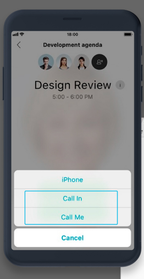
What's New with Cisco Webex Teams

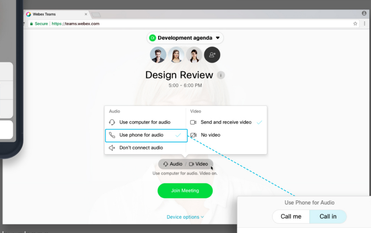
Join Meetings by Phone

Join your meetings by phone using **Call me** and **Call in** after you've joined the meeting.

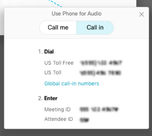
With **Call in**, we provide you with toll, toll-free, or global numbers to dial and the meeting information to enter.

Or, have the meeting call you back on any phone by selecting **Call me**.





You can also join Meetings by phone from the web and mobile app.



Get Help Easily

desktop

We've made it easier for you to get help when you need it.

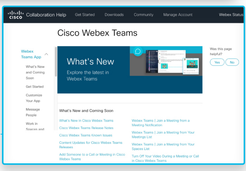
Got It



Updated In-Meeting Controls

Your in-meeting controls have a new look, similar to Webex Meetings.

When you join a meeting or call you'll see ? when video is on, and ? when it's turned off.

Other people's video now appear at the bottom of the screen.

Mute and Unmute

Share Screen

More Options

Video On and Off

Participants

End Call

The mute icon turns red when you mute others.

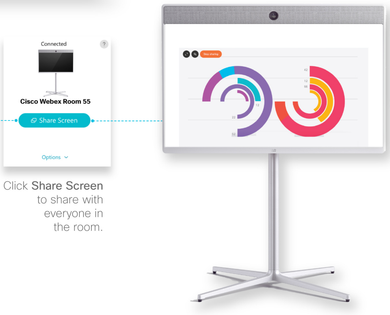
See who's in the meeting from the in-meeting controls.

Share Content Wirelessly

desktop
web

Connect and share wirelessly to cloud and on-premises devices.

Your Webex Teams app uses ultrasound to automatically connect to an on-premises device.



Click **Share Screen** to share with everyone in the room.

Try out the updated experience today.
