Introduction

These release notes cover a maintenance release of Cisco TMSXN version 11.3.2.

Changes to requirements

There are changes to Cisco TMSXN version 11.3.2 requirements for Microsoft Windows Server.

There is additional information on requirements for the Cisco TelePresence Management Suites testing results.

See the Upgrading to Cisco TMSXN 11.3.2 section for more information on requirements.

Product documentation

The following documents provide guidance on installation, initial configuration, and operation of the product:

[Cisco TelePresence Management Suite Extension for IBM Lotus Notes Installation and Getting Started Guide.](#)

Resolved issues

The following issues were found in previous releases and were resolved in 11.3.2.

For more information about issues for Cisco TMSXN, see the **Using the Bug Search Tool** section.

Internal reference	Description
CSCtr32289	Resolved the issue where an error was thrown when creating a new meeting and adding an external dial out participant with a sip domain address.
CSCtr61435	Resolved the issue where activating the Purge Agent didn't delete the old documents in the Cisco TMS Resource Reservation Database as expected.
CSCud29454	Corrected a reference to an erroneous server in the Cisco TMS requirements of the Cisco TMSXN Installation and Getting Started Guide.
CSCug15076	Resolved the issue where the password for a password protected meeting in Lotus Notes failed the initial verification and did not feed back to the user that it needed to be numeric.
CSCug15014	Resolved the issue where meetings settings regarding Restrict ISDN did not display correctly in Lotus Notes even though it was set initially and registered in Cisco TMS.
CSCug15000	Resolved the issue where Lotus Notes displayed an erroneous message when booking a meeting without a video conference room.
CSCug15060	Added an error message to be displayed if leaving the SIP address empty for conferences with SIP participants.
CSCug15041	Added a feedback message when adding an external dial in participant without entering a name.
CSCug14853	Added instructions in Cisco TelePresence Management Suite Extension for IBM Lotus Notes Installation and Getting Started Guide on enabling use of WebEx Enabled TelePresence.

Updating to Cisco TMSXN 11.3.2

Prerequisites and software dependencies

Please refer to the Installation and getting started guide for full details on server requirements.

Product	Software revision	Comments
Cisco TelePresence Management Suite	13.X 14.X	Cisco TMSXN utilizes Cisco TelePresence Management Suite Extension Booking API version 2.
Microsoft Windows Server	Windows 2008 Server Windows 2008 R2 Server	
IBM Lotus Domino/Notes	Cisco TMSXN has been tested with 8.5 8.5.1 8.5.2 8.5.3	IBM Lotus Domino clustered environments are not supported. Note: A bug was identified in the 8.5.3 FixPack3 and this is therefore not recommended.

Upgrade instructions

All steps necessary to upgrade the installation are described in detail in the [Cisco TelePresence Management Suite Extension for IBM Lotus Notes Installation and Getting Started Guide](#)..

Using the Bug Search Tool

The Bug Search Tool contains information about open and resolved issues for this release and previous releases, including descriptions of the problems and available workarounds. The identifiers listed in these release notes will take you directly to a description of each issue.

To look for information about a specific problem mentioned in this document:

1. Using a web browser, go to the [Bug Search Tool](#).
2. Sign in with a Cisco.com username and password.
3. Enter the bug identifier in the **Search** field and click **Search**.

To look for information when you do not know the identifier:

4. Type the product name in the **Search** field and click **Search**.
5. From the list of bugs that appears, use the **Filter** drop-down list to filter on either *Keyword*, *Modified Date*, *Severity*, *Status*, or *Technology*.

Use **Advanced Search** on the Bug Search Tool home page to search on a specific software version.

The Bug Search Tool help pages have further information on using the Bug Search Tool.

Getting help

If you experience any problems when configuring or using <product name>, see the "Product documentation" section of these release notes. If you cannot find the answer you need in the documentation, check the web site at <http://www.cisco.com/cisco/web/support/index.html> where you will be able to:

- Make sure that you are running the most up-to-date software.
- Get help from the Cisco Technical Support team.

Make sure you have the following information ready before raising a case:

- Identifying information for your product, such as model number, firmware version, and software version (where applicable).
- Your contact email address or telephone number.
- A full description of the problem.

To view a list of Cisco TelePresence products that are no longer being sold and might not be supported, visit http://www.cisco.com/en/US/products/prod_end_of_life.html and scroll down to the TelePresence section.
