

Release Notes for Cisco SPA232D Multi-Line DECT ATA and Cisco SPA302D Multi-Line DECT Handset Firmware Version 1.3.2(XU)

Firmware Released in July 2013

These Release Notes provide information about Cisco SPA232D Multi-Line DECT ATA and Cisco SPA302D Multi-Line DECT Handset firmware version 1.3.2(XU).

IMPORTANT:

As with any firmware release, read these release notes before upgrading the firmware. Cisco also recommends backing up the configuration before any firmware upgrade.

Changes in Firmware Version 1.3.2(XU) from 1.3.2

SRTP functionality has been removed, and it cannot be configured or provisioned in firmware versions designated with an “XU” in the filename.

Upgrading the Firmware

Upgrading the Cisco SPA232D

- STEP 1** Download the latest firmware by using the Firmware link on this web page: www.cisco.com/go/smallbizvoicegateways
- STEP 2** Launch a web browser, and enter the LAN IP addresses of the ATA.
- STEP 3** Log in to the Configuration Utility. (On first use, enter **admin** as the username and the password. After logging in, you should configure a unique password that is hard to guess.)
- STEP 4** Click **Administration** in the menu bar, and then click **Firmware Upgrade** in the navigation tree.
- STEP 5** Click **Browse** and select the location of the upgrade file that you downloaded.
- STEP 6** Click the **Upgrade** button to upgrade the firmware.

Upgrading the firmware may take several minutes. Until the process is complete, DO NOT turn off the power, press the hardware reset button, or click the Back button in your current browser.

Upgrading the Cisco SPA302D

Perform this procedure after upgrading the Cisco SPA232D and waiting for the ATA to reboot.

NOTE To verify the upgrade, go to the Administration > Firmware Upgrade page, and confirm that the firmware version number is correct.

- STEP 1** On the handset, press the center **Select** button, scroll to **Settings**, and press the **Select** button again.
- STEP 2** In the settings menu, choose **Update Software**, and then press the **Select** button.
- STEP 3** At the **Check for software update** prompt, press **Confirm**.
- STEP 4** Within a moment, the handset displays the current version of software on the handset and the latest software version available from the Cisco SPA232D. Press the **Select** softkey.

STEP 5 Place the handset in the charging cradle.

CAUTION Do not remove the handset from the charging cradle during the upgrade. Do not power off the handset, charging cradle, or base station, or otherwise interrupt the upgrade process.

The handset erases the flash memory, downloads the new software, and verifies the upgrade data. After the upgrade, a message appears indicating the status of the upgrade (for example, if the upgrade succeeded).

STEP 6 After the success message appears, press **Reset** to reboot the handset.

If the upgrade fails, press **Reset** to reboot the handset. Check the status lights on the Cisco SPA232D to make sure that it is powered on and functioning. Then repeat the upgrade steps.
