Introduction
These release notes cover a maintenance release of Cisco TMSXN version 11.3.2.

Changes to requirements
There are changes to Cisco TMSXN version 11.3.2 requirements for Microsoft Windows Server.
There is additional information on requirements for the Cisco TelePresence Management Suites testing results.
See the Upgrading to Cisco TMSXN 11.3.2 section for more information on requirements.

Product documentation
The following documents provide guidance on installation, initial configuration, and operation of the product:
Cisco TelePresence Management Suite Extension for IBM Lotus Notes Installation and Getting Started Guide.

Resolved issues
The following issues were found in previous releases and were resolved in 11.3.2.
For more information about issues for Cisco TMSXN, see the Using the Bug Search Tool section.
### Updating to Cisco TMSXN 11.3.2

#### Prerequisites and software dependencies

Please refer to the Installation and getting started guide for full details on server requirements.

<table>
<thead>

<th>Software revision</th>
<th>Comments</th>
</tr>
</thead>
<tbody>
<tr>
<td>IBM Lotus Domino/Notes</td>
<td>Cisco TMSXN has been tested with 8.5, 8.5.1, 8.5.2, 8.5.3</td>
<td>IBM Lotus Domino clustered environments are not supported. Note: A bug was identified in the 8.5.3 FixPack3 and this is therefore not recommended.</td>
</tr>
</tbody>
</table>

#### Upgrade instructions

All steps necessary to upgrade the installation are described in detail in the [Cisco TelePresence Management Suite Extension for IBM Lotus Notes Installation and Getting Started Guide](#).
Using the Bug Search Tool

The Bug Search Tool contains information about open and resolved issues for this release and previous releases, including descriptions of the problems and available workarounds. The identifiers listed in these release notes will take you directly to a description of each issue.

To look for information about a specific problem mentioned in this document:

1. Using a web browser, go to the Bug Search Tool.
2. Sign in with a Cisco.com username and password.
3. Enter the bug identifier in the Search field and click Search.

To look for information when you do not know the identifier:

4. Type the product name in the Search field and click Search.
5. From the list of bugs that appears, use the Filter drop-down list to filter on either Keyword, Modified Date, Severity, Status, or Technology.

Use Advanced Search on the Bug Search Tool home page to search on a specific software version.

The Bug Search Tool help pages have further information on using the Bug Search Tool.

Getting help

If you experience any problems when configuring or using <product name>, see the "Product documentation" section of these release notes. If you cannot find the answer you need in the documentation, check the web site at http://www.cisco.com/cisco/web/support/index.html where you will be able to:

- Make sure that you are running the most up-to-date software.
- Get help from the Cisco Technical Support team.

Make sure you have the following information ready before raising a case:

- Identifying information for your product, such as model number, firmware version, and software version (where applicable).
- Your contact email address or telephone number.
- A full description of the problem.

To view a list of Cisco TelePresence products that are no longer being sold and might not be supported, visit http://www.cisco.com/en/US/products/prod_end_of_life.html and scroll down to the TelePresence section.
