Guide to Using Your Digital Video Recorder in Stand-Alone Mode
Notice to Installers

The servicing instructions in this notice are for use by qualified service personnel only. To reduce the risk of electric shock, do not perform any servicing other than that contained in the operating instructions, unless you are qualified to do so.

Note to System Installer

For this apparatus, the coaxial cable shield/screen shall be grounded as close as practical to the point of entry of the cable into the building. For products sold in the US and Canada, this reminder is provided to call the system installer’s attention to Article 820-93 and Article 820-100 of the NEC (or Canadian Electrical Code Part 1), which provides guidelines for proper grounding of the coaxial cable shield.

CAUTION: To reduce the risk of electric shock, do not remove cover (or back). No user-serviceable parts inside. Refer servicing to qualified service personnel.

WARNING: To prevent fire or electric shock, do not expose this unit to rain or moisture.

This symbol is intended to alert you of the presence of important operating and maintenance (servicing) instructions in the literature accompanying this product.

Ce symbole a pour but de vous avertir qu'une documentation importante sur le fonctionnement et l'entretien accompagne ce produit.

IMPORTANT SAFETY INSTRUCTIONS

Read These Instructions
Keep These Instructions
Heed All Warnings
Follow All Instructions

Power Source Warning
A label on this product indicates the correct power source for this product. Operate this product only from an electrical outlet with the voltage and frequency indicated on the product label. If you are uncertain of the type of power supply to your home or business, consult your service provider or your local power company.

Ground the Product

WARNING: Avoid electric shock and fire hazard! Do not defeat the safety purpose of the polarized or grounding-type plug. A polarized plug has two blades with one wider than the other. A grounding-type plug has two blades and a third grounding prong. The wide blade or the third prong is provided for your safety. If the provided plug does not fit into your outlet, consult an electrician for replacement of the obsolete outlet.

If this product connects to coaxial cable wiring, be sure the cable system is grounded (earthed). Grounding provides some protection against voltage surges and built-up static charges.

Outdoor Grounding System
If this product connects to an outdoor antenna or cable system, be sure the antenna or cable system is grounded (earthed). This provides some protection against voltage surges and built-up static charges.

Article 810 of the National Electric Code (NEC) ANSI/NFPA No. 70-1990, provides the following information:
• Grounding of the mast and supporting structure
• Grounding the lead-in wire to an antenna discharge unit
• Size of the grounding conductors

WARNING: Avoid electric shock and fire hazard! Do not locate an outside antenna system in the vicinity of overhead power lines or power circuits. Touching power lines or circuits might be fatal.

Protect the Product from Lightning
For added protection, unplug this apparatus during lightning storms or when unused for long periods of time. In addition to disconnecting the AC power from the wall outlet, disconnect the signal inputs.

Verify the Power Source from the On/Off Power Light
When the on/off power light is not illuminated, the apparatus may still be connected to the power source. The light goes out when the apparatus is turned off, regardless of whether it is still plugged into an AC power source.

Eliminate AC Mains Overloads

WARNING: Avoid electric shock and fire hazard! Do not overload AC mains, outlets, extension cords, or integral convenience receptacles. For products that require battery power or other power sources to operate them, refer to the operating instructions for those products.
IMPORTANT SAFETY INSTRUCTIONS, continued

Prevent Power Cord Damage
Protect the power cord from being walked on or pinched, particularly at plugs, convenience receptacles, and the point where the cord exits from the apparatus.

Provide Ventilation and Select a Location
• Do not block any ventilation openings. Install in accordance with the manufacturer’s instructions.
• Do not place this apparatus on a bed, sofa, rug, or similar surface.
• Do not place this apparatus on an unstable surface.
• Do not install near any heat sources such as radiators, heat registers, stoves, or other apparatus (including amplifiers) that produce heat.
• Do not install this apparatus in an enclosure, such as a bookcase or rack, unless the installation provides proper ventilation.
• Do not place entertainment devices (such as VCRs or DVDs), lamps, books, vases with liquids, or other objects on top of this product.

Protect from Exposure to Moisture and Foreign Objects
Do not use this apparatus near water.

Accessories Warnings

WARNING:
Avoid electric shock and fire hazard! Only use attachments/accessories specified by your service provider or the manufacturer.

Service Warnings

WARNING:
Avoid electric shock! Do not open the cover of this product. Opening or removing the cover may expose you to dangerous voltages. If you open the cover, your warranty will be void. This product contains no user-serviceable parts. Refer all servicing to qualified service personnel.

Servicing is required when the apparatus has been damaged in any way, such as a power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.

Check Product Safety
Upon completion of any service or repairs to this product, the service technician must perform safety checks to determine that this product is in proper operating condition.

Protect the Product when Moving It
Always disconnect the power source when moving the apparatus or connecting or disconnecting cables.

WARNING:
Avoid personal injury and damage to this product! Use only with the cart, stand, tripod, bracket, or table specified by the manufacturer or sold with the apparatus. When a cart is used, use caution when moving the cart/apparatus combination to avoid injury from tip-over.
Welcome!
Going away for the weekend? Take your Digital Video Recorder (DVR) along - no cable connection required.
Now you can take your recordings with you. All you need is a TV, DVR, remote control, and the cables to connect the DVR to your TV. There’s no need for an active cable connection.
Use the instructions in this guide to connect your DVR to a TV in a stand-alone environment and access your recordings. Then, sit back and enjoy watching your recordings stored on the DVR’s hard disk!

IMPORTANT! When using your DVR in stand-alone mode, you cannot tune to other channels to watch TV because there is no active cable connection.
For more information about this product, visit our website:

Safety First
Before using the DVR, read the IMPORTANT SAFETY INSTRUCTIONS section of this guide.

Identify Your DVR
To find the serial number for your DVR, look on the back panel for a label that is similar to the example shown here. The serial number begins with “SA” and is located in the lower left corner of the bar code.
If the DVR requires troubleshooting in the future, your cable service provider may ask for this serial number.

Use the space provided here to record the serial number:

____________________________________________
0003B4287797
SABDQXTL N0006246618
Serial Number T1185
Handle with Care – Rules to Remember

Before you move your DVR, complete the following steps to properly disconnect and handle the DVR.

Disconnecting the DVR

1. Power off your DVR and TV.
2. Unplug your DVR and TV from the AC power source, and then disconnect the DVR from your TV.
3. Pack your DVR in its original packaging to prepare your DVR for transport.

Transporting the DVR

Your DVR contains a sophisticated hard disk drive that is designed to record and stream digital video. You want to carefully follow the recommended handling guidelines to protect your DVR from damage caused by mishandling.

IMPORTANT! The DVR must be handled with the same level of care you would use when handling other electronics containing hard disk drives, such as computers.

1. Use Protective Packaging When Transporting the DVR
   Pack the DVR in its original box before transporting to another location. The hard disk drive in an unpackaged DVR can be damaged from the excessive jarring and vibration that can occur during transportation.

2. Avoid Abrupt Changes in Temperature
   Moving a DVR immediately from a cold to a warm location, or vice versa, and then powering it On can damage it. Keep the temperature inside your vehicle within about 30°F (about 17°C) of the temperature of your remote location. If, while transporting, you encounter an extreme difference in temperature, then allow one hour before powering On the DVR.

3. Allow Time for the Hard Drive to Spin Down After Powering Off the DVR
   Always wait for the DVR hard drive heads to spin down (stop) before moving or handling the DVR. Otherwise, the heads and hard disk media can be jarred, broken, or scratched. Follow these steps to allow the drive heads to spin down:
   a) Turn Off the DVR unit.
   b) Unplug it from the household AC outlet.
   c) Wait 10 seconds for the hard disk drive to stop spinning.
Equipment You Need to Operate the DVR in a Stand-Alone Environment

Items are necessary for operating the DVR in stand-alone mode.

1. DVR and Original Packing Materials
2. Power Cord for DVR
3. Remote Control
4. Component Video Cables (YPbPr) (red, green, and blue connectors)
   and
   Audio Left/Right Cable (red and white connectors)

OR

4. HDMI-to-HDMI Cable
4. RF Coaxial Cable
4. Composite AV Cables (red, white, and yellow connectors)

Note: Use the cable configurations presented here as guidelines for connecting the DVR to your TV. See the sample connection diagrams on page 5 of this guide for more information.
Connecting Your DVR to a TV in a Stand-Alone Environment

To connect your DVR to your entertainment devices, complete these steps.

1. Connect the DVR to your TV using your choice of output (RF, component, composite, S-Video, DVI, HDMI). In the stand-alone environment, you do not need an active coaxial cable input.

2. Plug the DVR and the TV into an AC power source, and then press the **Power** button on the DVR front panel.

   **Note:** It may take several seconds while the DVR reboots.

3. After the DVR reboots, a banner appears on the TV to notify you that the DVR is now ready to play back recordings. Press on the remote or wait several seconds for the banner to disappear automatically.

4. If your TV is a different unit from your home TV, you may get a black screen (no video). No video indicates that you need to change the picture format to support your TV. If you do not need to change this picture format, go to step 5.

   To set the format, complete these steps.

   a) With your DVR powered on, press and hold the **Settings** button on the DVR front panel until **Set** on the front panel blinks.

   b) Press the **VOL–** key to select a picture format setting. The DVR front panel displays **HdSr**.

   c) In the following table, find the picture formats that your TV supports, then press the corresponding buttons on the DVR front panel.

5. Complete the following steps to watch your recordings:

   a) Press **LIST** on your remote to access the Recorded List screen.

   b) Use the **ARROW** keys on your remote to move through the list of recordings.

   c) Press **SELECT** on your remote to select a recording for playback.

   **Notes:**

   - Use your remote to fast-forward, rewind, pause, or stop the recording playback.
   - If you have an MCP-100™ HD DVR-DVD, you can play back DVDs and CDs while the DVR is in stand-alone mode.
Sample DVR to TV Connection Diagrams

Use the following diagrams as guidelines for connecting the DVR to your high-definition or standard-definition television (HDTV or SDTV). For more information about connectivity and connection diagrams, refer to the connectivity guide for your DVR model and the user’s guide for your TV.

WARNING: Electric shock hazard! Unplug all electronic devices before connecting or disconnecting any device cables to the DVR.
Reconnecting Your DVR at Home

1. To disconnect and prepare your DVR for transport, read the *Handle with Care – Rules to Remember* section of this guide.

2. At home, follow your normal procedures to reconnect your DVR to your home TV and any other home entertainment devices. For more information about connectivity requirements and connection diagrams, refer to the connectivity guide for your DVR model and the user’s guide for your TV.

3. After reconnecting your DVR to the TV, it may take several minutes for your DVR to receive the latest programming from your cable service provider. Wait until you see the current time or four dashes (--- -) on the front panel of the DVR to indicate that the update is complete.

   **Note:** If four dashes are displayed, you must call your cable service provider to get the DVR authorized.

4. If you need to change your TV picture format, refer to step 4 on page 4 for instructions.
FCC Compliance

United States FCC Compliance

This device has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against such interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy. If not installed and used in accordance with the instructions, it may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment OFF and ON, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the cable company or an experienced radio/television technician for help.

Any changes or modifications not expressly approved by Cisco Systems, Inc., could void the user’s authority to operate the equipment.

The information shown in the FCC Declaration of Conformity paragraph below is a requirement of the FCC and is intended to supply you with information regarding the FCC approval of this device.

This device complies with Part 15 of FCC Rules. Operation is subject to the following two conditions:
1) the device may not cause harmful interference, and
2) the device must accept any interference received, including interference that may cause undesired operation.

Canada EMI Regulation

This Class B digital apparatus complies with Canadian ICES-003.

Cet appareil numérique de la class B est conforme à la norme NMB-003 du Canada.

Software and Firmware Use

Cisco Systems, Inc. owns copyrights to the software included in your set-top and furnishes the software to your cable service provider under a license agreement. You may only use or copy this software in accordance with the terms of your cable service provider.

Cisco Systems, Inc. owns copyrights to the firmware in this equipment. You may only use the firmware in the equipment in which it is provided. Any reproduction or distribution of this firmware, or any portion of it, without the express written consent of Cisco Systems, Inc. is prohibited.
