system, [http://www.cisco.com/go/mx-docs](http://www.cisco.com/go/mx-docs)
Installing Cisco TelePresence MX300 G2 - Wheel Base

Wheel base

Column

Screws for mounting the base

Screwdriver

Back cover

Monitor

Accessories:

- Microphones
- Cables
- Screws for mounting the monitor
- Gloves

Touch controller

- Wheel base
- Column
- Screws for mounting the base
- Screwdriver

The packaging may be slightly different for some shipments.
1 Mounting the wheel base

Optional
It is possible to replace the wheels with rubber pads. The rubber pads are kept underneath the wheel base, and must be moved to their correct position.

M5x8 (Allen key, 3 mm)

You may place the column on the empty wheel base box as illustrated. Then it is easier to enter the screws from below.

4 × M6x20
Mounting the monitor

The monitor may be tilting slightly forward. If you gently pull it to a vertical position, the screws enter more easily.

Use gloves when handling the monitor.

Remove the cable channel lid for now. You need it in step 4.
3 Connecting the cables

Thread the cables up through the hole in the base.

Always use the provided power cable. The wall socket outlet must be easily accessible after installation.

Power (100-240 VAC, 50/60 Hz)

LAN **

Video output (e.g. 2nd display *)

DVI-I

HDMI

Audio line output

USB, for future use

For maintenance only

Reset to factory settings

Microphones

Touch controller **

Video input (e.g. PC *)

Audio line input

** Use the cable that is labeled with 🪛 for the Touch controller; use the cable that is labeled with 🪛 for the LAN

* Optional
Starting up the system

- Connect to power and LAN/Ethernet.
- Switch on the system. The power switch is placed next to the power connector at the rear side of the system.
  Wait while the unit starts up. Normally this takes a few minutes. It may include automatic software upgrade and restart of the Touch controller.
- Follow the instructions on the Touch controller.
  Cisco Spark: To find more information on how to get started with Spark registered systems, visit http://help.ciscospark.com and look for Getting Started articles for room systems.
  Other services: For further information on set-up and configuration, download the Getting Started Guide from the Cisco web site, http://www.cisco.com/go/mx-docs

Never move the camera manually when power is switched on; always use the camera control function on the Touch controller to change the camera position.
6 Mounting the back cover

Lift this handle to lock/unlock the back cover. Use both hands if required.

Wind up the cables on the hook on the back cover when rolling the unit.
