Installing Cisco TelePresence MX300 G2 - Wall Mount

- Wall and monitor brackets
- Bottom adapter
- Back cover
- Screwdrivers

Monitor Accessories:
- Microphones
- Cables
- Screws for mounting the bottom adapter
- Gloves

The packaging may be slightly different for some shipments.
1 Mounting the monitor bracket

Use gloves when handling the monitor.

Lay the monitor gently face down on a steady, soft surface.
Take care not to subject the camera for any stress (turn it parallel to the monitor).

Unscrew these four screws. You will re-use them when fastening the bracket.

Fasten the bracket with the four screws that you just removed.
2 Mounting the bottom adapter

Remove the cable channel lid for now. You need it in step 4.

2 × M6x16

### Connecting the cables

1. **Power switch**
2. **Power (100-240 VAC, 50/60 Hz)**
3. **Always use the provided power cable. The wall socket outlet must be easily accessible after installation.**

---

- **Audio line input**
- **Audio line output**
- **USB, for future use**
- **For maintenance only**
- **Reset to factory settings**

---

- **LAN**
- **Video input (e.g. PC *)
- **Video output (e.g. 2nd display *)
- **DVI-I**
- **HDMI**
- **Microphones**
- **Touch controller **

---

* Optional

**Use the cable that is labeled with for the Touch controller; use the cable that is labeled with for the LAN**
4 Snapping on the cable channel lid

Snap on the cable channel lid for strain relief.

5 Mounting the back cover

Lift this handle to lock/unlock the back cover. Use both hands if required.
6 Mounting the monitor to the wall

Due to the size and mass of this product, it is important that the wall-mounted system is safely installed according to these installation instructions.

The wall and mounting hardware must be able to safely support the product.

The wall-mounted system must be installed by qualified personnel, in accordance with state and local building regulations.

Fix the bracket to the wall with four screws. Use screws and anchors suiting your type of wall (not provided).

Verify that the bracket is level before securing it to the wall.

Tighten the upper setting screw to lock the monitor to the bracket.

Tighten the lower setting screw to fix the monitor parallel to the wall.

Recommended distance for regular meeting rooms:

0.76m (30in.)

Use gloves when handling the monitor.

40kg / 88lb (including brackets)
Starting up the system

- Connect to power and LAN/Ethernet.
- Switch on the system.
  The power switch is placed next to the power connector and can be accessed through the back cover.
  Wait while the unit starts up.
  Normally this takes a few minutes. It may include automatic software upgrade and restart of the Touch controller.
- Follow the instructions on the Touch controller.
  Cisco Spark: To find more information on how to get started with Spark registered systems, visit http://help.ciscospark.com and look for Getting Started articles for room systems.
  Other services: For further information on set-up and configuration, download the Getting Started Guide from the Cisco web site, http://www.cisco.com/go/mx-docs

! Never move the camera manually when power is switched on; always use the camera control function on the Touch controller to change the camera position.
