

Cisco OptoStar II Network Management System Release 1.09 Release Note

Overview

This release supports the OptoStar II Network Management System (NMS) software. It incorporates the new features and fixes for the NMS software.

Purpose

This document lists the new features in Release 1.09, and provides instructions for downloading and installing the software.

Audience

This document is intended for qualified and skilled personnel who configure the system. These personnel should understand basic optics, RF, and network monitoring operations.

Qualified Personnel

Only appropriately qualified and skilled service personnel should attempt to install, operate, maintain, and service this product.

WARNING:

Allow only qualified and skilled personnel to install, operate, maintain, and service this product. Otherwise, personal injury or equipment damage may occur.

Release Purpose

Hardware

This release includes no hardware changes or updates.

Firmware

This release includes software changes or updates.

Changes in Functionality

This release contains functionality changes:

- When there is an alarm, the Alarm LED will turn red.
- When the new trap is received, the Alarm Management tab will turn red.
- Select the received trap in the Alarm List, the corresponding chassis and module information will be displayed.
- In the parameter setting window of the Reverse Receiver/Forward Receiver module, a new MGC OFF option is added.

Resolved Items

This release resolves the following outstanding items that carried over from previous system releases.

| Issue ID | Status | Issue |
|------------|----------|---|
| CSCuq57856 | Resolved | The NMS sometimes inserted duplicated message into the database. |
| CSCuq57860 | Resolved | In Internet Explorer 10 and newer versions, the layout of some items was not correct. |

Operation Limitations

The NMS cannot connect to some of the mail servers.

Using the Bug Tool Kit

If you need information about a specific caveat that does not appear in this release note, you can use the Cisco Bug Toolkit to find caveats of any severity. Use the following URL to access the Bug Toolkit:

<http://tools.cisco.com/Support/BugToolKit/>

If you request a defect that cannot be displayed, the defect number might not exist, the defect might not yet have a customer-visible description, or the defect might be marked Cisco Confidential.

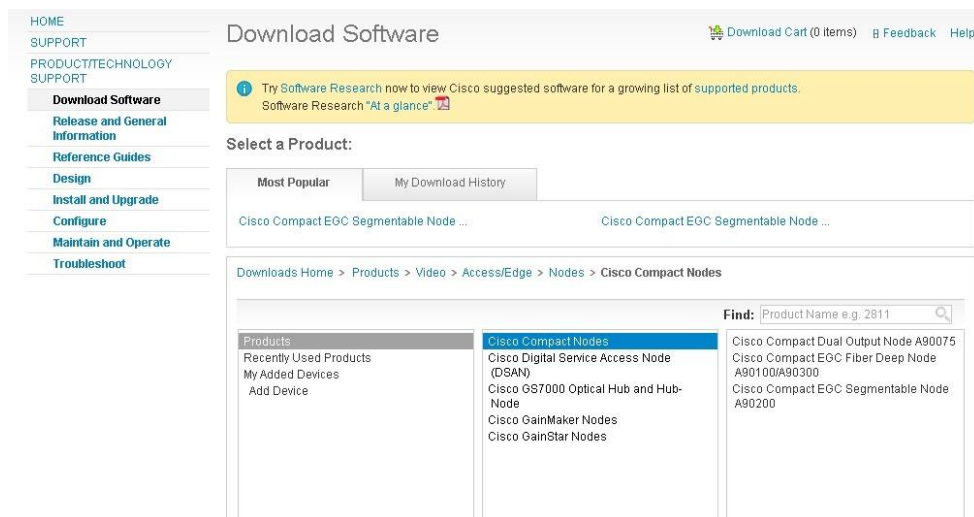

Installation Instructions

To Download the System Release

Complete the following steps to get the latest software releases.

- 1 Go to the support section of the Cisco website (<http://www.cisco.com>).
Note: If you have not done so, you will need to set up an account to access the software releases.
- 2 From the Support menu, choose **All Downloads** and then use the selection tree to find the appropriate products.

The following figure shows the general layout of the software download page accessible from the Cisco website.

For example, OptoStar II Console Release 3.0 software is listed under Products > Video > Access/Edge > Optoelectronics > Cisco OptoStar II Products.

- 3 Download the appropriate files, depending on your needs.

To Install the Latest Software

Double click the downloaded files, and then install the latest software according to the on-screen instructions. For detailed information, see the *Cisco OptoStar II Network Management System Installation and Operation Guide*, part number OL-29665.

For Information

If You Have Questions

If you have technical questions, call Cisco Services for assistance. Follow the menu options to speak with a service engineer.
